Because surplus peanuts adversely affect a proven marketing and quality control program, strong marketing penalties are placed on production outside the program. Opponents of the current program have publicly proclaimed that one "would go to jail" for unauthorized production in an effort to cast an evil image onto the peanut program. This characterization is false. The penalty for excess production is a fine assessed on the peanuts as they are marketed. To expand this civil penalty to "going to jail" is a gross overstatement.

9. U.S. NOW LEADS IN PEANUT EXPORTS

As a result of the two-tier peanut program enacted by Congress in 1977, the U.S. has become the leading exporter of edible grade peanuts.

Under the 1977 Act, producers who elect to do so may grow "additional" peanuts above their poundage quota but within their acreage allotments for the export market. These exports peanuts are produced and handled under the same rigorous quality standards that apply to domestically marketed peanuts. The Secretary of Agriculture is required to set price supports for additional peanuts at level that will move these peanuts into the world market. The U.S. peanut industry followed passage of that Act with an aggressive foreign market development program.

These efforts have paid off. Except for the 1980 short crop year, the United States has become the leading exporter of edible grade peanuts, capturing some 60 percent of the world edible market.

10. FARMERS SUPPORT PEANUT ALLOTMENTS

The Nation's 60,000 peanut farmers have shown overwhelming support for the existing peanut program in USDA-sponsored referendums held every three years. After three years experience under the new program of 1977, 89 percent of all U.S. peanut growers who voted in the most recent referendum favored continuation of the program.

Peanut legislation now before both houses of Congress is supported by the National Peanut Growers Group, which includes all 12 peanut grower organizations in the Nation. Continuation of the existing basic peanut program is also supported by the major general farm organizations, including:

American Farm Bureau Federation;
National Farmers Union;
National Farmers Organization;
American Agriculture Movement; and
National Grange.

11. ALLOTMENT SYSTEM PART OF FABRIC OF PEANUT PRODUCING COMMUNITIES

Over the past 40 years, the peanut allotment/quota system has become an integral part of the economic and social structures of the peanut-producing areas, states, and counties of the country.

Allotments have been capitalized into land values. Huge investments have been made in farm land and capitalized allotments and in specialized equipment, much of which can be used only for production of peanuts.

Termination of allotments would cause economic disruptions and hardships in many communities. Allotment holders, of course, would suffer most, but so would small town merchants, agri-businesses, bankers, and others. The ability of farmers to establish credit and secure farm operating loans on the basis of their allotments and quotas would disappear. Many simply would be forced out of business.

In short, the abolishment of allotments would be a severe blow to owners of peanut farms and to entire communities in many areas which now depend upon peanuts as a major cash crop and an important agricultural enterprise.

---

III. TOWARD THE FUTURE

The Food and Agriculture Act of 1977 updated and gave needed flexibility to the Nation's peanut program. The 1977 modifications have succeeded in reducing the cost of the program dramatically and in making the U.S. a major exporter of edible grade peanuts. The program has also continued to provide an abundant supply of high quality peanuts to the domestic market, a stable and orderly market for peanuts, and a modest floor under producers income.

The farm bills reported by the Agriculture Committees of both Houses will fine-tune and continue the basic program benefits—to consumer and producer alike—for the 1982–86 crop years.

The supply and market stability and price support protection afforded under the House and Senate bills are particularly needed at this time to allow the peanut industry to recover from the wrenching disruptions caused by the 1980 crop disaster—the first in 25 years.

As production, supplies, and the traditional marketing processes return to normal in 1981, the peanut program as fine tuned in the House and Senate farm bills will continue to meet long-range objectives that will benefit the entire Nation:

Provide U.S. consumers with an abundant supply of peanuts at reasonable prices;

Further reduce government program costs, already sharply down, to zero or near zero by mid-point in the life of the new Farm Bill;

Continue the quality assurance program for peanuts as a basic food commodity that is unmatched in the world;

Provide an increasing supply of quality-proven American peanuts for the world food market to enable the U.S. to maintain and enhance its position as the leading exporter of edible-grade peanuts;

Provide peanut producers with price support protection at a level to assure them of a reasonable return near the cost of production on their domestic quota production and an opportunity to grow additional peanuts for the export market largely at their own risk.

The peanut program has proven that it works. In the words of the adage: "If it isn't broke, don't fix it."

The PRESIDING OFFICER. The junior Senator from North Carolina is recognized.

Mr. EAST. Mr. President, I wish to speak in opposition to this amendment

that is being proposed to the farm bill and in particular, of course, I wish to direct my remarks to this question of the peanut program.

I shall keep my remarks brief and make some what I hope will be useful observations to my colleagues, and then I shall enter the remainder of my remarks in the RECORD.

Mr. President, I point out that with the commodity programs that we have in all of the areas here involved, we have programs that have been in operation for a long period of time and people have acted in reliance on those programs and they have become a part of the fabric of the economy in many parts of this country.

We are not dealing with abstractions. We are dealing with real people in real areas on real farms.

I caution members of both political parties that to engage in frontal assaults on these programs is going to cause not only enormous economic dislocation in these areas but is going to cause considerable political problems for both or either parties.

It is imperative that my colleagues keep in mind that today the American farmer has fewer and fewer representatives in the Senate and in the House of Representatives. Fewer and fewer farmers are producing more and more, and the irony of it is, as they have been more productive and more creative, they have fewer and fewer people here representing farm constituencies.

Our farmers in this country, including the peanut farmers, have been great producers. High productivity has been the hallmark of American agriculture, not only in terms of what it means for our domestic markets but in terms of what it means for our export markets.

In bringing about this excellent state of affairs, we have had a combination of the public and private sector working together, and over the period of years we have developed a very delicate balance to allow this to work and to work effectively.

The Agriculture Committee has worked very diligently to come up with the programs that meet the real needs of these real people and to meet the domestic production and foreign production needs.

It is a difficult thing to do, and they have created a very delicate balance, and I commend them for it, both parties, majority and minority, in working together diligently to bring this about.

What deeply concerns me is, in the current amendment which has been offered by the distinguished Senator from Indiana, that this is looked upon and must be as a frontal assault upon one of the vital commodity programs, and I repeat to dismantle, to begin the job of dismantling, these programs, in this case the peanut program, bodes ill for the farm economy of this country, and I strongly urge my colleagues to resist it.

Finally, I note, as the distinguished Senator from North Carolina has noted, when you are going to deal with something as fundamental and as important as changes of this kind it ought to be done through the hearing process. It ought to be done through the process of making a bill to change, not through an ill-thought-out amendment or a quickly-thought-out amendment.

I simply remind you that these kinds of amendments have enormous impact, and I would encourage my colleagues to think long and hard before they join quickly and casually in these assaults.

Mr. President, I would like to take this opportunity to speak on behalf of the Nation's 60,000 peanut farmers by supporting the peanut provisions contained in S. 884, the Agriculture and Food Act of 1981.

The peanut is a very unique commodity due to the fact that we can vastly overproduce peanuts in a very short time. Peanuts are a perishable commodity; they do not have the storability of grains and cannot be handled under similar conditions for long periods of time without severe product deterioration. Boom-and-bust agriculture can be avoided for peanuts through production controls provided under the existing allotment and marketing quota system.

The current program has provided a continuous supply of reasonably priced peanuts to the market while maintaining net returns to producers at satisfactory levels. This program has worked well over the years and has benefited both consumers and producers of peanuts.

Production is limited by the allotments and quotas, and this has served to keep supply in line with demand. A dramatic increase in production, which would occur in the absence of a program, would quickly bring crop prices down and ruin many small farmers out of business. And these are small family farmers. In my home State of North Carolina, we have over 13,400 peanut farms with an average allotment size of only 13 acres. Production would shift from these farms to large, corporate-type farming operations, and another blow would be dealt to the family farm system in North Carolina and America.

The elimination of the program would almost certainly produce a geographic shift in the growing area, and the production would be concentrated into one area of the Southeast. This shift to one area would increase the risk of weather loss, not to mention the tremendous economic injury resulting in the areas of former production.

Producers would encounter trouble in obtaining financing in the absence of the peanut price support program. Banks and other lending institutions would be very hesitant to obligate funds in a time of increased risk and uncertainty. Without the program and its stable supply and price, economic chaos would be a reality in many rural areas from Virginia to New Mexico.

Heat and drought greatly damaged the 1980 peanut crop in the United States in all producing areas. This was the first time in many years that the U.S. consumer was faced with a shortage of domestic peanuts. The opponents of the program will argue that the allotment system creates shortages. This is hardly the case. Before this current peanut program was changed by the 1977 farm bill, the major concern was over chronic surpluses of peanuts—not shortages.

Many of our opponents attack the peanut program by criticizing and calling unusual the leasing of allotments. A producer will justifiably lease peanut allotments for a number of reasons. He will often lease the allotment and the land to grow those peanuts on, just as he would for corn or soybeans.

I have already told you of the many small peanut allotments in North Carolina and elsewhere. Leasing is simply a means of combining several of these small allotments into an economically efficient farming unit. This even conserves energy by enabling a farmer to grow his peanuts in one location rather than driving up and down the highways producing peanuts on several small and scattered farms.

Leasing is not the problem many would have you think. Recent figures indicate that over 40 percent of all cropland in the country is rented and farmed by someone other than the owner.

The cost of the program is small to the taxpayer and is getting smaller. The program was indeed beginning to have considerable expenditures before the 1977 farm bill. But changes in that legislation sought to match supply with demand through the allotment and production quota mechanisms.

The cost of the program has declined drastically since those changes. The Federal cost to the taxpayer for the last 3 years has averaged just over $5 million per year—a 96-percent reduction in average annual program costs when compared with the program prior to the 1977 changes. But we are not finished reducing Government costs. This program, if it is allowed to continue, should have a virtual zero cost to the Government by 1985.

The distinguished Senator from Indiana has criticized the program by saying that he would go to jail for planting peanuts without an allotment. This is an example of a broken rule carried to the farthest step. All programs worth anything must have rules, and the peanut program states that fines must be imposed for peanuts produced outside the program.

Changes in the 1977 farm bill sought to increase the export of edible peanuts. This new legislation permitted producers to grow additional peanuts above their poundage quota but within their acreage allotments for the export market. As the 1977 act lowered the cost of the program, it also succeeded at promoting exports. The United States has become the leading exporter of edible grade peanuts, with approximately 60 percent of the world edible market.

Some of the proposed amendments would eliminate the allotment system. These allotments have been around for many years, and have actually been capitalized into land values. People have invested tremendous amounts of money into farmland with peanut allotments, and this land would be worth much less overnight if the allotments were removed. The allotment owner would not be the only one left holding the bag. Also on the

losing end would be the banker, car dealer, fertilizer salesman, and maybe even the preacher.

The peanut program is a good one. It has been overwhelmingly supported by the peanut growers in a referendum. They have voted to impose this restrictive program on themselves, because they know it works.

I urge my colleagues to support the peanut program and those farmers who depend on it for their livelihood.

The PRESIDING OFFICER. The Senator from Massachusetts.

THE FEDERAL PEANUT ALLOTMENT PROGRAM

Mr. TSONGAS. Mr. President, certainly the debate on this issue must be fascinating as we have a remarkable reversal of roles in which those who are supporting the Lugar amendment, as I do, are basically making free-market arguments, and those who are in opposition have been strong supporters of the free market and find it necessary to adopt a different approach.

It would suggest that in politics as in Government generally there are very few constants.

It must be, I would suggest, difficult for some people to get up and make these arguments, given a long history of arguing for less Government, less interference, less cost, and let the free market prevail. But there is something to be said for fascinating turnarounds.

Mr. President, today we are debating the right of any American to grow peanuts for profit, not a very complex issue at all, and a corresponding right of consumers to buy peanuts at a reasonable price.

Under current law the peanut allocation program limits the right to produce peanuts. I did not know very much about this issue a year ago. The more I have looked into it the more it has astounded me that there could be such a program in effect in the 1980's and that anyone could even suggest that it be continued in the post-Ronald Reagan period.

The limiting of the right to produce peanuts serves the interests of certain allotment holders—we all understand that—and we can understand why they are lobbying so furiously to protect their vested interests. Were we in their shoes we would do the same thing. The fact is that it hurts everyone else. This anachronism causes those 70 percent of peanut farmers who do not own allotments themselves to lease them at a handsome price from those who do. Where does that fit in a free-marketplace economy? The program artificially raises the cost of production for the average farmer.

As I said, it is ironic that we are even debating the end of such a program, given what the 97th Congress has already done. One could perhaps have envisioned this kind of debate 5, 6, 7 years ago, but the fact that we even engage in it today suggests that we live in a kind of time warp. It suggests that the approach of the free enterpriser is lacking some component parts.

For months we have listened to the claims that last November's election represented a mandate from the American people. The American public felt it was time to change the way we did things. They wanted to get Government off their backs. They wanted to eliminate special interest politics. They wanted Congress and the President to control the spiraling costs of consumer goods and services. Many of those who oppose this amendment were in the forefront of arguing for that change.

We have all received hundreds of letters, postcards, and phone calls from our constituents that express those sentiments. Motivated by this outpouring of constituent concern, the majority of the Congress supported the overall economic program of the administration. The President has won a massive overhaul of the Federal budget and the way the Federal Government will provide funds and support services in the future. His victories in the budget process have been called "sweeping," "profound," and "revolutionary," and so forth, and certainly yesterday was another step in that direction.

If we believe in the underlying goals set forth in the new budget, and obviously a majority of the Congress does, how can we continue to support a program such as the allotment program on peanuts? After all we have said and done about Government spending, Government intervention, and excessive regulations, how can we condone this wasteful Federal program?

Much has been made in recent months in the Committee on Foreign Relations about certain nominees and whether they were truly reflective of the policies of the Reagan administration, and there were Members of the Senate who were going to hold the President's nominees to the purity test of the Reagan administration's ideological bent. What I am here today to do is exactly that. I think we have to hold the Senate to a kind of ideological purity test in supporting President Reagan's commitment to the free enterprise system. What Senator LUGAR and I and others are doing is trying to, if you will, honor the mandate of November and to safeguard the mandate from those who would dilute the thrust and commitment of the Reagan administration.

The peanut acreage allotment system is a classic case of the special interest politics that many of my colleagues have pledged themselves to eradicate. Many of the programs I supported have been cut and, indeed, there were cuts made yesterday in time-honored programs. It is time that we extend the new approach across the board.

This Nation has always embraced a free market system. The peanut acreage allotment system is antagonistic to a free market. It is a blanket contradiction of the term "Land of the Free." It is incredible that an American who chooses to do so cannot grow and market peanuts for profit without an allotment. This allotment is not like a permit that anyone can get by applying for one. There have not been any issued in years.

These individuals have allotments because, by and large, their ancestors received them free from the Government during a time when the peanut farmer needed help. Forty years later they go on profiting from them, despite the fact that they really did nothing to earn them in the first place. Someone holding for 50 acres might lease it for $300 per acre, and make $15,000 compliments of Uncle Sam. This program is designed to aid one small group of people. It has an adverse affect on peanut farmers and millions of American consumers.

The vast majority of those 59,000 individuals who do have the privilege of owning an allotment do not even grow peanuts. Why should they? They can lease their allotments and make a handsome profit without purchasing one single seed or a pound of fertilizer. They do not have to plant, or nurture, or harvest the crops. Moreover, unlike the farmer, they do not lose their profits if there is a drought, such as the one in 1980. The allotment holder gets his rent no matter what.

The program has created tension between the farmer and the allotment holder, yet the farmers are reluctant to speak out. Speaking out could well mean they have no allotment for next year. This fact alone should cast doubt on the wisdom and fairness of the program. A man who invests his own money, time, and the most productive years of his life growing peanuts can lose it all at the whim of the allotment holder.

The consumer is an even bigger victim of this feudal system. All of us suffer in varying degrees during good and bad crop years, and over the last year we have paid unnecessarily high prices for peanuts and peanut products.

During the years when U.S. peanut products have been good, the consumer paid a higher price because of the artificial production costs created by the allotment system. In bad years, such as 1980, when there was a shortage of U.S. produced peanuts, consumer costs went through the roof. It inflated the cost of peanut butter—a basic part of a low-cost nutritional diet for many Americans.

Is addition to the allotment, the Government supplements the strict limits on supply with a domestic price support system. The annual cost has averaged $60 million over the last 5 years. The Government severely limits peanut imports. Last fall, shelled peanuts rose to $1.75 per pound. If there had been an adequate supply of peanuts, wholesale levels probably would have been 40 or 45 cents per pound. Our Government delayed raising the quota in response to the shortage. And so the consumer paid for the U.S. embargo on imported peanuts. Overall, this outdated program cost the U.S. Treasury over $1 billion during the past four decades—more than half of that since 1970.

I want to emphasize that we are not arguing against having an agriculture program for peanuts. But every practical factor argues against the unique allotment system for peanuts. This system, which exists for only one edible commodity, has outlived its usefulness and its effectiveness. A system more like

those for wheat, soybeans, and other major export products would be far more equitable.

The issue of the allotment acreage program is not a narrow question of farm supports and subsidies. It is not a matter of partisan politics. I urge my colleagues to support this amendment. We must demonstrate that we are working sincerely to curb inflation and protect the American consumer. We cannot and we must not continue to protect this special interest at the expense of the population at large.

(Mr. JEPSEN assumed the chair.)

Mr. TSONGAS. Let me say again that this is a fascinating issue. Indeed, the entire farm bill represents a rather historic turning point. Those who want to understand where this country is and where it is going, what the interplay is between special interests and ideology, should look at this whole debate.

Speaking as a Democrat who has grave reservations about the direction in which the country is going, one could be ambivalent about the outcome of this amendment. If indeed the amendment should fail and the vested interests should prevail, then we have indeed lost a short-term battle. But the major necessary ingredient for this administration to have in its new thrust is credibility. If you are going to go out and ask the school lunch program to take cuts, if you are going to ask people who need college loans to take cuts, and you keep this kind of program intact, you can do it, but you will pay a price. The price over the long term is a sense of unfairness, a sense of being had, a sense ultimately of hypocrisy.

So those of us who support a different approach look at this with a kind of ambivalence. In the short term, I, for one, would like to see this passed. But if I were a strong supporter of this administration's policy, I would want this to pass overwhelmingly to send a message that we are prepared to make the necessary sacrifices irrespective of special interests and who is who in the congressional firmament.

It is important that when we make cuts there be a sense of fairness. Nothing will, I think, erode that sense of credibility and fairness and equity than a sign that there are certain special reserve component parts to which the rhetoric—the ideology—does not apply. And let that sentiment be broad in the land and you will see a severe reaction build up over time.

If you are a consumerist, you should support this amendment. If you are a believer in the new economics of free enterprise, unfettered, you should support this amendment. If you are a supporter of the President in his attempt to provide a sense of equity, you should support this amendment. Indeed, one really has to search for a reason—other than that special constituency—why this amendment should not be supported.

I commend the Senator from Indiana for his initiative in this respect. Thank you, Mr. President.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Alabama.

Mr. HEFLIN. Mr. President, I wish to commend the membership of our Senate Agriculture Committee that spent literally months on the farm bill, literally weeks on the peanut provisions if you count all the hearings and various discussions, and the continuing effort to try to fit the farm bill and the peanut provisions within the scheme of the old Economic Recovery Act.

Some people have made some criticisms of deals. I heard this speech last night. I read something in the newspaper. I have heard things about a letter from the administration. But I do know that in time and sequence and events that the Secretary of Agriculture did not state his support for the revised committee version of peanuts until adjustments were made where the Government losses would be zero. In other words, no costs to the taxpaying public.

I think you have to look at every other farm commodity. Can you point to another commodity in the farm bill that is in the same category of peanuts, in that peanuts is not going to cost the Government to lose money or to expend money? Every other commodity has an expenditure associated with it, although I hear whispered that the tobacco program does not.

And I might say that the chairman of the committee, from the very beginning, has endeavored to reduce any cost that the Government is involved in down to a minimum. As the peanut section of the bill now stands, only administrative costs are involved.

Now, yesterday I painfully voted against an increase in support levels for the dairy farmers of our Nation. I have dairy farmers in my State. The president of my Farm Bureau is primarily a dairy farmer. But I have been trying to work within the framework of the committee, carefully fine tuning the farm bill to where it produces a workable program for the farmer but yet is a part of the overall economic recovery program of the President, which is fine tuned, too.

We have a budget approach involved. We had the first concurrent resolution in the budget and we had a reconciliation of the budget. The Agriculture Committee approached, its commitments and, overall, stayed within it, when everything is considered. Our Senate Agriculture Committee met the requirements or the severe budgetary constraints which were imposed upon us.

Really, it is rather ironic that the people who are trying to destroy the committee approach want to do it where it is adding costs. And each of the proposals that are before us will add costs to the peanut program.

I want to go into that later on in my remarks. The distinguished chairman of the Agriculture Committee went into that last night, pointing out how expensive the Lugar amendment will be and in a minute I want to point out what the Mattingly amendment will cost the taxpayers of the United States.

Our Senate Agriculture Committee spent 24 separate markup sessions trying to forgo a farm bill which will assure Americans plentiful supplies of food and fiber at reasonable prices while at the same time would be fair to our farmers. They have done a pretty good job. I do not believe any other committee has devoted as much time and effort trying to reach a solution to the overall problem of dealing fairly with each and every commodity. And I commend the chairman and Senator HUDDLESTON, the ranking minority member, for their patience and fairness in approaching this unenviable task.

I have heard a lot of conversations about allotments. What is an allotment? It is a franchise. Is there something un-American about franchises? Is there something un-American about McDonald's? Is there something un-American about Roy Rogers or Hardee's?

It is a franchise to sell within a restricted area. A franchise limits. It is a limitation.

Maybe we ought not to have any limitations, but there are limitations that exists in every aspect of business life and in government. Last year the soft drink bottlers came before the Congress and said because of a court decision, "Our franchises and franchise system are to be destroyed."

Like McDonald's, it was a franchise based upon a family business concept that they and they alone could sell within a limited area.

An allotment is a franchise. It is a franchise to sell to a limitation.

Why did the soft drink bottlers say, "We are justified in having a franchise"? Why is it that McDonald's is justified?

In the soft drink matter they brought out basically three arguments. One argument was quality control. No. 2 was stability. No. 3 was family, that the soft drink bottlers were family owned and operated and had been for many generations.

If you did not allow the local Coca-Cola Co. in my home area of Tuscumbia to have its franchise, then you are going to destroy that family and that family business.

There were three votes in the Senate against the Soft Drink Bottlers Act. Senator LUGAR voted for the Soft Drink Bottlers Act. Wherein, in principle, is there a difference? I see none.

We are dealing with the matter of franchise in the peanut program. We are dealing with the matter of quality control. The matter of quality control is important. It takes years of cultivation to be able to control the cornstalk borer, which is a dangerous adversary of the peanut. It takes a tremendous amount, year after year, of effort to control aflatoxin, which is a cancer-carrying type of fungus or disease.

On the matter of quality control, the fact that you have, year after year, planted peanuts in a proper manner gives you the proper control know how.

Stability. There has been a feeling that the peanut manufacturers ought to have a stability to their market. Peanuts have been grown in three areas, basically: The Southwest, Virginia and the Caro-

linas, and the Southeast—Georgia, Alabama, and Florida. Because of the fact that you have droughts that affect peanuts, only in 1 year out of the past 25 has there been a lack of stability as to adequate supply. The past crop year was a devastating year and the yield-sapping drought hit all areas of the peanut belt. As a result, we suffered. The drought caused increases in the price of peanut butter. But to show that you have had stability in all of that period of time is because of the peanut program that we have had.

The family I leave to the eloquence of the chairman of the committee who has spoken to this. There will be destruction of families, havoc that will take place in the absence of a planned, studious approach to this by which injury is minimized. If you are going to suddenly take this existing program away from groups where they have had it for 41 years, the resulting economic and social impact has to be considered and you have to minimize the consequences of injury that can result.

Franchise, quality control, stability, the family, whether it be in soft drinks, whether it be in legislation coming up pertaining to the beer distributors, again there are all of the essential elements. It is a limitation, but it is a limitation which is justified, a limitation which the soft drink people said was justified because of stability, quality control, and the consequences on the family.

Allotments have protected this country in the past. Protected the farmer, the cotton farmer, the wheat farmer, when supplies were such that we had no real export market. We have tried to improve the export market for farm commodities. They tell me in the dairy program we have butter that is 3 years old which the Government purchased as surplus. Do you want to put peanuts into the surplus type of commodity and pay a billion dollars a year as you are having to do in regards to the dairy program? That is, if they will grow peanuts, as they say, all over the country.

Somehow or other peanuts have been around for a long time. A great Alabamian by the name of George Washington Carver really lifted the world to the peanut and the potato, finding various uses for them. He could serve a meal in which you would start out with peanut soup and you would end up with peanut ice cream. Dr. George Washington Carver has been dead for many years, and peanuts have been growing. They were growing in many places before this program was adopted many years ago. Are they going to grow in Indiana? If they were to grow in Indiana, they would have been growing there a long time ago.

Forty-some odd years ago you had it where climate, the Lord, rain, everything came together. If you think you are going to grow peanuts in every place in the world, I think you will be sadly mistaken.

Frankly, the place that would probably benefit the most is the Southeast. That would be the place where the weather, the growing season, the length of time, and all of these matters would coalesce to produce and to increase the crop.

This program on peanuts is complex and a lot of people do not understand it. I would say that two-thirds of the agricultural staffs of the Senators think peanuts grow above the ground. Some of them may think you pick them from trees or in some way.

I am being facetious, though I do not intend to be. There is a lot of misunderstanding about the program and understandably, so because, as I have previously stated it is an extremely technical and complex program.

A peanut is more akin to a vegetable than to a grain. We have talked about a fine-tuned program. It has two basic areas. It has quota peanuts and it has additional peanuts, which are in a different category. There are two different support programs. There are all sorts of things that are different about peanuts that make it hard for people to understand unless they are intimately involved in it. I think because of this complexity many people compare peanuts to other crops. Some people have the idea, "All right we can take these peanuts away from the farmers in these areas and they can start out and use their plows and the tractors and the same machinery." But when you take away and destroy the peanut program, how many grain crops grow beneath the ground? Potatoes do but that is not a grain crop.

We had a terrible hurricane in my State, Hurricane Frederick. I did not know a lot about pecan trees, but I found out it takes 8, 10, or 12 years for a pecan tree to come into production. A fellow took me into his barn to show me his equipment. He had lost 2,000 pecan trees and he said, "What am I going to do with this equipment?" He had over $200,000 in specialized equipment.

As I look at the peanut farmer today, I realize that the peanut farmer's equipment is entirely different from soybean, wheat, corn equipment or the equipment for any other commodity.

The amendments now before us can destroy many of those who now rely on the peanut program for all or a substantial majority of their income. That may not be a reason for you to vote for the committee package, but it is a reason for you to give attention to what the chairman has suggested. Let us go about any changes in the program in an orderly, proper manner, through hearings and the receiving of public testimony, to determine the consequences of injury that will result from changes in the peanut program as presently constituted. We have a legislative procedure to be used when making drastic changes in various programs and this time-tested, time-proven procedure certainly should be the vehicle used in making any substantive changes in the peanut program, particulary inasmuch as livelihoods are very much involved.

If we destroy the franchise system, what takes place? What would have taken place in soft drinks? Large, regional corporate distributing units would have come about. There will be a shift, in my judgment, from the small farmer to the large corporate farmer in regard to the peanut program if we destroy it. I think it will definitely cause, as I say, a production shift from one geographic area to another of the Nation. It will destroy many family farms, as I have previously mentioned.

The average peanut allotment is 25 acres. Twenty-five acres is a small amount. Usually, there are maybe 75 acres of soybeans with it. They used to grow a little cotton, along with peanuts in my State, but they are not growing much cotton in the areas of Alabama where they are growing peanuts, because the boll weevil came along and ruined cotton farming. In Alabama, we have a statue to the boll weevils. The statue is there because it got the farmers of Coffee County away from raising cotton and got them to raising peanuts. That was many, many years ago.

Mr. President, I have heard the argument that there is a high percentage of leasing in the peanut program, and there is the indication that there is something evil about leasing. I do not know the exact figures, but I daresay that in the State of Indiana, close to 50 percent of all farmland is leased. Is there something evil about a widow leasing her land? Is there something evil about a farmer who has reached the golden years of his career deciding that he wants to lease? I do not believe the leasing aspect, which has been so highly publicized, is evil. I believe that leasing is a part of America as much as McDonald's. It is a part of America as much as political parties. So I do not see all this leasing evil which has been bandied about. I think there have been some distortions about that feature of the peanut program.

Opponents of the peanut program will take some figures and say that the peanut allotment is being leased at $200 an acre. But they do not show the separation of the other lands that go with that acreage allotment of peanuts, where they plan soybeans, where they plant corn, and where they plant other commodities.

Mr. President, I really think that this effort to drastically change the peanut program at this time is extremely unfortunate. This is certainly not a timely effort. We have really had 4 bad crop years with regard to peanuts in the Southeast. They have had, since 1977, a 40-percent loss of income. Some people had the idea that President Carter was looking out for the peanut farmers. The 1977 farm act in his administration was a substantial retreat. The peanut farmers gave tremendously at that time and now they are being called upon to abolish the entire program. All of this in just 4 short years.

Mr. President, I want to mention a few other things. If we do away with the peanut program, what is the effect going to be on soybean, corn, palm oil? Will not peanuts be turned loose in those areas? It is going to be the peanuts raised, that get into the candy bars or the peanuts that you will find on the cocktail circuits that will be involved. Those peanuts are going to go into competition with this corn oil, soybean oil, and other oils. The fine-tuned arrangement of the farm bill then gets out of line.

Mr. President, as you know, it is hard for a country boy from the valley of the Tennessee River in Alabama to understand how you can cut taxes and have a balanced budget. I was educated on the supply-side theory. The supply side brings about fine tuning so I was told. I was convinced that I ought to support the President's Economic Recovery Act and I am hoping and praying that his fine tuning is going to work. I think that high interest rates must come down if it is going to get to the fine tuning aspect of the President's program, because that tune is playing a sour note at this time.

But, Mr. President, I am telling you that the peanut program, with its complexities, has to operate under a fine-tuned plan and we are being called upon to destroy that with the amendment presently before us. On the one hand, we may have a dairy situation, where we may be called upon in 4 or 6 years to take care of the surpluses. On the other hand, which I think is going to be the more likely, we are not going to have all that production. We are going to have a fine-tuned plan destroyed. As a result, we are going to wreak havoc. It is going to be extremely costly to the Federal Government.

We have here the Helms and Huddleston carefully tuned peanut provisions that will work. It has worked in the past. It has the support of the President, it has the support of the Secretary of Agriculture. It is not going to cost the Government any money. You people who have been running around with the red pencils, balancing the budget, if you vote against the Helms and Huddleston provision, it is an indication that you are not for a balanced budget or a decrease.

The peanut farmers want to cooperate. They are willing to take their chances in regard to the commitee bill which has cut back on the program. But they want that fine-tuned plan that can come about and can continue to work.

Mr. President, I think it would be important to consider the cost of the other proposals being offered in lieu of the committee's peanut proposal. I do not have all the figures on them. With all the papers I have around here, it is a hard thing to do. But I have been told on Senator MATTINGLY's plan, there is no Government control on cost. The sky can be the limit. All additional peanuts can move into the domestic edible market, thereby causing quota-loan peanuts to remain in Government loan, resulting in high Government outlays. This would create a surplus situation similar to the situation that existed prior to the 1977 act.

The Mattingly proposal provides no cost offsets between the additional and the quota pools, thereby leaving the U.S. Department of Agriculture to pick up costs currently paid by the grower. I am told that it would cost at least $100 million a year.

Senator HELMS has gone into quite a great deal of detail about the Lugar amendment and what it would cost. It has been indicated to me in regard to the Lugar proposal that there would certainly be a price support. It will be left to the Department of Agriculture, the Secretary, and the price supports that are calculated will be calculated on the basis of cost of production. Senator LUGAR indicates that the Secretary would establish no high loan rate or support price. I just do not believe any Secretary of Agriculture, whether he be Democratic, Republican, or any breed whatever is going to get out of line in the percentage of cost of production of one commodity over another commodity.

I do not believe that anybody, in equity and fairness, is going to say, "All right, we'll give nothing to peanuts. I have the authority to do so. But we are going to give soybeans, corn, feed grains, and wheat a certain basis, based on the value of the cost of production."

If he went as low as about a third or in that neighborhood—say, a loan rate of $250 a ton—then the outlay in regard to that, under the Lugar proposal, according to the information I have, would cost $143,750,000. If a loan rate of $340 were used, which is getting up, the cost would be $195,500,000. If a loan rate of $420 were used, under the Lugar proposal, there would be an outlay of $241,500,000. If the present loan rate were used of $455, it would exceed $250 million.

In the desire to eliminate franchises, I believe we have forgotten the cost approach here, and it is important that we realize that cost is something we have to consider.

Peanuts are a complex product. The growing of peanuts is different. Peanuts grow below the ground. Have you ever eaten a rancid peanut? Peanuts cannot stay in the loan and in warehouses for long periods of time without refrigeration They are more akin to a vegetable or to a green.

I say again, the program is very, very complicated. But it has been worked out carefully over the years to prevent surpluses, to provide stability, to provide quality control, and to protect the family farmer.

I urge Senators to support the chairman and the minority member of the Agriculture Committee, who have worked, who have been present at each of the 24 markup sessions before the bill was finished, and who have been present at each of the 24 markup sessions before the bill was finished, and who have been present in at least five meetings since that time that I know of. They have endeavored to bring everything together. I believe they have done a remarkable job.

Some people can say that perhaps this commodity has a limited advantage, but that has not resulted from anything other than an effort to be fair. I believe that saying that would be a distortion, because we have tried to present an overall program that is equitable and fair. Senators should consider this. They should consider, No. 1, cost. Consider the fine-tuned plan. Consider the fact that this is an integral part of the President's program.

I hope Senators will support the chairman and the ranking minority member of the committee on this program.

Mr. HUDDLESTON. Mr. President, I join in the sentiments that have been expressed in rejecting the amendments that have been presented relating to the peanut program.

I point out, as already has been indicated, that what is before the Senate in S. 884, as modified, is a program that already has been substantially scaled down, as we have done in the case of the other commodity programs in wheat, cotton, and feed grains.

In the case of the peanut program, the committee reduced the loan rate for quota peanuts from $631 to $596 per ton. In addition, the committee reduced the minimum national poundage quota from 1.3 to 1.24 million tons. We also added language providing that no person may exercise allotment rights without sufficient land to support the allotment. Any allotment or poundage quota surrendered for lack of tillable land would revert to a pool for distribution to new growers.

The provision relating to tillable land is designed to prevent country clubs and other similar entities not now farming from accruing benefits from the peanut program through leases of their peanut allotments.

Finally, we added language making it clear that there are no criminal sanctions—only civil penalties—for violation of peanut marketing quotas.

We hear people saying that somebody is going to be put in jail if they want to grow peanuts. That question has been disposed of with this particular language.

Mr. President, the existing peanut program which S. 884, as modified, would basically extend for 4 crop years was hammered out in 1977 as part of the Food and Agriculture Act of 1977.

The program has worked well, and it has been of enormous benefit to the peanut farmers.

I point out one other fact for my colleagues. This program and all the other commodity programs are not something that just appeared out of the thin air. They were put into effect to meet a specific need. They were put into effect to eliminate chaos at the marketplace. They were put into effect to offer some degree, some modicum, of stability to the producer.

There are no bonanzas in this farm bill. You cannot write a program, no matter how generous you think you are, that is going to provide certainty for the farmer that he is going to make money from his operation. You cannot write a program against floods and dry weather and hurricanes and insects and all the other things that a farm operator is faced with from the time he considers planting his crop until he gets it to the marketplace.

This does not do that, either. All we can do is try to provide some measure of assurance that the farm operator, who invests his time, who invests his money, which is becoming more considerable all the time in the production of a crop, in trying to provide the food and fiber for this country and for much of the rest of the world, will not be totally wiped out, that he will not lose everything he has. In many cases you cannot do that because of adverse conditions over which nobody has any control.

So these are not programs, any of them, that have just appeared on the scene all of a sudden to try to provide some kind of bonanza for people who are agriculture producers. The programs were brought into being because of dire circumstances that existed.

If you want to look back to the day when we did not have any programs, if you want to look back to 1932 and 1929, there was not much Government regulation in those days. There were not even big deficits in Government expenditures. I do not have to describe the economic conditions that existed in those days, when the United States was, without question, at the point of its greatest peril since the time of the Founding Fathers.

So one can suggest that without Government programs, everything is going to be great; but I do not believe history will bear it out. I do not believe that the conditions that brought into effect these various programs have changed to the extent that we can say now that we do not need them any more and we should go back to those times.

I urge my colleagues to join in the motion that will be made relating to the pending amendments, that we table the efforts to eliminate or seriously modify this program and other programs, and move on with a reasonable program to provide some minimum help to agriculture producers of the country.

● Mr. JEPSEN. Mr. President, I am pleased to join Senator LUGAR in cosponsoring this legislation. In my opinion, there is only one word that describes the peanut program now in effect—unbelievable.

As Senator LUGAR has previously pointed out, his amendment was considered in the Senate Agriculture Committee during deliberations on the 1981 farm bill. The amendment did not pass, but that very well may have been because so few Senators really understood the peanut program.

I do not want this amendment to be voted on without Senators understanding the program we have now, so let me take a few minutes to explain it.

Simply stated, the present peanut law says that before a farmer can put a peanut in the ground, he must either have a Government peanut allotment or purchase the right to grow peanuts from a landowner who has an allotment previously passed on to him or his ancestors by the U.S. Government.

The original allotment system, started over 40 years ago, was intended to protect the peanut farmer. Allotments were generally given out to landowners who grew peanuts. However, over the course of 40 years, many of those farmers who originally wanted to plant peanuts have since decided that for various reasons they do not want to, and since a portion of their land was originally set aside to grow peanuts, they have the right to sell that allotment to another farmer who does want to grow peanuts—at some $100 to $200 rent per year.

I point out that this is not $200 per acre for the right to grow the peanuts plus the land to grow them on—this is only for the right to grow them. An allotment holder can and does sell his allotment, but farms the land and makes profit off of the crop he produces, too. This has gotten to be a common practice—in fact, today 70 to 75 percent of all the peanuts grown are grown on rented allotments.

Mr. President, I discussed this program with USDA officials during markup of the 1981 farm bill. When I asked about buying land and growing peanuts, they told me I could grow up to 1 acre for my own consumption, but that I could not market any other peanuts. When I pursued the question further, I was told that if I tried to market the peanuts I would be charged a penalty for the peanuts I grew and if I refused to pay the penalty, I would be thrown in jail. I ask my fellow Senators what kind of a free country we are running when I cannot plant what I want on my own land?

Mr. President, the history of the Government's role in the peanut industry is a classic example of bureaucratic indifference to both economic reality and the basic principles of our free enterprise system. I urge the Senate's approval of this proposed legislation.●

Mr. BOREN. Mr. President, I rise in opposition to the amendments offered by the Senator from Indiana and the Senator from Georgia.

These amendments would destroy the economic stability of the peanut producing sector. It is not fair to change the rules in midstream. Philosophically, I can understand some of the concerns expressed about the allotment approvals. However, we now have such a program. Young farmers have borrowed money to buy allotments.

To wipe away the program without notice would be to take away a property right, recognized by the current law, without compensation. It would be like suddenly doing away taxi licenses in some large cities for which the driver may have paid $25,000 to $50,000, planning for long range changes with due notice is one thing. A sudden sharp break with one part is another. Some medianism must be used to maintain a proper balance between supply and demand.

Peanut production is important to my home state of Oklahoma. There are 6,110 farms with allotments in our State. The value of the crop annually is approximately $60 million; 182,000,000 pounds constitutes the State's quota.

Peanut producers have been having a difficult time already. The cost of production exceeds $600 per acre, excluding the cost of land. The support levels have not increased quickly enough to keep up with increases in the cost of production. Last year because of a severe drought. There was a 40 percent reduction in peanut production.

S. 884 presents a reasonable compromise. It has been estimated that by 1985 the total cost of the program will be reduced to approximately $2 million. This would constitute only .0000028 percent of the total Federal budget.

Surely that is a reasonable price for retaining a viable domestic source of peanuts. We would do well to remember that last year, the domestic peanut grower received less than 34 percent of what the consumer paid for peanut butter.

We should especially remember that while the Oklahoma peanut grower was receiving about 25 cents per pound for his peanuts in 1980, the cost of imported peanuts was $1 per pound.

The peanut program, as with all programs which expend Federal funds, should be carefully scrutinized. Some changes may be in order. I might well have written a different program had I been in Congress nearly a half century ago when this and other commodity programs were commenced. However, to suddenly make drastic changes without notice which would destroy the domestic peanut producers is not fair or wise.

The over 6,000 peanut farmers in my State do not deserve such treatment. Neither do consumers who will pay much more if they are forced to depend upon imported peanuts in the future.

Mr. BENTSEN. Mr. President, I am strongly opposed both to the amendment of the Senator from Indiana and the amendment of the Senator from Georgia.

Both of these amendments would eliminate the current peanut program. They are a breach of faith in the face of a long, hard, good-faith effort by the peanut farmers to pare the program down to a minimal cost level.

The peanut growers have sacrificed for 4 years, ever since the 1977 farm bill, in order to reduce the cost of the program. They cut this cost by 90 percent a tremendous achievement.

It has been very costly for them financially, but they are now offering a peanut program which will continue to assure the American consumer a stable, adequate supply of high-quality peanuts at a reasonable price. This peanut program will deliver this at a minimal cost to the taxpayer, in fact at no cost in 1982.

We are now being asked to reject these efforts, to throw away 4 years of sacrifices made solely in order to keep a program which has served this country well. This is not right. I will not agree to it, and I hope the Senate will not agree to it.

I was an original cosponsor of the proposal that the growers wrote themselves. I have worked with the growers for months. We have gained ground inch by inch. We have made cut after cut to hold down the cost in the face of estimates which are continually revised upward. This is now the bottom line.

I am pleased that we were able to reach a reasonable compromise within the budget constraints while preserving the basic structure of the program. The peanut program has served this country well. Last year was the first time in 25 years that we have had a shortage of peanuts. Few other commodities can make that claim. The fact that peanuts are a perishable crop that cannot be stored, more like milk than other crops, requires that we produce a steady supply year in and year out. The geographic diversity of the current program has done that very successfully.

The peanut growers have made tremendous sacrifices in order to cut the cost and to keep the program. I urge

my colleagues to keep faith with these sacrifices and to keep this program without further changes.

● Mr. NUNN. Mr. President, I support the Agriculture Committee's version of the peanut program as presented by Senators HELMS and HUDDLESTON as a substitute to the original language of S. 884. I want to commend the leadership and the managers of this bill and the entire committee for meeting the challenges before them. My State depends on a healthy agricultural economy. Through the diligent efforts of these men, essential farm programs have been kept in place at cost-effective levels.

The peanut program is an excellent example. After lengthy markup sessions it was scaled down to maintain the present structure with lower costs than ever experienced in USDA history. Upon reporting the bill, it was realized that the Reagan administration would possibly veto the farm bill without further budget reductions. Once again this committee formed a package that meets these goals and protects our viable farm community. The peanut program is presently projected at no cost. With reductions in the support price, reductions in the minimal national poundage, and other changes, this perishable crop will remain affordable and abundant for consumers while protecting the marketing system for producers.

I have a more detailed statement I delivered on the floor earlier this summer which I will place in the RECORD again at this time. In short, let me caution my colleagues to refrain from drastic changes in traditional agricultural practices, when the committee bill can minimize Federal outlays and provide some semblance of security for agricultural producers. My State has endured some of the most devastating dry crop years in history. Coupled with spiraling inflation of production costs and high interest rates farmers are struggling to hold on to land that has been feeding the Nation for generations. I am not prepared to accept any responsibility for tampering with a program such as peanuts that has worked for over 40 years.

The statement follows:

[From the CONGRESSIONAL RECORD, June 25, 1981]

PEANUT PROGRAM

Mr. NUNN. Mr. President, today I rise in support of S. 884, the Agriculture and Food Act of 1981 as reported from the Committee on Agriculture, Nutrition, and Forestry under the leadership of Senator HELMS and Senator HUDDLESTON. I commend my colleagues for their conscientious reauthorization of programs which provide economic stability to the farmers of our respective States who are producing an abundant and affordable food supply for our Nation and the world.

I rise to lend my support to title VII of this bill which maintains the acreage allotments and poundage quota system for the production and marketing of peanuts. When the administration's proposal for the 1981 farm bill came to Capitol Hill, it became clear that significant alterations in the peanut program would be debated on the Senate floor with probable votes. Prior to the 1981 farm bill, peanut provisions had been part of the Omnibus Farm Act and no separate floor votes occurred.

As one of the 16,000 Georgia peanut growers, I wrote to the Senate Select Committee on Ethics describing my farm operation and, explaining attempts by me to sell my allotment during my first year as a Member of this body. I asked the committee to determine whether my participation in floor debate and votes would violate any Senate rules on conduct and ethics. I have recently received their response which concluded that legislative activity by me regarding the peanut program is not prohibited by the Senate Code of Official Conduct. Mr. President, I ask that my letter and the Ethics Committee's response be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
*Washington, D.C., April 30, 1981.*

Hon. MALCOLM WALLOP,
*Chairman, Senate Select Committee on Ethics, Washington, D.C.*

DEAR MR. CHAIRMAN: As you know, the Reagan Administration has submitted its recommendations on the 1981 Farm Bill to the Senate Committee on Agriculture, Nutrition, and Forestry. The Administration's proposal contains language that significantly alters the peanut program, including the elimination of the acreage allotment system. In addition, there are two pending amendments to S. 884 (Senator Helms' amendment 34 and Senator Mattingly's amendment 36) which may directly determine the future of the peanut program.

Georgia leads the nation in peanut production. The commodity contributes approximately $1.6 billion to the economy of my State with an allotted acreage of 567,000 acres and over 16,000 producers. I am, therefore, concerned about the proposed changes and the effect they would have on the agriculture community in Georgia.

I am now placed in an awkward position, however. My sister and I have a 75 acre peanut allotment in Houston County. I rent the farm from my sister and operate it as a sole proprietorship. I grow peanuts annually on this property, and this crop, depending on the many variables affecting farming, represents between 6% and 12% of my farm's gross income.

The dilemma is obvious—when legislation altering the peanut program is considered on the Senate floor, as a Senator from Georgia, I feel that I should play a role in the legislative process. On the other hand, I feel obligated to inform my colleagues of my own involvement in the peanut program, and I have refrained from any involvement in sponsoring legislation on this subject until my ethical responsibilities are clarified.

In the past, there has been no controversy on the peanut program in the Senate, and there have been no separate floor votes on this program. Legislation affecting the peanut program has been incorporated in the past as part of the Omnibus Farm Bill.

In 1973, early in my career in the Senate, I made an attempt to sell the allotment owned by my sister and myself, but I found that my attempted sale created much apprehension in the farming community because of considerable false speculation that I had inside information on the peanut program's future. Because of this, I decided against further efforts to sell the allotment even though I preferred not to be a direct, participant in a program with substantial federal government involvement.

This year, for the first time since I have been in the Senate, it is probable that there will be efforts to change the peanut program, and that the changes will result in Senate debate and votes.

With this background, I ask for your committee's advice on the following question: Would my participation in Senate debate and votes on the peanut program violate any Senate rules on conduct and ethics?

Thank you for your assistance in this matter.

Sincerely,

SAM NUNN.

---

U.S. SENATE,
SELECT COMMITTEE ON ETHICS,
*Washington, D.C., June 3, 1981.*

Hon. SAM NUNN,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR NUNN: This is in response to your letter of April 30, 1981 concerning pending farm legislation. The Administration's recommendations on the 1981 farm bill contain significant changes in the present peanut program, including a recommendation for the elimination of the acreage allotment system. In addition, Members have submitted amendments which would significantly affect the nation's peanut program. While these issues are presently pending before the Committee on Agriculture, Nutrition, and Forestry, of which you are not a Member, these issues will very likely be the subject of debate by the full Senate.

These potential changes in peanut policy could, of course, have a major impact on the agriculture community in Georgia, which leads the nation in peanut production. This consideration leads you to a major concern over how peanut legislation will affect your State and constituents.

In addition to these issues, we understand you and your sister have a 75-acre peanut allotment in Houston County, Georgia. You rent the farm from your sister and operate it as a sole proprietorship. You grow an annual crop of peanuts on this property, and the crop represents between 6% and 12% of the farm's gross income, depending on the variables affecting farming in a particular year.

In view of upcoming debate on the peanut program, the interest of your constituents in the program, and your own involvement in the program, you ask whether your participation in Senate debate and votes on the peanut program would violate any Senate rules or standard of conduct.

Paragraph 4 of Rule 37 of the Standing Rules of the Senate provides:

"No Member, officer, or employee shall knowingly use his official position to introduce or aid the progress or passage of legislation, a principal purpose of which is to further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises, when he, or his immediate family, or enterprises controlled by them, are members of the affected class."

The legislative history of this provision indicates that the provisions of the paragraph should be read quite narrowly. The Special Committee for Official Conduct stated in its report accompanying this provision to the floor as follows:

"The Committee recognizes that in many cases, legislation advancing through the Senate will have some impact on the financial situation of a member, officer, and employee. All tax legislation has such an import. Ordinarily, however, the impact on an individual's holdings is likely to be quite minimal in comparison to the impact of the legislation on the public and the public interest served. This paragraph addresses itself to the rare case when the relationship between the legislator's private interest and the public interest is dramatically different from the ordinary situation. It applies when a principal purpose of the legislation is to further the financial interests of the member, officer, or employee or his family. Legislation may have a significant financial ef-

fect on a Senator because his holdings are involved, but if the legislation also has a broad, general impact on his state or the nation, the prohibitions of the paragraph would not apply." S. Rep. 95-49 at 41-42 (1977).

The Committee Report went on to use an example which we believe is specifically applicable to the question you raise:

"Thus, for example, if a dairy farmer represented a dairy farming state in the Senate, and introduced, worked for, and voted for legislation to raise or maintain price supports for dairy producers, he would not fall under the stricture of this Rule. The strong presumption would be that the Member was working for legislation because of the public interest and the needs of his constituents and that his own financial interest was only incidentally related. In the terminology of the paragraph, the dairy farmer would be part of a class affected by the legislation, but not a member of a "limited class," as envisioned in this paragraph. The Committee tried to apply a number to the concept of "limited class" but found the task futile. However, the Committee intends that a class of people or enterprises sharing a particular economic interest (i.e. dairy farmers, shoemakers; disabled veterans) would not be a "limited class." By "limited class," the Committee means a class which resembles much more closely the class of people affected by a private bill. Therefore, to return again to the example of the Senator who was a dairy farmer, he would not be prohibited from working for legislation to help boost or maintain the price supports of dairy products. If, however, legislation was introduced to purchase a piece of land made up in part of a piece of this property and in part of pieces of his neighbor's property, in order to build a federal project there, the Senator would be foreclosed from working on the legislation.

If the legislation does meet the "principal purpose" (and "limited class") standards as necessary, the Committee intends that the disqualification from involvement with the legislation should be total. Id., at 43.

This legislative history makes clear that while you would be part of a class affected by changes in the peanut program, you would not be a member of a "limited class" as contemplated by the provision. As the report states, "[t]he strong presumption would be that the Member was working for legislation because of the public interest and the needs of his constituents and that his own financial interest was only incidentally related." We therefore conclude that legislative activity by you regarding the peanut program is not prohibited by the Senate Code of Official Conduct.

You are to be commended for your inquiry, which demonstrates sensitivity to the problems raised by potential conflicts of interest. That same judgment, carried through, indicates an ethical sensitivity to the problems and might at some moment dictate prudent withdrawal if events become more specific.

Sincerely yours,

MALCOLM WALLOP,
HOWELL HEFLIN.

Mr. NUNN. The present allotment system for peanut production has existed for over 40 years and represents 567,000 acres in Georgia. The average peanut allotment acreage in Georgia is 29 acres. With the exception of 1980 when dry weather sharply curtailed the crops, the program has insured a quality plentiful supply of peanuts at reasonble prices to consumers. This economic stability has contributed to the ability of many family-size farms to stay viable in the face of a series of drought years.

In light of producer initiated changes in the 1977 act, the overall cost to the Federal Government is minimal when compared to other commodity programs. Changes that give greater flexibility in the export and crushing markets have allowed peanuts produced in excess of quota but within the alloted acreage to be advance contracted for export at competitive market prices. This provision removes exposure for the Government by preventing those peanuts from entering the price support loan.

The present program is costing about $20 million annually. This compares with the Department of Agriculture's 1980 costs of milk at $1.03 billion, cotton at $75.8 million, wool at $34.5 million, and food stamps at $10.8 billion.

Following 1977, farm peanut prices have been stable with an increase of 8 percent between 1977 and 1981 ($420 per ton, 1978-79: $455 per ton, 1980-81).

Between 1976 and 1979, feeder steers doubled in price, corn rose from an average season price of $2.02 per bushel in 1977 to over $3.00 per bushel in 1980, and there was a general rise of 76 percent in the index of all farm prices.

Peanut prices to consumers have increased at about between 8 percent and 18 percent based on peanut butter data. Price ranges from 98 cents to $1.10 per pound in 1977 and $1.06 to $1.20 per pound in 1979. During the same period food prices rose about 27 percent.

Peanuts are also a unique perishable food crop which cannot be held in storage as grain and other commodities. This forces the marketplace to be highly dependent upon production controls and a price support program. Marketing supervision under the present program also provides for grower identification at the buying point thereby removing any mold or toxins from the food chain that are unfit for human consumption.

Peanuts are also unique in the type of equipment required to plant, harvest and dry for market. Investments required for this specialized equipment would tend to discourage major expansion into this industry should production control be eliminated. Data provided to me from the University of Georgia College of Agriculture states:

A recent study in Georgia gives more indication of what might have happened if additional peanut production were unlimited in 1979. Preliminary estimates from the study show that peanut acreage would have expanded by 28 percent, soybean acreage would have decreased by 8 percent, corn acreage would have decreased by 4 percent, and all other crops would have decreased by 3 percent. Only about 6 percent of the new production would have come from new producers and their average acreages would have been significantly less than for established growers.

The relatively small increase predicted by new growers in the shortrun was not surprising in light of the significant specialized investment required for peanut production and somewhat specialized knowledge of cultural practices. Some indicators were that relatively small acreages forecast by new producers were related to ability to rent specialized equipment from neighbors who were peanut growers. No new potential growers were found outside the traditional peanut counties.

The 1980 crop year for Georgia peanut farmers was devastating with a 40 percent reduction in crop yields. Farmers in Georgia have also experienced extremely dry conditions in almost every year since 1977 for all commodities. The financial burden has forced many bankruptcies of farm families that have lived on the land for generations. The stability of the peanut program works for the grower. It works for the landowner that uses the value of the allotment as equity to finance other farm enterprises. It works for the banker that can estimate a return for the money he lends on the peanut farmer's operating costs. It works for the fertilizer and implement dealer who provide the chemicals and equipment for this protein source. And it works for the consumer who has enjoyed an adequate supply of peanuts at a stable price for the last 25 out of 26 years.

I feel now is not the time to eliminate acreage allotments for peanuts and I endorse the committee's recommendations of the Agriculture and Food Act of 1981.●

● Mr. SPECTER. Mr. President, I support the amendment offered by Senator LUGAR which would eliminate the current peanut allotment program and provide in its place a price support program. This amendment would make the peanut program comparable to that for other commodities.

Under the Agriculture Committee's proposal, a person may not produce peanuts in excess of 1 acre in the absence of a Federal Government granted allotment. It is odd, indeed, that in a country that cherishes freedom so much, there is not freedom to grow peanuts. Any Member of this body and any other American citizen who wishes to farm may buy land in any State and plant any agricultural commodity—except peanuts.

And what is the basis for these allotments? They are based on who grew peanuts back in the depths of the great depression—1938. These allotments are now being passed down to the third generation, with approximately 94 percent of peanut allotment acreage being the special privileges of individuals in only 6 States.

And how does a person who wishes to grow peanuts obtain an allotment? Well, it is not easy. He must acquire land which already has a peanut allotment in one of the counties in only a very few States where there are owners who have peanut allotments. These allotments may not be transferred out of State and in the States where over 95 percent of all production occurs, they may not even be transferred out of the county. As a practical matter, the only way to obtain a peanut allotment is to buy land which already has an allotment. Any history student knows this system is akin to feudalism, even though it comes before the Senate under the rubric of a "farm program."

The current program has led to a terrible peanut supply shortage. In the summer and early fall of 1980, there was a severe drought in the 6 States which produce 94 percent of U.S. peanuts. The 1980 crop was 42 percent less than the 1979 harvest. With imports virtually prohibited in order to protect the peanut price support program, the price of peanuts rose from 45 cents a pound in July to $1.75 per pound in November and are still selling at approximately $1 a pound.

If Federal law did not require that 94 percent of the peanuts be produced in 6 States, and only in certain counties of those States, then the effects of the drought would not have been nearly so

severe. Peanuts would have been produced in more diversified locations. Consumers in the end were required to pay the biggest price, as peanut butter and other peanut products soared in price and even had to be rationed.

One of the more pernicious aspects of the allotment system is the value of the allotment rental. The dirt farmer has to pay an absentee landowner $100 to $300 for 1 year's use of a peanut allotment acre. Those who originally obtained the allotment from the Government, did not pay anything for it. Further, the land on which there is a peanut allotment will sell for a great deal more than comparable adjacent land without such an allotment. Of course, these same persons who have received this financial windfall from the Government are the same ones who are currently fighting so hard for perpetuation of this inequitable program.

My use of the term "absentee landowner" is not an overstatement. Over 70 percent of all peanuts are produced on rented land. Generally, the theory of Government agricultural programs has been to assist the individual actually doing the farming, not to annoint a monopoly on landlords. The peanut price support allotment program works just the opposite. Indeed, it is a fail-safe program for the allotment landlord. He gets his allotment rental cash in advance and takes no risks. While the farmer is actually doing his work, the allotment lord can have his allotment rental drawing interest.

Even worse than all of this is the total cost of the program to both the consumer and the Government. A significant part of price of peanut butter, packaged peanuts, and other peanut products reflects the value of peanut allotment rentals. For the 1981 crop, peanuts are price supported at $455 per ton, including allotment rentals which are believed to average between $100 and $300 per acre. The consumer gets nothing for these allotments. For any other crop, the cost of land rental is far less.

In order to compensate for these rental allotments and the recent escalating cost of producing peanuts because of inflation, the Senate Agriculture Committee has to provide for a minimum annual price support of $631.

Without the allotment rental of $100 and $300, the current price support of $455 per ton might be adequate. The difference, of course, will be passed on to the consumer. Under the committee's bill, U.S. consumers will pay about $175 million more for the farm value of edible peanuts. Since the manufacturers and retailers price is based on a percentage markup, the costs will probably be even greater. For example, the actual cost for the peanuts in a pound jar of peanut butter may be 60 cents instead of 43 cents.

The peanut program has also been an expensive one for the taxpayer. It has cost a total of $1.1 billion through 1980 and peanuts account for less than 1 percent of national farm income. If all other agricultural programs had been as costly, the burden on the taxpayer would have been staggering. One unexamined feature of the allotment program is the amount of bureaucracy which has been imposed on peanut production. One witness for the Senate Agriculture Committee stated:

> Most ASCS offices in the peanut belts devote nearly full time to the peanut program with more different forms, maps, measurements, poundage quota cards and peanut red tape than one can imagine.

I would also like to address two arguments proponents make in favor of this program.

First, that peanuts are a unique crop. It is contended that peanuts are different because they cannot be stored for long periods of time. While peanuts cannot be stored for as long as wheat, corn, and other commodities, they can be stored for much longer than fruits, vegetables, tree nuts, and other farm products.

Second, the current program has produced an abundant supply of peanuts. This is not accurate. There are three principal types of peanuts and the present program has provided an adequate supply of only one of these three types of peanuts.

In conclusion, Mr. President, the entire thrust of the President's program and of the program we have been trying to pass here in the Senate has been to reduce inflation and unneeded Government subsidies. Using these criteria, there is no doubt that the peanut program is a prime target for extinction. We should adopt the Lugar amendment and bring an end to the feudalistic peanut allotment program.●

● Mr. HAYAKAWA. Mr. President, at this time, I would like to voice my support for Senator LUGAR's amendment to the farm bill.

Senator LUGAR's proposal would eliminate the current system of peanut acreage allotments and poundage quotas. In place of this system, the amendment would require the Secretary of Agriculture to establish a price-support loan program at an appropriate level, taking into consideration the cost of production and other economic factors.

The farm bill, as reported from the Agriculture Committee, retains both the allotment system and poundage quotas. Such legislation preserves an archaic system of Government controlled peanut production. The original peanut allotments were distributed in 1938. They were given to those who were farming peanuts at that time to alleviate a possible oversupply situation in the wake of the depression. These farmers did not pay for this right to produce peanuts. The U.S. Government, therefore, has no moral or legal obligation to continue supporting the holders of these allotments with a monopoly on the peanut markets, especially since less than 30 percent of the allotment holders are presently involved in the actual farming of peanuts. The majority of the allotment holders simply lease all or part of their allotments, at considerable profit, to the farmer who actually grows and markets the peanuts.

As the committee's report correctly states:

> The bill attempts to protect the interests of the basic peanut producing areas of the country.

This is achieved, however, at the expense of the Nation as a whole. In this great land of freedom the only way an American can begin producing and marketing peanuts is to lease the right from an allotment holder. It is inconceivable to me that our Nation and Government, founded on the principles of free enterprise and equality, would continue to uphold a "feudal aristocracy" of privileged peanut allotment holders, while literally hundreds and thousands of farmers equally deserving are prohibited from growing and marketing peanuts.

Farmers are not the only ones affected by this outdated system. Both the consumers and the peanut processors are also penalized by the allotments and poundage quotas. By artificially limiting the supply, the consumer is forced to pay a much higher price for peanut products than he might if the free market was allowed to operate without the Government's interference. As Senator LUGAR notes, "The allotment rental costs (which add 20 percent to the farmers production costs) results directly in higher prices for every peanut produced." Though there is no way to calculate the loss to consumers from the lack of peanut supplies not produced, California consumers presently must pay 3 cents a pound in unnecessary transportation costs to bring the peanuts across the country. Not only are consumers and farmers adversely affected but the peanut processors are also inhibited by high prices and low supply.

As simple as eliminating the current peanut program seems, there are those who say we should keep the peanut program because poor old ladies have been dependent on their allotment income for years. It would be unfair, they say, to all of a sudden pull the rug out from under their feet. Indeed this conjures up a nasty image of insensitivity on the part of the Senate. Let us be realistic, the holders of peanut allotments are the same people who participate in the stock market, the bond market and the real estate market—some young, some old, some rich and some of middle income.

I think we can rest assured that those folks receiving income from peanut allotments have had plenty of forewarning. For years we have been talking of putting an end to such perversions of the free enterprise system. The writing has been on the wall long enough. We have not been bashful about taking strong actions in the past. What this country needs is tough action—responsible yes—but tough.

The question of fairness is often brought up when we talk of eliminating the peanut program. It is without a doubt a question of fairness. Just how fair is it for the Federal Government to tell farmers all across this great Nation—

no; you cannot participate in the free enterprise system? Or worse yet, how can this Senate with a clear conscience tell farmers that they must pay for the right to farm?

Let us go on with the question of fairness. I ask you, what about the millions of hard working Americans who have to pay more for peanut products just so we can maintain this program? What about the small farmer who has to pay 20 percent of his production costs just to lease the right to grow peanuts. Is this fair?

There are those who agree that this program should be eliminated but they oppose Senator LUGAR because he is supposedly moving too quickly. They say "wait", let us reduce the program gradually. Well I cannot with a clear conscience, say "wait" to the millions of Californians who should be paying less for peanuts. No American should have to wait any longer than he or she has to for relief from inflation. I cannot, with a clear conscience say "wait" to the small peanut farmers who should be getting more of a profit for the hard work they do.

There has been no clear evidence offered which would cause me to believe that peanuts should be treated any differently than other food crop. It is time to stop protecting those few privileged holders of allotments. It is time to stop national poundage quotas. If we accept Senator LUGAR's amendment Americans can look forward to larger supplies of peanuts at lower prices, peanut farmers to greater profits, and California, to the possibility of a new agricultural industry.●

Mr. THURMOND. Mr. President, today, I rise in opposition to the amendment offered by Senator LUGAR from Indiana. The Lugar amendment would jeopardize the survival of the peanut price support program, which helps stabilize the peanut market. This would be a severe blow to the peanut growers of our Nation.

The peanut price support program has been in effect since 1949. Without the stability of this program, uncertainty and confusion would interfere with the marketing of peanuts. Many small farmers unable to compete with large growers, would be forced out of business and would be denied their chosen lifestyle. This is certainly a situation that should be avoided if possible.

Peanut farmers have realized, as have most citizens today, that they must do their part to help bring Federal spending under control. The National Peanut Growers Association has worked with the Agriculture Committee and has agreed to a compromise that will help reduce Government expenditures. They have agreed to accept a support price of $596 per ton instead of the $631 level proposed in the bill as reported from committee. The minimum national poundage quota would be set at 1.24 million metric tons instead of 1.3 million. The compromise would eliminate allotments on farms with no cropland, making these allotments available for new grower applications. Additionally, it would clarify the provisions setting a civil penalty for those who produce in excess of their allotment and quota.

Mr. President, I believe this compromise is a fair one. The peanut growers of America have proven that they are willing to do their part to help cut Federal spending. In exchange, they are asking that the essential elements of this price support program be preserved. Accordingly, I hope my colleagues will reject this amendment.

The PRESIDING OFFICER. The Chair recognizes the distinguished majority leader, the Senator from Tennessee.

Mr. BAKER. Mr. President, the debate on these amendments has proceeded now for some time, and I am prepared at some point to offer a motion to table the Lugar amendment.

I have discussed this with the distinguished Senator from Indiana and the distinguished Senator from Georgia. I observe that the managers on both sides are present in the Chamber.

I have no desire to end the debate prematurely, but I inquire now if there is further debate. If not, I am prepared to make the motion at this time.

The PRESIDING OFFICER. The Senator from Alabama (Mr. DENTON) wishes to speak.

Mr. BAKER. Mr. President, I am prepared to yield the floor. At the conclusion of the remarks of the Senator from Alabama, if there are no other requirements for time to debate the amendment, I will be prepared to make the motion.

I yield the floor.

Mr. LUGAR. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. LUGAR. In the event additional time is allocated to those Senators, I should like an additional allocation of time to respond. If we are going to continue the debate, I would want time to respond.

Mr. BAKER. I thank the Senator.

Mr. HEFLIN. Mr. President, I wish to have a few additional minutes. I have additional information to present to the Senate.

Mr. BAKER. Mr. President, I do not desire to cut anyone off. Generosity can be a fault also. I thought we had this done to go right now.

So if there is to be further debate, I urge Members to make it as brief as possible. We have a lot of work yet to do and a lot of amendments to dispose of. I am prepared to make a tabling motion whenever it is possible to do so.

The PRESIDING OFFICER. The Chair recognizes the junior Senator from Alabama.

Mr. DENTON. Mr. President, my remarks will be brief. The case has been well made by the chairman of the Agriculture Committee and by my distinguished colleague from Alabama, Senator HEFLIN, here this morning.

It does seem to this Senator that the amendment proposed by my respected friend, the Senator from Indiana, does not address adequately the problems of the peanut industry. The Agriculture Committee's compromise package for peanuts is acceptable to the administration, and this compromise moves even closer to the administration's original proposal.

The committee's bill, with the latest cuts in domestic quota supports, insures that no cost will be incurred. This compromise package brings domestic quota production in balance with consumption. This proposal provides that allotments not used in at least 1 out of 3 years would revert back to the county and be made available to new growers only.

Except for last year, peanuts have been in oversupply. Senator LUGAR's proposal would create additional edible oil supply in an already saturated domestic and world market.

The committee's compromise proposal is a step in the right direction to produce adequate commodities insuring continuous supply for our American consumers.

Even with these proposed support levels, farmers will not be guaranteed a profit, only protection against manipulation of the markets and depressed prices in periods of oversupply.

It has been suggested that Senator LUGAR's proposal would enable us to maintain more budgetary control. However, under the committee compromise package, the Secretary of Agriculture will continue to have at his discretion the authority and the ability to influence commodity prices, thereby maintaining prices at levels that are not a liability to the Treasury.

In conclusion, allow me to say that the 58,000 farm families in my State of Alabama carry a tremendous financial burden. The peanut community of those farmers is facing a great challenge. In my view farmers are not among those segments of our society who are ripping off the system. We need a stable farming base to insure our national survival.

I believe we should extend to the peanut community the justified degree of stability imparted by the Agriculture Committee's compromise package.

I, as well as my colleagues, must shoulder a responsibility to assure equitable treatment of our deserving farm community.

Thank you, Mr. President.

I also thank the chairman of the committee.

The PRESIDING OFFICER. The Chair recognizes the Senator from Tennessee.

Mr. BAKER. Mr. President, I inquire of the distinguished Senator from Indiana if he has further debate on this farm bill.

Mr. LUGAR. Mr. President, I wish 2 minutes.

Mr. BAKER. I yield.

Mr. LUGAR. Mr. President, I have stated the case for my amendment in an extended speech last evening which I shall not repeat.

But the point of the peanut amendment was to bring peanuts into the

1980's, to make certain that there is some basis for the dramatic growth of a crop that has in fact been in a status of atrophy for a long time, largely because it has missed the free market of this country altogether.

In justice and equity to soybean farmers, corn farmers, wheat farmers, and every other sort of farmer, peanuts should stand in the same position. They should not have a privileged place in this House, and essentially the compromise fashioned by the committee protects, in my judgment, a system that really cannot stand the light of day, economically or politically, or with justice to farmers or consumers.

So, Mr. President, although I appreciate the parliamentary situation in which the distinguished majority leader is about to offer a tabling motion against my amendment, I am hopeful that the amendment will not be tabled, that in fact some reform opportunity will still remain. I have admitted the cost factors now are relatively moot. It is a question of principle, a question of equity, a question at least in which peanuts should not be the last edible crop in our country that has special allotment acreage controls, special poundage controls, and a system designed to privilege 59,100 Americans and no more, no less, forever.

I yield the floor.

Mr. BAKER and Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee has the floor and he may yield.

Mr. BAKER. Mr. President, I yield to the Senator from Alabama.

Mr. HEFLIN. Mr. President, I rise in support of title VII of the Agriculture and Food Act of 1981 (S. 884) as amended by the substitute package of the Committee on Agriculture, Nutrition, and Forestry. I respectfully urge the Senate to reject other amendments that will be offered to undercut and overturn the position of the committee.

Title VII is the provision of the farm bill that deals with peanuts—a basic food commodity whose products are found in almost every home in America. The principal product—peanut butter—has long been recognized as one of the most delicious, nutritious, and reasonably priced foods available to U.S. consumers. As the U.S. Department of Agriculture notes in a paper prepared for consideration of this bill:

> Peanut butter is considered by nutritionists as a good source of protein and has been widely used in low cost diets for this reason.

Peanuts are also a basic agriculture commodity in this country. The commodity is grown by some 60,000 producers in 19 States stretching across the Sunbelt from Virginia to California. Peanuts have a farm value of about $1 billion, and the crop is a bulwark of the family farm system in major producing States. Indeed, peanuts constitute a vital component of the agricultural economies of some 8 to 10 States and are deeply interwoven into the local economy and social fabric of hundreds of communities and counties across the production belt.

I cite these fundamentals at the outset to invite my colleagues—especially those from outside the peanut production areas—to consider carefully and thoughtfully all that is involved in the consideration of this title of the farm bill. I urge them to look beyond the emotional and often misleading statements that have been made about the current peanut program and about the Senate committee bill. I appeal to them to consider the impact on consumers and producers alike of the action we will take on the pending legislation and to consider the economic and human impact it will have on a large section of the country.

Mr. President, the peanut title of the farm bill now before the Senate was carefully weighed and considered before it was adopted by the Agriculture Committee. The committee held comprehensive hearings and received testimony from all segments of the industry.

The basic provisions of the peanut title now before you are supported by all the peanut grower organizations in the United States, by the sheller groups that appeared before the committee, and by the major general farm organization.

The bill was opposed by two representatives of the peanut product manufacturing industry. I doubt that any Members of the Senate will be surprised to learn that the main thrust of their testimony was that they want cheap peanuts. So much for the position of the manufacturers.

The peanut title as approved by the Agriculture Committee would extend for 4 years and fine tune the present peanut program, which was extensively revised by Congress in the Food and Agriculture Act of 1977.

It is interesting to observe that my friend and colleague from Indiana (Mr. LUGAR) continues to berate the peanut program as archaic, out of date, and a relic of the 1930's. He neglects to inform us that this archaic program is one that was substantially modified by the Senate Agriculture Committee only 4 years ago and that he, as a distinguished member of the committee then as now, participated in that modification.

The changes made by the 1977 act improved the peanut program in several respects and gave it needed flexibility.

The act provided for a two-tier system of production and price supports for the domestic and export markets within the existing acreage allotment system. Domestic poundage quotas were instituted among growers, with quota production supported at not less than $420 per ton. Poundage quotas have been adjusted downward over the past 4 years to bring production near to balance with domestic need, thus sharply reducing program costs for price supports. At the same time, producers grow additional—or nonquota—peanuts for the world market within their acreage allotments at price support levels at or below the world market price. There has been virtually no cost involved in the support of these additional peanuts.

The 1977 act has achieved a drastic reduction in peanut program costs. Prior to that act, net annual costs of the program had risen to above the $100 million level—to $121.1 in fiscal year 1975 and $210.3 million in fiscal year 1976. Since enactment of the 1977 law—according to figures provided our committee by the Department—the net 3-year cost to the Government was $15.4 million, or an average of $5.1 per year.

As a direct result of the 1977 act, the United States has become the leading exporter of edible grade peanuts. Except for last year's weather-induced short crop, we have captured some 60 percent of the world market for peanuts for food use, thus contributing to our international trade balance. This export leadership was achieved while maintaining an abundant production for our own consumers on the domestic side.

Mr. President, I believe any fairminded person will agree that the peanut program, as modified in 1977, has worked exceedingly well and to the benefit of all concerned—consumers, producers, and taxpayers. With the fine tuning that will be provided by the committee substitute, I believe we will continue to have a sound program for the next 4 years—a program that will continue to yield benefits to all concerned.

One of the principal changes in the current program under the committee substitute will be to reduce the minimum poundage quota from 1,440,000 tons this year to 1,240,000, effective with the 1982 crop. In subsequent years, the poundage quota would be adjusted as the Secretary of Agriculture deems necessary to cover domestic requirements.

The committee substitute will result in a further reduction in the already low cost of the program during the 4-year life of the bill. In fact, the net cost is projected to be only $2 million, which, I believe, represents the administrative cost of the program. Otherwise, there is zero cost to the taxpayer.

Mr. President, I am aware there are all kinds of cost estimates floating around concerning the peanut program. There are USDA estimates, CBO estimates, Budget Committee estimates, our committee estimates, and—I feel sure—OMB estimates. These estimates are just that, estimates. Each reflect the particular assumptions made by the particular estimator.

In the case of the Senate Agriculture Committee, we arrived at our cost estimates on an assumption that domestic peanut consumption next year would be in the range of 1,240,000 tons (farmer stock basis), and that increases in future years would be in line with the historic growth rate of 3 percent per year. Our assumptions are based on USDA's own projections in the 1979 and 1980 impact statements developed by the Price Support and Loan Division. These projec-

tions, which obviously were not made by USDA for use in consideration of the present legislation, put consumption in a range from 1,245,000 to 1,318,000 tons for the 1979–80 period. They were prepared before the disruptions in normal supply and demand trends caused by the 1980 crop disaster.

As the Senate Committee report notes:

USDA estimates that domestic usage will be in the 1,100,000 ton range rather than the 1,250,000 ton range estimated by the committee. Because the committee estimates that domestic usage will continue to increase at a level of approximately 3 percent per year, it establishes the minimum national poundage quota at 1,300,000 tons. This figure was reduced by the committee from the 1,440,000 tons provided for the 1977 act, so as to assure the lowest possible outlays for the program.

Another principal change that the committee substitute makes is to decrease the minimum price support loan level for quota peanuts from $631 to $596 per ton, effective with the 1982 crop. As in the case of other commodity programs, the minimum support level in future years will be increased on the basis of increases in production costs, excluding the cost of land. The Secretary's authority to set the support loan level for additional peanuts would continue to be tied to world market prices and conditions.

The price support protection provided to peanut farmers under the 1977 act has lagged far behind increases in production costs. Over the 4-year period of the present law the quota support level has been increased only once, in 1980 to $455 per ton. This is an increase of only 8.3 percent over 4 years. During the same time, according to USDA figures, the cost of producing peanuts has increased 44.6 percent, not including land costs. It was the consensus of the committee that the increase in support level provided under the bill is fair and equitable to producers.

Mr. President, in the weeks and months that the 1981 farm bill has been under consideration, a curious campaign has been mounted to discredit and vilify the current peanut program and to defeat the new peanut legislation approved by the Committee on Agriculture, Nutrition, and Forestry.

Fair criticism and vigorous debate are part of the legislative process that I welcome and relish. I am deeply disappointed, however, that much of the criticism of the peanut program has been more emotional than factual and reflects a bias and hostility that I find highly disturbing Seldom has such a small program been accused of such great evils.

Much of the criticism has centered on the acreage allotment system. It has been described as "monopolistic" and "feudal," serving no purpose other than to line the pockets of allotment holders.

This criticism ignores the vital role that the allotment system plays in assuring consumers a constant and abundant supply of high quality peanuts at reasonable prices and assuring producers of a stable market and fair prices at the farm level.

As it developed over the years, the peanut program of allotments and quotas has prevented the wrenching boom-and-bust cycles that many other commodities have experienced—and are experiencing at the present time.

By contrast, the peanut program has resulted in stability for the entire peanut industry—producers, handlers, manufacturers, and ultimately consumers of peanuts and peanut products. It has prevented wild swings in production and prices, which would have resulted in market gluts in some years and scarcities in others.

The present program also provides stability and order in the marketing of peanuts. Peanuts are a unique commodity. Unlike grains and soybeans, this commodity cannot be stored for extended periods by the producer to await a better market. Peanuts are a perishable commodity and must be marketed as they are harvested. Without the existing program, producers at harvest would be at the mercy of buyers, without the option of holding or storing their crop in hopes of obtaining higher prices. This is a major difference that many overlook when considering and comparing commodity programs.

Quality control is tied directly into the peanut allotment program. Peanuts is the only major American food commodity that is marketed under a voluntary but very strict quality assurance program, providing U.S. consumers with the highest quality peanuts in the world. Marketing supervision and checks built into the allotment and quota system provide the mechanism for identifying at the buying point and removing from the food chain any lot of peanuts found to have mold or to be otherwise unfit for human consumption.

Another persistent criticism is that the allotment system unfairly restricts peanut production to owners or renters of allotment and prevents nonallotment holders from growing and marketing peanuts.

That peanut production is tied to allotments is not denied. This is an integral part of the system to prevent ruinous overproduction and the boom-bust cycle, which would be bad for both producers and consumers of peanuts. But anyone can buy or rent a farm with a peanut allotment or the allotment itself. This, as we are frequently reminded, is a common practice.

There is another way for a new producer to obtain a peanut allotment, and that is through the new farm provision of the existing law. Under this provision, any eligible producers in a peanut county may apply to the local USDA office for a new allotment. The law establishes a 1 percent reserve in each State's annual allotment that can be apportioned among new producers. The Department has an established procedure under which new producers may apply for and receive new farm allotments.

Critics of the peanut program—relying on statistics produced by USDA—cite as a fact that 70 percent of all peanut production in the United States is on rented or leased allotments.

I do not know if the 70-percent figure is accurate or not. Regardless of what the true figure is, what is unusual, wrong, or evil about renting or leasing allotments in the first place? Leasing and renting of farm land is a time honored and perfectly normal agricultural practice in the United States for all types of commodities. According to the latest census data, more than 40 percent of all cropland is rented and farmed by someone other than the owner. It occurs in Indiana, California, Iowa, Alabama, and every other State of the Union.

In the case of peanut allotments, in the vast majority of cases, when a producer leases an allotment, included in that lease is the land on which to grow the crop. There is no difference in that process than a corn or soybean farmer renting his neighbor's cropland to grow those crops.

Leasing also is frequently necessary to bring together several small allotments into an economically viable family farm unit. Some 22,500 peanut allotments—or 38 percent—are less than 10 acres, and another 14,400 are between 10 and 20 acres in size. These smaller allotments are frequently combined with others to make up a practical family-farm-size allotment.

The impact of allotment rental costs on peanut products has been greatly exaggerated. The Senator from Indiana (Mr. LUGAR) said in a press release dated April 23, 1981, that "more than 20 percent of the cost of each peanut product * * * goes to pay the additional rental value" of peanut allotments. With all due respect to my friend from Indiana, I submit that this is patently absurd. Even if an average rental cost of $115 per acre is assumed, this would amount to only 1.71 percent of the consumer price of a 12-ounce jar of peanut butter selling today at $1.75. There is a vast difference between 20 percent and 1.71 percent.

Perhaps the most specious of all the criticisms that have been leveled against the peanut program is that a farmer without an allotment "would go to jail" for growing peanuts. This is an outrageous attempt to discredit the peanut program with emotional scare tactics.

After producers have approved of marketing quotas in a referendum, a farmer who produces peanuts without an allotment would be subject to cash marketing penalties based on a percentage of the Government price support. There is also a provision of the law for the collection of such penalties, which could result in court action to require payment to the U.S. Government. But none of this involves criminal offenses or criminal statutes and could not result in anyone "going to jail" for growing peanuts without an allotment. In any event, we have made it abundantly clear

in the committee substitute that only civil penalties shall apply in cases of program violations. In addition—and this is important—under the committee substitute it is expressly provided that no person may exercise allotment rights without sufficient fillable land to support the allotment. The substitute also mandates that any allotment or quota surrendered for lack of fillable land shall revert to a pool to be distributed to new growers.

Finally, Mr. President, there is the allegation that consumers would be forced to pay a great deal more for peanut butter and other peanut products under the committee bill because of the proposed increase in the price-support level. This is another flagrant emotional appeal to attempt to discredit the committee bill.

Mr. President, I would like to refer to a so-called "Inflationary Impact Statement" that has been circulated among Members of the Senate by the administration in opposition to the original committee bill. According to this sheet, some $185 million in higher costs to consumers would occur under the $631 per ton support level proposed in our bill versus the $455 per ton support level recommended by the administration. Even granting that such an increase would result, the impact on the U.S. economy and on consumers would be infinitesimal. The increase is further reduced by the committee substitute which reduces the loan level to $596 in the 1982 fiscal year.

Americans now have an aggregate disposal income of $1,945.5 billion—almost $2 trillion. The $185 million figure in the administration's sheet would amount to 0.00951 percent—less than one hundreth of 1 percent. On an individual basis, that works out to be about 84 cents of the per capita disposable income of $8,679 in this country.

The example cited in the administration's "Inflationary Impact Statement," upon close examination, is virtually indecipherable. Using the first quarter of 1980 as a base, the authors of this paper somehow manage to translate a 39.5-percent increase in the theoretical cost of peanuts in a 1 pound jar of peanut butter into a 38 percent of the total cost, conveniently ignoring the fact that peanuts account for only a fraction of the total price. They appear to build in an additional 31 cents profit on the jar of peanut butter for the manufacturer or somebody. Either that or the paper assumes it is all right for all costs of peanut butter to increase except for the peanuts, and that cost is supposed to remain at 1980 level.

I submit that this document appears to be deliberately intended to mislead and confuse the Senate on a very important matter. I hope it will be repudiated by the administration. For it is an insult to the intelligence of the Members of the Senate and to the integrity of this body.

Mr. President, I have cited only some of the unfair, prejudicial, and downright misleading criticisms that have been heaped upon the peanut program. I frankly am at a loss to understand the motivation behind this calculated attempt to destroy a program that is so important to a great many people in a large area of our Nation.

For let there be no misunderstanding about this: The destruction of the peanut program will have devastating economic, social, and human repercussions in a number of States. Peanut allotments have been capitalized into land values. Huge investments have been made in land, in allotments, and in the costly and highly specialized equipment required for the production of peanuts.

Termination of peanut allotments would cause economic disruptions and hardship all across the peanut belt. Allotment holders, of course, would suffer most, but so would small town merchants, agribusinesses, bankers, and others.

In my opinion, shou'd the present peanut program be abolished, there would be fundamental shifts and changes in peanut production and in the structure of peanut farming in this country. The most apparent effect, I believe, would be the concentration of peanut production in a relatively few hands and in a relatively few locales. The small, family-farm producer—now the backbone of peanut production in this country—would be replaced rather quickly by large scale farming operations.

Mr. President, I do not want to see this come to pass. I pray that it will not. The Members of this Senate have the opportunity to help see that it does not.

I urge my colleagues to support the peanut legislation that the Committee on Agriculture has brought to the floor. We have given our best efforts and our careful consideration in developing legislation that will maintain a sound, viable, and stable peanut industry in America—one that serves the best interests of the consumer, the producers, and the Nation.

Mr. President, throughout most of this year, the peanut producers of this country have worked diligently and conscientiously with Congress to develop new peanut legislation that would serve the best interest of consumers, producers, and taxpayers.

They have cooperated with the Senate and House Committees on Agriculture—and with the administration as well—in seeking to improve and fine tune the peanut title of the Food and Agriculture Act of 1977.

As a result of these efforts, both the Senate and House Committees on Agriculture approved, as part of the new farm bill, a peanut title that would:

Continue to provide U.S. consumers with an abundant supply of peanuts and peanut products at fair and reasonable prices and avoid boom-bust cycles in peanut supplies and peanut prices;

Reduce Government costs, which already have been dramatically lowered in 1977 the act, to minimal levels;

Continue the quality assurances program that provides consumers at home and abroad with the highest quality peanuts in the world;

Make U.S. peanut prices competitive in the world market and establish this country as the largest exporter of peanuts for food consumption; and

Provide peanut farmers with price support protection to assure them a fair return and to encourage a steady, constant production for domestic needs and to give producers an opportunity to grow additional peanuts for the export market largely at their own risk.

Mr. President, I believe the peanut provisions as reported by both the House and Senate committees are fair and reasonable. However, the legislation falls short of what the growers had originally sought and indeed deserve. It should be noted that the price-support levels for quota peanuts increased only 8.3 percent over the 4-year life of the 1977 act. Yet production costs, according to the U.S. Department of Agriculture increased almost 45 percent, even excluding land costs.

This pushed the cost of production to such high levels that under the present legislation, it was impossible to produce peanuts at a profit.

Since the Senate reconvened last week, a concerted effort has been made by members of the Senate Committee on Agriculture, other interested Senators, and by the administration, to reach agreement on certain provisions of the committee bill (S. 884) that the administration has found unacceptable, primarily on the basis of Government costs. With considerable give and take, agreement has been reached by the committee on the outstanding issues, and these compromises are reflected in the committee amendment now before the Senate.

Although the peanut provisions of the farm bill were not directly in dispute, those of us from peanut-producing areas—after consultation with the peanut grower groups—have, on our own motion, developed certain changes in the peanut provisions of S. 884 that will eliminate virtually all costs in the peanut program. The Nation's peanut producers have accepted these further concessions in the committee bill as a contribution to the reduction of overall Federal spending and to meet objections raised by some Members of the Senate.

Mr. President, I can explain the changes and concessions briefly:

First, the committee amendment reduces the quota support level to $596 per ton. This is a $35 reduction from the level in S. 884 and is in line with the reduction in support levels for other major commodities. It is also below the support level provided in the House bill, a measure that is acceptable to the administration.

Mr. President, let me point out again, that the peanut growers had initially sought, with considerable justification, a support level above what either the House or Senate committees approved. The $596 loan rate provided by the com-

mittee amendment represents a very significant sacrifice by the Nation's growers.

The second concession, Mr. President, in the committee amendment, is a reduction in the national poundage quota from 1,300,000 tons to 1,240,000 tons. This represents a 60,000 ton reduction from both the Senate and House bills and is 200,000 tons below the minimum established by present law.

This will bring about a drastic, one-step adjustment in the production of quota peanuts to a level that, even by the most conservative estimates, will be equal to anticipated domestic consumption in 1982. This will result in the total elimination of Government costs for peanut price supports. I must point out that it will also have a severe impact on producer income next year, and both the House and Senate bills had taken a more responsible approach to cushion the impact by spreading it over more than 1 year. This is another major concession that peanut farmers are willing to make in the interest of cutting Federal expenditures to the very bone.

A third change that will be made by the committee amendment is to require that every peanut allotment farm have sufficient tillable acreage so that the entire peanut allotment could be planted on that farm. If sufficient tillable acreage does not exist on the farm, the excess allotment would go into a pool for allocation to new growers. Mr. President, this change will answer one of the most persistent objections that has been made to the existing program. It is also a change that bona fide peanut producers support. Although this change will apply only to a tiny portion of the national allotment, it will eliminate those few instances that allotments have remained on farms that have been converted to country clubs, shopping centers, housing developments, or timber production.

The fourth change to be made by the committee amendment will provide an absolute answer to those who profess to believe that a nonallotment holder can be "put in jail" for growing peanuts. Of course this has never been the case. Nonallotment production of peanuts is subjected only to marketing penalties, not the criminal statutes. However, to put this issue to rest once and for all, the committee amendment adds a provision expressly providing that the penalties under the Peanut Act are civil, not criminal, in nature. No one will be sent to jail for growing nonallotment peanuts, although I should again like to point out that this was never the case in the first instance.

Mr. President, concessions and compromises are seldom pleasant, but they are a necessary part of our legislative process. It is clearly evident that the peanut farmers of this Nation have made their share, and perhaps more than their share of concessions in the development of the 1981 farm bill. They are making further concessions today in the interest of gaining approval for the committee amendment, which is vital to all segments of all American agriculture.

I urge the Senate to support the committee amendment.

Mr. BAKER. Mr. President, if there be no other Senators presently seeking recognition, and I see none, I now move to table the Lugar amendment, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Indiana. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Vermont (Mr. STAFFORD) is necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. STAFFORD), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. MATSUNAGA), is necessarily absent.

I further announce that, if present and voting, the Senator from Hawaii (Mr. MATSUNAGA), would vote "yea."

The PRESIDING OFFICER (Mr. EAST). Are there any other Senators wishing to vote?

The result was announced—yeas 42, nays 56, as follows:

[Rollcall Vote No. 256 Leg.]

NOT VOTING—2

| | |
|---|---|
| Stafford | Matsunaga |

So the motion to lay on the table UP amendment No. 544 was rejected.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, if we can have order in the Senate, I would like to make one announcement which is of importance to many Senators.

The PRESIDING OFFICER. The Senate will be in order. The majority leader has the floor.

Mr. BAKER. Mr. President, what is the pending business before the Senate?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Georgia to the amendment of the Senator from Indiana.

Mr. BAKER. I thank the Chair.

Mr. President, there will be certain matters of an official nature that will require the attendance and the attention of Senators between the hour of 12:30 and 2 o'clock.

I ask unanimous consent that no vote occur on this amendment or any other amendment prior to the hour of 2 p.m. this afternoon.

Mr. GOLDWATER. I object.

Mr. BAKER. Mr. President, I hope the Senator will consider that it is unlikely that a vote will occur before that time anyway because there will probably be substantial debate on this issue. I think to accommodate the convenience of a great number of Senators, it would be wise to place an order to make sure that we can have this in order.

Mr. GOLDWATER. I withdraw my objection.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank the Chair and I thank the distinguished Senator from Arizona.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, there has been a good deal of speculation and question about the projected cost of the farm program that we are dealing with. I wish to submit for the RECORD the cost as estimated by the Congressional Budget Office. These costs include all programs that are included in S. 884, including the peanut program itself.

I ask unanimous consent that this table be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE COST ESTIMATES—FARM BILL COMMODITIES, BASED ON AUGUST CROP REPORT

[In millions of dollars]

| | Fiscal year 1982 | | | | | | | New law | |

[1] Includes dairy program passed by Senate Sept. 15, 1981.

Mr. HUDDLESTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RECESS UNTIL 2 P.M.

Mr. BAKER. Mr. President, it is clear that there will be no business transacted by the Senate of a significant nature between now and 2 o'clock in view of the fact there is a unanimous-consent order providing against any rollcalls prior to 2 o'clock. I had hoped that some other business might be disposed of, but I believe that is not the case. Therefore, I ask unanimous consent that the Senate now stand in recess until the hour of 2 p.m. today.

There being no objection, the Senate, at 1:08 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HUMPHREY).

## DEPARTMENT OF JUSTICE AUTHORIZATIONS, 1982

The Senate continued with the consideration of the bill (S. 951) to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, under the previous order, the clerk will state the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment numbered 96 (as modified) to S. 951, the Department of Justice authorization bill.

Mr. Johnston, Mr. Bentsen, Mr. Randolph, Mr. Stennis, Mr. Long, Mr. DeConcini, Mr. Exon, Mr. Chiles, Mr. Grassley, Mr. Huddleston, Mr. Nickles, Mr. Mattingly, Mr. Proxmire, Mr. Boren, Mr. Kasten, and Mr. Heflin.

## VOTE

The PRESIDING OFFICER. The question is: Is it the sense of the Senate that debate should be brought to a close on amendment No. 96 (as modified). The yeas and nays are mandatory under the rule. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RANDOLPH. Mr. President, the Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order. Senators will cease conversations in the well. The Senate will be in order.

The clerk will not continue until there is order in the Chamber

Mr. RANDOLPH. Mr. President, I renew my statement that the Senate is not in order.

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order. Senators will cease conversations.

Mr. RANDOLPH. Mr. President, I hope the Chair will order the Senate to be in order and that there will not be the necessity to have the Sergeant at Arms enforce order in the Chamber.

The PRESIDING OFFICER. The Chair shares that hope.

The Senate will be in order.

The clerk will resume.

The assistant legislative clerk resumed the call of the roll.

Mr. WEICKER. Regular order, Mr. President. Regular order.

The PRESIDING OFFICER. The clerk will tally the vote.

Are there any other Senators in the Chamber who wish to vote?

Mr. TOWER. Mr. President, is it within the purview of the rules that I may ask whether or not I am recorded on this vote?

The PRESIDING OFFICER. Regular order has been called for.

Mr. PELL (when his name was called). Mr. President, on this vote I have a live pair with the distinguished Senator from Massachusetts (Mr. KENNEDY). If he were present, he would vote "nay." If I were permitted to vote, I would vote "aye." Therefore, I withhold my vote.

The PRESIDING OFFICER. On this vote——

SEVERAL SENATORS. Mr. President.

Mr. METZENBAUM. Mr. President, regular order.

SEVERAL SENATORS. Mr. President.

Mr. STEVENS. Mr. President, I have not voted and I desire to vote.

The PRESIDING OFFICER. The Senator has the right to vote.

The assistant legislative clerk resumed the call of the roll.

Mr. METZENBAUM. Regular order.

The PRESIDING OFFICER. The clerk will tally the vote.

Mr. WEICKER. Mr. President, regular order.

SEVERAL SENATORS. Mr. President.

The PRESIDING OFFICER. On this vote—Is there any other Senator who wishes to vote?

Mr. METZENBAUM. Mr. President, the vote has already been announced.

Mr. TOWER. No, it has not been announced.

The PRESIDING OFFICER. The Senator was in the Chamber and is permitted to vote.

Mr. METZENBAUM. The vote has been announced.

The PRESIDING OFFICER. It was not announced.

Mr. METZENBAUM. You had announced 60 to 36.

The PRESIDING OFFICER. The Senator is in the Chamber and has the right to vote.

Mr. METZENBAUM. You are making new rules as you go along, Mr. President.

The assistant legislative clerk resumed and concluded the call of the roll.

Mr. STEVENS. I announce that the Senator from Vermont (Mr. STAFFORD) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

The result was announced—yeas 61, nays 36, as follows:

[Rollcall Vote No. 257 Leg.]

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Pell, for.

NOT VOTING—2

Kennedy Stafford

The PRESIDING OFFICER. On this vote, the yeas are 61, the nays are 36. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, could we have order in the Chamber, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. METZENBAUM addressed the Chair.

Mr. BAKER. Mr. President, I have the floor, and I have asked for order. Mr. President, will the Chair restore order to the Senate?

The PRESIDING OFFICER. The Chair will announce that the Sergeant at Arms will be requested to assist if we do not have order. The majority leader wishes to conduct business. Will Members please cease their conversations?

Mr. BAKER. I thank the Chair.

Mr. President, cloture has been invoked on the Johnston amendment. I have consulted with the distinguished minority leader, with the distinguished author of the amendment, with the distinguished Senator from Connecticut, with the chairman of the Judiciary Committee, and with other members, and I believe this request has been cleared all around.

UNANIMOUS-CONSENT REQUEST

Mr. President, I ask unanimous consent that debate on the Johnston amendment, provisions of rule XXII to the contrary notwithstanding, be limited to 20 minutes equally divided and under the control of the distinguished author of the amendment (Mr. JOHNSTON) and the distinguished Senator from Connecticut (Mr. WEICKER).

I further ask unanimous consent that upon the disposition of the Johnston amendment, the bill return to the calendar pending further action by the Senate.

That is the end of the unanimous-consent request, Mr. President. I have a further statement to make in respect to it.

Mr. JOHNSTON. Mr. President, reserving the right to object, as I understand it the majority leader was going to add a proviso that the bill would come back as the pending business upon a motion of the majority leader without debate and without a vote. In other words, the motion of the majority leader would automatically cause it to come back as the pending business.

Mr. BAKER. The essence of what the Senator says is correct, but that is not part of the request. As I told the Senator in the well, or attempted to, the agreement is that the bill go back to the calendar. My additional statement to the Senator was that it is my intention at some point to motion up this bill so that he and other Senators may proceed with it as they wish.

Mr. President, I have no desire to bury this bill. Indeed, I intend to try to pass this bill. But it is not part of the unanimous-consent request that it would come up at a particular time. It is my assurance to the Senator that I intend to do that. It is my intention to do that sometime after we have disposed of necessary and urgent business of the Senate, perhaps during the month of October.

Mr. JOHNSTON. Mr. President, further reserving the right to object, I understand that there is no specific provision within the four corners of the unanimous-consent request as to when it will come up. What I have reference to is whether the motion to proceed to this bill would be debatable or would require a vote.

As I understand my agreement with the distinguished Senator from Connecticut, he is willing—and he may correct me if I am wrong—that it become the pending business at any time that the majority leader specifies it as being so, without the necessity for a debate on the motion to proceed or without the necessity for a vote of the Senate for it to become the pending business.

Mr. BAKER. Mr. President, before I agree to that request, may I inquire of the Senator from Connecticut his view on that request?

Mr. WEICKER. To respond to the distinguished Senator from Louisiana and to the distinguished majority leader, it was my intention to move ahead with some rather extended debate on this matter, even though cloture had been invoked. Then, after the vote would have been taken, which probably would have been sometime within the next week or two, we would have been back on the bill, with Members being allowed to amend or speak on the bill any way that they saw fit.

I have consistently made a commitment to the majority leader that I would not, in any way, try to interfere with the normal flow of business in this Chamber. Clearly, that kind of action would serve no purpose in the ultimate, since we would be voting on the Johnston amendment, but it certainly would hash matters up insofar as scheduling is concerned.

Therefore, I agreed to what has just been proposed here, that we have a vote on the amendment of the distinguished Senator from Louisiana. I might add, if we could, that I have a few requests to speak; if we could make it a half-hour instead of 20 minutes, I am sure that would cover it.

But I agreed to the vote being taken, with action then taking place in the form of the bill returning to the calendar. I did not want the majority leader in any way to be instructed as to when he had to bring it up. I think he has shown great good faith, both to the distinguished Senator from Louisiana—on whose side he has stood—and to the Senator from the State of Connecticut.

I will not, and the distinguished Senator from Louisiana has my word, try to delay or filibuster any motion to take this bill back off the calendar. I shall not do

that. That is the only thing that I will not do. Once that bill comes off the calendar, then we shall be in the same position that we would have been before, which is that the bill is subject to amendment and subject, by this Senator and by others, to being discussed at length.

I conclude my remarks in this fashion: This matter came to the floor exactly 3 months ago. Aside from whatever the content of the bill is or how it is viewed in the constitutional sense, it has taken 3 months to get to the point where we are now. I can assure my colleagues that it is going to take much more than 3 months before we shall ever get to passage. As long as that point has been made and as long as I make it clear to everybody what is going to happen in the future, I have no objection to the unanimous-consent request, nor do I have any objection to the request of the distinguished Senator from Louisiana that the bill, on a motion by the majority leader, be brought back here. And I will not debate that one.

Mr. BAKER. Mr. President, in view of the representations made by the Senator from Connecticut, which I greatly appreciate, and the remarks of the Senator from Louisiana, which I appreciate as well, I amend my unanimous-consent request to change the time for the debate from 20 minutes to 30 minutes equally divided.

I add to the unanimous-consent request that, at any time on a motion, a nondebatable motion of the majority leader, we may proceed to consideration of the question of proceeding to the Department of Justice——

Mr. JOHNSTON. Will the majority leader repeat that?

Mr. BAKER. That on motion without debate, the Senate will proceed to the consideration of the question of bringing up the Department of Justice authorization.

Mr. JOHNSTON. That the bill be automatically brought up upon motion without vote or without debate?

Mr. BAKER. No, no, not without vote, without debate. I really would not like to provide that it will be brought up without a vote. I think that would be a precedent that would be unfortunate indeed. I have an idea that on a nondebatable motion, in light of this colloquy, when that motion is made, it will be done on a voice vote or by unanimous consent. But I would not wish to try to abrogate the right of the Senate to speak on such an issue without unanimous consent.

Mr. President, I really must say to the Senator from Louisiana that I do not recall, in my years in the Senate, that ever having been done—that is, to obliterate the right of the Senate to speak on a motion. I have many times seen the majority leader, in consultation with the minority leader—and I add that to my request as well, Mr. President—the majority leader have the right at any time to call up a bill. That has always meant that the majority leader, in consultation with the minority leader, might ask unanimous consent that that be done or move that it be done, notwithstanding any other business pending before the Senate.

Mr. JOHNSTON. Reserving the right to object, Mr. President, the majority leader has added that it be brought up on motion of the majority leader without debate and with a vote.

Mr. BAKER. Not necessarily with a vote.

Mr. JOHNSTON. Without, necessarily, a record vote.

Mr. BAKER. Mr. President, all I have said is I am not prepared at this time to ask unanimous consent to give me the unilateral right to call up the measure and to eliminate the right of the Senate to speak on that point. I am willing to agree that the motion will be a nondebatable motion.

Mr. JOHNSTON. When the Senator says a nondebatable motion, there can be no debate on the motion to proceed.

Mr. BAKER. Yes, that is what I mean. That is the motion I am referring to.

The PRESIDING OFFICER. Is there objection?

Mr. HEFLIN. Reserving the right to object, I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I would like to reiterate the unanimous-consent request that I had put and that the Chair has not ruled on.

Mr. President, I ask unanimous consent that there be a time limitation of 30 minutes, equally divided, for debate on the Johnston amendment, the provisions of rule XXII to the contrary notwithstanding, and that the time be equally divided and controlled by the Senator from Louisiana (Mr. JOHNSTON) and the Senator from Connecticut (Mr. WEICKER). I further ask unanimous consent that, after the disposition of the Johnston amendment, that the bill be returned to the calendar and that, on motion of the majority leader, after consulting with the minority leader, that the bill be made once again the pending business on nondebatable motion.

Mr. JOHNSTON. Of the majority leader.

Mr. BAKER. Yes.

The PRESIDING OFFICER. Is there objection?

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Now, Mr. President, I believe we have all of the components of the agreement and I hope and trust there will be no further difficulty and no objection.

Let me attempt to restate the request at this time.

Mr. President, I ask unanimous consent that there now be a time for debate on the Johnston amendment of not to exceed 30 minutes to be equally divided and under the control of the distinguished Senator from Louisiana (Mr. JOHNSTON) and the distinguished Senator from Connecticut (Mr. WEICKER).

I further ask unanimous consent, Mr. President, that after the vote on the Johnston amendment the bill be returned to the calendar.

I ask unanimous consent, Mr. President, that the majority leader, after consulting with the minority leader, may, at any time, by nondebatable motion, move to take the bill from the calendar and make it the pending business before the Senate.

I further ask unanimous consent, Mr. President, that on any cloture motion which may be filed against the bill, a vote on such cloture motion not occur until the bill is once again motioned up and presented to the Senate, according to the provisions of this order.

Now, Mr. President, before the Chair rules, it is my understanding of the request that I have just put that the bill will automatically go back to the calendar after the vote on the Johnston amendment, regardless of the outcome; that it will remain on the calendar until it is motioned up by a nondebatable motion, and that any cloture motion that is filed—and I anticipate that the distinguished Senator from North Carolina will shortly seek recognition for the purpose of offering a cloture motion against his amendment—will not be voted on by the Senate until the matter is once again placed before the Senate by nondebatable motion as provided for in this order.

Further, Mr. President, that the time for that vote, as I understand the matter, would be 1 hour after the Senate convenes on the day on which the matter is presented.

Mr. President, since there may be a difference between the time when we convene and control of the time for the cloture vote under the provisions of rule XXII and the time the Senate gives its consent to return to this bill, I modify the unanimous-consent request so that the vote on any subsequent cloture motion will be 1 hour after the matter is laid before the Senate again.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I will not object——

Mr. BAKER. Mr. President, before the Chair rules, the minority leader points out to me that there may be, indeed I fully expect, a motion to reconsider and the usual tabling motion against the motion to reconsider in order to lock in the result of the vote on the Johnston amendment.

Mr. President, I modify my unanimous-consent request so that the bill will go back to the calendar only after a motion to reconsider, which shall be without debate, or a tabling motion made against it.

The PRESIDING OFFICER. Is there any objection? If not, it is so ordered.

Mr. BAKER. Mr. President, I thank all Senators. I especially thank the Senator from Louisiana and the Senator from Connecticut. Notwithstanding they have been very effective adversaries and that they have required the attention of the Senate for some time now, off and on for more than 3 months, they have been unfailingly cooperative with the leadership and I am grateful for that.

What we have done just now is to provide an orderly way to go about the business at hand, that is to say the farm bill, the O'Connor nomination, the Interior appropriation bill, other appropriations bills, perhaps the continuing resolution, and a number of other matters. But still, I have given assurance to both Senators that at some point we will return to the consideration of this matter.

The Senator from Connecticut, by his agreeing to this measure, has given his consent to proceeding to this matter without debate on the motion to proceed.

I think both Senators are to be commended for their consideration for the requirements of the joint leadership and also for their concern and their respect for each other.

Mr. JOHNSTON addressed the Chair.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, I yield myself 1 minute simply to thank the distinguished Senator from Tennessee, the majority leader, for his kind comments, and to say that this agreement was possible because of our confidence in the distinguished Senator from Tennessee to live up to not only what he tells us explicitly but to the mood and to the spirit of this agreement. We are not requiring that the bill come up at any particular time because we have confidence that the distinguished Senator from Tennessee will indeed, as he said, bring it up sometime during the month of October and in time to finish the bill this year, this calendar year.

I have full confidence that the distinguished majority leader will do so.

I yield to the distinguished Senator from North Carolina.

The PRESIDING OFFICER. The Senator from North Carolina.

## CLOTURE MOTION

Mr. HELMS. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the Helms amendment No. 69, to S. 951, the Department of Justice Authorization Bill,

Mr. Helms, Mr. Jepsen, Mr. Thurmond, Mr. Humphrey, Mr. McClure, Mr. Johnston, Mr. Cochran, Mr. Warner, Mr. Tower, Mr. Byrd of Virginia, Mr. Grassley, Mr. Dole, Mr. DeConcini, Mr. Abdnor, Mr. Exon, and Mr. Mattingly.

Mr. BAKER. Mr. President, I ask unanimous consent that it may now be in order to suggest the absence of a quorum without the time being charged against either party in control of time under the Johnston amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, how much time remains?

The PRESIDING OFFICER. There are 30 minutes equally divided. The Senator has 14 minutes.

Mr. JOHNSTON. Mr. President, I yield myself 5 minutes.

According to David J. Armor, the noted educator and sociologist from the Rand Corp. and Harvard University, no policy of the Federal Government since prohibition has been so unpopular and so unworkable as forced crosstown busing. This is a conclusion which the American people, in public opinion polls every year since 1972, say they have come to by percentages of not less than 72 percent each year. It is a conclusion reinforced by educators—by James J. Coleman in his noted report, by David J. Armor in his report, and a host of other reports and studies by noted educators.

Mr. President, today, in their vote on invoking cloture, some 61 Senators have said, "We have had enough. It is time to put limits on the excesses of forced crosstown busing," the kind of excesses that are represented by orders now being implemented in my own State of Louisiana.

If I may just give two examples: After the recent order in Baton Rouge, La., was issued, the superintendent of schools called to tell me how bad the situation is. He said that first and second graders are being bused an hour and a half in each direction. First and second graders, 3 hours on the school bus every day.

That is not an order from last year, that is an order from this year, with this Justice Department, with this President.

Mr. President, I also point out to my colleagues the case of Rapides Parish, La., to which I have alluded so many times: 30 to 40 miles busing in one direction. The excesses of those orders have been recognized by the Senate, Mr. President.

Mr. President, the question is what can the Senate, what can the Congress of the United States do about it? Many of my colleagues have said that this is a matter subject to the 14th amendment, it is a matter of constitutional law, we cannot change that. Mr. President, my answer is to read the Constitution. Particularly read section 5 of the 14th amendment, which provides that Congress may, by appropriate legislation, enforce the provisions of the 14th amendment.

What does that mean, appropriate legislation, Mr. President? We have the benefit of two rather recent Supreme Court cases, the case of Katzenbach against Morgan in 1966 and Oregon against Mitchell in 1970. These two cases dealt with section 5 of the 14th amendment the Katzenbach case with the Voting Rights Act, as well as the Oregon against Mitchell case.

In both cases, Congress, using the power under section 5 of the 14th amendment, provided for remedies which otherwise would not have existed under the 14th amendment. In both of those Supreme Court cases, the Court identified two important powers of the Congress, and they emphasized those two powers and underlined them: First, that the power of the Congress to find facts is one that is particularly recognized under our Constitution; second, that the Congress of the United States has wide discretion in the formulation of remedies. There is, in those two recent Supreme Court cases, all of the support and comfort that any supporter of the Johnston amendment could want.

It is quite true, Mr. President, that those two cases dealt with an expansion of rights under the 14th amendment rather than what some would call a contraction of rights under the 14th amendment. In that respect, it is quite true that the decisions are not four-square with the facts of the instant amendment.

But by the same token, Mr. President, there is no case which is contrary to this amendment.

What one has to do, I believe, is to look at the spirit of those cases, the spirit of the 14th amendment at the time it was enacted, as well as the spirit of this amendment, and I believe one will come to the conclusion, as did the Congressional Research Service in the study I put into the RECORD, that this matter can probably pass muster constitutionally.

I say "probably," Mr. President, because no one can say for certain, on a matter of first impression, what the Supreme Court will do. However, in my judgment and in the judgment of the Congressional Research Service and in the judgment of many other legal scholars, Congress does have that wide latitude and power under section V of the 14th amendment.

There is still another basis for the power of Congress as exercised in this amendment, and that is under article III of the Constitution, which gives to Congress the power to establish courts and provide for their jurisdiction.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. JOHNSTON. I yield myself 2 additional minutes.

There is a whole host of cases, to which we have alluded in this debate, in which Congress has exercised its power, even in cases on appeal, to take away the jurisdiction of courts.

Congress, for example, has taken away the right of a court to issue an injunction in a labor case under the Knox-LaGuardia Act, upheld by the Supreme Court, specifically using article III to restrict remedies of the courts.

In ex parte McArdle, after the Civil War, Congress took away the appellate jurisdiction of the Supreme Court to

adjudicate a case then in the process of litigation.

So, Mr. President, there is abundant authority under article III to support this amendment.

The final judgment is, and the difficult judgment is, what should Congress do if we have the power?

Mr. President, I want to make it very clear that I do not wish to turn back the clock. I do not wish to resegregate the schools. I do not wish to go back to the status quo ante, prior to the Brown decision. Far from it.

I am and have been a strong supporter of civil rights, a strong supporter of desegregation. But, Mr. President, the evidence is overwhelming. Take almost any school system one wishes. Take yesterday's article in the Wall Street Journal describing the Nashville, Tenn., situation. Busing has not worked—so says the expert who wrote the article

Take the Prince Georges situation which has been in our newspapers here, where that which was ordered several years ago is no longer working. Why is it not "working"? Because the white students are leaving the school system.

As many of the experts say, we would do much better, instead of using the schoolbus as our principal tool, to give our attention to eliminating discrimination while upgrading education. It is time to put the emphasis again on education and not on the schoolbus. The schoolbus as a means, as machinery for providing quality education has been a sorry vehicle. More important, the schoolbus as a tool of integration has been a failure. We should discontinue what has failed and use busing in a way that promises to be effective. This amendment is just that.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. Who yields time to the Senator from Pennsylvania?

Mr. SPECTER. Mr. President, the Senator from Connecticut has yielded time to me to speak on this subject.

The PRESIDING OFFICER. Without objection, the Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, I speak in opposition to the subject which has been advocated by the Senator from Louisiana.

The issue which is now before the Senate has come here along a laborous road, with cloture having been invoked earlier today. It is my submission to the Senate that adoption of this measure would pose a most serious threat to the authority, power, and jurisdiction of the Supreme Court of the United States, not only on matters relating to busing but also on all matters of constitutional import.

When the Senator from Louisiana details the failures of schoolbusing, he is speaking on a subject on which many would agree with him, and my own experience has suggested to me that busing has not been successful. But the real answer to equality of educational opportunity is a good school system in the neighborhood, regardless of the racial mixture. So, busing has not been a success.

However, the problems which have been posed by busing in the United States do not justify, in my judgment, the kind of proposal which is being advocated here today by the distinguished Senator from Louisiana. The precedents he cites in terms of interpretation of section 5 of the 14th amendment—those two cases—realistically viewed, have nothing whatever to do with the measure before the Senate this afternoon. When he refers to cases which relate to limitations on jurisdiction, the labor dispute cases have no bearing on this kind of matter, and the scope of ex parte McCardle certainly is not germane precedent for the measure which is before the Senate this afternoon.

The language of the proposal, which says:

> No court of the United States may order or issue any writ, directly or indirectly, ordering any students to be assigned to or transported to a public school other than that which is closest to the student's residence unless, . . .

With a string of circumstances setting forth the conditions, poses a total threat to the supremacy of the Supreme Court of the United States in interpreting the Constitution of the United States. The language "No court of the United States" comprehends directly the Supreme Court.

So this measure does not involve a discussion as to whether the jurisdiction of inferior courts can be limited, but this measure is a direct attack on the jurisdiction of the Supreme Court of the United States itself.

If Congress has the power to prohibit the Supreme Court of the United States from issuing a writ as defined in this statute, there is nothing to stop Congress from limiting the jurisdiction of the Supreme Court of the United States on matters involving first amendment rights of freedom of the press. There are few institutions more fundamental to the operation of a democratic society than a free and unencumbered press.

Once Congress has the jurisdiction to limit the authority of the Supreme Court of the United States to interpret the Constitution freely on this issue, there would be nothing to prevent Congress from limiting the jurisdiction of the Supreme Court of the United States on matters relating to freedom of the press.

Similarly, the first amendment right of freedom of religion poses, if any does, an even more paramount concern in the heritage of the United States of America. If Congress can limit the Supreme Court of the United States and define its jurisdiction relating to busing, a 14th amendment issue, then, similarly, Congress would have the authority to limit the Supreme Court of the United States in permitting freedom of religion in this country.

So it would be with the other rights of the first amendment—of assembly, of the right to petition the Government and so, similarly, it would be with all the constitutional rights embodied in the Bill of Rights, in the first 10 amendments, and the rights embodied in the length and breadth of the U.S. Constitution.

I suggest that the transgression which would be incurred on the Court's jurisdiction, realistically viewed, would be calamitous if this measure were to be adopted. In my judgment, with some substantial experience in law enforcement and some substantial experience on constitutional issues in the courts of this country, including the Supreme Court of the United States, there is not a chance in the world that this measure would pass constitutional muster as interpreted by the Supreme Court of the United States, for the reasons I have given. Because, in the evolution of the Government of this country, the Supreme Court has asserted the power of supremacy, and the Supreme Court is not about to let the Congress of the United States tell the Supreme Court what it can do on constitutional issues.

Mr. President, I believe that the measure which is being advanced here—at least in some quarters—is being advanced by those in Congress who are concerned that a vote against this measure may seem a vote in favor of busing, which it certainly is not, because many of us concede that busing has been a failure, and yet we argue fervently that this kind of measure should not be adopted because of the threat to the court system.

I have no reason to conclude that there are those who would favor this kind of measure to avoid that kind of adverse conclusion as to a sentiment on busing, leaving the work of declaring this kind of measure unconstitutional to the courts of the United States, including the Supreme Court.

I believe we should face this issue squarely in terms of constitutionality, and this measure should be rejected by the U.S. Senate.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, I yield myself 1 minute to reply.

First of all, I say to my distinguished friend from Pennsylvania that the case of ex parte McArdle, where the jurisdiction of the Supreme Court was taken away, involved the right of habeas corpus. So there is already precedent in Supreme Court decisions dealing with the right of Congress to deal with jurisdiction.

Whether or not ex parte McArdle is the law when it deals with primary constitutional rights such as those of press and religion I tend to doubt.

I do not know the limits of that because ex parte McArdle is an old case, an 1868 case, as I recall.

I believe the key issue is, Mr. President, whether a right is a primary right, and busing has been discussed a great deal by the Supreme Court but never as a matter of right.

Mr. SPECTER. Mr. President, will the Senator yield for a question?

Mr. JOHNSTON. I yield.

Mr. SPECTER. Is a 14th amendment right not a primary right?

Mr. JOHNSTON. There are all kinds of degrees and gradations of rights within the 14th amendment, and what I am saying is that busing is not a matter of right within the 14th amendment. Busing is one of those remedies that the Supreme Court has prescribed in the

Green case and others that must be used when everything else fails.

What we are saying in this amendment is that we make a finding of fact, that as a remedy, when it exceeds limits of time and distance, it does not work.

We are dealing with the doctor here who is prescribing——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSTON. I yield myself an additional 1 minute.

We are dealing with the doctor here who is prescribing 10 aspirin for the patient. Those 10 aspirin tablets do more harm than good. He should limit that to two aspirin when he thinks it is appropriate.

Mr. SPECTER. Is the Senator confusing or mixing rights with remedies when he talks about remedies? When he talks about busing, is he not realistically talking about a remedy as opposed to the question which I propounded to the Senator? Is the 14th amendment not dealing with a primary right and is due process of law not a primary right on equal constitutional footing with first amendment rights?

Mr. JOHNSTON. What the Senator said is that busing is a remedy and not a right, and with that I agree. With all the decisions of the Supreme Court on this subject, there is none that I am aware of which said that busing is a right or a remedy which must always be used.

There is also a great deal of discussion to the effect that it has been abused, and a number of Justices have spoken of that.

The PRESIDING OFFICER. The additional minute has expired.

Mr. JOHNSTON. How much time do I have remaining?

The PRESIDING OFFICER. Two minutes and 55 seconds.

Who yields time?

Mr. WEICKER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Seven minutes and 46 seconds.

Mr. WEICKER. Mr. President, in his letter to this Senator of August 24, 1981, the president of the American Bar Association included a report with recommendation of the association.

I ask unanimous consent to have that report and letter printed in the RECORD in its entirety at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMERICAN BAR ASSOCIATION,
*Chicago, Ill., August 24, 1981.*

Hon. LOWELL P. WEICKER,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR WEICKER: On August 11, the House of Delegates of the American Bar Association overwhelmingly approved a resolution opposing congressional curtailment of the jurisdiction of the Supreme Court or the inferior Federal courts for the purpose of effecting changes in constitutional law. This resolution was brought to the House of Delegates because of the many bills which are pending in Congress to strip the Federal courts of jurisdiction to hear cases on controversial subjects such as busing, school prayer and abortion. A copy of the resolution, and a copy of the report which accompanied it before the House of Delegates are enclosed.

At best the pending legislation is of questionable constitutionality, but in any event it is, in my judgment, expressive of an extremely poor policy with serious, adverse implications for the future. If lawmakers, or others, believe our Constitution, as interpreted by the branch of government to which its interpretation was entrusted is wrong, the answer lies either in the appellate judicial process itself or in the amendment of the Constitution by the means provided in that Constitution. Anything else represents a change in our basic of government that might please some persons today and be used tomorrow to destroy things in our system that the same persons hold dear.

Although the Secretary of the Association will formally advise the President, the Attorney General, the Chief Justice, and the relevant committees of the Congress of the action taken by our House of Delegates, because of the grave importance of the subject, the fact that it will again be before the Senate immediately upon the reconvening of the Congress, and my strong support for the action of the House of Delegates, I personally call it to your attention and urge your assistance in defeating any such legislation.

Sincerely,

DAVID R. BRINK.

Enclosures.

---

REPORT WITH RECOMMENDATION

RECOMMENDATION

Whereas, numerous bills are now pending in Congress that would curtail the jurisdiction of the Supreme Court of the United States and the inferior federal courts, for the purpose of changing certain decisions of the Supreme Court interpreting the Constitution of the United States; and

Whereas, historically, the American Bar Association has opposed the manipulation of the jurisdiction and powers of the Supreme Court in order to alter constiutional decisions which can be done only through constitutional amendment.

Be it resolved, that the American Bar Association opposes the legislative curtailment of the jurisdiction of the Supreme Court of the United States or the inferior federal courts for the purpose of effecting changes in constitutional law.

REPORT

Before the 97th Congress are more than a score of bills which would strip from the original jurisdiction of the lower federal courts certain subject areas involving controversial decisions of the Supreme Court of the United States, notably abortion, school prayers, and busing. Enactment of such legislation would require persons claiming rights under one or another of these decisions to bring suit in state courts. Moreover, several of these bills would deny the Supreme Court appellate jurisdiction to review the decisions of the state courts with respect to those issues that could be brought only in the state courts.

Sponsors of these bills clearly avow that their purpose is to bring about an altering of the constitutional interpretations that now prevail. The belief is apparently that state courts, if given exclusive power to decide such suits without fear of Supreme Court review, will not follow the precedents established in these areas by the Nation's highest Court.

The Committee recommends to the Association the adoption of this resolution because of one overriding conviction: the necessity to protect the integrity of the courts of this Nation, federal and state, from misdirected legislative efforts to achieve something that can be done only through constitutional amendment. The issue is not abortion; it is not busing; it is not prayer in the public schools; it is not any of a number of things that may occasion dissatisfaction with particular decisions. We are sure that the Members of the Association have many various positions on these substantive questions, as we do. But the real issue, the only issue, is whether, as a matter of policy and of constiutional permissibility, this Nation is going to adopt a device whereby each time a decision of the Supreme Court or a lower federal court offends a majority of both Houses of Congress the jurisdiction of the federal courts to hear that issue will be stripped away. We do not believe that is a system the Framers intended nor one that we should strive to institute.

Supreme Court decisions interpreting the Constitution establish binding precedents which are subject to alteration by the people through the process of constitutional amendment. The Framers provided in Article V a means of changing the Constitution and deliberately made it difficult to achieve. The "leaden-footed process of constitutional amendment," as Justice Frankfurter called it, with the requirement of extraordinary majorities in Congress and among the States, was designed to make sure that transient majorities could not easily change our fundamental law. Are we to believe that after constructing this formidable barrier to easy change, the Framers intentionally or inadvertently also put in place a system in which simple majorities could bring about a rewriting of constitutional law?

The American Bar Association has long opposed efforts, from whatever spectrum of the political scene, to alter constitutional interpretation through means other than constitutional amendment. We stood in opposition to the "Court-packing" plan of the late 1930's, which would have altered prevailing law by stacking the Court's membership. More than thirty years ago we called for the adoption of assurance that jurisdictional manipulation would not and could not be used to work substantive changes in the Constitution. In 1958, the Association opposed bills pending in Congress that would have denied the Supreme Court review of decisions involving alleged subversives in various fields. That policy is Association policy today and the Committee calls on the House to reaffirm it and extend it.

Central to this position is recognition of the great power which Congress possesses under the Constitution to structure and to allocate the jurisdiction of the Supreme Court to hear appeals and the jurisdiction of the lower federal courts—and of the limits on that power. Article III stipulates that the High Court has appellate jurisdiction over practically the entire range of federal judicial matters, subject to such "exceptions and regulations" as Congress provides. Clearly, then, Congress may regulate how cases come to the Court and could deny the Court appellate jurisdiction over some classes of cases altogether, as in fact it has historically done. It could, for example, make a lower federal court's decisions with respect to interpretation of the tax laws or admiralty issues final.

Even greater is Congress' power with respect to the lower federal courts. The compromise at the Constitutional Convention was to create "one Supreme Court" and to leave in legislative discretion whether and when to create and to do away with any "inferior" federal courts. Some of the Framers wanted constitutional assurance of lower courts, but the prevailing number thought that Congress should be able to leave to state court adjudication matters of national interest, subject to Supreme Court review. And to safeguard the national interest and the integrity of constitutional rights, the Framers wrote in Article VI, the "Supremacy Clause," the guarantee that the Constitution, federal laws, and treaties would be the "supreme law of the land" and that "the judges in every State shall be bound thereby, anything in the Constitution or laws of any

State to the contrary notwithstanding." Moreover, the same Article requires state judges, as well as all other state officers, to be bound by oath or affirmation to support the Constitution of the United States.

Necessarily, it follows that if the Constitution empowers Congress to provide or not to provide for lower federal courts, it empowers Congress to vest in such lower federal courts that it creates all or only some of the jurisdiction it could give and thus to allocate between state and federal courts the judicial power of the Nation in such ways as it deems to serve the best interests of the States and the Nation. That has been the understanding from the beginning on which Congress has acted and the decisions of the United States Supreme Court are consistent in affirming the correctness of that understanding.

It is thus not with any reservations with respect to congressional power generally that the Committee recommends this resolution. Rather, we are actuated by specific constitutional reservations, more substantial as to Supreme Court appellate jurisdiction than as to lower federal court jurisdiction, and by what we believe to be compelling policy considerations against the propriety and desirability of the bills now pending before Congress.

Even were the constitutional considerations compellingly clear in favor of the validity of these bills, as they are not, we would urge opposition.

First, if it is likely, as we by no means concede it is, that the meaning ascribed to a constitutional provision can be changed by the simple device of divesting jurisdiction from one set of courts and giving it to another, then indeed we have a Constitution writ on sand and the integrity of our amending process is eroded. It is central to our fundamental Charter that ordinary legislation can be changed through ordinary legislation and the Constitution only through amendment. We should resoundingly reject the counsel of those who tell us there is another way. Down that route lie barely-hidden hazards to constitutional governance.

Second, to accept the explicit judgment of the sponsors of these bills that shifting jurisdiction will result in substantive change requires us to dishonor the thousands of state judges who by oath and conscience are bound to adhere to established precedent enunciated by the Supreme Court. We do not doubt that the great majority of state judges will do their duty. Nonetheless, this legislation is pernicious in concept even if it does not achieve its purpose.

It is bad because it suggests state judges will depart from their oaths. It is bad because it constitutes a congressional invitation to them to depart from their oaths; it says to state judges that Congress believes some decisions are so wrong they ought to be changed and these judges should do it. It is wrong because hundreds or thousands of state judges who are subject to periodic elections will be put in peril. The same interest groups that extract from an elected Congress jurisdictional alterations will demand from elected state judiciaries that they accept the congressional invitation to change. Federal judges are insulated from this and other pressures; the Framers deliberately provided for independence to prevent just these pressures. Congress should not subject state judges to often hard choices between oath and career.

Finally, if most state judges honor their oaths, the status of the objected-to constitutional decisions will be frozen in place. The Supreme Court cannot hear such cases and perhaps overrule them or alter them in any way. And as new fact situations arise, state court interpretations will begin to create somewhat different rules which will vary from State to State.

Third, either because of disagreement with the substance of these decisions or because of electoral pressures, some state judges may indeed accept the invitation of Congress and refuse to follow Supreme Court precedent. Because there would be no Supreme Court review, in those States federal constitutional law would change and the Constitution would mean something different from State to State. This result would be pernicious because fundamental liberties—whether the ones which are the subjects of these bills or others in the future if these succeed—will have been altered in some States and depreciated in all because of the demonstration that, contrary to what we have always believed, constitutional rights are subject to evanescent majority opinion. While the constitutional rights at peril today may not be valued by some, those at peril tomorrow may be freedom of speech, or just compensation for property taken for public use, or the guarantee against impairment of the obligation of contracts.

Even were Congress to adopt an approach, which is found in a few of the pending bills, of depriving the lower federal courts of jurisdiction and continuing Supreme Court review of state court decisions in those areas, we believe that should be opposed as well. Basic to that effect would be a conclusion that alteration of substantive law could still be achieved which contains the same insult to state judges and the same possible injury to them. Supreme Court review could always alleviate some of the problem should some state judges depart from precedent, but the High Court's caseload is such that it could insure adherence to precedent only by taking an inordinate number of state cases in these areas to the neglect of its many other functions in interpreting national law.

Certainly, in the absence of Supreme Court review, the command of the Supremacy Clause that the Constitution be the "supreme law of the land" could become a nullity. Since the adoption of the Judiciary Act of 1789, a constant feature of the history of federal court jurisdiction in this country, upon which the Nation continues to depend, has been the review by the United States Supreme Court of state court interpretations on questions of federal constitutional law. If, as Justice Holmes reminded us, a page of history is worth a volume of logic, that singular fact stands as a practically unanswerable argument against jurisdictional legislation that would remove Supreme Court review of state court interpretation of the Constitution.

With regard to the constitutional validity of these bills, the Committee doubts that, with respect to the Supreme Court's appellate jurisdiction, they can be sustained as proper "exceptions and regulations" and we have reservations about the bills' divestitures of lower federal court jurisdiction as well. Numerous arguments have been addressed to the question, some based on theories of the "essential functions" of the federal courts, some on equal protection concepts governing the decision to restrict jurisdiction over certain disfavored issues, but we believe the correct analysis to be grounded upon what limits the Constitution itself places upon congressional exercise of any of its granted powers. The Constitution explicitly authorizes Congress to make exceptions to the Supreme Court's appellate jurisdiction and implicitly to determine what, if any, jurisdiction the lower federal courts are to have. Proponents of these bills read these authorizations not only as if they are plenary powers but as if they are completely unrestrained. But this cannot be so. The Constitution authorizes Congress to regulate interstate commerce, to tax, to spend money, to create a postal system. None of these powers is conferred in language that then says, "but you cannot regulate commerce to deny the right to transport political literature across state lines," or "but you cannot bar from the mails newspapers that oppose the position of the majority in Congress." Rather, these powers are conferred in the manner in which Chief Justice Marshall described the commerce power in *Gibbons* v. *Ogden*, "This power, like all others vested in Congress, is complete in itself, and may be exercised to its utmost extent, and acknowledges no limitations, other than are prescribed in the Constitution."

Just so is the power to structure jurisdiction. It is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations, other than are prescribed in the Constitution. And what is prescribed in the Constitution? The First Amendment, the Fourth Amendment, and the Fifth Amendment, and all the other limitations upon the powers, conferred on Congress in other parts of the Constitution obviously are those limitations. They restrain the power of Congress to legislate with respect to other constitutional provisions under granting clauses which would appear on their face to be unlimited. To construe the congressional power to structure jurisdiction the way the proponents would construe it would be to make it the only power conferred on Congress that is beyond the constraints of other provisions of the Constitution. Obviously, this cannot be so.

Important to this issue is the fact that while the authorization to Congress to structure the jurisdiction of the courts is contained in the body of the Constitution adopted in 1789, the relevant limitations are in the Bill of Rights, proposed and adopted in 1791, which are operative as to all of Congress' powers conferred in the Constitution itself. Thus, even if the Framers in the Convention did not conceive of the jurisdictional powers being limited, although it is likely they did, adoption of the Bill of Rights did so limit them. Madison, we must remember, stated in the House of Representatives on June 8, 1789, that the amendments he proposed would not be "parchment barriers" to federal action, because "independent tribunals of justice will consider themselves in a peculiar manner the guardians of those rights."

No Supreme Court precedent stands in the way of this reading. The McCardle case (1869) is of limited value, not only because it arose in the context of post-Civil War radicalism, but because, as the Court plainly stated, it did not bar all access to the Supreme Court but only one avenue of appellate review. Within three years of McCardle, the Court in the Klein case (1872) held unconstitutional an attempted exercise of congressional power over its jurisdiction for the purpose of nullifying the President's pardoning power. Certainly, McCardle lends support to the proponents of these bills but far less support than they pretend.

The only complexity that enters into the argument is that when Congress removes from the jurisdiction of the federal courts an issue it does not by that act alone violate one of the constitutional constraints. That is to say, when it denies to the lower federal courts and to the Supreme Court authority to hear a suit arising out of the institution of a prayer in the public schools, it does not establish a religion. The establishment clause is violated when some state or local authority imposes a prayer requirement and a state court refuses to follow Supreme Court precedent and to strike down the imposition. But just as Congress could not itself violate the establishment clause it cannot authorize the States to violate the establishment clause. The authorization when acted on in the jurisdictional context would violate the establishment clause and could not validly prevent exercise of the Supreme Court's appellate jurisdiction to give a remedy for the violation. The congressional jurisdiction provision would be void.

We think it plain that the Constitution thus bars a manipulation of the Supreme Court's appellate jurisdiction for the purpose of effecting substantive changes in constitutional law. More difficult is resolution of the issue when what Congress enacts takes from the federal and gives to the state courts jurisdiction to entertain such suits subject to Supreme Court review. Theoretically, High Court review should prevent effectuation of the forbidden constitutional change and save the statute. But it may be that the practical difficulties of Supreme Court review do not allow for adequate protection of constitutional rights under the circumstances. It may be that state legislatures would restrict state court jurisdiction and powers to afford adequate relief or to process cases that can be taken to the Supreme Court with sufficient promptness to protect rights. It may be that other unforeseen situations arise. In that eventually, can it be doubted that serious constitutional questions would arise?

Because the policy considerations are so substantial and because the constitutional propriety of these bills is open to such serious reservations, we urge the House to adopt as the position of the Association a simple, forthright policy: to oppose the curtailment of the jurisdiction of the federal courts for the purpose of effecting constitutional change that is properly the province only of the amending process. Irrespective of the subject involved and regardless of our individual beliefs with respect to any of them, the overriding consideration is that we support the integrity and independence of federal courts, whether we agree with particular decisions or not, and that we support the integrity and inviolability of the amending process.

We ask reaffirmation of the principle that Elihu Root, leader of the American bar, enunciated in 1912. "If the people of our country yield to the impatience which would destroy the system that alone makes effective these great impersonal rules and preserves our constitutional government, rather than endure the temporary inconvenience of pursuing regulated methods of changing the law, we shall not be reforming, we shall not be making progress, but shall be exhibiting . . . the lack of that self-control which enables great bodies of men to abide the slow process of orderly government rather than to break down the barriers of order when they have struck the impulse of the moment."

In Number 78 of "The Federalist," Alexander Hamilton explained that federal judges had been given the maximum degree of independence and protection possible because they had a critical function to perform. They must assure, he said, that the limitations on legislative authority are enforced. "Limitations of this kind can be preserved in practice no other way than through the medium of the courts of justice, whose duty it must be to declare all acts contrary to the manifest tenor of the Constitution void. Without this, all the reservations of particular rights or privileges would amount to nothing."

We do not believe the great rights set out in the First, Fourth, Fifth, and other provisions of the Constitution "amount to nothing." We deem it critical to their continued meaningfulness that these bills under consideration and others like them be defeated.

Respectfully submitted,

Richard R. Bostwick, W. Gibson Harris, Elaine R. Jones, Johnny H. Killian, Hon. Harry Phillips, Hon. H. Barefoot Sanders, Irving R. Segal, Benjamin L. Zelenko, Edward I. Cutler, Chairman.

Mr. WEICKER. The section I wish to emphasize, and this is a good point I think with which to lead off the debate on this amendment, is that paragraph which states as follows:

The Committee recommends to the Association the adoption of this resolution because of one overriding conviction: the necessity to protect the integrity of the courts of this Nation, federal and state, from misdirected legislative efforts to achieve something that can be done only through constitutional amendment. The issue is not abortion; it is not busing; it is not prayer in the public schools; it is not any of a number of things that may occasion dissatisfaction with particular decisions. We are sure that the Members of the Association have many various positions on these substantive questions, as we do. But the real issue, the only issue, is whether, as a matter of policy and of constitutional permissibility this Nation is going to adopt a device whereby each time a decision of the Supreme Court or a lower federal court offends a majority of both Houses of Congress the jurisdiction of the federal courts to hear that issue will be stripped away. We do not believe that is a system the Framers intended nor one that we should strive to institute.

That states as eloquently as is possible the argument against adoption of the Johnston amendment.

The American Bar Association has stated clearly the case on behalf of the independence of the courts of this country.

The other individual who should be in this Chamber is the President who should state equally forcefully and with equal clarity the case on his behalf for preserving the powers of the executive branch of Government, preserving the powers of the Office of President. He is already achieving what he wants as a matter of policy in having a go-slow on the whole subject of integration as it relates to the school system in this country. But the powers of his Office are of his office; they are not his. So he should also be here making the argument that the legislative branch of Government has no right via the Johnston amendment to diminish those powers.

Mr. President, how do we get here in the first place? How is it that the Members of this body do not like what it is that the Supreme Court and the Justice Department and various administrations have done? How is it that they complain that the courts are legislating?

It is because we have failed to legislate. Congress has not gone ahead and created a system, albeit expensive, which does guarantee equality of educational opportunity and equality insofar as the quality of education is concerned, but rather we have passed the buck on the matter of integration to the judiciary. And now, when we do not like the result, now we show our courage.

That courage would have been far better exhibited in this Chamber 20 and 30 years ago.

So that is how we got here. And during this last vote and the ones that have taken place prior to it I cannot tell you the number of colleagues that came to me in the Chamber and said, "Senator, we know you are right. We know you are right but have no fear the Supreme Court will declare this amendment unconstitutional."

And I have no doubt they will. But that is a decision of leadership to be made here in the Chamber and because we did not do it in the past is exactly why the trouble confronts us now.

This bill was passed as much by those Senators who fear for the busing label on their reelection efforts as for any other reason. Even I, as the principal in this filibuster event, have a difficult time in a State like Connecticut explaining that this is not a busing issue but rather that it relates solely to the Constitution. So I can sympathize with how much more difficult it is for someone on the fringes of this particular debate to explain what it is all about.

But that does not mean that the explanation should not be made. It has to be made. If indeed we do not want imperial residencies or we do not want imperial judiciaries, then it is important that Congress exert itself, stand up for that Constitution, stand up for the rights which are ours and belong to every other citizen of this Nation.

Mr. President, mind you, I do not even get off on the hook that this is unconstitutional or a bad law. It also is mighty bad policy.

I do not think most of my colleagues even realize what they have signed their names to here in the sense of a finding of facts. Read the amendment. There are probably not three Senators out here who could attest to firsthand knowledge of the facts which they have just stated as being the case in our society.

So I hope that the amendment will be rejected. I rather doubt that it will be.

But, Mr. President, it is my hope that at the end of this, my second term in the Senate, this will not be law.

I yield the floor.

Mr. JOHNSTON. Mr. President, how much time remains?

The PRESIDING OFFICER. Two minutes and fifty seconds.

Mr. JOHNSTON. Mr. President, I yield myself 1½ minutes.

Mr. President, first of all, in reply to the distinguished Senator from Pennsylvania, with respect to remedies, it is a difficult and close distinction—the denial of a remedy as opposed to the denial of a right.

I invite his attention to the Harvard Law Review article in volume 66 entitled "The Power of Congress to Limit the Jurisdiction of Federal Courts and Exercise in Dialectic" by the distinguished Prof. Henry M. Hart, Jr. I understood he wrote the textbook on the subject. One particular quote from that article I think is particularly pertinent here. He says this:

The denial of any remedy is one thing—that raises the question we're postponing. But the denial of one remedy while another is left open, or the substitution of one for another, is very different. It must be plain that Congress necessarily has a wide choice in the selection of remedies, and that a complaint about action of this kind can rarely be of constitutional dimension.

Mr. President, I also reply on the question of the American Bar Association. The American Bar Association, in spite of numerous requests from me, never considered section 5——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. JOHNSTON. Mr. President, I yield myself another additional half minute.

They never considered section 5 of the 14th amendment. They did not deal with my amendment, although I requested them to do so, and indeed their recommendation deals only with "jurisdiction of the Supreme Court or the inferior Federal courts for the purpose of effecting changes in constitutional law."

And we do not plan to change constitutional law in this amendment.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. WEICKER. Mr. President, I yield myself 10 seconds only in response, because I had to go through this exercise with the Senator from Louisiana, what the American Bar Association did or did not say. What they said in this first letter and second letter, and they had the whole American Bar Association vote on it, they said thumbs down with the Johnston amendment.

I yield the remainder of my time to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, how much time has the Senator from Connecticut generously yielded to me?

The PRESIDING OFFICER. There is 1 second remaining.

Mr. SPECTER. Mr. President, I opt not to accept his yield.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I will not take my full minute, except to say we could debate the ABA on another day. That is a very long story. They did not please me by their action, nor did they fully support those in opposition to this amendment.

Let me simply say, Mr. President, there is broad support constitutionally for this amendment. I cannot tell the Senate it is absolutely clear that there is a case on point, but, in my judgment, as in the judgment of the American Law Division of the Congressional Research Service, there is a sound basis for the Congress in making findings of fact and in choosing other remedies where remedies have proven to be ineffective. That is what we are doing here, tailoring a remedy so that it will be effective in implementing constitutional law. I ask my colleagues to pass the amendment.

Mr. President, I ask unanimous consent that my name be added to the amendment. I understand it was not on there.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. KASSEBAUM. Mr. President, the Senate is currently engaged in the most recent of a long series of efforts to eliminate busing as a tool for desegregation of our Nation's schools. The floor debate has reflected all of the intensity and controversy which has been played out time and again at local school board meetings and in the courts.

Public opposition to busing has reached the point that it is clearly only a matter of time before it is abandoned as a national policy. Congressional action and Justice Department litigation decisions may well accelerate the process, but—even in the absense of such efforts—I am convinced the demise of busing would be imminent.

This is true due to the simple fact that busing has failed. Although not without its successes in the past, busing now serves to frustrate rather than promote the goals it is intended to achieve. Bitter busing disputes have caused us to lose sight of the fact that what we really want is the assurance that our Nation's schoolchildren have the opportunity for a quality education regardless of race.

The educational neglect of black children which preceded the Supreme Court decisions initiating the process of school desegregation cannot be condoned. It is a shameful part of our national history which we cannot afford to repeat. My own opposition to busing as a technique for desegregation does not imply either opposition to school integration or an arcane desire for a return to old ways and old mistakes.

What I do believe is that busing controversies have consumed time and energy which could have been more productively channeled toward improving our school system. Some of our finest minds and our most concerned citizens have been poring over busing routes and assignment plans, paying far less attention to ways in which the schools at the end of those routes can better serve students.

It is time that we move away from our preoccupation with procedure and begin to focus on substance. There are many other avenues for achieving our real goals which we should be exploring. Nearly any person who reads a daily paper would be able to name a dozen or more U.S. cities which are in the midst of divisive busing battles. However, that person would be much harder put to identify even one example where magnet schools or other creative approaches have been established.

Alternatives are available to us—alternatives which hold the promise of upgrading the educational achievement of all our Nation's students. I urge that we move from confrontation to cooperation in making that promise a reality.

Mr. HEINZ. Mr. President, since the 1950's, the Federal Government has attempted to end racial discrimination in our Nation's schools by attempting to remedy segregated, or dual educational systems. I have been, and remain, committed to upholding the 14th amendment to our Constitution by guaranteeing equal educational opportunity for children of all races and national origins.

In the past, I have supported legislation to redress unlawful discriminatory practices in all areas, including housing, voting, employment, services, as well as education. And, I remain united with many Americans in the hope of eliminating incidences of unlawful discrimination which deprive individuals of equality under the law.

While I remain firmly committed to upholding the Constitution, I recognize that busing, which has served as a principal Federal remedy for segregation, has occasioned exorbitant social and economic costs. In return, we have reaped little reward.

Therefore, I believe that busing is an inappropriate tool of the Federal Government to effectuate equality of opportunity in education, and could only accept it when used to remedy certain instances where, without busing, children would be deprived of equal education. Furthermore, I believe busing should only be ordered when segregation in fact is coupled with evidence of a discriminatory intent on the part of school officials. School districts should be subject to busing only where discriminatory intent has been a principal motivating factor in creating segregated schools.

Mr. President, I have carefully examined the amendment offered by my distinguished colleague from Louisiana. While I am sympathetic to a number of the objectives of sponsors of the Neighborhood School Act Amendment, and while I would very much like to support legislation to curtail the use of forced busing as a tool for achieving an arbitrary racial balance in the schools, I cannot support the Johnston amendment for two reasons.

First, I am deeply troubled by the retroactive applicability of the amendment. This amendment would allow segregation cases for which busing has been ordered as a remedy for years past to be reopened. The reconsiderations and disputes about whatever has happened in the past, for better or for worse, could create disruptions in the lives of thousands of students and families across our Nation. And the effect of this amendment would therefore in my judgment, be divisive, confrontational, and counterproductive.

Second, this amendment is very broad and far-reaching in a very vital area of law—constitutional rights.

A number of highly respected legal authorities have stated for the record that the amendment is unconstitutional. Without the benefit of extensive hearings on this subject which—in depth hearings have never been held on this legislative approach, I would remind you—Congress is ill-advised to enact any measure subject to a plausible claim of unconstitutionality.

● Mr. RIEGLE. Mr. President, I have long opposed court-ordered school busing because it is an ineffective device for achieving integrated schools and high-quality education for all our students.

At no time has the Congress ever voted for busing—or have I voted for busing. Busing plans have come from the courts, not from the Congress. Here in the Senate I have consistently voted to prohibit forced busing that would result from administrative actions by the Department of Health, Education, and Welfare, a limitation within the legal reach of Congress.

Even the courts have now come to realize that forced busing usually has negative consequences, and the courts themselves have steadily moved away from busing and toward other methods of achieving integrated, high-quality education.

While I do not favor busing, I do fully recognize that our Constitution divides

Federal power and creates three separate, but equal branches of Government.

When the courts invade the jurisdiction of the Congress—or the Congress invades the jurisdiction of the courts—we violate both the spirit and structure of our Constitution. I have always opposed these unconstitutional invasions of power by any of the three branches of Government and I will continue to do so.

So, while I oppose busing, I do not believe that Congress has the constitutional authority to tell the courts exactly how to settle each and every case they must deal with. The court derives its own legal authority from the Constitution, as does the Congress and neither branch can legally deny or invade the constitutional authority of the other.

The aim of the original Johnston amendment, to sharply limit the amount and degree of court-ordered busing, is a goal I support. I believe, however, that the effort to achieve this goal must be done in a manner that does not violate the Constitution in the process. It should also be noted that we find ourselves in a parliamentary situation where we must make these crucial votes without a proper set of public hearings conducted within the committees of jurisdiction.

We cannot properly take unconstitutional actions on a given issue, no matter how strongly we feel about that issue.

Therefore, I once again state my forceful opposition to court-ordered busing, and I would urge the sponsors of this amendment to devise another legislative approach to this problem that will not violate the Constitution; and yet accomplishes the goal of further limiting court-ordered actions of this nature.●

The PRESIDING OFFICER. All time has expired. The question is on agreeing to amendment No. 96, as modified, offered by the Senator from North Carolina (Mr. HELMS), the so-called Johnston amendment, as a substitute for amendment No. 69 offered by the Senator from North Carolina, at the end of the language proposed to be stricken by the first committee amendment. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Vermont (Mr. STAFFORD) is necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. STAFFORD) would vote "nay."

The PRESIDING OFFICER (Mr. CHAFEE). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 60, nays 39, as follows:

[Rollcall Vote No. 258 Leg.]

YEAS—60

NOT VOTING—1

Stafford

So Mr. HELMS' amendment (UP No. 96), as modified, was agreed to.

Mr. JOHNSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## AGRICULTURE AND FOOD ACT OF 1981

The PRESIDING OFFICER. Pursuant to the unanimous-consent agreement previously arrived at, the Senate will now resume consideration of the pending business, which is S. 884, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The Senate continued with consideration of the bill.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, for the dozen years I have been in Congress serving on both the House and Senate Agriculture Committees, it has been essential to form a coalition of commodity groups, agribusiness, and some cooperation by consumer groups to pass a farm bill. At this time, there is no effective coalition to pass a farm bill.

Through use of the very tactics that a coalition seeks to avoid, two commodity groups have been singled out by Senate votes to absorb devastating program restrains. Dairy and peanuts have been on the firing line first. A depressing amendment on the dairy program has been adopted by the Senate.

Dairy farmers are shell-shocked. These family operators have twice-a-day work 7 days a week, 52 weeks of the year, milking their cows.

It is a grueling way to make a living. They are now forced with lower prices for milk knowing their costs of operation are increasing and that further debt is a reality at interest rates of 20 percent.

There is no coalition for a farm bill that includes them.

Peanut farmers now face a similar fate.

Although the Senate Agriculture Committee reported S. 884, it should not be looked upon as a bill that is a bonanza for farmers and ranchers that produce any agricultural commodity. That bill is a retrenchment bill—a retreat from helping to stimulate a second agricultural economy in the United States. That is a mistake because this sick domestic economy of ours needs vigor and vitality that our most basic U.S. industry—agriculture—can provide if it is allowed to do so.

Over the past several years, our increasing agricultural exports have provided each year a shot at a favorable balance of payments. Our agricultural abundance has produced food at reasonable prices.

Farmers and ranchers have suffered the cheap commodity prices for themselves that they receive while their costs have risen. Increases in food prices at retail have, for the most part, been the result of increasing costs for processors, transportation, and retailing. Producers' prices for commodities such as livestock, poultry, dairy, grain, cotton, sugar, wool, and so forth have not been gaining enough to keep up with the increasing costs.

Despite all of this, S. 884, as reported by the committee, made further cuts, restrictions, and price constraints for agricultural producers. It is a bill that further cheapens commodity prices—a sop to a "cheaper food policy."

Now comes the administration again. Having accepted the President's budget in the Committee with S. 884, the Administration asked for further reductions. Last week, they presented to three sessions of the Senate Agriculture Committee additional sniveling cuts concerning some commodities.

Their 11th hour package of modifications has succeeded in dynamiting the very weak coalition that had formed to back S. 884.

Mr. President, the administration may reap a harvest of bitter fruit. Two out of three farmers and ranchers supported President Reagan a year ago. The hemming and hawing to further weaken the farm bill may result in so dividing the coalition as to make it impossible to agree on any bill.

That is not an economic recovery program. It is a return to the basic Agricultural Act of 1949. Every commodity group, every farm and ranch organization will review how that would affect us.

The administration's last-minute manipulations to alter and further restrict the farm bill not only puzzle me but have sent such confusing figures for budget costs to the Senate that no one can accurately portray solid cost estimates.

The only solid estimate is that farmers and ranchers producing America's food and fiber will be losers.

They are entitled to better treatment. A coalition is necessary to pass the farm bill. The administration is preventing support for a bill from a broad-based coalition.

Mr. PRESSLER. Will my colleague yield?

Mr. MELCHER. I am delighted to yield to the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I commend my colleague from Montana for his remarks. I am in full agreement. There is such frustration on my part that I have talked with some of my colleagues about the possibility of a filibuster on this bill to try to get back to an extension of the present farm bill, which would be better. The point is that many Midwestern Senators of both parties have patiently supported the administration's economic programs and now find that the commodities dearest to us are those that are first to be cut. I do wish there could be an agreement that we could get the commodities back together. The farm bill we are coming out with is perhaps the worst in my 7 years here, from my State's point of view. I am very concerned about what is happening.

Let me also say that I know there are many talks under way at this moment about the treatment of wheat in particular.

I am one who believes our target price and loan price for wheat sets the international price. In meeting with Canadians, Australians, and Argentinians, they always wait to see what our target price is. We set the price below production cost because of what we do here in the Senate.

Mr. President, I feel very strongly and identify with the words of my colleague. In all my years in Congress, and this is my seventh, I am more deeply troubled with what is occurring here. I shall continue my informal discussions with my colleagues, but we would be better off with an extension of the present farm bill than this farm bill. Even if we went forward with a bill that would be vetoed, we would still be better off than with the present bill.

So I identify with the remarks of my colleague, and I commend him.

Mr. MELCHER. I thank the Senator from South Dakota.

I yield the floor.

Mr. HELMS. Mr. President, after this day, I feel that I have been fighting a pair of octopi. It is a frustrating experience.

I say again that the Senator from Montana and the Senator from South Dakota are exactly right; this is not the most desirable farm bill for any commodity.

Also, this is the first time in history that the Senate Committee on Agriculture, Nutrition, and Forestry has been required to report a farm bill under budgetary restraints, and there is no way that the committee could come up with a farm bill that would satisfy everybody. As a matter of fact, we have a farm bill that satisfies nobody.

In any event, we are doing the best we can, recognizing that the vast majority of farmers would much prefer that we get the interest rates down, that we put an end to inflation or at least put some good, healthy brakes to it; and from that standpoint, the modified version of S. 884 meets a pretty fair test.

We have had a vote today on the peanut program which is not exactly exhilarating to the Senator from North Carolina, who tried to work out a compromise, and has. The compromise will meet the objections, or most of the objections, of those who have been most vocal in their criticism of that program.

In that connection, Mr. President, I see the distinguished Senator from Georgia walking across the Chamber, and I would be willing to yield to him so that he could offer some modifications.

Mr. PRESSLER. Mr. President, if the Senator will yield, I wish to commend him.

I say to the Senator that in no way did my remarks refer to him.

Mr. HELMS. I understand. It was not a criticism of me. It was a criticism of the state the country is in. The Senator is always most cooperative and generous.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. HELMS. I yield.

Mr. JEPSEN. Can the Senator advise me how many amendments we have remaining on this bill at this time?

Mr. HELMS. I have no earthly idea, except I believe that there are too many. [Laughter.]

We will count them and let the Senator know in a moment.

Mr. JEPSEN. If it meets with the approval of the distinguished Senator from North Carolina, I should like that information to be compiled by someone before too long.

Mr. HELMS. I have been advised by Mr. Dunlop, who keeps track of all the facts and figures, that we have at least 20.

Mr. JEPSEN. I thank the Senator.

Mr. HELMS. Mr. President, I yield to the Senator from Georgia.

Mr. MATTINGLY. I thank the distinguished Senator from North Carolina.

Mr. President, we have a few modifications I should like to make in my amendment, and they should be ready in 3 or 4 minutes.

Mr. LUGAR. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. MATTINGLY. I yield.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Will the Chair respond to this parliamentary inquiry: May the Senator from Georgia modify his amendment again? As I recall, there were modifications previously, and some action has taken place.

The PRESIDING OFFICER. The Senator from Georgia still has the right to modify his amendment.

Mr. LUGAR. I thank the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. MATTINGLY. I yield.

SCHEDULE FOR REMAINDER OF TODAY AND TOMORROW

Mr. BAKER. I thank the Senator from Georgia for yielding.

Mr. President, I take this opportunity to apprise the Senate of the present leadership plans. It is not anticipated that the Senate will consider this measure beyond about 6 o'clock tonight. I expect that we will be out around 6:30, after we have completed our housekeeping details.

It is the intention of the leadership on tomorrow to stay as late as necessary to try to finish this bill, because it must be finished. So I anticipate a late night tomorrow night, if that is necessary, in order to complete action on the farm bill; and if that means 10, 11, or 12 o'clock, we will have to do that. But it is the firm intention of the leadership to be in session late tomorrow night, if that is necessary, to pass this bill.

I thank the Senator from Georgia for permitting me to make this announcement at this time.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MATTINGLY. Mr. President, I yield to the Senator from Virginia (Mr. WARNER).

Mr. WARNER. Mr. President, I compliment the distinguished chairman of the Agriculture Committee, as well as the Senator from Georgia, the Senator from Alabama, and the ranking minority member of the Agriculture Committee.

We have engaged in extensive negotiation during the past 3 hours or more, and I believe that the proposal soon to be submitted by the Senator from Georgia will provide the Senate as a whole a reasonable compromise of this most difficult question. I also extend my appreciation to a great number of individuals who are in the environs of this Chamber, representing diverse interests in the peanut industry, who have worked together to effect this compromise.

The modifications by the Senator from Georgia, in effect, move the peanut price support program into a "no cost" position. The amendment, of course, will remove the principal objection to the present peanut program by eliminating certain restrictions on planting. Such an amendment, while accomplishing a major objective, imposes on the Government and industry additional responsibilities for the proper administration of the program, and on the producers, and in my judgment it will help the consumers as well as the taxpayers.

Mr. President, we must make certain that if there is any extra volume of peanuts that may be produced under the amendment of the Senator from Georgia, it does not adversely affect our present peanut quality, which is excellent, the program, additional cost to the taxpayers, and the price stability to our producers.

We must assure a continuous supply of reasonably priced peanuts both to domestic and foreign markets. It is my understanding that these amendments will provide additional production for the domestic market and oil for the foreign market. The modifications by the Senator from Georgia provide systematic and orderly methods of marketing which are absolutely essential for this perishable food industry.

I am in a position to recommend to my colleagues that the amendment, as soon to be modified by the distinguished Senator from Georgia, be adopted.

Mr. MATTINGLY. Mr. President, very shortly, we will bring forth the modifications, and I will ask that they be

added to my amendment when sent to the desk, and that reading be dispensed with.

Once again, we should repeat that it does open up the export market, as the Senator from Virginia eloquently stated. In addition, it restores freedom for the peanut industry, freedom that all Americans desire.

Also, this comes at no cost to the American taxpayer, which also is what we are looking for. What has happened here today is that there has been unanimous support, coming from both sides of the aisle, on a new wave, and a new desire for a method for agriculture that will open up the markets at home and abroad.

I am glad to have been a part of it, as I am sure the same desire was in the amendment offered by Senator LUGAR, to open up the markets and open up the freedom for people to grow crops in the United States.

I will send this amendment to the desk shortly.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I yield the floor to the distinguished Senator from Georgia.

AMENDMENT NO. 545 MODIFICATION

Mr. MATTINGLY. Mr. President, I send a modification of my amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) proposes a further modification to amendment numbered 545.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator has the right to modify his amendment and the amendment is so modified.

The amendment (No. 545), as further modified, is as follows:

In lieu of the language proposed to be inserted, insert the following:

TITLE VII—PEANUTS

SUSPENSION OF MARKETING QUOTAS AND ACREAGE ALLOTMENTS

SEC. 701. Effective only for the 1982 through 1985 crops of peanuts, sections 358, 358a, 359, and 371 and part I of subtitle C of title III of the Agricultural Adjustment Act of 1938 are amended as follows:

(1) Subsections (a) through (j) of section 358 shall not be applicable to the 1982 through 1985 crops of peanuts.

(2) Subsections (a) through (h) of section 358a shall not be applicable to the 1982 through 1985 crops of peanuts.

(3) Subsections (a), (b), (d), and (e) of section 359 shall not be applicable to the 1982 through 1985 crops of peanuts.

(4) Part I of subtitle C of title III shall not be applicable to the 1982 through 1985 crops of peanuts.

NATIONAL POUNDAGE QUOTA AND FARM POUNDAGE QUOTA

SEC. 702. Effective for the 1982 through 1985 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (k) through (q) as follows:

"(k) Not later than December 1 of each year, the Secretary shall announce a minimum national poundage quota for peanuts for the next marketing year. The minimum national poundage quota for each of the 1982 through 1985 crops of peanuts shall not be less than one million two hundred forty thousand tons reduced in each such crop year, as provided in subsection (m) of this section, by the amount of any forfeited poundage quotas.

"(l) The minimum national poundage quota established under subsection (k) of this section shall be apportioned among the States on the following basis: The poundage quota allocated to each State shall be equal to the percentage of the national poundage quota allocated to farms in the State for 1981, and such State poundage quota shall be allocated among the counties within such State in accordance with regulations established by the Secretary and in accordance with the provisions of subsection (o) of this section, taking into consideration each county's historical production of peanuts.

"(m) A farm base production poundage shall be established for each farm which had an acreage allotment for the 1981 crop year. The farm base production poundage for any such farm shall be the same as the farm base production poundage for such farm for the 1981 marketing year. Such farm base production poundage shall be the same for such farm for the 1982 through 1985 marketing years, except that if the farm base production poundage, or any part thereof, is permanently transferred in accordance with section 358a of this Act, the receiving farm shall be considered as possessing the farm base production poundage (or portion thereof) of the transferring farm for all subsequent marketing years. If any part of the farm base production poundage is allocated to a farm on which there in inadequate cropland available on the date of the enactment of the Agriculture and Food Act of 1981 to produce the amount of the farm base production poundage on such farm, or in the event that peanuts are not actually produced on such farm in at least one of any three consecutive crop years, the portion of such farm base production poundage that cannot be produced or which is not produced on such farm shall be forfeited, and, to the extent such farm base production poundage is comprised of quota poundage, such quota shall be subtracted from the national poundage quota for all subsequent years, except that in any case in which the farm base production poundage (or any portion thereof) was leased for production in 1980 or 1981, or any subsequent year, the farm base production poundage (or portion thereof) shall be allocated to the farm to which it was most recently leased.

"(n) For each farm for which a farm base production poundage was established for the 1981 crop of peanuts, and when necessary for purposes of this Act, a farm yield of peanuts shall be determined for each farm. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1973 through 1977. In the event that peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yields established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(o)(1) A farm poundage quota shall be established by the Secretary for each marketing year for each farm for which a farm base production poundage was established for the 1981 crop of peanuts, and such farm poundage quota shall be equal to the farm base production poundage multiplied by the factor determined by dividing the State poundage quota established in subsection (l) of this section by the sum total of all farm base production poundages in effect in such State for the 1981 marketing year.

"(2) The poundage quota so determined shall be increased by the number of pounds by which marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) were less than the farm poundage quota.

"(3) For any crop of peanuts, a quantity of peanuts equal to the quantity of peanuts undermarketed during such previous years may be produced and marketed in subsequent years, and such quantity of peanuts (undermarketing carry forward) shall be considered quota peanuts, except that in order to qualify for such undermarketing carry forward in any year, a producer must have planted an acreage on the farm to peanuts in the previous year which, when multiplied by the farm yield of peanuts as determined in accordance with subsection (n) of this section would have yielded 75 per centum of the quota poundage for the farm for peanuts for such previous year.

"(4) Notwithstanding the foregoing provisions of this subsection, if the total of all increases under paragraph (2) of this subsection in individual farm poundage quotas exceeds 10 per centum of the national poundage quota for the marketing year, the Secretary shall adjust such increases so that the total of all such increases does not exceed 10 per centum of the national poundage quota.

"(p) Not later than December 15 of each calendar year the Secretary shall conduct a referendum of farmers engaged in the production of quota peanuts in the calendar year in which the referendum is held to determine whether such farmers are in favor of or opposed to poundage quotas with respect to the crops of peanuts produced in the four calendar years immediately following the year in which the referendum is held, except that, if as many as two-thirds of the farmers voting in any referendum vote in favor of poundage quotas, no referendum shall be held with respect to quotas for the second, third, and fourth years of the period. The Secretary shall proclaim the results of the referendum within thirty days after the date on which it is held, and, if more than one-third of the farmers voting in the referendum vote against quotas, the Secretary also shall proclaim that poundage quotas will not be in effect with respect to the crop of peanuts produced in the calendar year immediately following the calendar year in which the referendum is held.

"(q) For the purposes of this part and title I of the Agricultural Act of 1949—

"(1) 'quota peanuts' means, for any marketing year, any peanuts produced on a farm having a farm base production poundage, as determined in subsection (m) of this section, which are eligible for domestic edible use as determined by the Secretary, which are marketed or considered marketed from a farm, and which do not exceed the

farm poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year (A) any peanuts which are marketed from a farm for which a farm base production poundage has been established and which are in excess of the marketings of quota peanuts from such farm for such year, and (B) all peanuts marketed from a farm for which no farm base production poundage has been established in accordance with subsection (o) of this section;

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or otherwise when authorized by the Secretary; and

"(4) 'domestic edible use' means use for milling to produce domestic food peanuts and seed and use on a farm, except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE, OR TRANSFER OF FARM BASE PRODUCTION POUNDAGE

SEC. 703. Effective for the 1982 through 1985 crops of peanuts, section 358a of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (i) and (j) as follows:

"(i) The owner or operator of any farm for which a farm base production poundage has been established under this Act may, subject to such terms, conditions, or limitations as the Secretary may prescribe, sell or lease any part of the right to all or any part of such farm base production poundage to any other owner or operator of a farm within the same State for transfer to such farm. The owner of a farm shall be permitted to transfer all or any part of such farm's farm base production poundage to any other farm owned or controlled by him.

"(j) Transfers (including transfer by sale or lease) of farm base production poundage under this section shall be subject to the following conditions (1) no transfer of farm base production poundage from a farm subject to a mortgage or other lien shall be permitted unless the transfer is agreed to by the lienholders; (2) no transfer of farm base production poundage shall be permitted if the county committee determines that the receiving farm does not have adequate cropland to produce the farm poundage quota; (3) no transfer of farm base production poundage shall be effective until a record thereof is filed with the county committee of the county to which such transfer is made and such committee determines that the transfer complies with the provisions of this section; and (4) such other terms and conditions which the Secretary may by regulations prescribe.".

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 704. Effective only for the 1982 through 1985 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof the following new subsections:

"(f)(1) The marketing of any peanuts for domestic edible use in excess of the farm poundage quota for the farm on which such peanuts are produced shall be subject to penalty at a rate equal to 140 per centum of the support price for quota peanuts for the marketing year (August 1 through July 31) in which such marketing occurs. The marketing of any additional peanuts from a farm shall be subject to the same penalty unless such peanuts, in accordance with regulations established by the Secretary, are either (A) placed under loan at the additional loan rate in effect for such peanuts under section 108 of the Agricultural Act of 1949 and not redeemed by the producers, (B) marketed through an area marketing association designated pursuant to section 108(4) of the Agricultural Act of 1949 or (C) marketed under contracts between handlers and producers, pursuant to the provisions of subsection (j) of this section. Such penalty shall be paid by the person who buys or otherwise acquires the peanuts from the producer, or if the peanuts are marketed by the producer through an agent, the penalty shall be paid by such agent, and such person or agent may deduct an amount equivalent to the penalty from the price paid to the producer. If the person required to collect the penalty fails to collect such penalty, such person and all persons entitled to share in the peanuts marketed from the farm or the proceeds thereof shall be jointly and severally liable for the amount of the penalty. Peanuts produced in a calendar year in which farm poundage quotas are in effect for the marketing year beginning therein shall be subject to such quotas even though the peanuts are marketed prior to the date on which such marketing year begins. If any producer falsely identifies or fails to certify planted acres or fails to account for the disposition of any peanuts produced on such planted acres, an amount of peanuts equal to the farm's average yield, as determined under section 358(n) of this Act, times the planted acres, shall be deemed to have been marketed in violation of permissible uses of quota and additional peanuts and the penalty in respect thereof shall be paid and remitted by the producer.

"(2) The Secretary shall authorize, under such regulations as he shall prescribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations which were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned. Errors in weight which do not exceed one-tenth of 1 per centum in the case of any one marketing document shall not be considered marketing violations except in cases of fraud or conspiracy.

"(3) The person liable for payment or collection of any penalty provided for in this section shall be liable also for interest thereon at a rate per annum equal to the rate of interest which was charged the Commodity Credit Corporation by the Treasury of the United States on the date such penalty became due.

"(4) The provisions of this section shall not apply to peanuts produced on any farm on which the acreage harvested for nuts is one acre or less if the producers who share in the peanuts produced on such farm do not share in the peanuts produced on any other farm.

"(5) Until the amount of the penalty provided by this section is paid, a lien on the crop of peanuts with respect to which such penalty is incurred, and on any subsequent crop of peanuts subject to marketing quotas in which the person liable for payment of the penalty has an interest shall be in effect in favor of the United States.

"(6) Notwithstanding any other provision of law, the liability for and the amount of any penalty assessed under this section shall be determined in accordance with such procedures as the Secretary by regulations may prescribe. The facts constituting the basis for determining the liability for or amount of any penalty assessed under this section, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other office or agency of the Government or any court of law. Nothing in this section shall be construed as prohibiting any court of competent jurisdiction from reviewing any determination made by the Secretary with respect to whether such determination was made in conformity with the applicable law and regulations. All penalties imposed under this section shall for all purposes be considered civil penalties.

"(7) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts excluded under section 359(c), are unique strains, and are not commercially available. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(h) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts which the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(i) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108(4) of the Agricultural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(j) Handlers may, under regulations prescribed by the Secretary, contract with producers for the purchase of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval prior to April 15 of the year in which the crop is produced, except that if any handler contracts with a producer for additional peanuts produced on a farm for which a farm base production poundage has been established at a price equal to or more than 105 per centum of the loan level for quota peanuts not in excess of the farm base production poundage, such peanuts may be utilized as quota peanuts if (1) such contract is approved before April 15 of the year in which the crop is produced, and (2) all of the producer's quota peanuts have been contracted for before or at the same time that the producer's additional peanuts are contracted for.

"(k) Subject to the provisions of section 407 of the Agricultural Act of 1949, any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus (1) not less than 100 per centum of the loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season upon delivery by and with the written consent of the producer, (2) not less

than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer by not later than December 31 of the marketing year, or (3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year: *Provided, however,* That additional peanuts produced outside the farm base production poundage shall not be sold into domestic and related channels until all quota and additional peanuts produced within the farm base production poundage under loan have been contracted for sale.

For the period from the date additional peanuts are delivered for loan to April 30 of the calendar year following the year in which such additional peanuts were harvested, the area marketing association designated pursuant to section 108(4) of the Agriculture Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price as determined under this section equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this sentence in order to facilitate the orderly marketing of additional peanuts.".

PRICE SUPPORT PROGRAM

SEC. 705. Effective only for the 1982 through 1985 crop of peanuts, title I of the Agricultural Act of 1949 is amended by adding after section 107 a new section 108 as follows:

"PRICE SUPPORT FOR 1982 THROUGH 1985 CROPS OF PEANUTS

"SEC. 108. Notwithstanding any other provision of law—

"(1) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1982 through 1985 crops. The national average quota support rate for the 1982 crop of quota peanuts shall be the national average cost of production, including the cost of land on a current value basis, for such crop, as estimated by the Secretary, but in no event less than $596 per ton. The national average quota support rate for each of the 1983, 1984, and 1985 crops of quota peanuts shall be the national average quota support rate for such peanuts for the preceding crop, adjusted to reflect the change, during the period January 1 and ending December 31 of the calendar year immediately preceding the marketing year for which a level of support is being determined, in the national average cost of peanut production, excluding the cost of land. The levels of support so announced shall not be reduced by any deductions for inspection, handling, or storage: *Provided,* That the Secretary may make adjustments for location of peanuts and such other adjustments as are authorized by section 403 of this Act.

"(2) The Secretary shall make price support available to producers through loans, purchases, or other operations on additional peanuts which are produced on a farm for which a farm base production poundage has been determined in accordance with section 358(m) of the Agricultural Adjustment Act of 1938, and which are not in excess of the farm base production poundage, at such levels as the Secretary finds appropriate, taking into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets: *Provided,* That the Secretary shall set the support rate on additional peanuts at a level estimated by the Secretary to insure that there are no losses to the Commodity Credit Corporation on the sale or disposal of such peanuts. The Secretary shall announce the level of support for additional peanuts of each crop not later than February 15 preceding the marketing year for which the level of support is being determined.

"(3) The Secretary may make price support available to producers through loans, purchases, or other operations on additional peanuts which are in excess of a farm's base production poundage, or which are produced on a farm with no farm base production poundage. In determining the support level for such additional peanuts, the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets, but in no case may the level of price support for such additional peanuts be set at a level which the Secretary estimates would result in the Commodity Credit Corporation incurring a loss on the price support program for such additional peanuts for the marketing year concerned. The Secretary shall announce the level of price support, if any, for such additional peanuts of each crop not later than February 15 preceding the marketing year for which the level of price support, so announced, is to be in effect.

"(4)(A) In carrying out paragraphs (1), (2), and (3) of this section, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in 7 CFR 1446.10 (1980)) to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily for the purpose of conducting such loan activities. The Secretary may not make warehouse storage loans available to any cooperative which is engaged in operations or activities concerning peanuts other than those operations and activities specified in this section and in section 359 of the Agricultural Adjustment Act of 1938. Such area marketing associations shall be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Loans made under this subparagraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsibilities, operations, and activities under this section and section 359 of the Agricultural Adjustment Act of 1938.

"(B) The Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by type for quota peanuts handled under loans, for additional peanuts placed under loan and for additional peanuts produced without a contract between handler and producer described in section 359(j) of the Agricultural Adjustment Act of 1938, and for such additional peanuts separate pools shall be established for (i) such peanuts marketed in excess of farm poundage quotas, but not in excess of farm base production poundage, and for (ii) such peanuts marketed in excess of farm poundage quotas and in excess of the farm base production poundage, or from farms having no farm base production poundage.

Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each grower.

Net gains for peanuts in each pool shall consist of (A) for quota peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts and (B) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (A) of this paragraph. Notwithstanding any other provision of this section, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such grower.".

"(5) Notwithstanding the foregoing provisions of this section or any other provision of law, no price support shall be made available by the Secretary for any crop of peanuts with respect to which poundage quotas have been disapproved by producers, as provided for in section 358(p) of the Agricultural Adjustment Act of 1938.".

REPORTS AND RECORDS

SEC. 706. Section 805 of the Food and Agriculture Act of 1977 (91 Stat. 947) is amended by striking out "1981" and inserting in lieu thereof "1985".

SUSPENSION OF CERTAIN PRICE SUPPORT PROVISIONS

SEC. 707. Section 101 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of peanuts.

Mr. MATTINGLY. Mr. President, everyone knows the issue. We have debated it thoroughly today on the peanut program and the amendment.

I think that as rapidly as possible we should call the question on the issue.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Indiana.

Mr. LUGAR. Mr. President, I do not want to intrude if the Senator from Georgia is going to explain his amendment further, but in the event that no further debate is going to occur on a rather substantial modification I think we should take some time at this point to understand what is involved.

I would have thought it would be incumbent upon the proponents of the modifications to explain what they are about, and since they have, in fact, very recently reached the desk many Senators may have no idea what we are about to vote upon.

So let me proceed through analysis as I understand it of the Mattingly amendment which is being proposed as a substitute to my amendment.

The parliamentary situation is such that in the event the Mattingly amendment is adopted it will become the amendment on which we vote, and the Lugar amendment would fall because it is a substitute.

So I take the position, first of all, so that things will be perfectly clear to Senators that I oppose the Mattingly amendment. I am hopeful it will be defeated and Senators will, therefore, have an opportunity to vote on my amendment up or down.

Very clearly the last vote that we took was a motion to table the Lugar amendment, not the Mattingly amendment. It was a point of strategy taken by those who presumably oppose my idea of getting rid of allotments and poundage quo-

tas and moving peanuts to a system very similar to that of soybeans, wheat, and corn in this country. Very specifically the leadership of our Agriculture Committee determined that mine was the amendment they wanted to go after and they did so. They lost 56 to 43.

At this point apparently the distinguished Senator from North Carolina, the chairman of our committee, has worked with the distinguished Senator from Georgia in what they have described as some simple modifications which have not even been explained on which a yea and nay vote has been called for.

I am not certain most Senators understood the Mattingly amendment to begin with. I am not certain that many Senators have any idea what the peanut program in this country is all about.

Leaving that aside, the Mattingly amendment as modified, as best I can understand it from Xerox notes that have been sent out to us, comes down to this:

All acreage allotments would be eliminated. That is a good idea. That is a substantial change from the point of view expressed by the Senator from North Carolina that appeared in S. 884 and in the so-called committee modifications.

Senators should know that in voting for the Mattingly amendment at least they would get back to a point where all acreage allotments for peanuts in this country would be eliminated.

I congratulate the Senator from Georgia on that significant step.

Clearly, the right to grow peanuts on any farm in the country is a point at issue, and that we solved.

Unfortunately, we then come to the second point in the Mattingly amendment, and that is that all poundage quotas would be maintained on all the allotment acres that are actually productive farmland.

Mr. President, the peanut program involves those two elements, allotments now which have been passed on from father to son, 59,100 of them in the country, but in addition, as I pointed out yesterday afternoon, because peanut farmers become more efficient over the course of time, grow as much as 2½ to 3 times as many peanuts on an acre of allotment as they used to, in order to keep the system down to a dull roar, poundage quotas were put on in addition to acreage allotments. The poundage quotas under the Mattingly amendment would remain. And herein, of course, lies all of the Federal bureaucracy attached to the maintenance of that kind of a measuring and weighing system.

The Senator from Georgia has recognized that under the current system, the one that was being defended so eloquently earlier on in the day, there are many acres that are not tillable and that have still been receiving these monopoly rents. So, in fairness to the Mattingly amendment, at least those acres somewhere in the country that were a part of this 59,100 group that are now tillable will no longer receive the poundage quota treatment.

And the Senator from Georgia at least in his first amendment of this morning went on to say that those quota amounts would be subtracted from the total national poundage quota. It may be that in due course he will want to indicate whether that is still the case, because in this morning's amendment he suggested that national poundage quota would now be set at 1.1 million tons, lower by 140,000 tons from the 1.24 million level contained in the so-called committee compromise. And you will recall I say to my colleagues, that the committee compromise at 1.24 was called down from the original 1.3 in the S. 884. So the committee compromise has tried to lower the cost from going from 1.3 to 1.24. Senator MATTINGLY was headed toward 1.1 until he found the senior Senator from North Carolina, and now in the new modifications, as I understand them, we are back to 1.24.

An argument is being made that some seed peanuts are required and they overlooked that in the first go-round. But be that as it may, the count is back up to where we were this morning rather than where we might have been this afternoon if we were considering the Mattingly amendment as first offered.

Now, in the event that the number of peanuts gets down lower in terms of pounds, the philosophy, as I understand, of the Mattingly amendment, as modified, and as suggested before would lower the cost of the original S. 884 agriculture bill. It does so because there were fewer peanuts that are to be supported at the high level.

And in fairness to the chairman and his proposal, Senator HELMS and Senator MATTINGLY apparently have adopted a $596 per ton support as opposed to $641 that we started out with. That is a definite step forward in terms of reducing costs.

As I pointed out in my arguments last evening, the argument with regard to the cost of the program, I think, has diminished. These things are difficult to estimate. But in fairness to the amendments that I am opposing, I believe, in fact, that most of the cost of the program, at least in fiscal 1982, has been diminished by lowering the poundage and lowering the amount of $641 to $596.

Now I think what has to be said, in analyzing the Mattingly amendment, as modified, is that essentially if you are a farmer somewhere in this country who currently does not have one of the 59,100 allotments, you could grow peanuts but essentially—and I hope this does not unfairly over simpify—you had better plan to export them. In essence, the argument is being made that the Mattingly amendment would be a boost to exports. Well, indeed it would, if you grow peanuts and you have very little possibility of marketing them within the United States of America. And that is the gist of the poundage quota situation that we are looking at here.

The point that I attempted to make last evening and very briefly this morning is that a similar predicament has been faced by most of the commodities in this country at some point. I cited the case in 1975 of our congressional debate on rice. At the time, the point was made of that rigidly controlled commodity that if, in fact, the controls were knocked off and rice came into the same category as cotton and corn and beans, which we will be considering with regard to the target price argument, if rice did not have special treatment, in essence, we would see a destruction of that industry and its producers. Now, in fact, the rice market has taken off much stronger than it was in 1975.

The same thing with regard to soybeans, much earlier in the bidding there. Soybeans used to be a crop that was exceeded by peanuts in terms of production, values added, and the exports. Not so after soybeans were freed from all the apparatus and the rigmarole that we are discussing presently.

The difference between the Mattingly amendment and the Lugar amendment comes down to the fact that the Lugar amendment wants to put the peanut situation into a market economic context, not a totally free market situation. It is no more free than the market situation for wheat and beans and corn and rice and cotton and lots of other commodities. As a matter of fact, as we have discussed, peanuts are the last, the very last edible crop in this country to have this sort of convoluted support structure.

But if the peanut industry is ever going to take off in this country, it will really need to come into the same situation. There are no substantial differences with regard to perishability, with regard to marketability, with regard to anything else, aside from the very difficult political problem which is involved in this peanut question. And that is at the nub of any discussion of this.

The predicament—and I sympathize with it—of each of my colleagues on the Agriculture Committee is so frequently to be under the gun from particular producers in their States who say: "We have always had this program. Are you going to be the one that let us down? Were you the one who was sitting there when the whole thing collapsed? Did you have the watch that night when the ship went down?"

Now, the facts of life are that in the great peanut-producing States of this country there are a lot of very efficient producers. They, in fact, would like to produce more peanuts. They would produce them more efficiently.

Senator HEFLIN, I thought, in an eloquent statement this morning, said that in the event the Lugar amendment passes, there will be a change; a good number of smaller plots are likely to go into larger plots; and there will be a consolidation of many of those situations. And I would admit there would be. As a matter of fact, I have suggested that if my amendment passes, the trend will be for peanuts to be grown in the more efficient areas of this country in terms of soil, in terms of climate, by more efficient farmers and that will be of great benefit as a matter of fact to consumers as well as to the peanut industry as a

whole which is likely to take off in much the same way as the soybean industry did before, following the same route.

In other words, we are arguing, as we take a look at the Mattingly amendment, which I would characterize as sort of a last ditch attempt to hang onto some vestige or what is there to try at least now through the poundage quota situation to achieve essentially what was there before through allotment plus poundage. There are, of course, some interesting facets to the Mattingly amendment that the markets will test out. And it is difficult on first impression, as one looks simply at the notes of a Xerox copy, to imagine all the hypothetical situations.

But, in the event that there are free-floating allotment acres in a particular State, as I understand, the Mattingly amendment would make it possible for the holder of an allotment in essence to rent, to receive rent from anybody within a State for those available acres.

Now that could excite quite a bit of business. That could be a market system all of its own within the boundaries of a particular State. If, as a matter of fact, farmers who are efficient and who are consolidating their peanut operations saw a value in doing it, the monopoly rent that I have already characterized as $125 to $200 per acre could escalate very high indeed for those marginal acres. It would be a very valuable thing.

In essence the Mattingly amendment now transfers the bidding from bidding for acres to bidding for pounds. With the allotment of acres taken off but the poundage quotas remaining, one now has a very interesting speculation in pounds, as opposed to acres. And the ramifications of that, I trust, have not been thoroughly explored. I suspect that those who made the argument this morning that thorough consideration ought to be given to legislation before it is adopted, even almost without debate, by a quick up and down vote would agree there are some unusual aspects of this when you take a look at it.

Mr. President, I think you must say, in logic, that the current system is as well known as any. If one were to make a choice, it seems to me logical one is going to adopt either the current system with its failings but with its strength, as those who love it have advocated, or adopt my amendment which says that you do away with allotments, you do away with poundage quotas, you move to a free market situation very similar to those for everything else and let the Secretary of Agriculture have discretion with regard to loans and purchases to make certain that there is security for peanut producers the same as there is for producers of corn and beans and wheat and other situations.

So, Mr. President, at least these are points that, at first analysis, I wanted to share with my colleagues, as well as my conviction that there are, I believe, two essential choices to be made. One is we will continue to have the current system, the Mattingly involvement in this doing away with allotments but now putting in the controls and bidding on pounds instead. I have characterized that as, unfortunately, much of the same old thing. I would guess there is no phasing out of this. I see no phasing whatsoever, aside from the fact that a few acres might be found nontillable. In the event someone drops out of the peanut game, very rapidly they auction off the right to the pounds. The system continues on forever. There is no phasing out here. There is no end of the rainbow.

I would suggest that if you want change, if you want reform, that you vote for the Lugar amendment. This ongoing reform I believe has a certain internal logic with the rest of the farm bill we are considering.

Mr. WARNER. Will the Senator yield for a question?

Mr. LUGAR. I yield.

Mr. WARNER. I helped draft the legislation as arbiter on certain provisions and I have tried to assess the situations before I came down to support the amendment of the distinguished Senator from Georgia.

As I look at the program of the Senator from Indiana, there is involved a price support, although set by the Secretary of Agriculture, in the nature of a loan, but there is no way of estimating the volume of production of peanuts and the ultimate cost to the taxpayer. It is an open-ended situation. As such, the taxpayer is left at the peril of those who want to get involved in this new industry. Therefore, I feel that while none of these programs may have all the advantages that we wish to achieve at this time, the Senator from Georgia at least has drawn certain parameters within which there is an estimate of the impact on the American taxpayer. Am I not correct?

Mr. LUGAR. Let me respond to the Senator's question on the cost of the program by indicating that in my analysis the cost of my program would be approximately zero, as I admit the cost of the Mattingly or Mattingly-Helms program would be approximately zero. These, I understand, are from the modifications.

Mine comes to zero because the Secretary of Agriculture has absolute discretion to set the loan rates, given the conditions of the market and the supply-demand, with any other considerations which are part of his normal settings of loan rates. At least, in my judgment, he has the privilege of setting a loan rate in such a way that it could come out zero.

I see the estimates of costs which have attended the discussion of this debate have all assumed that the Secretary of Agriculture would set the loan rate at a particular level. As I recall, several hypothetical examples were tried out for size this morning, various sizes and sums of money. But I would say that this particular Secretary of Agriculture and this particular administration are feeling the chill winds of the budgetary situation right now. He is feeling at least a rather cool breeze coming from the White House with regard to the potential cost of this entire piece of legislation.

This Senator from Indiana has made other suggestions with regard to more sizable sums of money. It certainly is not my purpose to add to the problems of the Secretary. In trying to come down on this amendment I have consulted with him about his administration of the project. I have no desire to set in advance, or even hypothetically set in advance, his decision.

I would simply say that we are arguing cost, which we leave to the Secretary's discretion. His discretion will be to have a very alive program, which is what we shall have.

Mr. WARNER. Does the Senator yield the floor?

Mr. LUGAR. I yield the floor.

Mr. WARNER. Mr. President, I yield to the Senator from Georgia.

Mr. MATTINGLY. Mr. President, I have a few brief comments. I would like to ask how much virtue the last digit in the amendment has. This morning I was referred to as the emasculator of the program. In fact, statements were made that referred to poundage going from 1.1 million to 1.24 would just add seed peanuts. So it is not any real poundage change.

The problem with the Lugar amendment was, as the Senator from Virginia spoke about, that it was open-ended. There is no lid on what the CCC would have to acquire, which means that it would cost the taxpayers more money.

As far as opening up the export markets, the farmer would appreciate opening up the export markets for additional peanuts grown, but they also can be used domestically because they can be crushed and used for oil. They can also be acquired in case there was a shortfall, as there was this past year in the peanut program. So they are available from domestic production.

I would just reiterate a prior statement that I made that if you do not produce on the land that you have the poundage on, you lose the right to produce. That is a significant change. It does allow anyone anywhere in our country to grow peanuts in the future.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Will the Senator from Georgia yield for a question with regard to the modification?

Mr. MATTINGLY. I yield.

Mr. LUGAR. In the first point of the summary page that I have before me there is a notation of a 2-year grace period to be allowed. What is the meaning of that term?

Mr. MATTINGLY. I will yield back to the Senator from Virginia.

Mr. WARNER. I yield to the Senator from Kansas.

Mr. DOLE. I did not think that was in the modification.

Mr. LUGAR. Since I do not have a copy of what was included, I am going from notes of what I understood to be in the modification. What is the 2-year grace period discussion? I am not certain.

Mr. WARNER. If the Senator is reading from this handwritten document which I have been using, item 2 is not a part of the amendment submitted by the Senator from Georgia. That was not agreed upon. That reads "effective date of 1984" and so on, that sentence.

Mr. LUGAR. There are several dates. Some of it seems to be scratched out.

Mr. WARNER. We attempted to perfect a compromise on that. At one time we indicated 1983. But, again, that has not been made a part of the compromise. It was deleted.

Mr. LUGAR. So the modification would be effective with the 1982 crop, is that correct?

Mr. WARNER. That is correct.

Mr. LUGAR. Then the allotments would be suspended so that anyone could grow peanuts?

Mr. WARNER. That is correct.

Mr. LUGAR. May I ask a second question either of the Senator from Georgia or the Senator from Virginia? Why was the original poundage quota at 1.1 million raised to 1.24 million? This would appear to be a step in the wrong direction so far as its cost in winding down the program.

Mr. MATTINGLY. It was that if you did not grow peanuts in 1 year out of 3, you would lose that poundage.

Mr. LUGAR. If you do not grow peanuts in 1 year out of 3 you would lose the poundage quota?

Mr. MATTINGLY. Right.

Mr. LUGAR. How does that affect the raising of this figure from 1.1 to 1.24?

Mr. MATTINGLY. The 1.1 to 1.24 is that originally the bill included 1.29 which included the administration bill in the beginning. 1.29 included the seed peanuts and then we excluded seed peanuts which took it down to 1.14. We made it 1.1. Then they wanted to include seed peanuts and it is a reasonable modification. It goes back to 1.24. So there is no impact. It is six of one and half dozen of another.

Mr. LUGAR. How does the situation of the Senator from Georgia ever wind this program up? I do not see an end to the tunnel in this respect. In fact, we seem to have retreated back to more peanuts in the amendment than we had this morning.

Mr. MATTINGLY. It opens the program. It opens it up to where everybody in this country can grow peanuts but it would still be subsidized by the Federal Government, as in the other amendments.

Mr. LUGAR. But it does not open up the poundage quotas; is that correct? In other words, although allotments are suspended, poundage quotas remain?

Mr. MATTINGLY. Poundage would still be retained, but it opens up supplementals or additional peanuts, however you want to refer to them. But they are not supported by the Federal Government, as the Senator's are.

Mr. LUGAR. Mr. President, I have indicated that corn, wheat, beans, and a number of crops have a certain degree of support. That is the nature of our general farm bill, to try consistently to bring the general peanut situation to some equity with the others.

It would appear that, for example, in the case of a corn farmer, in Indiana, it is hard to imagine how you would begin to put a poundage quota program in place and begin auctioning off pounds of corn, as is the case with this program. If there were some progress being shown in this amendment as to how, somehow, we have to bring it to a conclusion, I think that would give this Senator some hope. But I do not see any end to this whatsoever.

As a matter of fact, Mr. President, we are going to come to the end of this farm bill debate, and Senators will be exhausted with the whole process for the next 3 years. I think that is why I support where we are in other commodities because after having this, this is what we are stuck with.

Mr. MATTINGLY. I should like to make one more comment on it, Mr. President, to clarify it.

In all honesty, if we went with the Senator's amendment and they grow 10 times as many peanuts next year as they do this year, the Government would be responsible for supporting it all. I am saying that is not right.

Mr. LUGAR. I ask the Senator from Georgia another question: On what basis would the Government have to support 10 times as many peanuts? I do not understand why people would go on an irrational binge and start growing peanuts when there is no market and no support.

Mr. MATTINGLY. That is why it has to be done in an orderly manner as with the rest of the commodities. I rest my case.

Mr. LUGAR. Mr. President, I think the market would start sending signals to people who want to grow 10 times as many peanuts that that is not a good thing to do when there is no market for them. I think if we are to rest our cases on poundage instead of principles, I hope people will side with the market. I hope Senators will reject the Mattingly substitute and support the Lugar amendment.

Mr. WARNER. Mr. President, there are many reasons I cannot support my friend from Indiana. The distinguished Senator from Indiana cannot provide the Senate with any possible cost estimates to the taxpayer in the near future. It is my hope that the Agriculture Committee, in the years to come, can consider this problem and work out a program that will address it. In the meantime, there are a number of Senators who wish to support the amendment of the Senator from Georgia, and I yield at this point to the distinguished Senator from Alabama, who has been most helpful in effecting this compromise.

Mr. HEFLIN. Mr. President, I am reluctantly supporting the Mattingly modified amendment. I think that, after 4 years, the Committee on Agriculture will come back and realize we had an excellent peanut program and reinstate it in the future. But, unfortunately, peanuts are the target of a number of attacks on the floor of the Senate. All of the attacks are not against the peanut program. There are a lot of crosscurrents and a lot of tactics being used.

There were people who had belonged to a farm coalition who voted against peanuts, as I would say, using that in a general term, on the vote that we had on a tabling motion. They do not really want to destroy peanuts, they do not want to destroy the program. They are trying to gain some advantage somewhere else. I suppose that is a part of the parliamentary procedure that we are faced with. But we are in an unusual position and we are in this position now.

It could well be, Mr. President, that there will be no farm bill. If there is no farm bill in existing legislation, we go back to the farm bill of 1949. The farm bill of 1949 provides allotments for practically every crop, referenda price supports, all sorts of things. Peanuts will do pretty well under the 1949 act. It would devastate cotton. It would devastate many other programs.

We are now at a stage where a lot of people are making tactical attacks on peanuts, trying to gain something else. Maybe they will gain, maybe they will not. I do not feel that, at this stage, with several more days of debate on the farm bill facing us, I want to be placed in a position, because of my vote today supporting the Mattingly position, that I will be in that same situation, maybe, tomorrow or the next day or on down. But I feel at the present time that the Mattingly amendment is far superior to the Lugar one. It does not completely destroy the peanut program overall. It is not nearly as costly.

Senator LUGAR, I am sure, in all conscience, feels that the Secretary of Agriculture can use his discretion where the present peanut program will cost no money. But he is not going to; let us realistically realize that he is not going to cut the support price under where it is today. At $455 a ton, we are talking about a program, under the Lugar amendment, that would cost close to $300 million a year. Under the Mattingly amendment, he did not make the corrections. His program that we were arguing this morning would have cost $100 million. But it is a matter where, because of some peculiarities, offsets and facts, it can be saved. The distinguished Senator from Virginia has worked on that along with staff people, and that saving is there, so the Mattingly amendment will not cause any losses to the Government.

Therefore, Mr. President, I urge the Senators at this time to support the Mattingly amendment. One, it is cost saving. Two, it does not completely destroy the peanut program. I should like to predict, Mr. President, that 4 years from now, Senators may see the error of their ways on a past vote.

I thank the Chair.

Mr. WARNER. Mr. President, again, I thank the distinguished Senator from Alabama. This proposal does not meet the requirements or the expectations of any of us who have been involved in it, but it represents the best compromise that we can reach through many hours of arduous effort.

At this time, Mr. President, I yield the floor to the distinguished chairman of the Committee on Agriculture, Senator HELMS of North Carolina.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I thank

the able Senator from Virginia. I thank the Chair for recognizing me.

What we are doing, Mr. President, with this amendment is compromising on second best. The third best, or the worst, would be the Lugar amendment. By far it would be the most costly to the taxpayers and by far the most injurious to all concerned.

Mr. President, I see no point in reviewing what I have said over and over again since the peanut section of this bill became the pending business last evening. But I reiterate what I said last night. Nobody in this Chamber has more affection and respect for the distinguished Senator from Indiana than I do. This is one of the rare times when I have disagreed with him. I do not doubt his sincerity; I just think he is sincerely wrong.

I think on the arithmetic, any way you look at his amendment compared to the modified version of the peanut section of the bill, his amendment is a mistake. It will cost the taxpayers; it will disrupt a program that has worked. It will have an exceedingly adverse effect on a lot of innocent citizens, who will discover to their dismay that they made a mistake when they had faith in their Government and faith in a governmental program.

For 4 years, this program has been in effect; and now, on this day, in this Chamber, by amendment, comes the proposal to jerk the rug from under thousands upon thousands of small farmers.

I reiterate what I have said over and over again in this Chamber: that if Senator LUGAR or any other Senator will introduce legislation to adjust or change the peanut program, the Agriculture Committee will hold hearings promptly, so that we can learn what the impact would be across the board. This is not the place nor the time to take such a drastic action.

As I said this morning, the modified version of the peanut section which my friend from Indiana proposes to amend—in effect, destroy—would cost the taxpayers not one thin dime. The projected figures, on the other hand, of the Lugar proposal run into hundreds of millions of dollars.

The compromise proposal by the able Senator from Georgia (Mr. MATTINGLY) is precisely that, a compromise. It is an accommodation that has been reached on the peanut question which, while not satisfactory to every Senator, will at least not be completely disastrous.

This has been a difficult issue, because there has been an interest among Senators to permit citizens not now holding allotments to grow peanuts to have the opportunity to do so. This is not going to involve very many States.

One of my dearest friends in the Senate yesterday was lamenting the fact that he could not grow peanuts in his State because of the peanut program. I have news for the Senator. He could not grow them under any circumstances in that State, because the frost line is considerably south of his State. He might grow a few in potted plants in the living room, I say to the Senator from Virginia. But that is not an issue. This has been the most controversial aspect of the peanut program, because it does offend the sensibilities of Senators and others to have an allotment program at all.

The point is that the peanut program has worked. The point is that there has been a stable supply, at a stable price, all these years, except one, last year, when a drought caused catastrophic circumstances.

The agreement worked out and incorporated into the Mattingly compromise preserve fiscal stability of the peanut program, but it also will permit anyone to grow and to market peanuts. So let us put that argument to rest.

Under the Mattingly compromise, anybody in Nebraska, Minnesota, or anywhere else can grow all the peanuts they can grow, if they can grow them in the soil and under the climate conditions they have. This will not undermine those who have invested in the peanut program over the years, because the program will continue operating, but new growers may produce peanuts as well.

In addition, there are a number of other changes which have the effect of moving the program in the direction of market orientation, which is what we have tried to do with this entire farm bill.

So I support the Mattingly amendment. I hope the Senate will approve it, so that we can move on to the remainder of the bill and pass it tomorrow or the next day.

Finally, Mr. President, I am hearing all sorts of reports about how one commodity interest group is working against another commodity interest group. I am not working for or against any commodity interest group. From the very beginning, the minutes of the first hearing, and in the markup of the farm bill, the chairman was preaching fiscal responsibility. With the utmost respect to all members of the committee, as we proceeded into the markup session, this chairman remarked on a number of occasions that we were marching up the hill of spending, big spending, a hill down which we would have to march. And we did—not once, but twice.

So here we are, with an opportunity to move ahead on this section of the bill, an adequate compromise which is not a delight to anybody, but it was a product of a great deal of hard work by a number of people, led by the distinguished Senator from Virginia (Mr. WARNER), to whom I am most grateful for the time and effort he devoted to it.

So I do urge the adoption of the Mattingly amendment.

Mr. DOLE. I thank the chairman.

Mr. President, I will take a minute or two, because I do not know much about the peanut program. That does not mean I could not talk at length on the peanut program. [Laughter.]

The Senator from Kansas voted in favor of the Lugar amendment but did not speak on the amendment. I was in support of the effort of the distinguished Senator from Alabama and the chairman of the committee and others, because I felt that they had made a good faith effort to move in the right direction. That effort failed. The motion to table was not agreed to, and I commend the distinguished Senator from Indiana for his efforts to make certain that we move in that direction.

Having said that, I also commend other Senators who have been working on this compromise, because I believe that it is certainly a giant step in the right direction. It should still most of the criticism that may have been justified, because you just could not plant the peanuts if you did not have an allotment. There were even some penalties if you did so. That has all been changed, with this approach, and I believe it has been changed for the better.

At the same time, I certainly understand those who have been in this business for a long time who are reluctant to make any change at all. So it is not a criticism of those who grow peanuts at this time. I believe it is an indication of a change in direction in farm programs, as suggested by the distinguished Senator from Indiana, and a change that has been accepted by almost every other commodity. Rice has been mentioned as one that has been changed, but I remind the Senator from Indiana that that did not happen in one big step. As I recall, rice moved in sort of a two-step.

In 1975, they had a very tightly controlled program, probably as tightly controlled as the current peanut program. Even in 1975, when we changed the law, you had to have an allotment to be eligible for support and loans. In 1977, that was changed. So rice made it in sort of two steps. I suggest that the same could happen to the peanut program.

Peanuts are not raised in Kansas now. They could raise peanuts. There may be other reasons we would not, but it is not prohibited. The program has been opened up.

I hope that now there will be widespread support for this compromise which has been worked out by the Senator from Alabama, both Senators from Georgia, both Senators from Virginia, the Senator from Kentucky (Mr. HUDDLESTON), and the chairman of this committee. They have a direct interest, as I am sure other Senators have, in resolving what is a problem. I suggest that we have come a long way in resolving some of the thorniest issues in the farm bill. Others will come before this body.

I again say that we made a great deal of progress yesterday. I believe there are excesses in the dairy program, and those excesses were eliminated. There may be excesses in the peanut program, and those excesses, if there are any, are about to be eliminated with this compromise.

There may be excesses in other commodity programs which have not yet surfaced, including wheat, cotton, and whatever. If that is the case, we may be able to address some of the arguments made by our colleagues who have a view of what farm legislation should be that is different from the view of some of those who deal with it on a regular basis.

If I understand correctly the reason for the change in the poundage quota, the reason for the increase was to take care of the so-called seed peanuts. That

is why it was increased to that figure. Otherwise it would remain unchanged. I also understand that there can be loans extended to those who raise additional peanuts if the Secretary so determines. So it seems to this Senator there has been a giant step in the right direction.

I urge my colleagues to support this compromise that has been the result of several hours efforts by a number of our colleagues.

I thank the distinguished Senator.

Mr. WARNER. Mr. President, I just wish to thank, and I will yield momentarily, both the distinguished chairman of the Agriculture Committee as well as the distinguished Senator from Kansas.

We hope to bring this colloquy to a close very shortly, Mr. President, such as we may proceed to a vote, but the Senator from Georgia seeks recognition.

Mr. NUNN. Mr. President, I wish to make a couple of comments.

First, I congratulate the Senator from Virginia and my colleague from Georgia on working hard to come up with this compromise. I think as between this compromise and the Lugar amendment, certainly I strongly prefer the Mattingly-Warner compromise.

I do think it should be clear, though, that the committee had already proposed a compromise and that compromise would not have cost the taxpayers any money. That was a no-cost program to the Government.

So we are not talking about scaling down the cost to the Government. We are talking about changing the fundamental concept of the peanut program that I think has served the Nation well for a long time.

The Lugar amendment, of course, would eliminate that program altogether. But the Mattingly amendment is certainly preferable to that.

I think that the people who are following the farm bill with a great deal of interest and the people who are in the peanut business have to be concerned, however, even if this compromise passes because historically all of us recognize that the Senate has been the place, since we represent geography and we know something about the rural areas and many of the people in the House of Representatives are from the urban areas and they understandably do not take the interest that we do in the farm program and the welfare of our farmers, the Senate has always been the place that came up with a strong bill, a strong position on agriculture, the most favorable position for the farmers, and then we go into the conference with the House of Representatives and we come out with a much weaker provision.

What we are doing at this stage, as I see it, in the peanut program, if the Mattingly amendment passes, and I hope at this stage that it does, we are going into conference with a scaled-down version of the peanut program that has already been compromised.

What I fear is that if the House of Representatives comes up with something that is the equivalent of the Lugar amendment, then we may come out of the conference with the peanut program that is unrecognizable and does not preserve in any degree the integrity of the program that is so essential for my State and so essential for the States of many other people throughout the country.

So we are in a very dangerous position as far as the future of the peanut program is concerned. We are going to have to do everything possible to see that the House of Representatives understands that the compromise has already been made, and I certainly hope this amendment passes.

I do not wish to belabor the point, but I think the Senator from Alabama has worked longer and harder on the peanut program than anyone I know in this body, certainly on this side of the aisle. He has spent literally hundreds of hours working diligently to protect the program that is of vital interest to the State of Alabama and also the State of Georgia as well as other States.

So I thank my colleague from Alabama for his leadership. I have been following his lead on this issue as well as many other farm issues, and I thank him for an exceptional job all the way through.

I also serve notice, as the Senator from Alabama did, that I am voting on the best alternative that is now available to me vote for, and I certainly reserve my rights on any other alternative that may come up during the course of this farm bill.

I think everyone recognizes that the farm coalition at this point is split into many different groups. I think most people recognize that the vote on the tabling motion on the Lugar amendment to which the Mattingly amendment was attached this morning was an unusual vote in that many Senators voted on that in a negative sense to the peanut program because they were very disappointed in the commodities that were top priority in their own State. That is understandable.

But when the Senate coalition on agriculture comes apart, then there is real danger when we go to the House conference that we may end up with a farm bill that takes a part of our economy that is in rather desperate condition now in our section of the country and I think throughout the country and delivers it a blow from which it cannot recover.

I have a great deal of respect for the Senator from Indiana, and I know he studied this long and hard. I have tremendous respect for him as an individual.

But I simply submit to those who may be tempted to vote for this amendment that frankly we do not have the margin for error in this stage in our agriculture community to go into philosophical arguments about some theories of agriculture that might be appropriately debated in a period of time where agriculture was not already crippled by droughts and crippled by commodity prices that have been below the cost of production. We are talking about a crippled industry, and we are talking about a crippled part of our economy now that I think is in grave danger.

So I urge my colleagues, those who may at some point be inclined to vote on the basis of philosophy and a lot of theoretical arguments, to be practical at this stage of our history and to try to come out of the Senate with as strong a bill as we can on this peanut program and on other commodities from that point of view.

I know the Senator from North Carolina has worked for many, many hours on this bill. I know he has tremendous pressure on the budgetary side. I know that if we get the bill too high in cost we may very well have a veto on it. I understand all of those pressures. But I also think the Senate should recognize that we may very well be dealing with a future in the question of whether a large portion of the agricultural segment of our country indeed is able to survive.

I yield.

Mr. WARNER. Mr. President, I thank the distinguished Senator from Georgia. Indeed, I feel so strongly about this compromise that I do wish to add my name as a cosponsor.

At this point, Mr. President, I yield to the Senator from Florida.

Mr. CHILES. Mr. President, I thank the distinguished Senator from Virginia.

Mr. President, I associate myself with the remarks of the Senator from Georgia, Senator NUNN, and say that I intend to vote for this compromise also but only because I think it is the only alternative that we have now in the face of the amendment of the Senator from Indiana that will do away with the program altogether.

I was very disappointed and surprised with the result of the tabling motion. It was my feeling that the compromise that had been worked out by the committee was workable and would allow the program to survive, but at the same time would have protected the taxpayers from any loss of funds or any problems with the program until we could find another way perhaps to work on some of the problems that are in this program.

I hope that we will get an opportunity before this bill is over to get another meaningful package that we can do something to make a program better than this compromise I see here affords now, but I do intend to vote for this because it is the alternative that we have.

Mr. MATTINGLY. Mr. President, I ask unanimous consent to add as cosponsors of the amendment Senator WARNER, Senator TOWER, Senator HARRY F. BYRD, JR., Senator DOMENICI, Senator DOLE, Senator NICKLES, Senator HELMS, and Senator BENTSEN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I believe we have come to a conclusion now on this matter and again I thank all the many colleagues who made this possible.

I thank Senator LUGAR. It was his foresight, emphasis, and wisdom that drove this Chamber to what I hope will be a compromise on this program acceptable by the majority.

As the distinguished Senator from North Carolina, the chairman of the committee, has indicated, in the forthcoming year hearings will be held such that maybe a final result of this situation can be adopted.

Mr. TSONGAS. Mr. President, I do not wish to belabor the point. But I wish to say that as a cosponsor of the Lugar amendment, having spoken earlier I shall not repeat my remarks. I simply reiterate the comments of the Senator from Indiana to suggest that this is not a compromise. All the arguments I made this morning pertain to this vote as well.

I thank the Chair for the courtesy.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia as further modified.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Vermont (Mr. STAFFORD), is necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. STAFFORD), would vote "nay."

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. RANDOLPH), is necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH), would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 51, nays 47, as follows:

[Rollcall No. 259 Leg.]

YEAS—51

| | | |
|---|---|---|
| Abdnor | Ford | Melcher |
| Andrews | Grassley | Murkowski |
| Baker | Hart | Nickles |
| Baucus | Hatch | Nunn |
| Bentsen | Hawkins | Pressler |
| Boren | Heflin | Pryor |
| Bumpers | Helms | Rudman |
| Burdick | Hollings | Sasser |
| Byrd, Harry F., Jr. | Huddleston | Schmitt |
| | Inouye | Stennis |
| Byrd, Robert C. | Jepsen | Stevens |
| Cannon | Johnston | Symms |
| Chiles | Laxalt | Thurmond |
| Cochran | Leahy | Tower |
| Denton | Long | Wallop |
| Dole | Matsunaga | Warner |
| Domenici | Mattingly | |
| East | McClure | |

NAYS—47

| | | |
|---|---|---|
| Armstrong | Glenn | Moynihan |
| Biden | Goldwater | Packwood |
| Boschwitz | Gorton | Pell |
| Bradley | Hatfield | Percy |
| Chafee | Hayakawa | Proxmire |
| Cohen | Heinz | Quayle |
| Cranston | Humphrey | Riegle |
| D'Amato | Jackson | Roth |
| Danforth | Kassebaum | Sarbanes |
| DeConcini | Kasten | Simpson |

| Dodd | Levin | Tsongas |
| Durenberger | Lugar | Weicker |
| Eagleton | Mathias | Williams |
| Exon | Metzenbaum | Zorinsky |
| Garn | Mitchell | |

NOT VOTING—2

| | |
|---|---|
| Randolph | Stafford |

So Mr. MATTINGLY's amendment (No. 545), as further modified, was agreed to.

Mr. MATTINGLY. I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Indiana as amended.

The amendment (No. 544), as amended, was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. Are there further amendments?

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE. Mr. President, I am informed that the committee's substitute proposal included a technical modification on sugar deleting the April 1 to March 31 crop year definition and leaving that definition to the Secretary as it was under earlier programs. We in Hawaii, have no problem with the way it was done under the old Sugar Act and under the de la Garza amendment in the 1977 act as the crop year for Hawaii was then the calendar year and this coincides with our normal period of very minimal, if any, harvesting and processing activity.

It is my understanding that the Department of Agriculture favors the greater flexibility of setting various crop years for various segments of the industry. There is no date which can accommodate the harvesting and processing schedules of all our sugarcane and sugar beet areas.

Is it the chairman's understanding that the flexibility provided the Secretary by his technical modification should not be interpreted to permit the Secretary to set a crop year definition later than the April 1 date in the case of the Hawaiian sugar crop year.

Mr. HELMS. The Senator from Hawaii is correct. This change is for the purpose of accommodating the needs of the domestic industry for varying crop year definitions and does not threaten any loss of coverage under the act for Hawaii's production. I would hope that the Secretary would consult with the segments of the industry involved before establishing the various crop years.

## HON. MICHAEL V. DiSALLE

Mr. GLENN. Mr. President, it is with great sadness and a deep sense of personal loss that I rise to address the Senate this afternoon. Late last night, former Ohio Governor Michael V. DiSalle passed away in his sleep. Today, in the words of the English poet, John Donne, we need not ask for whom the bell tolls, It tolls for all of us. It tolls for me, because I have lost a close personal friend and a cherished counselor. It tolls for the people of Ohio, for they too have lost a friend, a friend who championed their cause throughout a quarter century of public service. And the bell is tolling for America as well, because she has lost one of her most noble patriots and eloquent spokesmen. Mike DiSalle, you see, did far more than simply devote his life to the service of this Nation. He demonstrated by personal example that the political life can be a proud and honest life. For Mike DiSalle, politics was indeed an honorable profession.

Born in New York City, Mike was 3 years old when his family moved west to Toledo, Ohio, in 1911. After receiving his law degree from Georgetown University here, in Washington, Mike returned home to Toledo in 1931 to start his own law practice. In 1936, he was elected to the Ohio General Assembly and, within 2 months, was voted one of the five most valuable members of the House.

Local government had always attracted Mike, however, and from 1941 to 1950, he served the people of Toledo—first on the city council and as vice mayor, and later as the city's mayor. As mayor of Toledo, Mike DiSalle was a brilliant and forward-looking innovator, establishing early and successful programs to deal with such contemporary problems as air pollution, labor-management relations, port development, expressways and improved recreational facilities. He was also an early and firm advocate of "sunshine" government and insisted that all city council meetings be open to the public.

But Mayor DiSalle was never one whose interests were restricted solely to local affairs. Following World War II, for instance, he was deeply concerned about growing Communist strength in the Western European democracies. So Mike established the letters for democracy program that journalist Drew Pearson later credited with defeating the Communists in the Italian national elections of 1947.

After a 3-year stint in the Truman administration, first as Director of Price Stabilization and then Administrator of Economic Stabilization, Mike came home to Toledo in 1953. Undaunted by a losing bid for the office in 1956, Mike came back 3 years later to win the Governorship of Ohio by the largest margin in the State's history.

He wasted no time in making his presence felt. Indeed, more governmental firsts were established during the DiSalle administration than at any other time in Ohio history. He made reform of the State's mental institutions a top personal priority; he put the State government on a pay-as-you-go basis; he set records in highway construction; he helped create the Ohio Civil Rights Commission; he issued a code of ethics for all State employees; he developed a statewide economic plan and he insisted on open, honest government, with all cabinet meetings, correspondence and files open and available to the press.

Always a principled politician himself, Mike also proved to be an astute observer of national political trends; in

January 1960, he became the first Governor of a major State to announce his support for the Presidential candidacy of John F. Kennedy. Because of his widely acknowledged expertise in the area of State government, Mr. DiSalle became a valued adviser to President Kennedy and was later appointed to the President's Advisory Committee on Intergovernmental Affairs.

I will not even attempt today to recite the long list of awards and honors that were bestowed upon Mike DiSalle during his long and distinguished career. But there is one award that does bear special mention, because Mike was one of only 32 people to receive it. In 1962, he was honored by Interfaith Movement, Inc., for his "outstanding achievement in attaining the highest ideals of goodwill, tolerance, understanding and mutual respect." In receiving that award, Mike DiSalle joined rather select company. The 31 other recipients included such giants as Dwight Eisenhower, Cardinal Cushing, George Meany, and Supreme Court Justice Felix Frankfurter.

Mr. President, in summarizing the life and career of my friend, Mike DiSalle, I have enumerated some of the reasons that he will long be remembered. But I loved and respected Mike for yet another reason, a reason that goes far beyond his numerous accomplishments and his governmental successes. Above all else, Mike was a courageous human being who steadfastly refused to compromise either his beliefs or his ideals. In my opinion, Mike DiSalle's life was truly a profile in courage. This was a man who had the guts, time and time again, to take unpopular and politically risky stands in support of the principles in which he believed. Not once throughout his long career did he ever shirk his duties or abandon his convictions for the sake of political expediency. In fact, many people believe that his defeat for reelection as Governor of Ohio in 1962 was largely due to his firm and outspoken opposition to capital punishment.

Whether you agreed or disagreed with the positions that Mike DiSalle took, you could not help but respect him, for you know that whatever the stakes for him personally, Mike would not deviate from the course he believed was right.

That is why I shall remember Mike DiSalle—and that is why I am thankful to have known him. It has been said that a good man never really dies, that what he leaves behind will live forever in the hearts of those who knew him. In that sense, Mike did not—and cannot—pass away from us. For as it is written in the first chapter of the Book of Psalms:

He shall be like a tree planted on the banks of running water, giving fruit in season, its leaves never fading.

For me—and for all those whose lives he touched—Mike DiSalle continues to stand like a mighty oak—his principles never bending; his compassion never waivering; his memory never fading.

Thank you, Mr. President.

Mr. BAKER. Mr. President, I am pleased to join the distinguished Senator from Ohio in expressing my regret and the regret of so many on this side who knew Governor DiSalle and respected him for the contributions he made and the warmth he brought to public service. It is truly a loss to the country. I am sure I am joined by every Member of the Senate in expressing our sympathy to the people of Ohio and the family of Mike DiSalle.

Mr. GLENN. I thank the distinguished majority leader for his comments.

## ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, there will be no more votes tonight; and if the managers of the bill are agreeable, I am prepared now to ask the Senate to proceed to a period for the transaction of routine morning business. I see no dissent.

Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 6:45 p.m., in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

At 11:46 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its readings clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week."

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 153. Concurrent resolution authorizing a bust or statue of Dr. Martin Luther King, Junior, to be placed in the Capitol.

## ENROLLED JOINT RESOLUTION SIGNED

At 3:20 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week."

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

## HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read; and referred to the Committee on Rules and Administration:

H. Con. Res. 153. Concurrent resolution authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol.

## ENROLLED JOINT RESOLUTION PRESENTED

The Secretary reported that on today, September 16, 1981, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week."

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1925. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a report on the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement for the quarter ending June 30, 1981; to the Committee on Appropriations.

EC–1926. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on a proposed foreign military sale to Jordan; to the Committee on Armed Services.

EC–1927. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on a proposed foreign military sale to Spain; to the Committee on Armed Services.

EC–1928. A communication from the Principal Deputy Assistant Secretary of Defense, Comptroller, transmitting, pursuant to law, a report on certain transfers of amounts of appropriated funds; to the Committee on Armed Services.

EC–1929. A communication from the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting, pursuant to law, a report concerning the Selected Reserve recruiting and retention incentives; to the Committee on Armed Services.

EC–1930. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Progress In Improving Program And Budget Information For Congressional Use"; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget and the Committee on Governmental Affairs.

EC–1931. A communication from the Acting Chairman of the Federal Trade Commission, transmitting, pursuant to law, the second and third annual line of business reports; to the Committee on Commerce, Science, and Transportation.

EC–1932. A communication from the Deputy Secretary of the Army for Installations and Housing, transmitting a draft of pro-

posed legislation to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit the temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management, Department of the Interior; to the Committee on Energy and Natural Resources.

EC–1933. A communication from the Acting Secretary of the Interior, transmitting, pursuant to law, an application for refund of excess royalty payments from Getty Oil Company; to the Committee on Energy and Natural Resources.

EC–1934. A communication from the Assistant Secretary of the Army (Civil Works), transmitting, pursuant to law, a final supplement to a final environmental impact statement and a final report for downstream measures on the Harry S Truman Dam and Reservoir Project, Missouri; to the Committee on Environment and Public Works.

EC–1935. A communication from the Acting Secretary of the Interior, transmitting, pursuant to law, a list of requests for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC–1936. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to September 8, 1981; to the Committee on Foreign Relations.

EC–1937. A communication from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to amend Title 18, and Title 28, and Title 49, United States Code, in order to implement the "Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation"; to the Committe on Foreign Relations.

EC–1938. A communication from the Director of the Federal Prison System, Department of Justice, transmitting, pursuant to law, the annual report of the Board of Directors of Federal Prison Industries, Inc., for fiscal year 1980; to the Committee on Governmental Affairs.

EC–1939. A communication from the Plan Administrator of the Farm Credit Banks of New Orleans, transmitting, pursuant to law, the 1980 annual reports of the Farm Credit Retirement System and Production Credit Associations Retirement Plans; to the Committee on Governmental Affairs.

EC–1940. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Serious Problems Need To Be Corrected Before Federal Merit Pay Goes Into Effect"; to the Committee on Governmental Affairs.

EC–1941. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on July 28, 1981; to the Committee on Governmental Affairs.

EC–1942. A communication from the Chairman of the National Advisory Council on Ethnic Heritage Studies, transmitting, pursuant to law, the annual report of the Council for 1980–1981; to the Committee on Labor and Human Resources.

EC–1943. A communication from the Special Assistant to the Secretary of Defense, transmitting, pursuant to law, the report of Department of Defense procurement from small and other business firms for October 1980–May 1981; to the Committee on Small Business.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment, and with a preamble:

S. Res. 198. A resolution expressing the sense of the Senate that Benedict Scott (Vytautas Skuodis) be released from imprisonment in the Soviet Union.

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Report to accompany the nomination of Jose Manuel Casanova to be U.S. Executive Director of the Inter-American Development Bank for a term of three years (Ex. Rept. 97–21).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Sherman Maxwell Funk, of Maryland, to be Inspector General, Department of Commerce; pursuant to the order of June 2, 1981, referred to the Committee on Governmental Affairs for not to exceed 20 days.

(The above nomination was reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

William Addison Vaughan, of Michigan, to be Assistant Secretary of Energy (Environmental Protection, Safety and Emergency Preparedness);

Rayburn D. Hanzlik, of California, to be Administrator of the Economic Regulatory Administration;

Dallas Lynn Peck, of Virginia, to be Director of the Geological Survey;

Robert Carlton Horton, of Colorado, to be Director of the Bureau of Mines; and

Guy W. Fiske, of Missouri, to be Under Secretary of Energy.

(The above nominations were reported from the Committee on Energy and Natural Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. TOWER, from the Committee on Armed Services:

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Maj. Gen. Jack V. Mackmull, U.S. Army, to be lieutenant general, Maj. Gen. Donald E. Rosenblum, U.S. Army, to be lieutenant general, Maj. Gen. Howard F. Stone, U.S. Army, to be lieutenant general, Maj. Gen. James B. Vaught, U.S. Army, to be lieutenant general, Lt. Gen. John G. Albert, U.S. Air Force, (age 58) for appointment to the grade of lieutenant general on the retired list, Lt. Gen. William R. Richardson, U.S. Army, to be senior Army member of the military staff of the United Nations, Maj. Gen. Bernhard T. Mittemeyer, as the Surgeon General, U.S. Army, to be lieutenant general, Maj. Gen. John N. Brandenburg, U.S. Army, to be lieutenant general, Lt. Gen. Charles C. Pixley, U.S. Army, (age 57) for appointment to the grade of lieutenant general on the retired list, Lee D. Badgett for reappointment to the active duty list of the Regular Air Force in the grade of colonel, and in the Naval Reserve there are six temporary promotions to the grade of rear admiral (list begins with Leroy V. Isaacson). I ask that these names be placed on the executive calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. In addition, in the Air Force there are 1,312 appointments to the grade of major and below (list begins with Jose E. Calzada), in the Army there are 1,962 promotions to the grade of colonel and below (list begins with Ray A. Strawser), in the Marine Corps there are 608 temporary/permanent appointments to the grade of lieutenant colonel and below (list begins with George L. Alvarez), in the Regular Air Force there are 573 appointments to the grade of colonel and below (list begins with George W. Beddingfield), in the U.S. Army Reserve there are 378 promotions to the grade of colonel and below (list begins with Marvin G. Back), in the U.S. Navy and Naval Reserve there are 1,056 permanent promotions to the grade of lieutenant commander (list begins with Iffat A. Abbasi), in the U.S. Navy and Naval Reserve there are 311 permanent promotions to the grade of commander and below (list begins with John R. Anguilar), in the U.S. Navy there are 1,047 permanent promotions to the grade of captain (list begins with Robert W. Aldinger), in the Navy there are 27 temporary promotions to the grade of lieutenant commander and below (list begins with Steven C. Streck), in the Naval Reserve and NROTC there are 38 permanent/temporary appointments to the grade of captain and below (list begins with Billy J. Archer), and in the Marine Corps there are 149 temporary appointments to the grade of first lieutenant for limited duty (list begins with Anthony E. Agrue). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of July 31 and September 9, 1981, at the end of the Senate proceedings.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PERCY (by request):

S. 1627. A bill to amend Public Law 90–553, to authorize the transfer, conveyance, lease and improvement of, and construction on, certain property in the District of Columbia, for use as a headquarters site for an international organization, as sites for governments of foreign countries, and for other purposes; to the Committee on Foreign Relations.

By Mr. McCLURE (by request):

S. 1628. A bill to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052); to the Committee on Energy and Natural Resources.

By Mr. CANNON (for himself, Mr. PACKWOOD, Mr. GOLDWATER, Mr. HOLLINGS, and Mr. SCHMITT):

S. 1629. A bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain broadcast services and to provide certain deregulation of such broadcast services, and for other purposes; to the Committee on Commerce, Science, and Transportation.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PERCY (by request):

S. 1627. A bill to amend Public Law 90–553, to authorize the transfer, conveyance, lease and improvement of, and construction on, certain property in the District of Columbia, for use as a headquarters site for an international organization, as sites for governments of foreign countries, and for other purposes; to the Committee on Foreign Relations.

AMENDMENT OF INTERNATIONAL CENTER ACT

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to amend the International Center Act which would expand and bring to completion the planned International Diplomatic Center.

This legislation has been requested by the Department of State and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated August 25, 1981.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1627

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress asembled,* That the first section of the Act approved October 8, 1968 (Public Law 90–553, 82 Stat. 958), is amended—

(1) in the first sentence by striking out "sell or lease" and inserting in lieu thereof: "develop in coordination with the Administrator of General Services for, or to sell, exchange, or lease,";

(2) by striking out "Van Ness Street, Reno Road, and Tilden Street" and inserting in lieu thereof: "Yuma Street, 36th Street, Reno Road, and Tilden Street, except that portion of lot 802 in square 1964, the jurisdiction over which was transferred to the District of Columbia for use as an educational facility"; and

(3) by striking out "he" and inserting "the Secretary".

SEC. 2. Section 2 of such Act of October 8, 1968 (Public Law 90–553), is amended to read as follows:

"SEC. 2. Upon the request of any foreign government or international organization and with funds provided by such government or organization in advance, the Administrator of General Services is authorized to design, construct, and equip a headquarters building or legation building or related facilities on property conveyed pursuant to the first section of this Act".

SEC. 3. Section 3 of such Act of October 8, 1968 (Public Law 90–553), is deleted, and sections 4 to 6 of such Act, inclusive, are renumbered as sections 3 to 5, including references thereto. The first sentence of renumbered section 3 is amended to read as follows: "The Act of June 20, 1938 (DC Code, secs. 5–413 to 5–428), shall not apply to buildings constructed on property transferred or conveyed pursuant to this Act including section 3 of this Act as in effect January 1, 1980.".

SEC. 4. Section 4 of such Act of October 8, 1968 (Public Law 90–553), as renumbered by this Act is amended by—

(1) inserting "demolition or removal of existing structures, site preparation, and the" immediately after "The";

(2) striking out "and" immediately before "(d)";

(3) inserting "(e) other utilities, and (f) related improvements necessary to accomplish the purposes of this Act," immediately after "the fire alarm system,"; and

(4) inserting "or contiguous to" after "within".

SEC. 5. Section 5 of such Act of October 8, 1968 (Public Law 90–553), as renumbered by this Act is amended by—

(1) inserting ", exchange," after "sale" in the first sentence, and by inserting ", exchanges," after "sales" in the second sentence thereof; and

(2) adding at the end thereof the following:

"The Secretary may retain therefrom a reserve for maintenance and security of those public improvements authorized by this Act which have not been conveyed to a government or international organization under the first section of this Act, and for surveys and plans related to development of additional areas within the Nation's Capital for chancery and diplomatic purposes. Amounts in the reserve will be available only to the extent and in such amounts as provided in advance in appropriations Acts."

SEC. 6. The Act of October 8, 1968 (Public Law 90–553), is further amended by adding at the end thereof the following new section:

"SEC. 6. This Act may be cited as the 'International Center Act'".

DEPARTMENT OF STATE,
*Washington, D.C., August 25, 1981.*

Hon. GEORGE BUSH,
*President of the Senate.*

DEAR MR. PRESIDENT: Enclosed for your consideration and appropriate reference is a legislative proposal to amend the International Center Act (Public Law 90–553, enacted on October 9, 1968) which would expand and bring to completion the planned International Diplomatic Center within the federally-owned Bureau of Standards site at Van Ness Street and Connecticut Avenue in northwest Washington, D.C. This project, with the amendments proposed herein, will be completed without cost to the American taxpayer.

This legislation was previously introduced in the House (H.R. 6550) and the Senate (S. 2302) during the 96th Congress, and was passed by the House with amendments (House Report 96–1208, July 30, 1980). Senate action, however, was unable to be completed before the end of the last session. The legislation proposed herein is the same as the Bill passed by the House, with an additional amendment to extend the time in which project-related costs can be funded from surplus lease proceeds, to the extent provided for in appropriations acts.

The need for this legislation has become pressing. The United States Government, as part of its international obligations, is required to assist foreign governments to obtain suitable premises for chanceries in the nation's capital. Of equal importance, there is a growing need for reciprocity involving the substantial problems of the United States missions overseas. The Department of State is currently unable to meet its obligations due to the unavailability of suitable chancery sites in Washington because of security, costs, and restrictive zoning problems. This situation has created an adverse impact on our national security interests and the ability of the United States to support our needs abroad.

The planned Diplomatic Center is intended to partially alleviate the critical shortage of suitable space for location of chanceries and related facilities of foreign governments in the nation's capital. The project is currently under development, and sites for ten governments have been completed by the General Services Administration. It is anticipated that all presently available space for chanceries at the Center will be reserved by the end of 1982.

The Department urges your support of the legislation and requests that consideration be given to its expeditious passage.

The Office of Management and Budget has advised the Department that there is no objection to the submission of this proposal to the Congress, and its enactment would be consistent with the Administration's objectives.

Yours sincerely,

RICHARD FAIRBANKS,
*Assistant Secretary for Congressional Relations.*●

By Mr. McCLURE (by request):

S. 1628. A bill to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052); to the Committee on Energy and Natural Resources.

AMENDMENT OF EMERGENCY FUND ACT

● Mr. McCLURE. Mr. President, at the request of the administration, I send to the desk for appropriate reference a bill to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052).

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the bill, and the executive communication which accompanied the proposal from the Assistant Secretary be printed in the RECORD.

There being no objection, the bill and communication were ordered to be printed in the RECORD, as follows:

S. 1628

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Act entitled "An Act to authorize an emergency fund for the Bureau of Reclamation to assure the continuous operation of its irrigation and power systems," approved June 26, 1948, is amended as follows: (1) by changing the first sentence of the Act to read as follows: "In order to assure continuous operation of all projects and project facilities governed by the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and for which title is held by the United States, there is

hereby authorized to be appropriated from the reclamation fund an Emergency Fund which shall be available for defraying expenses which the Commissioner of Reclamation determines are required to be incurred because of unusual or emergency conditions."

---

U.S. DEPARTMENT OF THE INTERIOR,
*Washington, D.C., August 7, 1981.*

Hon. GEORGE BUSH,
*President of the Senate,*
*Washington, D.C.*

DEAR MR. PRESIDENT: There is enclosed a draft of a proposed bill, "To amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052)."

We recommend that the bill be introduced and swiftly enacted.

Public Law 80–790 (the Act of June 26, 1948, 62 Stat. 1052), referred to as the Emergency Fund Act, authorized the appropriation of an emergency fund for the Bureau of Reclamation to ensure the continuous operation of its irrigation and power systems on projects governed by the Federal Reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto). Funds are made available to the Emergency Fund in annual appropriation acts. The Emergency Fund authority can be used only for the emergency protection and repair of irrigation and power systems being operated and maintained by the Bureau and for those systems for which title is vested in the United States but which are being operated and maintained by other entities pursuant to provisions of an operating contract.

Under the Emergency Fund Act, funds are made available to meet unusual or emergency conditions, such as canal bank failures, generator failures, damage to transmission lines; or other physical failures or damage, acts of God such as fires, floods, drought or epidemics, strikes, freight embargoes, or conditions causing or threatening to cause interruption of water or power service. Use of funds must be approved by the Commissioner of Reclamation except in extreme emergencies, when regional or project officials may incur obligations in advance of the Commissioner's approval, in order to prevent any possible loss of life.

The Emergency Fund appropriation is used only to the extent necessary to restore irrigation or power service or to assure the continuation of service if conditions threaten interruption of such service. The Fund is used if no other federally appropriated funds are available and only until other Federal funds, if needed, can be obtained in timely manner through the normal appropriation process. If it will require several months to complete repairs or replacement, the appropriation of other Federal funds is requested as soon as possible. The Emergency Fund Act authority is not used as a means to avoid requesting operation and maintenance or rehabilitation and betterment funds sufficiently in advance to keep project works in a safe operating condition. On projects turned over to water users for operation and maintenance, only those emergencies which cannot be met by the water users out of regular or reserve operation and maintenance funds are considered within the scope of the Emergency Fund. Expenditures are reimbursable or returnable depending upon the applicable law or contractual arrangements on reimbursability for the purpose for which the expenditures are made. The amendment makes no change in existing law on reimbursability.

Funds for the repair or replacement of the numerous water systems constructed by the Bureau to serve municipal or industrial purposes are not available under the present terms of the Emergency Fund Act.

The proposed bill would broaden the Act to permit the use of emergency funds for the repair of all project facilities for all projects governed by the Federal reclamation laws, where title is vested in the United States, including those which are serving municipal or industrial purposes. Emergency funds would be used only when such use would be needed to restore service or to prevent loss of service or further damage to project facilities.

If the proposed bill becomes law, we would expect use of the Emergency Fund to increase; however, with the recent agency reorganization and the transfer of a large portion of our power facilities, particularly transmission lines, which have previously relied heavily on the Emergency Fund, to the Department of Energy, we cannot yet predict the net overall impact on use of the Fund. Our amendment conforms the Act to current conditions by recognizing the reorganization of most power functions out of Interior.

The bill is consistent with the purposes of the Emergency Fund Act and would enable the Commissioner to deal more adequately with emergency situations not now covered by the Act and to maintain continuous operation of all project facilities. Such a change is desirable to protect project beneficiaries from damage or economic loss, to protect the repayment capacity of project beneficiaries, and to protect the United States investment.

We recommend that the bill be introduced and enacted.

The Office of Management and Budget has advised that there is no objection to the presentation of this draft bill from the standpoint of the Administration's program.

Sincerely,

GARREY CARRUTHERS,
*Assistant Secretary.*

---

By Mr. CANNON (for himself, Mr. PACKWOOD, Mr. GOLDWATER, Mr. HOLLINGS, and Mr. SCHMITT):

S. 1629. A bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain broadcast services and to provide certain deregulation of such broadcast services, and for other purposes; to the Committee on Commerce, Science, and Transportation.

FEDERAL REGULATION OF THE NATION'S BROADCASTING INDUSTRY

● Mr. CANNON. Mr. President, I am sending to the desk a bill that incorporates a number of legislative proposals to reduce Federal regulation of the Nation's broadcasting industry. As such, it consolidates the substantial efforts of Senators GOLDWATER, SCHMITT, and PACKWOOD to eliminate a significant degree of Government interference with the radio and television industries.

There are three basic concepts contained in the proposed Broadcast Deregulation Act of 1981. First, is the elimination of the expensive, time-consuming, and essentially superficial comparative renewal process for all broadcast licenses. Second, is the elimination of all Federal control over radio programing. Third, is a statement of congressional policy that new and additional services, if technically feasible, are desirable and consistent with our desire to encourage competition in this industry.

None of these concepts is novel. All have been explored in previous hearings. Thus, I believe there is a strong consensus among members of the Commerce Committee that these provisions should be enacted. The list of cosponsors is sufficient demonstration of that fact.

In addition, I personally hope that we will be able to explore the idea of subsequently amending the bill to eliminate Federal Communications Commission regulation of television programing, including community ascertainment requirements. I am inclined to apply the provisions in the bill that apply to radio program deregulation to television as well. If we choose to explore this path, however, I believe we would need to hold an additional hearing to hear all the various points of view.

During the next few days, I expect to include a section-by-section analysis of the bill in the RECORD.

In the meantime, I hope that we will receive public comment on this proposal and suggestions for any further proposals. In particular, I am looking forward to the comments of the Federal Communications Commission concerning the degree to which the bill should apply to television broadcasting. I would encourage the Commission to provide us with its views as soon as possible.●

---

## ADDITIONAL COSPONSORS

S. 1030

At the request of Mr. MCCLURE, the Senator from Kentucky (Mr. FORD), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Wyoming (Mr. SIMPSON) were added as cosponsors of S. 1030, a bill to protect firearms owners' constitutional rights, civil liberties, and rights to privacy.

S. 1230

At the request of Mr. CRANSTON, the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 1230, a bill to provide for the minting of commemorative coins to support the 1984 Los Angeles Olympic games.

S. 1235

At the request of Mr. D'AMATO, the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 1235, a bill to exempt certain matters relating to the Central Intelligence Agency from the disclosure requirements of title 5, United States Code.

S. 1277

At the request of Mr. HATCH, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 1277, a bill to restrict the authority of the Secretary of Health, Education, and Welfare with respect to the regulation of vitamin and mineral products for over-the-counter use.

S. 1373

At the request of Mr. DECONCINI, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 1373, a bill to authorize the President to call a White House Conference on Veterans.

S. 1442

At the request of Mr. HATCH, the Senator from Oklahoma (Mr. NICKLES), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of S. 1442, a bill to amend the Federal Food, Drug, and Cosmetic Act, the Poultry Products Inspection Act, the Federal Meat Inspection Act, and the Egg Products Inspection Act to improve food safety decisions, to provide for assessment of risks to health presented by sub-

stances present in food, to provide for referral of food safety questions to expert scientific advisory panels, to provide authority for flexible regulatory response based on the risks and uses associated with a substance, and for other purposes.

S. 1626

At the request of Mr. NICKLES, the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of S. 1626, a bill to amend the Department of Energy Organization Act to clarify the jurisdiction of the Federal Energy Regulatory Commission, to reform and improve the regulation of oil pipelines, and for other purposes.

SENATE JOINT RESOLUTION 85

At the request of Mr. HATCH, the Senator from Alabama (Mr. HEFLIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Tennessee (Mr. SASSER), the Senator from North Dakota (Mr. BURDICK), the Senator from Indiana (Mr. LUGAR), the Senator from Iowa (Mr. GRASSLEY), the Senator from Florida (Mr. CHILES), the Senator from Kansas (Mr. DOLE), the Senator from Rhode Island (Mr. PELL), the Senator from Idaho (Mr. SYMMS), the Senator from Nevada (Mr. LAXALT), the Senator from Hawaii (Mr. INOUYE), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of Senate Joint Resolution 85, a joint resolution to designate June 30, 1981, as "National Drug Standards Day."

SENATE JOINT RESOLUTION 97

At the request of Mr. MITCHELL, the Senator from Alabama (Mr. HEFLIN), the Senator from South Dakota (Mr. ABDNOR), the Senator from New York (Mr. MOYNIHAN), the Senator from New York (Mr. D'AMATO), and the Senator from Arizona (Mr. GOLDWATER) were added as cosponsors of Senate Joint Resolution 97, a joint resolution to designate the second full week in October as "National Legal Secretaries' Court Observance Week".

SENATE JOINT RESOLUTION 104

At the request of Mr. MELCHER, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of Senate Joint Resolution 104, a joint resolution directing the President to consult with the Governors of the Federal Reserve System for the purpose of substantially reducing interest rates within the next 90 days.

SENATE RESOLUTION 175

At the request of Mr. BOREN, the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of Senate Resolution 175, a resolution to congratulate the State of Oklahoma on the celebration of its Diamond Jubilee.

SENATE RESOLUTION 198

At the request of Mr. PERCY, the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of Senate Resolution 198, a resolution expressing the sense of the Senate that Benedict Scott (Vytautas Skuodis) be released from imprisonment in the Soviet Union.

SENATE RESOLUTION 200

At the request of Mr. HOLLINGS, the Senator from Florida (Mr. CHILES) was added as a cosponsor of Senate Resolution 200, a resolution expressing the sense of the Senate with respect to the scheduled meeting of the Interparliamentary Union in Havana, Cuba, in September 1981.

SENATE RESOLUTION 211

At the request of Mr. BENTSEN, the Senator from Oklahoma (Mr. BOREN), the Senator from Maryland (Mr. SARBANES), the Senator from Florida (Mr. CHILES), the Senator from Mississippi (Mr. STENNIS), the Senator from Washington (Mr. JACKSON), the Senator from North Dakota (Mr. BURDICK), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of Senate Resolution 211, a resolution calling on the Governors of the Federal Reserve System to encourage banks to make loans available for productive uses while eliminating loans for speculative and unproductive uses.

AMENDMENT NO. 96

At the request of Mr. JOHNSTON, his name was added as a cosponsor of amendment No. 96 proposed to S. 951, a bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

AMENDMENT NO. 545

At the request of Mr. MATTINGLY, the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from New Mexico (Mr. DOMENICI), the Senator from Kansas (Mr. DOLE), the Senator from Oklahoma (Mr. NICKLES), the Senator from North Carolina (Mr. HELMS), the Senator from Texas (Mr. BENTSEN), and the Senator from Texas (Mr. TOWER) were added as cosponsors of amendment No. 545 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

## SENATE RESOLUTION 212—SUBMISSION OF A RESOLUTION TO DIRECT THE FINANCE COMMITTEE TO REDUCE THE COST OF ECONOMIC RECOVERY TAX ACT

Mr. MOYNIHAN submitted the following resolution, which was referred to the Committee on Finance:

S. RES. 212

Whereas the Economic Recovery Tax Act that Congress passed in August will cost the Treasury $750 billion in lost revenue between now and 1986,

Whereas the Republican staff of the Senate Budget Committee now estimates that the deficit will be $78 billion in fiscal year 1984, when just last spring, Congress was expecting a small surplus,

Whereas the staff also estimates there will be deficits in 1985 and 1986,

Whereas sustained deficits hinder capital formation: they keep interest rates high and divert capital otherwise available for the private sector to the uses of government, and

Whereas increasing capital formation ought to be a principal objective of the government's economic policy,

Whereas a $750 billion tax Act also commits the nation to a decade in which the issue of public discourse, over and over and over, will be how big must the budget cuts be in order to prevent the deficits from being even bigger, and

Whereas this is a dismal and dispiriting prospect:

*Therefore be it resolved* That the Committee on Finance is directed to report a new bill by no later than October 15 that would reduce the revenue loss from the Economic Recovery Tax Act for fiscal years 1981 through 1986 by $250 billion.

● Mr. MOYNIHAN. Mr. President, I am submitting a resolution today that would direct the Senate Finance Committee to reduce the cost of the Economic Recovery Tax Act by a third. The committee would do this by reporting new legislation. It would have until October 15 to act.

The Economic Recovery Tax Act is too expensive. The act is expected to cost the Treasury nearly $750 billion in lost revenue over the 6 years from 1981 through 1986.

Too many provisions were added at the last minute by the administration and by Members of Congress in the bidding for votes. Democrats are as guilty of this as Republicans. I calculate the total cost of these provisions to be $150 billion. They ought to be reconsidered.

In addition, the original elements of the administration's bill were more than we can reasonably afford. The 10–5–3 depreciation plan is too liberal. Under that plan, businesses will be able to write off the cost of new machines and buildings over a shorter period of time than they could do in the past—all well and good.

But the new depreciation schedules are so generous that, in future, income from some depreciable assets would not be taxed at all. In fact, the Government will subsidize companies that make these investments. For example, the Congressional Research Service calculates that with 6 percent inflation, income from light trucks, buses and trailers would be taxed at a rate of minus 108 percent.

It is one thing not to tax income from depreciable assets. It is another matter entirely to subsidize businesses when they purchase such assets. Not taxing is defensible; subsidizing is not.

Let it also be said that Congress erred by approving a 25-percent reduction in marginal income tax rates for individuals over 3 years. A smaller reduction in tax rates limited to 1 or 2 years was in order, with a commitment by Congress for a review in the third year and a decision whether economic conditions warrant further reductions.

The Republican staff of the Senate Budget Committee recently prepared a memorandum for internal use that discusses how likely we are to balance the Federal budget in the foreseeable future. The answer: Expect mounting deficits at least through 1984.

That alone should raise questions about the tax bill. When Congress committed itself to the bill, it did so on the assumption that there would be a small budget surplus of about $1 billion in 1984.

The Republican staff now says to expect a deficit in 1984 of $78 billion. The change is explained by reestimates due to changing economic forecasts, a larger-than-expected tax cut, and an admission that some of the budget savings counted on earlier by the committee were just "smoke and mirrors."

Do we really want a decade in which

the issue of public discourse, over and over and over, will be how big must the budget cuts be in order to prevent the deficit from being even bigger? What a dismal and dispiriting prospect.

Do we really want to be forced to choose between strengthening the national defense, or continuing to pay the social security benefits we have promised elderly Americans? No other areas in the budget offer large savings.

Other Members of Congress are reaching the same conclusion. Senator GARY HART introduced a resolution on Friday that would hold the income tax cuts for individuals in abeyance until there is a balanced Federal budget. Congressmen MORRIS UDALL and DAVID OBEY introduced legislation in the House to cut the cost of the Economic Recovery Tax Act by more than half. Said UDALL and OBEY:

Emergency action is needed now to control inflation and to prevent a virtual decimation of the bond markets and a nose dive in stock values.

All these ideas should enter the mix. The point is that we could cooperate and have a bill on the President's desk very soon. Perhaps that exaggerates the prospects but it certainly does not overstate the urgency given our critical need for corrective action.

Finally, Mr. President, all of this was predictable. It was predictable that we would have large deficits. It was well known even before Congress completed work on the tax bill that too many special interest provisions had been added, and that the cost of the bill was too great.

On March 5, I spoke to the Economic Club of New York. The deficit for fiscal year 1982 was being projected at some $42 billion. This, I said, was not going to happen. There would be some loss of revenue. "The deficit in fiscal year 1982," I continued, "will surely be in the neighborhood of $60 billion, and it would go higher." I made this point "not to criticize, much less to discredit." We had to get hold of spending, we had to cut taxes, but we also had to be realistic about what would happen when we did.

The economic debate went on all spring and into summer. It culminated, for me at all events, on the evening of July 27. That was the evening the President spoke to the Nation about the tax bill. I was asked by my party to respond later that same evening, an offer made possible by the generosity of NBC television.

The President wanted to cut taxes: So did we all. My concern was with the battle then reaching its climax in the House of Representatives between the administration and the Democratic majority. Most everyone had lost sight of the fact that there was basic agreement on the need for a "clean" tax bill, while all attention had turned to the question just whose bill it would be. A bidding process had begun. Votes were being won by offering yet further special interest tax cuts.

In my July 27 speech, my plea was for the bidding to stop:

In the last few days something like an auction of the Treasury has been going on. The administration is seemingly willing to pay any price to win votes for its version of a tax cut, simply to gain a victory on its own terms.

What this is doing is taking a tax bill we could afford and transforming it into a great barbecue that we can't afford. I would say to the President that some victories come too dear.

The Senate Finance Committee voted out a major tax reduction on June 25 by a margin of 19 to 1. It is now on the (Senate) floor. We will pass it Wednesday. If the House does the same we can have a bill on the President's desk in a matter of days.

Let us pass a tax bill and get on with the business of government. Our business—the administration's business—is to promote the general welfare by getting the American economy moving again. It hasn't been and it isn't now.

My concern was that we would wake up to an empty Treasury, with the grimmest consequences.

This need not happen. There is still time to prevent it. Mr. President, I ask unanimous consent that the text of a speech I gave last Sunday to the Business Council of New York be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR DANIEL PATRICK MOYNIHAN

In 1977 I spoke to the then Associated Industries of New York State on the subject of the imbalance of the fiscal relation between the national government and the State of New York. I offered my judgement that this had become a sustained and significant problem to our economy. (Although even I would not have then foreseen that our poplation losses in the decade would lead to the loss of five congressional seats, the largest such loss in the history of the Congress.) I gave to my address the somewhat academic title:

"On the time it takes to explain something" but my purpose was to suggest that the problem was all the more urgent because it was not one that was easily set forth or readily comprehended. This evening I return to the same theme, but to a much larger subject.

The United States is facing an economic and in consequence a political crisis—I hope I do not use the word "crisis" casually—which is all the more ominous because it, too, is somehow difficult to explain, difficult to comprehend.

The signs of crisis are not hard to find. Our financial markets are in an unprecedented condition. The price of stocks and bonds have sharply dropped, while rates of interest are higher than any, I believe, known to our history. They recall the rates the Fuggers charged the Hapsburgs, but have no equivalent in the economic history of the United States, and with respect to the rates of government securities, none, at least to my knowledge, in the history of the Republic. At a time when General Burgoyne was still in the field, and not far from where we are today, the Continental Congress could sell its securities for less.

Our President, whom we admire and wish success—I served in the Cabinet or the sub-Cabinet of each of the four Presidents who succeeded Jimmy Carter, and in the Senate I did all I could do to support him, so let me say I want to see a President succeed—told his Economic Policy Advisory Board just last Thursday that there must be yet greater reductions in the budget as the only way to prevent "eventual collapse" of the economy. (NYT Sept. 11.) on that day his senior White House spokesman told the press, and I quote an account:

"Mr. Reagan's statements did not reflect a sense of panic in the White House over the declining financial markets or over a Congressional Budget Office estimate that the 1982 deficit will exceed Mr. Reagan's estimate by over $22 billion."

The only meaning of—the only reason for—such a statement is that, of course, there is panic.

The extent of the panic is to be found in the statements of the leaders of the President's party in Congress. They are talking of punishing the markets for not behaving. Quite specifically, the majority whip of the Senate has suggested a windfall profits tax might be in order for those who benefit from high interest rates. The majority leader of the Senate sent word north, to you know where, saying he wanted things to shape up not in a matter of weeks, but "days." "It's time indeed," he said, "that the financial markets realize that they are playing a dangerous game." They are, in a word, getting government mad.

I need not tell you that we are not far from proposals for wage and price controls, although the power of the Executive to impose these unilaterally has, to my knowledge, expired.

How can this have happened to an administration so exuberantly committed to the free market as an economic and moral ideal?

It is not easy to explain, but it is, I think explicable.

Two basic elements are involved: First, a political tradition; second, an economic idea.

There is no handy term for the political tradition, although it recurs in American history at all points in the political spectrum. It involves a profound distrust of institutions, be they governmental, financial or corporate. It occurs on the right and on the left. The Carter administration, for example, had more than its share of the latter variety. But the present administration, on the other end of the spectrum, is the most advanced case we have yet encountered. May I repeat that I served in the Cabinet of the two preceeded Republican Presidents. This new group—one of whose more prominant members was once a student of mine—are as nothing we have seen.

They are conservatives as anarchists are to liberals.

This would all be innocent enough were it not for the economic idea they brought to office with them, the idea that the revenue system of the Federal Government was not an institution of any great importance, that the most extraordinary things could be done to it with relative impunity.

Specifically, this doctrine held that any given level of revenue can be obtained by two levels of taxation: One high, one low. This was not a mere extension of the principle of price elasticity.

In 1978, for example, I persuaded first the Finance Committee and then the Congress to reduce capital gains taxes which clearly were too high. The Treasury foresaw a prolonged loss of revenue.

Yet the very next year capital gains tax collections increased. But that was a conventional argument over an established economic principle. The "laffer curve" was new. It was a fundamental rejection of the notion of restraint, of limit as the necessary environment of government.

The proposition took as its most popular form the proposal that taxes could be cut by one third at no cost to revenues. The President put it thus while campaigning in Flint, Michigan in May, 1980: One can cut taxes, spend more for national defense and balance the budget because:

"We would take the increased revenues from the tax decrease to rebuild our defense capabilities."

A first restraint which has had to yield is the balanced budget, which one would have thought was at the core of the doctrine of economic conservatism.

Some knew this all along. For others, it comes as a surprise. My colleague and friend Jack Kemp, an author of the Kemp-Roth tax bill, declared last spring in the House: "We don't worship any longer at the shrine of the balanced budget."

And more recently, when the tax bill was signed, the Congressman told the President: "I want your support for my next tax bill—a 30 percent rate reduction in your second term." "Gee Jack," the President responded, "I thought we'd go for a 40 percent reduction next time."

At first it seemed to me that if everyone made allowances for the understandable—and wholly attractive—enthusiasm which new ideas generate, we could get through it all well enough. "Voodoo" economics or not.

On March 5, I spoke to the Economic Club of New York. The deficit for fiscal year 1982 was being projected at some $42 billion. This, I said, was not going to happen. There would be some loss of revenue. "The deficit in fiscal year 1982," I continued, "will surely be in the neighborhood of $60 billion, and it could go higher." (On September 10, the congressional budget office forecast $65 billion.) I made this point, "not to criticize, much less to discredit." We had to get hold of spending. We had to cut taxes. But we also had to be realistic about what would happen when we did.

The economic debate went on all spring and into summer. It culminated, for me at all events, on the evening of July 27th.

That was the evening the President spoke to the Nation about the tax bill. I was asked by my party to respond later that same evening, an offer made possible by the generosity of NBC television.

The President wanted to cut taxes: so did we all. My concern was with the battle then reaching its climax in the House of Representatives between the administration and the Democratic majority. Most everyone had lost sight of the fact that there was basic agreement on the need for a "clean" tax bill, while all attention had turned to the question just whose bill it would be. A bidding process had begun: votes were being won by offering yet further special interest tax cuts.

In my July 27th speech, my plea was for the bidding to stop:

"In the last few days something like an auction of the Treasury has been going on. The administration is seemingly willing to pay any price to win votes for its version of a tax cut, simply to gain a victory on its own terms."

"What this is doing is taking a tax bill we could afford and transforming it into a great barbecue that we can't afford. I would say to the President that some victories come to dear."

"The Senate Finance Committee voted out a major tax reduction on June 25 by a margin of 19 to 1. It is now on the (Senate) floor. We will pass it Wednesday. If the House does the same we can have a bill on the President's desk in a matter of days."

"Let us pass a tax bill and get on with the business of government. Our business—the administration's business—is to promote the general welfare by getting the American economy moving again. It hasn't been and it isn't now."

My concern was that we would wake up to an empty Treasury, with the grimmest consequences. To begin with it would be discovered that the new economic doctrine did not have many adherents. One of its essential, almost chiliastic elements, is that people must believe it, if it turned out they didn't, well * * *

Well what? The absolute predictable conclusion that the lost revenues would not be replaced, and that in consequence an unending sequence of deficits loomed. I pleaded in March for realism in the hope that we would not lose our nerve once realty was forced upon us, and would set about balancing future budgets.

I repeat, I repeat, I repeat. The single most important economic problem facing our nation is capital formation. We have gone on for a generation now with the lowest or second lowest rate of capital formation in the western world. We are eating our seed corn. Last year, for example, American personal income, in real terms, dropped five percent, the largest decline since this series began in 1947.

Sustained deficits destroy capital formation.

They divert capital otherwise available for the private sector to the uses of government, most of which goes to consumption. Worse yet, in the present situation the demands of government are so great that interest rates soar beyond bearing. The cost of capital formation become prohibitive, unless a permanent inflation is foreseen.

Hence the demands for further budget cuts. Our defense budget, which finally was getting on a steady course, will not be whipped up once more. Our domestic budget is being shredded, and with it the social compact of a half century concerning the role of government in abbeting the health, education and welfare of our people.

Is there any hope: Some.

There are signs in Washington that the shallowness of some of that early economic doctrine is beginning to sink in. Commenting on the wreckage of the defense program, a department spokesman, the distinguished public servant Henry Catto, quoted Emerson: "A foolish consistency is the hobgoblin of little minds . . ."

That I fear is the mark of experience in government, and it is no accident that Mr. Catto is an experienced official. Nor any accident that so many of those who fashioned the present crisis have no real experience responsibility at the national executive level of Government.

But why not be friends? Be forgiving. Be amnesiac if it comes to that?

The tax bill was too large. Let me give you its measure. The report of the committee of conference gives the estimated revenue loss as follows:

*Total revenue effect*

[In millions of dollars]

| *Years* | |
|---|---|
| 1981 | −1,565 |
| 1982 | −37,656 |
| 1983 | −92,732 |
| 1984 | −149,944 |
| 1985 | −199,303 |
| 1986 | −267,627 |

In round terms this is a revenue loss of $750 billion. What we need is a midcourse correction, keeping many of the fine features of the new bill (which is why I voted for it) reducing this cost by, let us say, $250 billion. Take away one quarter trillion, and a one half trillion tax cut remains. Surely next month, when we raise the debt ceiling above the $1 trillion mark we could lower that tax loss over the next 5 years by a third of a trillion. The benefits to the economy would surely be enormous, and even more to the tone of public debate.

Do we really want a decade in which the issue of public discourse, over and over and over, will be how big must the budget cuts be in order to prevent the deficit from being even bigger? Surely larger, more noble purpose ought to engage us.

The tax cut was too large. That need not be the end of the world. Cut it back a bit.

I shall introduce such a bill on Tuesday. It could be on the President's desk Friday if we all cooperated. Well, that exaggerates somewhat. But it does not overstate the urgency, given the alternative.

Clearly there is nothing sacred about $250 billion as the midcourse correction I speak of, but the number can be defended. It is generally agreed that at least $150 billion in the tax cut came from the absurd last minute bidding in the House, the object of which was not to bring about a tax cut, but to run up vote totals as if a great basketball game were in progress. Assign tht sum to budget balancing. Assign the remaining to keeping other promises. (Remember, a balanced budget was promised.) You might call them negative promises. In the campaign of 1980 the President never mentioned the slashes he is now being forced to propose in education, social security, nutrition and other programs. He did not want them; I am convinced he does not want them. Imagine the United States of America, with a GNP approaching $3 trillion announcing that henceforth school children eligible for support will be limited to one half glass of milk at lunch.

I plead now as I pleaded 6 weeks ago for continuity and for rationale. For 6 months in Washington we have been subjected to ever more radical proposals for change in fundamental national commitments which don't originate in any new thinking about those commitments, but simply in the dawning recognition that the new economics isn't credible.

Just after the tax cut our distinguished majority leader Baker called the whole thing "a riverboat gamble," that seemed to me admirably candid. But why, if the flush doesn't fill out, start breaking up the place.

For how else are we to understand his more recent call for what Leonard Silk terms "reprisals" against Wall Street in the form of "credit controls, reorganizing the Federal Reserve, a windfall-profits tax on interest income, and wage and price controls"?

Do we really want to put Willard Butcher in jail for usury? Or Walter Wriston in the stocks for excess profit? Or see "Mil" Batten fined for running a gaming house? New Yorkers arise! For the first time since the battle of Oriskany, the frontier is in flames.●

## AMENDMENTS SUBMITTED FOR PRINTING

### DEPARTMENT OF JUSTICE AUTHORIZATION ACT, 1982

AMENDMENT NOS. 546 AND 547

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH submitted two amendments intended to be proposed by him to the bill (S. 951) to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

AMENDMENT NOS. 548 AND 549

(Ordered to be printed and to lie on the table.)

Mrs. HAWKINS submitted two amendments intended to be proposed by her to the bill S. 951, supra.

### AGRICULTURE AND FOOD ACT OF 1981

AMENDMENT NO. 550

(Ordered to be printed and to lie on the table.)

Mr. HUMPHREY submitted an amendment to be proposed by him to the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

## NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES AND SUBCOMMITTEE ON NUCLEAR REGULATION, COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing which will be held jointly before the Committee on Energy and Natural Resources and the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works. The hearing will be held on Tuesday, October 20, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, to consider S. 1606, relating to nuclear accident cleanup legislation, including the Three Mile Island accident.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Charles Trabandt of the Energy and Natural Resources Committee staff at 224–7141 or Mr. James Asselstine of the Environment and Public Work Committee staff at 224–2991.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources. On Tuesday, September 29, beginning at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building, the committee will consider S. 1544, the State and Local Energy Block Grant Act of 1981.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. Richard Grundy of the committee staff at 224–2564.

SUBCOMMITTEE ON ENERGY REGULATION AND THE SUBCOMMITTEE ON WATER AND POWER

Mr. HUMPHREY. Mr. President, on behalf of myself and Mr. MURKOWSKI, I would like to announce for the information of the Senate and the public the scheduling of public hearings which will be held jointly by the Subcommittee on Energy Regulation and the Subcommittee on Water and Power. These oversight hearings to consider hydroelectric development and licensing procedures will be held on Monday, October 19, and Friday, October 23, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittees on Energy Regulation, and Water and Power, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings, you may wish to contact Mr. Howard Useem at 224–5205 or Mr. Russ Brown at 224–2366.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, September 17, at 1:30 p.m., to hold a hearing on the nomination of Charles Bowsher to be Comptroller General of the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution of the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, September 17, at 10 a.m. to hold a hearing on the Constitution Bicentennial and at 2 p.m. to hold a hearing on bail reform.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, September 17, to hold a hearing on S. 1575, the Combined Hydrocarbon Leasing Act of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### HENRY B. RICKENBAKER

● Mr. HOLLINGS. Mr. President, from 1977 until early this year South Carolina, and in particular its agricultural community, has been very ably served by Mr. Henry B. Rickenbaker as chairperson of the State Agricultural Stabilization and Conservation (ASC) Committee. I bring his outstanding service to the Senate's attention, Mr. President, because his dedicated and conscientious work in behalf of many South Carolinians deserves our recognition and appreciation.

Henry knows farming firsthand. He is a resident of Clarendon County where he produces cotton, tobacco, corn, soybeans, and small grain on 2,500 acres. He has been active in the operation of Rickenbaker Gin, Inc., and has served the gin in the capacities of president and general manager. In addition to his farming activities, Mr. President, Henry has been a strong voice in the farming community of our State for a number of years. This is evidenced by his participation in many farm organizations. He has been a community ASC committeeman, a director of the Clarendon County Farm Bureau, a director of the National Cotton Council, chairman of the South Carolina Unit of the National Cotton Council, director of the Carolina Ginners Association, director of the Southern Cotton Growers, Inc., and a member of the South Carolina Farm Bureau Cotton Committee. Additionally he is very active in his church and local community and this is demonstrated, in part, by his service as senior warden of Saint Matthias Episcopal Church and his membership on the board of the Clarendon County Memorial Hospital and role of adviser to the National Bank of South Carolina.

Given Henry's background and involvement in the affairs of the agricultural community of his county and State it is no surprise to those of us who know him that he has done such a fine job as chairperson of the South Carolina State ASC Committee. A brief review of the accomplishments of ASC during Henry's tenure brings this into focus. And, Mr. President, I should point out, this record of accomplishment was made during a very difficult and trying time for the farmers of South Carolina. Because of severe drought conditions there were unprecedented agriculture disasters for the years 1977, 1978, and 1980. This condition, of course, placed additional burdens and pressures on ASC's to meet the obligations and requirements of Federal programs designed to cope with the disasters. Therefore, Mr. President, Henry's fine job of leadership takes on even more significance.

Let me outline here, Mr. President, a brief review of some of the accomplishments of ASC during Henry's tenure. Confronting disasterous economic times, the ASC committee led the way in insuring that the various ASC's programs were administered responsively and efficiently. This did much to mitigate the effect of the widespread drought. The cotton, wheat, and feed grain programs; the emergency feed program; the commodity nonrecourse loan program and other programs such as the farm storage facility and drying equipment loan program and the tobacco and peanut marketing quota programs were effective in meeting the unprecedented problems confronting our producers.

During his tenure in office, the agricultural conservation program made available over $15 million to assist farmers in carrying out soil and water conservation practices on their farms. Additionally, six special water quality projects, designed to provide clean water, were implemented within the State. And, under the forestry incentives program, over $5 million was allocated to South Carolina's 46 counties for the purpose of increasing the Nation's supply of timber products.

Under Henry Rickenbaker's leadership the aerial compliance method of determining crop acreage was introduced in South Carolina in 1977. By taking aerial photographs special equipment is used to determine crop acreage. This method was used in four counties in 1977 and was in use in 23 counties in 1980. It has proven most satisfactory. This new methodology has allowed compliance

acreage determinations to be completed in less time and at less cost to ASCS than the conventional method.

Finally, Henry Rickenbaker is to be commended, Mr. President, for the extremely high morale of State and county office employees during his tenure. This is, in part, attributable to his experience in agricultural matters, competent leadership, and sincere concern over employee welfare. His enthusiasm for his work is infectious and inspires individuals to attain their highest level of performance. All of Henry's many fine qualities are reflected by the capable and dedicated staff which serves South Carolina's agriculture community.

It is with great pleasure that I thank Henry Rickenbaker, on behalf of the people of South Carolina, for his valuable and most beneficial service. We all wish Henry well and know that he will continue his tireless efforts to benefit our farmers in his future endeavors.●

## NINETIETH ANNIVERSARY OF ST. JOHN THE BAPTIST RUSSIAN ORTHODOX CHURCH, MAYFIELD, PA.

● Mr. SPECTER. I would like to call to the attention of my colleagues the special celebrations and pontifical liturgy being held September 20, 1981, in commemoration of the 90th anniversary of the founding of St. John the Baptist Russian Orthodox Church of Mayfield, Pa. Attending the services will be his Beatitude Metropolitan Theodosius, His Grace Bishop Herman, and the clergy of the Wilkes-Barre Deanery. At this time I would like to congratulate St. John the Baptist Russian Orthodox Church on its observance of its 90th anniversary and wish the congregation and its leaders continued growth and service.●

## AN APPEAL OR DELAYING TACTIC?

● Mr. McCLURE. Mr. President, the issue of wilderness designations appears to be never ending. Over the years there has been a growing awareness for a need to preserve areas containing unique characteristics. I am in agreement with this, but I am disturbed by the attitude of more, more, more, regardless of cost and loss of other resources just as important as wilderness.

The roadless area review and evaluation (RARE II) was a voluntary effort by Government and the public to once and for all settle the question of how much wilderness. I supported this process because I believed it was important to preserve some lands, and equally important to permit long-range multiple use management on other lands.

Ten years have now passed since the inception of RARE I and II, and there is no end in sight. Even with legislation passing designating wilderness, areas which should be available for multiple use are headed for de facto wilderness once again.

Mr. President, a perceptive view of this problem was recently reported by the editor of the Idaho County Free Press. I ask that the article "An Appeal or Delaying Tactic?" by Ed W. Stepanek, be printed in the RECORD.

The article follows:

AN APPEAL OR DELAYING TACTIC?

(By Ed W. Stepanek)

One of the disturbing things about the West Meadow Creek decision is the fact that opponents of the Forest Service's decision now say they will appeal.

The Forest Service went to great lengths in past months to gain input from individuals about in what shape people wanted this area.

The Forest Service even scheduled a hearing in Lewiston which drew a good number of individuals and members of the media. Interestingly enough, at the meeting, not much opposition, if any opposition at all to the plan of the Forest Service surfaced.

In fact, this editor was absolutely amazed at the apparent harmony at the hearing. Loggers and environmentalists sat together in little study groups looking at and discussing alternatives. The many loggers in the crowd were able to give first-hand information about logging techniques, and also first-hand information about terrain in the West Meadow Creek area.

In each of the groups, the unanimous vote was for development, and rather quick development at that, which was even more surprising.

The alternative which seemed to be favored was surprising because of the amount of development people at the hearing seemed to want.

This editor recalled a vote was taken on an individual basis, with virtually no one wanting a "leave it alone" policy adopted.

Keep in mind, that this meeting included many people called environmentalists, a term which is probably a misnomer of sorts.

Even the Lewiston Tribune carried a story about the meeting the following day in which they said something to the effect that once everyone understood what the Forest Service was doing, no opposition surfaced.

Now, opposition has begun over the West Meadow Creek decision, with an individual quoted in a Spokane newspaper as saying the appeal was a foregone conclusion.

We find this type of attitude by some so-called "environmentalists" to be rather disturbing. To be sure, they have a right to take this decision by the Forest Service to the Courts, however, they have not voiced much opposition, to this editor's knowledge, about the matter prior to this. This hearing in Lewiston was a dandy place to voice opposition, however no opposition was forthcoming. We feel those trying to stop development have a duty to participate in these hearings at the first level. Not only in written form, but verbal as well.

Many environmentalists at the meeting were very open and conscientious about the West Meadow Creek matter, using give-and-take of debate for the final decision.

Now, despite all the efforts on the part of the Forest Service, we are facing, and appeal of the matter. Perhaps it was unavoidable. But we'd like to see some real reasons from those who oppose the West Meadow Creek decisions.

At this point in time, the opponents in the West Meadow Creek decision appear to be indulging in nothing more than delaying tactics.●

## RESIDENTIAL CONSERVATION SERVICE PROGRAM

● Mr. KENNEDY. Mr. President, it is expected that later this week an effort will be made to abolish the Residential Conservation Service. I believe that the residential conservation service program is a test of whether this administration is dedicated to making our Government work better or committed to destroying all efforts by the Federal Government to help our citizens increase the well-being of their lives.

The energy conservation service program was established by Congress in 1978 because of the widespread conviction that we must reduce our oil imports in the most cost-effective manner possible. It was widely agreed that homeowners did not have the information they needed to make intelligent decisions about energy conservation matters.

They needed an audit by a trained, competent professional to help them decide whether they should invest $1,000 in insulation and storm windows, or $200 in weatherstripping, or $500 in a more effective oil or gas burner. These are very complicated decisions which the average homeowner does not have the information to make.

The RCS program requires large electric and gas utilities to provide homeowners with the opportunity to have these energy audits done. No one is required to have an audit if they do not want it. And, after the auditor has made his estimates no one is required to make a single investment in energy conservation in their homes.

Thus, no homeowner is subject to any regulatory burden under this legislation. Instead, this is a program that will actually help the market to work. Without this program, the regulatory burden on homeowners will be increased because building more powerplants will increase their energy bills.

Now, there are three reasons why I support the continuation of this program.

The first is because this is a program that works. This program has a positive cost benefit ratio of at least 2 to 1. The opponents of the RCS continually talk about the costs of the program. They claim it will cost $15 billion. Even if it were this expensive, which it is not, this expenditure would create benefits of $33 billion.

This is according to the Department of Energy's own regulatory analysis. In reality, two-thirds of the $15 billion that the opponents of the RCS call "costs" are actually investments which are made voluntarily by homeowners to save energy and to save money.

The total cost of the savings is less than $10 per barrel—that is one-third the current world market price of oil.

The second reason why I believe that it is essential that we fund this program is that saving energy will free capital for more productive uses in other places in our society. The Department of Energy has estimated that this program will save 8½ quads—the equivalent of 1 entire year's oil imports. This is an enormous saving.

This money would have been completely wasted if this program is not continued. The American people do not want regulatory programs that harass them and that would not work.

But the American people clearly do support programs that will work. I would like to read several letters from average homeowners in Massachusetts who have benefited from this program. I would

like to point out to my colleagues that in Massachusetts we have already had 37,000 audits under this program and there is a waiting list of 13,000 people to go into this program.

By the end of this year, they expect there will be 80,000 homes audited and more than half of these homes will take actions as a result of their audits to save energy.

Following are excerpts from letters received from homeowners who have had a mass-save energy audit—the residential conservation service program in Massachusetts:

Beverly, Mass., September 1, 1981—Just a short note to congratulate you and the people of Mass-Save for offering the energy consumers of this state a service that all should take advantage of immediately.

I have already started implementing some of the recommendations and plan to follow through on those that seem reasonable within the timeframe that myself and my wife plan to be here. I truly can't say enough good things about Mass-Save; you are to be commended.

Burlington, Mass., August 3, 1981—On 7/22/81 I had my home audited. The young man was very informative and knowledgeable about the energy program. He cleared up quite a few questions I had asked. I was more than satisfied with the information that he gave me and was glad that I had requested the audit.

Melrose, Mass., July 2, 1981—A knowledgeable and personable young man visited my home yesterday for an energy audit.

He made quite an impression on me. He knew what he was doing and was able to explain to me clearly what I should be doing. He inspected my home from top to bottom, taking time patiently to answer my questions as I followed him around. He had a wealth of information at his fingertips and no question went unanswered.

The $10.00 energy audit is the bargain of the century!

Boston, Mass., June 26, 1981—The auditor was professional, courteous, very competent, and not only went through a thorough audit, but also was able to answer all our questions. We were very impressed with his expertise.

The audit was very beneficial, even though we learned that our home is already energy saving sound. There is still room for some improvement.

Swampscott, Mass., July 28, 1981—Last week your auditor came to my home to conduct an energy audit.

At a time when everyone seems to complain, I hasten to say thank you. Your auditor was a fine gentleman and did his job most efficiently and conscientiously. He is to be commended and your firm to be congratulated.

Lexington, Mass., July 12, 1981—I would like to thank you for an incredible service, well delivered by your auditor when he came to our house on July 6. He was thorough, competent, and willing to answer and discuss all of our questions. Thank you so much for this outstanding program.

Dunstable, Mass., June 9, 1981—Received an energy audit today by one of your auditors. I just wanted to let you know that the audit was excellent and the auditor was great. He was extremely knowledgeable, helpful and thorough. I am very pleased with the results and the recommendations of the audit.

Reading, Mass.—I would like to take this opportunity to state my sincere gratitude for the excellent service which you perform at such a reasonable price. I would like also to bring your attention to the excellent job your auditor from the Woburn office performed. If his expertise and professionalism is indicative of the rest of your staff, I'm sure we, in Massachusetts, will live a lot more warmer in the years to come.

Woburn, Mass., July 6, 1981—Today, July 6, 1981, an auditor prepared an energy report for our home. Every step that was taken was conveyed in a professional yet pleasing and personal manner. The information was clearly presented in an appropriate sequence. We hope to utilize some of the recommended measures in the near future. We also hope programs like Mass-Save will be able to continue its exposure of energy conservation measures to homes such as ours.

Great Barrington, Mass., July 12, 1981—I asked for the audit chiefly because of the furnace. I have had trouble with it for the past two years. I am on a fixed income and have already lost some of my Medicaid help. I will try and see what I can do about the furnace, but I am afraid that I can't afford a new one. I do appreciate your concern and help. The young man was very nice. I enjoyed his being here. Thank you.

Finally, I believe this program is critical because it will create jobs. The Department of Energy has estimated that 30,000 new jobs will be created throughout the economy. As unemployment is steadily rising, it makes sense to fund programs that create more jobs as well as save money for the homeowners and the economy.

I urge my colleagues to support this program. I ask that certain newspaper articles about the success of the RCS program in Massachusetts be printed in the RECORD.

The articles follow:

[From the West Hanover (Mass.) Weekly, Aug. 27, 1981]

ENERGY AUDITS INFLUENCE CONSERVATION

A recent survey indicates that 90 percent of Massachusetts residents receiving home energy audits from Mass-Save, the nation's largest utility-sponsored non-profit energy conservation program, claimed the program influenced their decisions to actively conserve energy. In addition, those interviewed claimed an average of $125 per household had already been spent on weatherization measures recommended as part of Mass-Save audits and an additional $825 in conservation measures was expected to be spent within six months to one year of the audit.

Mass-Save has already conducted 30,000 home energy audits in its seven months of operation. The audit itself consists of a two-to-three hour examination of a home's energy efficiency by a certified auditor. After results are processed in the residence with a portable computer terminal, the auditor then discusses with the customer the written comprehensive package of energy-conserving measures and practices left with the customer.

Mass-Save statistics indicate that implementation of all of the audit recommendations in the area of weatherization and heating system improvements could yield total annual savings of approximately 700 per customer. If all 30,000 customers followed through on report recommendations, up to $21 million could be saved in money spent on energy consumption. Implementation of the recommendations regarding solar measures adds even further to the energy savings.

While some of the audit recommendations require substantial investment, the most frequently called-for-steps—caulking and weatherstripping—tend to be those which could be performed easily by the average do-it-yourselfer, with minimal cost and immediate savings. However, about 60 percent of the audited homes require replacement of the heating system or burner, while 50 percent need insulation of attics and walls, measures which call for large expenditures but reap large and immediate savings.

Mass-Save Executive Director, John B. Roll, had high praise for the support which sponsoring utilities have given the program. "They have shown us exceptional cooperation; some utilities have even had their own separate programs to promote Mass-Save. In an era in which we see continued increases in the cost of energy, Mass-Save provides an important model for private industry as it meets public and consumer needs economically," he commented.

[From the Worcester (Mass.) Evening Gazette, Aug. 27, 1981]

DON'T WAIT FOR FUEL AID

The word from Washington, by way of the state Executive Office of Communities and Development, is that more people will qualify for fuel assistance this winter. The income ceiling for a family of four has been raised from $12,880 to $14,272.

The catch is that there won't be any more money than last year for the program—about $93 million. If there are more slices from the same pie, the slices will have to be smaller.

The wise person will take note of this and act accordingly. He or she will try to make every gallon, ton or cord of fuel go farther. That can be done by weatherization. Every door, window and joint that is weatherstripped and caulked means less cold air seeping into the house. Every double window or double pane means less warm air dissipated into the outdoors. Every properly insulated hot waterpipe and heat duct means more heat in the right places.

As Fitchburg showed last year, a lot of little things add up to a lot when it comes to saving heat. That city's FACE program concentrated on the sort of weatherstripping and caulking that most anybody can do.

There are various sources of information available—the Worcester County Extension Service and Mass-Save, Inc., of example. For a token fee of $10, Mass-Save will do a complete energy audit of a single-family home and provide detailed instructions on how to tighten it up. Mass-Save also will provide information over the telephone. Now is the time to prepare for the winter. November is hardly two months away.

In addition to delivering audits, Mass-Save is working to broaden its scope in order to further encourage residential energy conservation.

"We want to underscore the fact that Mass-Save is much more than an energy audit program. It is a complete energy action program in which we also help find conservation financing and reputable contractors to do the work," Rolls said.

For example, in Westfield, Mass-Save has co-sponsored a group bidding program with the city intended to reduce the cost of installing attic insulation by 50-60 percent to residents who have had a Mass-Save audit. Interest in the Westfield-Save program seems exceptional; over 325 requests for participation were received in the five weeks of the program's duration.

As a further example, in Hampden County, 17 banks are participating in a lower interest extended repayment Home Energy Conservation Loan Program. Elsewhere in the state Mass-Save has entered into cooperative agreements to combine the Mass-Save audit with local available weatherization funds to bring the program to low-income and special groups areas.

"While the warm weather is here, we want to emphasize follow-up on audit recommendations while supplier and contractor discounts are still available. We will do everything possible to make sure these

audits don't gather dust, but are translated into energy and dollar savings," Executive Director Rolls said.

Fifty-two investor-owned and municipal electric and gas utilities formed the organization last year to provide a cost-effective means of meeting the federal and state Residential Conservation Service mandate.

[From the Wakefield (Mass.) Daily Item, Aug. 20, 1981]

MASSACHUSETTS RESIDENTS RESPOND TO MASS-SAVE AUDITS

BOSTON.—Energy audits done by Mass-Save, Inc., the nation's newest utility-sponsored non-profit energy conservation program, have had an impact.

A recent survey indicates that 90 percent of Bay State residents receiving the audits say the program influenced them in their decisions to conserve actively. Those interviewed claimed an average of $125 per household had already been spent on weatherization projects recommended by the audits. An additional $825 in conservation measures is expected to be expended within six months to one year of the audit.

During its seven months of operation, Mass-Save has conducted 30,000 home energy audits.

The audit consists of a two to three hour examination of the home's energy efficiency by a certified auditor. Results are processed in the residence with a portable computer terminal. The auditor then discusses with the householder the written comprehensive package of energy-conserving measures and practices, and this "package" is left with the customer.

An annual savings of approximately $700 per customer could be realized, it is estimated, if there is implementation of all the adudit recommendations for weatherization and heating system improvements.

If all 30,000 customers followed through on report recommendations, up to $20 million could be saved in money spent on energy consumption.

Implementation of recommendations regarding solar measures would add even more to the energy savings.

Many of the recommended energy-saving measures are relatively simple and relatively inexpensive ones that can be handled by the average "do-it-yourselfer"—caulking and weatherstripping.

Some of the recommendations, however, do necessitate substantial investments. About 60 percent of the audited homes require replacement of the heating system or burner, and about 50 percent need wall and or attic insulation.

In addition to doing the audits, Mass-Save is working to expand its scope in order to encourage further residential energy conservation.

"We want to underscore the fact that Mass-Save is much more than an energy audit program," John B. Roll, executive director, stated.

"It is a complete energy action program in which we also help find conservation financing and reputable contractors to do the work."

[From the Greenfield (Mass.) Recorder, Apr. 10, 1981]

ENERGY WASTE MUST BE HALTED

(By John W. Olver)

Americans use more energy than any other people in the world and a lot of what we use is wasted. This waste at today's prices represents a continuing tragedy—an economic hemorrhage stifling every citizen's finances.

The expenditure of $40 and four hours of effort (in the average household) to install nationally proven, low-cost weatherization measures such as weatherstripping, foundation caulking, doorsweeps and hot water heater insulation would save each household $150 to $200 a year at today's prices. Yet, fewer than 30 percent of Massachusetts homeowners have bothered.

If the remaining 70 percent were to apply these measures, we would keep in the Massachusetts economy at least $250 million now being spent on fuel oil, natural gas and oil-produced electricity—almost all of which now goes out of state and much of it to OPEC nations. These millions would be saved, invested or spent by our citizens; thousands of jobs would be created and millions of dollars in new municipal and state revenues would be available without raising a single old or new tax.

Our conservation efforts must include attention to the fuel assistance program for low-income people. Unfortunately, in the past the federal government has refused the state's requests to use some of the fuel assistance money provided by Congress for low-cost weatherization. The state's version of the same program set aside only $2.5 million for weatherization this year. While that is clearly a step in the right direction, it is only a drop in the bucket. We should weatherize every dwelling unit in the fuel assistance program before next winter, at least to the level of the low-cost measures. This investment in weatherization will be paid back three times within the year and will continue to save otherwise wasted energy in years to follow.

To help with conservation, our public utilities have been federally mandated to provide a program of comprehensive energy audits to households. This program, called Mass-Save, has been much touted as an energy and dollar saver. The price paid by a household for an audit is between $5 and $15. But the actual total cost is about $127, and the difference will be paid by all utility ratepayers as a monthly surcharge on all utility bills during the five-year life of the program, whether they have an audit or not. Since we may collectively pay as much as $60 million for the audits over the five-year course of the program, we all have a stake in seeing that the audit recommendations are implemented and that energy is actually saved.

We have learned from past experience that audits have not been enough to stimulate extensive conservation projects in which the payback is longer than for low-cost weatherization. Up-front money has been unavailable or, at today's interest rates, too costly for most people to implement the audit recommendations. Government and utilities must assure capital at affordable interest rates to complete energy saving projects.

While the utility companies can be commended for quickly launching the federally mandated program, their audit program, Mass-Save, would more immediately serve the public interest if, as part of the audit, the auditor turned down hot water thermostats and applied insulation to the hot water heater. That action would save real energy rather than merely audit its waste. For a cost to the utilities of about $5 for materials and less than an hour's labor, the water heater would be energy efficient. With that simple operation, according to estimates by Oakridge National Laboratories, we could save about 5 percent of each household's annual energy bill. Utility companies on the West Coast have voluntarily instituted energy conservation projects; ours should be required to do so, too.

The Legislature has before it a variety of bills to promote low-cost weatherization as well as more comprehensive energy conservation projects. With our attention focused on Proposition 2½, it would be easy to do nothing about this most inflation-ridden part of every family's budget. Instead, we should combine the best ideas into a total energy conservation program and fund it so the job can be completed quickly. The bottom line is that we can get serious and save hundreds of millions of dollars spent on energy waste in Massachusetts. If we don't, we might just as well use dollar bills themselves as fuel.

---

ENERGY AUDIT SHOWS HOMEOWNERS THE LIGHT (HEAT)

(By Steve Sibbers)

WESTFIELD.—Marion McCarthy comes to the door armed with a Craftsman tool box, a computer terminal the size of a portable typewriter and almost two years of experience.

When she leaves, about two hours later, she leaves behind data, literature and advice. If the homeowner or tenant reads the information and follows her advice he will save money that would have gone out the windows, through the walls or up the chimney.

McCarthy is the only energy auditor from Westfield working with Mass-Save Inc., the non-profit company formed by state utilities to provide fuel conservation services to their customers.

McCarthy's examination of a house for energy-conservation trouble spots is exhaustive; literally top to bottom, inside and out; and it's cheap—only $10.

In the basement she examines the oil burner for efficiency, measures the amount of exposed hot water pipe and examines the perimeter of the foundation for heat loss.

On the first floor she examines every window and door for tightness and to ascertain if weather-stripping is required. She looks behind wall outlets to examine the home's original insulation. She offers advice to the homeowner with a kitchen cabinet so cold that condiments are partly frozen.

Upstairs, all the windows are checked. Crawl spaces are peered into and insulation examined. McCarthy climbs a ladder and disappears into the attic for a short time.

"There's nothing here," she tells a homeowner who has recently spent a considerable amount of money on insulation.

She's joking. The homeowner knows she's joking because bits of insulation are drifting down from the attic opening.

Outside, McCarthy uses a compass, taking a sight on the sun to ascertain the home's potential for the use of solar power. She decides the angle is not right. She asks the owner if he is interested in putting up a windmill. He says no. Perhaps at his house in Maine, which has a steady breeze, but not here.

Her physical examination of the house is complete. She's already done an energy inventory with the homeowner, asking him what kind of fuel he uses, how much was used in the previous year and how much he paid for it.

She sets up the computer on the kitchen counter. After a few false starts (it seems auditors across the state all wanted to be on-line at the same time) she is connected with the computer at Mass-Save's Boston office. She feeds it the information she's gathered and it tells her and the homeowner what steps he can take to save money, and how much money those steps will save him.

This afternoon the computer recommended a new oil burner to replace the one McCarthy found to be only 68 percent effective. McCarthy told the homeowner that a $350 outlay for a new burner which was 80 percent effective would result in $246 annual savings. That savings will increase as the price of fuel rises. The homeowner said he will probably get a new oil burner.

The computer also gave him the figures for a whole new heating system that would cost $2000 and have a payback period of about eight years. The homeowner said he would probably not replace the whole system.

McCarthy recommended extensive caulking, weatherization and insulation of pipes—

all projects the homeowner could undertake on his own, with costs and savings provided by the computer.

McCarthy handed the homeowner the facts and will call him in a few weeks to see how he's progressed.

"Very good, very worthwhile," the homeowner said. "People ought to take advantage of this service."

McCarthy's second audit of the day was complete. She does two a day, every day. She said Mass-Save wants to put the program into high gear and get 12 audits a week out of its field workers. She looks like she can handle it.

[From the Nantucket (Mass.) Inquirer and Mirror, Mar. 5, 1981]

ENERGY AUDITS COMMENCING ON NANTUCKET AT THE REQUEST OF HOMEOWNERS

(By Dale Scott)

Nantucketers are beginning to take advantage of the low-cost home energy audits provided by the state utilities' new Mass-Save Energy Conservation Program. Southeastern division representatives for the program were here last week in response to six audit requests from local residents.

Captain Nelson Woodward of 27 Pine Street was one of the first homeowners to be audited in the newly developed program. He heard about the service one recent evening on the news and called the Mass-Save toll free number (1-800-632-8300) to request the scheduling of an audit for his house.

"It just makes a helluva lot of sense to me," he said. "At the price they're offering the audits, it would be foolish not to do it."

And so last week, Greg Cauley, one of Mass-Save's energy auditors, combed the Woodward house from cellar to attic in search of the information he needed to complete his audit report.

The procedure began with an assessment of Woodward's energy uses in his circa 1814 Nantucket three-quarter house. Cauley posed a series of questions and made note of the house size, number of rooms, type of heating system, appliance used, amount of insulation, and average temperature maintained. He pursued the past year's electric and oil bills and calculated the projected cost of heating for next winter. He explained that his figures reflected costs that could be expected if no additional energy conservation methods were employed in the Woodward household.

Woodward had been sending him a list of contractors and lending institutions to assist him in the completion of any work he chose to do.

The completed audit report was then turned over to Woodward. It came in a neat little package that includes fact sheets, guides and information about renewable resource measures. Cauley further indicated that he's available if more information is needed.

Woodward later commented on the audit, saying. "It was very worthwhile. It shows which things I ought to do and the order in which I should do them. I was very favorably impressed."

According to Mass-Save Southeastern regional manager Ed Sanders, an auditor will return to Nantucket as soon as residents express more interest in the service.

"This is the time to do it, when steps can be taken now before next winter," he said.

A VISIT FROM THE "HOUSE DOCTOR"

(By Marion Widger)

FRAMINGHAM.—I'm a single home owner. Emancipated, and all that. I can cope with crises like frozen pipes (I know how to dial for a plumber), gypsy moths (I hung my little red sex traps for them), and lawn mowers (I've taken mine in for its spring checkup).

But, I must confess, I freaked out when I got my fuel and electricity bills last December—$153 for two months for two people in a miniscule seven-room cape. And we don't even have a dishwasher. Or color TV.

You try staying calm while watching the dials whirl on your electric meter, knowing that they are marking up 9.5 cents a kilowatt hour.

The tenants in the apartment complex behind me don't have such worries, I enviously reflected. Their landlord just takes care of all their worries by lumping them into their rent bill.

When I heard myself utter: "Oh, for a man to take me away from all this," I bit my tongue, stopped doing laundry in hot water, took showers in the school locker room where I swim, pulled down my window shades to keep every last BTU inside, and waited for spring.

Then, along came a man to rescue me.

His name was Lance Davis, and he represented Mass-Save, Inc. He took me by the hand to show me how I could save by myself.

Under a mandate from the federal Department of Energy, all utilities must offer their customers a class A audit. Mass-Save was formed by a consortium of 53 area utilities to take over the audit, and I ordered mine by returning a card that I received with my electric bill. It cost me $10.

Davis was trained as a municipal energy auditor before he went to Mass-Save and knew his business. Here's what he told me:

The overall insulation package in my house is kind of sloppy. I always knew that somewhat—you know, I'm not uptight about little drafts and things. They don't bother me. I figured that they didn't reach the thermostat so what's the difference. Besides, cauking and storm doors look gauche with my authentic antique house, I thought.

But, Davis pointed out that those little cracks around my windows and doors, and the leaks in my wall plugs, are costing me money. I could save $158 a year by tightening the doors—that simply means weatherstripping—installing rope caulking around the door and window frames, putting outlet gaskets over the wall switches. And, Davis gave me caulking compound that isn't aesthetically offensive.

If I put storm windows on the seven windows that don't have them now, I'd save another $76 a year.

And storm doors. I've got three inserts in the cellar that I didn't bother to put into the combinations this year. That little sloppinesss cost another $35.

My water heater, which is advertised as insulated, can have another layer of insulation around the outside. The do-it-yourself would cost only $15, but would save another $75 a year. And even I, who can't cope with anything with two moving parts, could manage that. The hot water used in my house, even though it's set at 130 degrees, amounts to half my energy cost. Unfortunately, Davis said a test with a shading mask shows that I can't make use of solar heat.

The sheet metal ducts that carry the heat from the furnace to the room outlets—that 140-degree air loses about one-third of its heat just passing through the cold cellar. Insulating that could save another $76.

Then, there are a couple of biggies. The interior walls, plus my floors, are not insulated. And, you know that thing about heat rising. Well, I figured that the cold in the cellar wouldn't come up through the cracks, and that the heat inside wouldn't travel laterally. Wrong. "Heat goes into unheated areas," Davis told me.

The do-it-yourself price for the floor (which might be beyond my ability) is $225, but even the have-it-done price is only $562, and the payback would be less than five years.

The wall insulation cost was quoted $1,400, with a little over six year payback period, the longest of all.

My oil burner is 73 percent efficient, which Davis said isn't bad, but a $350 investment on a new high-speed, flame-retention burner would save me $110 a year.

One thing Davis did praise me for was my Spartan stinginess with the room temperatures.

"Reducing the average temperature by one degree over the heating season results in a 3 percent reduction in fuel conservation annually," he said with teeth chattering in my 60-degree kitchen.

That means $33.60 per degree. If I could learn to stand 55 degrees, I could save $158, I was thinking.

But, what the heck—then I'd be tempted to buy a ticket on a southbound plane, and $158 wouldn't get me very far south.

Guess I'll just start wrapping insulation.

---

[From the Worcester (Mass.) Sunday Telegram, May 10, 1981]

FOR $10, HE'LL PROWL YOUR HOME

(By Chris Pope)

Chuck Rousseau walked into the kitchen of a nine-room Cape-style house in Southboro, plunked a metal case down on a table and began pulling out the tools of his trade.

In short order Rousseau laid out a thermometer, a medium-length knitting needle, rolls of caulk and a variety of other equipment and materials. That done, he drew out a pen and started firing questions at the owner of the house, Walter Eremich of 46 Lattisquama Road.

The questions all had to do with the Eremichs' energy lifestyle. Among other things, Rousseau wanted to know what kind of heating system the house contained, what kind of appliances the Eremichs used, how often they used their fireplace and at what temperature they like to keep their home.

As might be expected, Rousseau was not asking the questions out of idle curiosity. The answers, he explained, might lead to suggestions that would chop hundreds of dollars from the Eremichs' annual heating bill.

Rousseau is an auditor for Mass-Save Inc., a non-profit corporation whose job is to help Massachusetts residents save on their utility bills.

Created in accordance with state and federal mandates by most of the gas and electric utility companies in the state, Mass-Save offers homeowners and multi-unit apartment dwellers the chance to have their residences inspected for efficient energy use.

In exchange for a $10 fee, Mass-Save sends its energy auditors to prowl your home in search of inefficient burners, uninsulated attics and heat-draining drafts of all kinds. When the inspection is completed, the auditors make energy-saving recommendations and provide homeowners with lists of reputable contractors who install energy improvements as well as the names of institutions that finance such work with low-interest loans.

At the Eremichs' recently, Rousseau spent almost two hours looking for ways to weatherproof their house against winter's icy and budget-busting blasts.

In the cellar he determined the condition of the family's gas-fired burner and checked to see if the hot water heater was insulated. He searched the foundation for cracks, checked windows and doors on all floors for tightness and used his knitting needle to probe walls and ceilings for insulation.

In the living room Rousseau examined the fireplace for efficiency, and in an upstairs bathroom he turned on a hot-water faucet and measured its temperature with a thermometer.

Outside the house, he peered through a device known as a solar site selector to determine whether the Eremichs could save money

by installing solar heating panels on their roof.

The audit completed, Rousseau returned to the kitchen, plugged a pint-sized computer terminal into the Eremichs' telephone and typed the information he had collected into Mass-Save's main computer in Burlington.

A few minutes later, the computer spewed out a printout that listed energy-saving suggestions. The computer estimated how much each improvement would cost if installed by a professional contractor or on a do-it-yourself basis, predicted first-year savings that would result from following each recommendation and calculated how much time would pass before the cost of making the improvements would pay for themselves in lower fuel bills.

In all, the computer recommended eight energy-conserving measures for the Eremich home. Among them were recommendations to insulate the hot water heater, outside walls and attic, to caulk some windows and install an electronic ignition device to replace pilot lights on the Eremichs' gas-powered stove.

According to the computer, provided he was willing to do some of the work himself, Eremich could recoup the cost of following five of the suggestions within four years and all within 10. The computer estimated that the improvements could be installed by a professional for about $2,370 and on a mostly do-it-yourself basis for about $1,426. In either case, it estimated that performing the work would slash about 30 percent from the Eremichs' heating bills.

Impressive as those savings sound, however, Rousseau was quick to point out that the computer's estimates of savings could differ significantly from those actually received. That's because fuel costs and winter weather are hard to predict, he said, and because the total savings from following all the recommendations together are usually less than the sum of the savings if each measure is installed individually.

And, said Rousseau, once the recommendations are made, it's up to the homeowner to decide which if any he or she wants to follow.

"We look at houses and energy systems and tell homeowners what they can do," said Ildi Von Rosenvinge, a technical specialist for Mass-Save who accompanied Rousseau to the Eremich house. "Deciding which ones to do is up to them."

For Eremich, the decision was to follow two of the eight recommendations suggested by Mass-Save.

"I'll add some insulation in the attic and have a contractor blow some into the sidewalls," he said. "I figure it'll cost about $750 and save about $200 a year on my heating bill."

But even though he deemed some of the suggestions impractical, Eremich was still pleased that he had the audit performed.

"Some of the things that were suggested would either cost too much or have too long a payback period. But overall, it was well worth it to have this done. The way I look at it, I spent $10 and got $150 worth of advice. Even if I only do one or two things, I'll more than make my money back."

---

[From the Worcester (Mass.) Sunday Telegram, May 10, 1981]

HELP'S AVAILABLE FROM MASS-SAVE

(By Chris Pope)

Richard Landry is afraid of grasshoppers.

For those who've forgotten the fable, the grasshopper fiddled and diddled the summer away. The conscientious ant, meanwhile, busied itself gathering and storing supplies for the winter. When the cold weather came, the ant was ready, and the grasshopper went without.

As regional head of Mass-Save Inc., Landry's job is to help consumers conserve energy and save money on their heating bills. For the past two months he and his staff have been working out of their second-floor office at 534 Lincoln St. to provide energy audits for homeowners and some apartment dwellers in 110 Worcester County and Middlesex County communities.

So far, Landry said recently, Mass-Save's services have been in heavy demand. To date, about 600 energy audits have been completed in the Worcester area and about 3,000 have been performed throughout the state.

Even so, Landry said, the crunch remains ahead

"The weather's getting hot now, so people aren't thinking about their heating bills, but come September, I just know we're going to get inundated."

To prevent that from happening, Landry is urging homeowners to imitate the ant instead of the grasshopper by signing up for audits while the weather is warm.

And, he said, those who do sign up for the program will be cashing in on a good deal.

Incorporated as a non-profit corporation, Mass-Save is a spinoff of the federal National Energy Act approved by Congress during the Carter administration. The legislation requires utility companies with more than 250,000 customers to provide home energy audits for customers who request them.

In Massachusetts the state Department of Energy took the federal mandate one step farther by ruling that all utilities would have to participate in the audit program. To comply with that directive, more than 50 of the state's gas and electric companies set up Mass-Save in September.

According to Landry, Mass-Save offers four basic services to homeowners or apartment dwellers who live in buildings of four or fewer units.

For a $10 fee, which is waived for low-income groups, a person eligible to participate in the program receives:

A complete energy audit of his or her residence.

Help in arranging financing for energy improvements.

Assistance in finding qualified contractors to do the work.

Mediation between the contractor and the consumer in cases where there is a dispute about the work performed.

Actually, Landry said, the $10 fee covers only a fraction of the audit's true cost of about $130. To make up the difference, the state Department of Public Utilities has authorized electric and gas companies to place a monthly surcharge ranging between 30 and 50 cents on their customers' utility bills.

The financing arrangement is not without its critics. According to Fair Share, the statewide consumer organization that watchdogs utility charges, while Mass-Save's energy-audit concept is admirable, the surcharge used to pay for it is inequitable.

First, says Carol Gillies, president of Fair Share's Worcester branch, while only some Massachusetts utility customers are eligible for the audits, all are billed.

Second, Gillies pointed out that all customers receive the same surcharge regardless of how much electricity they use. The person who patrols his house turning off lights and unplugging the air conditioner pays the same as the person who turns on a half-loaded dishwasher and insists on blow-drying his hair. And what's worse, she added, is that both these customers pay the same surcharge as industries whose operations swallow up massive amounts of electricity and fossil-based fuel every month.

Finally, Gillies said, utility customers who use both electricity and gas in their homes receive surcharges on both utility bills. The double-billing arrangement is patently unfair, she contends.

To remedy these difficulties, Fair Share suggests that utility companies base the surcharges on the amount of gas and electricity customers consume each month. The more kilowatts a customer uses, the higher the surcharge should be, argues Fair Share.

According to Mass-Save officials, however, financing the energy audit program on a per-kilowatt basis might be even less fair than using the flat-rate method. People living in an all-electric house, for example, would be heavily penalized under that arrangement, and industries who run energy-efficient plants would be charged inordinate amounts to finance a program they aren't even eligible to participate in.

For Landry, the rationale for billing everyone the same for Mass-Save boils down to oil economics. "Every barrel of oil we import into this state means X number of dollars that leave the state and country. Every barrel we save means X number of dollars that stay here. It may be abstract, but the message has to go out to John Q. Public that we have to tighten our belts through conservation."

And, according to Landry, ultimately the bottom line for Mass-Save is not how it's paid for but how much oil and gas its energy-audit program can save.

"Our big thing is not just to do audits but to get people to follow up on the recommendations our auditors make. If they do, we'll be able to measure the decrease in consumption and calculate how many fewer barrels of oil are coming into the state. The goal of this program is to cut down on oil imports and to cut the export of U.S. dollars to OPEC nations. Judging from the response we've had so far, I think we're going to succeed." ●

---

## SENATOR FRANK MURKOWSKI OF ALASKA

● Mr. McCLURE. Mr. President, as chairman of the Committee on Energy and Natural Resources, I have been pleased to have the support and cooperation of several new Members of the Senate on this committee. Senator FRANK MURKOWSKI of Alaska is one of these new committee members. He has worked hard, learned quickly, and taken an active role in committee activities.

As chairman of the Subcommittee on Water and Power, he has already initiated efforts to expedite the Federal licensing procedures for hydroelectric projects. Senator MURKOWSKI is also a member of the Committee on Environment and Public Works and the Veterans' Affairs Committee.

Mr. President, I am delighted to learn that the Anchorage Times, in Senator MURKOWSKI's home State, has taken note of his fine start as a U.S. Senator in an editorial of August 17, 1981. Senator MURKOWSKI deserves this recognition and I ask that the text of this editorial appear at this point in the RECORD.

The editorial follows:

A CREDIT TO ALASKA

Frank Murkowski, home during the August congressional recess, impressed many who saw him last week as a man who is delighted with being a United States senator from Alaska. The impression he gave was that the man and the job fit like a glove.

Elected last November and sworn in as a senator in January, Mr. Murkowski's first eight months in the Senate evidently posed

no big problem for the freshman in a club that prizes seniority.

Touring the state, meeting with constituents, appearing with Interior Secretary James Watt here and elsewhere, the former Fairbanks banker was at ease and in command, relaxed and responsive.

Some had feared that Mr. Murkowski might be dominated in the Senate by fellow Republican Ted Stevens, quite unintentionally on the part of either man. But he has demonstrated that he's his own man—while, understandably, recognizing that Sen. Stevens is the state's senior senator and, as majority whip, high in the Senate hierarchy.

Eight months is not a very long way into a six-year term. But it appears—to the state's credit—that Alaska has come up with a good one in Frank Murkowski.●

## OMNIBUS BUDGET RECONCILIATION ACT OF 1981—SELECTED PROVISIONS AFFECTING THE ELDERLY

● Mr. HEINZ. Mr. President, older Americans and professionals working in the field of aging are extremely interested in the details of the Omnibus Budget Reconciliation Act of 1981 which was approved by the Congress on July 31, and signed by the President on August 31, 1981.

To assist individuals and groups to understand the provisions of the act and how they impact on programs and services for the elderly, the Special Committee on Aging, with the assistance of the Congressional Research Service of the Library of Congress, has prepared an information paper summarizing the most relevant provisions affecting older persons.

The paper also provides background information and discussion of the budget proposals set forth by the administration.

Since its publication, the demand for this paper from the elderly, practitioners in the field, policymakers and others concerned with the quality of life for older Americans has been overwhelming. In fact, it well exceeds our limited supply.

I am, therefore, asking to have the document printed in its entirety in the RECORD for the benefit of my colleagues and to assure that this vital information is available to the public.

The provisions follow:

OMNIBUS BUDGET RECONCILIATION ACT OF 1981, PUBLIC LAW 97-35

(Selected Provisions Affecting the Elderly)

INTRODUCTION

The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) was approved by Congress on July 31, 1981, and signed by the President on August 13, 1981. Following is a summary of selected provisions affecting programs which assist the elderly.

SOCIAL SECURITY

In fiscal year 1982, more than 95 percent of the Nation's citizens aged 65 or older, and their dependents, will be eligible for social security benefits. Under current law, fiscal year 1982 expenditures for benefits for this group are projected to exceed $159 billion. The Reagan budget proposed no structural revisions to the social security system. The Reagan administration estimates that social security benefits will rise 9.3 percent in July 1982, when the next adjustment for price inflation is scheduled.

The Reagan budget included two proposals with significant potential impact on older Americans and their families.

First, the administration's budget submission assumed elimination of the minimum benefit to present and future social security recipients for fiscal year 1982, with savings of $1.3 billion. Prior law assured that beneficiaries whose average lifetime earnings in covered employment are low, received a minimum benefit higher than the benefit they would otherwise receive. This provision of the statute was originally intended to help the poor but also benefits those with other sources of retirement income. The administration's budget also assumed that retirees who could meet income eligibility requirements would have the minimum benefit replaced by payments from the supplemental security income (SSI) program, resulting in a $300 million increase in Federal spending for that program. The Omnibus Budget Reconciliation Act of 1981 eliminated the minimum benefit for all present and future beneficiaries. In the final Reconciliation Act provision as with the Reagan budget proposal, those individuals over 65, or blind, or disabled, who meet SSI eligibility requirements, will have their social security benefits replaced with SSI payments. In addition, under the bill as enacted, persons aged 60 to 64 who were entitled to a minimum benefit for the month of July 1981 will become eligible for a special SSI benefit, if they qualify under all SSI rules except that pertaining to age. Net savings for fiscal year 1982 are estimated to be $459 million.

Second, the administration's budget submission assumed elimination of the lump-sum death benefit in instances in which there is neither a widow nor a dependent child to receive the survivor's benefits. Fiscal year 1982 savings were estimated to be $200 million. Current law provides a lump-sum death payment of $255 when a worker who is fully or currently insured dies. If there is no spouse to receive the payments under prior law, the money could be paid to a relative or other persons who assumed responsibility for the funeral expenses. A funeral home itself could also apply to receive the payment directly for these expenses. This proposal, restricting the payment of lump-sum death benefits, is included in the final reconciliation legislation.

In addition to the minimum benefit and lump-sum death benefit provisions, the following other social security provisions were included in the Omnibus Budget Reconciliation Act.

A provision was enacted, although not proposed by the Reagan administration, which will delay eligibility for social security benefits for a worker retiring at age 62, and his dependents, until the first full month during which all factors of eligibility are met. Under prior law, social security benefits were always payable for the entire month during which the beneficiary first met all requirements for eligibility, regardless of when during the month all requirements were met. This provision is estimated to save $190 million in fiscal year 1982.

Another provision of the Omnibus Budget Reconciliation Act not proposed by the administration will affect older workers by delaying the time when the retirement test exempt age is lowered from 72 to 70. Under prior law, all workers 70 and older would have become exempt from the retirement earnings test in 1982; under the new law, the exempt age will remain 72 until January 1983, when it will drop to 70. Estimated fiscal year 1982 savings from this change are $380 million.

Further, in passing the Omnibus Budget Reconciliation Act, Congress voted to restrict Federal funding for reimbursement of rehabilitative services furnished by State vocational rehabilitation agencies to beneficiaries of disability insurance (DI) under the social security program. The new rule permits Federal reimbursement only for "rehabilitated" DI beneficiaries who succeed in performing substantial gainful activity (now defined as earning $300 a month) for a continuous period of 9 months. The Congressional Budget Office estimates that the new rule will cut Federal outlays by $87 million in fiscal year 1982, $86 million in fiscal year 1983, and $73 million in fiscal year 1984. The Reagan administration had recommended outright repeal of reimbursement at an estimated annual savings of $87 million.

[In billions of dollars]

| | Fiscal year outlays | |
|---|---|---|
| | 1981 | 1982 |
| Prior law | $139.5 | $159.3 |
| Savings: | | |
| Minimum benefit: | | |
| Reagan proposal | | −1.0 |
| Omnibus Budget Reconciliation Act | | −.459 |
| Lump-sum death benefit: | | |
| Reagan proposal | | −.200 |
| Omnibus Budget Reconciliation Act | | −.200 |
| Month of entitlement: Omnibus Budget Reconciliation Act | | −.190 |
| Retirement test exempt age: Omnibus Budget Reconciliation Act | | −.380 |
| Rehabilitation services: Omnibus Budget Reconciliation Act | | −.87 |

SUPPLEMENTAL SECURITY INCOME

In May 1981, supplemental security income (SSI) served some 4.1 million persons, of whom 2.2 million were at least 65 years old. The aged SSI population included 0.4 million persons who enrolled at a younger age on grounds of disability.

Basic Federal SSI benefits rose 11.2 percent on July 1, 1981, reflecting the rise in the Consumer Price Index (CPI) from the first quarter of 1980 to the same quarter of 1981. The boost lifted the Federal cash income floor from $238 per individual to $264.70 (and from $357 per couple to $397). These benefit levels apply to persons with no other counted income (and without State SSI supplements). In May 1981, SSI payments averaged $166 per person. The Reagan administration estimates that Federal SSI benefit levels will rise 9.3 percent on July 1, 1982, when the next adjustment for price inflation is scheduled.

In passing the Omnibus Budget Reconciliation Act of 1981, Congress accepted a budget-cutting recommendation of the Reagan administration to change the accounting period used for calculating SSI benefits. The change is to base SSI benefits, in general, on actual income and other relevant circumstances of the previous month (retrospective accounting) rather than on anticipated income of the future quarter (prospective accounting). An exception was made for the month of application, when both eligibility and benefit amounts would continue to be determined on a prospective basis. The Congressional Budget Office estimates that the new rule will reduce Federal SSI benefit outlays by $30 million in fiscal year 1982, and by $60 million annually in fiscal year 1983 through fiscal year 1986.

In drafting its budget-cutting bill, Congress rejected a recommendation of the Reagan administration that might have reduced SSI benefits in the 31 jurisdictions (30 States plus the District of Columbia) that now supplement the basic Federal SSI benefit with their own funds. The proposal, which was included in the administration's Social Welfare Amendments of 1981 (H.R. 3468 and S. 1293) was to repeal the law requiring States to maintain their aggregate spending on SSI supplements in order to be eligible for medicaid matching funds. This

rule has the effect of requiring States to pass through to beneficiaries any cost-of-living increases in basic Federal benefits.

Congress voted in passing the Omnibus Budget Reconciliation Act to restrict Federal funding for reimbursement of rehabilitative services furnished by State vocational rehabilitation agencies to SSI recipients. The new rule permits Federal reimbursement only for "rehabilitated" SSI recipients who succeed in performing substantial gainful activity (now defined as earning $300 a month) for a continuous period of 9 months. The Congressional Budget Office estimates that the new rule will cut Federal outlays by $20 million in fiscal year 1982, $18 million in fiscal year 1983, and $15 million in fiscal year 1984. The Reagan administration had recommended outright repeal of reimbursement at an estimated annual saving of $20 million.

CIVIL SERVICE AND MILITARY RETIREMENT

More than 3.2 million Americans receive benefits under the civil service and military retirement systems. Retirement payments for these persons are estimated to total $35.5 billion in fiscal year 1983. The Reagan budget proposed legislation to provide cost-of-living adjustments (indexing) to annuity payments on an annual rather than semiannual basis. This proposal was adopted by Congress in the Omnibus Budget Reconciliation Act of 1981. The Congressional Budget Office estimates that adoption of the proposal will reduce fiscal year 1982 expenditures by $907 million, giving civil service and military retirees one 10.2 percent inflation adjustment for that year.

[In billions of dollars]

| Prior law | $14.7 | $17.5 | $20.1 |
| Indexing proposal | | | −.5 |
| Military retirement: | | | |
| Prior law | 11.9 | 13.8 | 15.5 |
| Indexing proposal | | | −.4 |

RAILROAD RETIREMENT

More than 1 million Americans receive benefits from the railroad retirement system. Payments to these beneficiaries are estimated to reach $5.9 billion in fiscal year 1982. The Reagan budget assumed savings of $40 million in fiscal year 1982 by proposing to defer a cost-of-living adjustment for a portion of the railroad retirement benefit. Because payments have exceeded revenues over the last few years, Congress has adopted a package of changes to the system to assure its continued solvency. Modifications to the benefit structure are contained in the Omnibus Budget Reconciliation Act of 1981; additional revenue is provided for in the Economic Recovery Tax Act of 1981. Benefit changes include modifications to cost-of-living adjustments for survivors, and changes to the so-called "windfall" benefit rights of a closed class of employees and retirees who had been "grandfathered" for these rights when the system was reorganized in 1974. Generally, those windfall rights are held by individuals who had qualified for both social security and railroad retirement benefits prior to 1974. Congress voted to make benefits available for the first time to divorced spouses, remarried widows, and surviving divorced mothers, modified the benefit formula for new retirees, and installed permanent annual cost-of-living adjustments (32.5 percent of Consumer Price Index (CPI) changes) for a portion of the benefit paid to survivors. The major portion continues to be annually adjusted 100 percent of CPI changes. The new CPI formula for survivor benefits is that already used for benefits to retirees. Congress also increased the payroll tax on employers 2.25 percent (to 11.75 percent) and added a 2-percent tax on employee pay for the first time.

FOOD STAMPS

Prior to enactment of the Omnibus Reconciliation Act of 1981, the food stamp program was expected to cost the Federal Government $12.3 billion, 8 percent more than the $11.4 billion appropriated for fiscal year 1981. It was estimated that over 23 million low-income Americans (2.5 million elderly) would participate in the program.

The Reagan budget assumed adoption of several legislative changes in the program to reduce food stamp expenditures by $1.5 billion in fiscal year 1982 and larger amounts in later years. Three of these proposals, totaling over $400 million in savings, would have had significant effects on the elderly.

First, the Reagan proposals would have established an absolute 130 percent of poverty gross income eligibility limit, with no allowance for special expenses such as medical costs; this new, lower income eligibility limit would be $467 and $616 per month, for singles and couples, respectively, until the next inflation update in July 1982. Under present rules, income eligibility limits for food stamps vary according to the type of household income (earned versus unearned) and whether a household has special expenses for shelter, dependent care, or medical care. As a result, the existing income eligibility limits applied to most households range from 125 to 200 percent of the official Federal "poverty levels."

Second, the Reagan proposals would have permanently frozen the $85-per-month "standard deduction"; this deduction determines the basic amount of income that is disregarded in calculating food stamp benefits and is now indexed annually for inflation.

Finally, the Reagan proposals would have repealed a provision of law, scheduled to take effect in fiscal year 1982, that would have increased benefits to elderly recipients with medical expenses by allowing these recipients to have an additional $10 per month in medical expenses disregarded when benefits are calculated. Other major savings proposed by the Reagan administration would have been achieved by converting the food stamp program in Puerto Rico to a food assistance block grant, reducing benefits to households with children in schools offering free lunches, and reducing first-month benefits to reflect the date of application.

The Omnibus Budget Reconciliation Act of 1981 adopted the three Reagan administration proposals affecting the elderly, with some significant changes. Households containing elderly (age 60 or over) or disabled members are exempted from the new, lower income eligibility limits and will continue to have their eligibility judged, as provided for by existing rules, taking into account the type of income and special expenses. The $85-per-month "standard deduction" is frozen only through June 1983. However, inflation adjustments after June 1983 are staggered: July 1983, October 1984, and October for each year thereafter. The Reagan proposal to repeal increased benefits to elderly recipients with medical expenses was adopted without change.

The Omnibus Budget Reconciliation Act also added one important new cost-saving revision that would affect the elderly along with other recipients. Benefit levels, now adjusted annually each January to reflect food-price inflation, are to be adjusted on a delayed schedule: April in 1982; July in 1983, October in 1984, and October each year thereafter. Reagan administration proposals to convert the food stamp program in Puerto Rico to a block grant and to reduce first-month benefits were also included in the Reconciliation Act; the proposal to reduce benefits to households with children in school was not included.

In all, the food stamp savings to be achieved by the provisions of the Omnibus Budget Reconciliation Act total $1.7 billion in fiscal year 1982 (larger amounts in later years), some $200 million more than suggested by the Reagan administration. Approximately $600 million of the fiscal year 1982 savings will have a significant effect on elderly recipients, primarily by delaying benefit increases that would have occurred through inflation indexing of benefit levels and the "standard deduction."

LOW-INCOME ENERGY ASSISTANCE

The present energy assistance program for low-income households was authorized by the Home Energy Assistance Act of 1980. Under the legislation, the Secretary of the Department of Health and Human Services (DHHS) provides grants to the States for the purpose of financial assistance available to low-income households with home energy costs that are excessive in relation to household income. Eligibility for benefits is limited to households where one or more individuals qualify for cash payments from aid to families with dependent children, supplemental security income, food stamps, or veterans' pensions. Households with income levels at or below the Bureau of Labor Statistics (BLS) lower living standard set by the Department of Labor also qualify for assistance. Single person households may have the higher of the BLS lower living standard or 125 percent of the Community Services Administration's poverty guidelines. The law specifically requires that priority be given to households with a member who is aged or handicapped.

For fiscal year 1982, the Reagan administration proposed consolidation of the expiring home energy assistance authority with the emergency assistance authority under title IV of the Social Security Act. The proposed block grant would have granted States complete flexibility to develop and administer fuel assistance and other crisis or emergency needs activities for their low-income households. The total budget request of $1.4 billion was $500 million below the combined fiscal year 1981 current services level of $1.85 billion for low-income energy assistance and an estimated $55 million for title IV emergency assistance.

As passed by Congress, the Low-Income Home Energy Act of 1981 (title XXVI of H.R.

3982, the Omnibus Budget Reconciliation Act of 1981) authorizes $1.875 billion in grants to States for low-income energy assistance for fiscal years 1982, 1983, and 1984.

The program is 100 percent federally financed in each year of its authorization. One hundred percent of the funds will be distributed as grants to States. States will receive the same proportion of $1.875 billion as the proportion of funds they were eligible to receive under the allotment formula of the fiscal year 1981 program.

In order to receive an energy assistance grant, States are required to submit a two-part application. The first part of the application consists of a series of assurances made by the chief executive officer (CEO) of the State, that the State will operate its energy assistance program in accordance with stated congressional intent. The second part of the application consists of a plan detailing the manner in which the State intends to carry out the assurances made by the CEO. An important corollary to the State application process is that the Secretary of the DHHS may not specify the manner in which the States carry out the CEO's assurances or disapprove a State's application.

In the application, the CEO must make assurances that: Federal funds will not be used to assist a household unless the household has at least one member receiving public assistance or the household has an income below either 150 percent of poverty or 60 percent of a State's median income (adjusted for family size); appropriate outreach activities, directed especially toward the elderly and the handicapped, will be conducted; no more than 10 percent of a State's allotment will be spent on State administration; there will be public participation in the development of the State plan; and owners and renters will be treated equitably.

The Low-Income Home Energy Assistance Act permits assistance for home heating and cooling costs, weatherization up to 15 percent of a State's allotment, and energy-related crisis intervention activities (temporary shelter, space heaters, blankets, etc.).

Up to 10 percent of the State's allotment under this program can be transferred into other block grant programs. Up to 25 percent of a State's allotment can be held over by a State for the next fiscal year. Funds not spent, held over, or transferred in a fiscal year can be reallocated by the Secretary.

Indian tribal organizations are eligible for direct payments of energy assistance funds if they request such payments and the Secretary determines that direct payments would best serve the tribe. At the option of the State, the Federal Government can make direct payments to recipients of supplemental security income.

[In billions of dollars]

| | Fiscal year budget authority | | |
|---|---|---|---|
| | 1981 | 1982 | 1983 |
| Prior law | $1.85 | | |
| Reagan proposal | | $1.4 | $1.4 |
| Omnibus Budget Reconciliation Act | | 1.9 | 1.9 |

VETERANS' PENSIONS

No legislative provisions changing the veterans' pension program were included in President Reagan's budget submission to the Congress or the Omnibus Budget Reconciliation Act of 1981. Federal expenditures for veterans' pensions will exceed $4 billion in fiscal year 1982 with 1.9 million veterans and their survivors receiving payments. Approximately 30 to 50 percent of the beneficiaries are age 65 and older. Recipients received an 11.2 percent cost-of-living increase in payment levels in July 1981. Pensions are automatically increased by the same amount and at the same time as social security benefits.

| | Fiscal year— | | |
|---|---|---|---|
| | 1980 | 1981 | 1982 |
| Beneficiaries (millions) | 2.1 | 2.0 | 1.9 |
| Expenditures (billions) | $3.6 | $3.8 | $4.0 |

VETERANS' BURIAL BENEFITS

Families of deceased veterans who are buried in private cemeteries may receive allowances to apply toward the purchase of a burial plot. They may also receive benefits to assist in defraying funeral expenses. Federal outlays for this program in fiscal year 1982 are expected to total $203 million.

The Reagan budget contained no proposals to revise the veterans' burial benefits program. Under the provisions of the Omnibus Budget Reconciliation Act of 1981, eligibility for the $300 burial and funeral expense benefit would be restricted to cases of veterans who were eligible to receive compensation for a service-connected disability and a Veterans Administration pension. It is estimated by the Congressional Budget Office that savings would be $75.2 million in budget authority and outlays in fiscal year 1982.

| | Fiscal year— | | |
|---|---|---|---|
| | 1980 | 1981 | 1982 |
| Beneficiaries | 334,116 | 350,500 | 355,500 |
| Expenditures (millions) | $183 | $198 | $203 |

MEDICARE

Under current law, fiscal year 1982 expenditures for the medicare program will total $48.3 billion. The Reagan budget assumed savings of $1.9 billion from implementation of several legislative and regulatory initiatives. Most of these savings were assumed to result from changes in reimbursement methods and management practices. In addition, the administration proposed repeal of several benefit provisions in the Omnibus Reconciliation Act of 1980 that will expand medicare coverage beginning in fiscal year 1982.

The Omnibus Budget Reconciliation Act of 1981 makes a variety of changes in the medicare program, some administrative and others that will impact beneficiaries directly. Beginning in 1982, for example, enrollees in the supplemental medical insurance (SMI), or part B, portion of medicare will have to pay the first $75 (instead of the current $60) of covered expenses before program benefits will be paid. The inpatient hospital deductible and coinsurance amounts required under the hospital insurance (HI), or part A, portion of medicare will also be increased in 1982 by somewhat more than such amounts were expected to rise as a result of the reconciliation action. Congress rejected provisions that would have imposed new beneficiary copayment charges on stays in a hospital, turned down increases in the part B premium, and retained the pneumococcal vaccination benefit under medicare.

MEDICAID

The medicaid program was established to provide Federal aid to States for medical assistance to low-income persons who are aged, blind, disabled, or members of families with dependent children. Each State designs its own medicaid program consistent with specific Federal guidelines and requirements. Thus, there are differences among the States in eligibility requirements, the range of services offered, limitations imposed of such services, and reimbursement policies. The Federal Government helps States share in the cost of medicaid services through a variable matching formula that is periodically adjusted. The matching rate, which is inversely related to a State's per capita income, ranges from 50 to 83 percent.

Medicaid expenditures have increased at an average rate of more than 15 percent per year over the last 5 years. A large part of the increase is due to a relatively stable percentage of elderly beneficiaries that has consumed an increasingly larger share of medicaid expenditures each year. Much of that increased share has been for long-term care services. At present, 15 percent of the medicaid program's 18.8 million recipients are elderly. They account for over 30 percent of program expenditures. The Congressional Budget Office estimates that, under current law, medicaid outlays would total $18 billion in fiscal year 1982.

The Reagan administration proposed enactment of legislation to limit, or cap, Federal medicaid expenditures for fiscal year 1982, for a savings of $1 billion. Offered as an interim measure prior to the adoption of comprehensive Federal health financing initiatives, the administration assumed immediate enactment of the proposal. The cap was structured to reduce Federal expenditures for fiscal year 1981 by $100 million below the current estimates for program costs. Expenditures would then be allowed to increase by 5 percent in fiscal year 1982, and with the rate of inflation in future years. The proposal also provided the States with more flexibility in structuring their individual medicaid programs. It was anticipated that by limiting Federal spending, States would have additional incentives to provide cost-effective services and to reduce fraud, abuse, and waste.

Congress did not accept the administration's plan for imposing a cap on State medicaid programs. Instead, the Omnibus Budget Reconciliation Act of 1981 provides for a reduction in Federal matching payments to all States by 3 percent in fiscal year 1982, 4 percent in fiscal year 1983, and by 4.5 percent in fiscal year 1984. Any State could lower the amount of such reductions in any year, if it adopts a qualified hospital cost review program; if unemployment in the State is greater than 150 percent of the national average; if it recovers 1 percent of Federal payments by controlling fraud or program abuse; or if it holds down increases in medicaid spending below certain target levels. Congress rejected efforts to reduce the minimum rate of Federal matching for medicaid services, currently set at 50 percent. The final budget measure permits States to exercise greater flexibility in implementing their medicaid programs by encouraging them to enter into new cost-effective arrangements to provide services, and by encouraging more health maintenance organization participation in medicaid. Congress also added a new provision that will permit States to provide a new range of home- and community-based long-term care services that represent alternatives to institutionalization of medicaid recipients.

NATIONAL INSTITUTE ON AGING

Since 1977, Federal funding for the Institute's research programs on aging has more than doubled. The Reagan budget included $84.2 million for fiscal year 1982 funding for the National Institute on Aging (NIA). This amount is $8.1 million higher than the amount that would be required to continue the Institute programs at their fiscal year 1981 level of activity. No specific authorization figure for the NIA was included in the Omnibus Budget Reconciliation Act. Therefore, the NIA may continue to carry out its functions under the general authority of

section 301 of the Public Health Service Act; appropriation amounts will be determined in the regular appropriations process.

VETERANS' HEALTH

The Reagan budget proposal assumed a reduction in medical care of $107 million from the adoption of legislation reducing reimbursement to veterans for travel expenses between a veteran's home and Veterans Administration (VA) medical facilities, restricting out-patient dental services, and reducing funds available for physicians bonus pay. The Reagan budget also assumed $32 million in savings by eliminating the readjustment counseling program for Vietnam veterans. It was assumed that an additional $433 million could be saved by postponing hospital construction projects, and reducing nondirect care staff and other overhead costs.

The Omnibus Budget Reconciliation Act of 1981 includes language restricting outpatient dental care for noncompensable service conditions to veterans who served at least 180 days and who apply for dental care within 3 months of their discharge date. This provision will save an estimated $17.7 million in budget authority and outlays in fiscal year 1982.

OTHER HEALTH PROGRAMS

The Department of Health and Human Services (DHHS) administers a wide array of health services and disease control programs that are utilized in part by the elderly. The Reagan administration proposed revising and consolidating these programs into block grants, designed to allow States more flexibility in determining their health services needs and priorities.

In the area of preventive health, the administration proposed the consolidation of 11 categorical programs including health incentive, hypertension, and health education and risk reduction programs. The proposed authorization level of $260 million represented a 25-percent reduction from the combined fiscal year 1981 current services levels of the preventive health programs which the block grant would replace.

In the area of health services, the administration proposed consolidation of 15 categorical programs including community and migrant health centers, maternal and child health, community mental health, and substance abuse programs. As with the preventive health services block grant, the health services block grant proposed for fiscal year 1982 would have been funded at a level representing 25 percent of fiscal year 1981 current services levels, or $1.1 billion.

The Omnibus Budget Reconciliation Act of 1981 created four health block grant programs (as opposed to the Reagan administration's proposals for two) and authorized or extended a number of separate categorical health programs, including migrant health programs and a tuberculosis control program.

*1. Preventive health and health services block grant*

The preventive health and health services block grant includes eight categorical programs. The preventive health programs included are: Health incentive, hypertension, health education/risk reduction, rodent control, and fluoridation grants; the health services program included are home health and emergency medical services grants. The eighth program included is the rape crisis centers program originally authorized in the 1980 Mental Health Systems Act.

From funds appropriated under the preventive health and health services block grant, each State will be allocated the same proportion of funds as it received in fiscal year 1981 under the various separate programs included in the block grant. The exception to this is the allocation of funds for rape crisis centers which will be based on population.

The Reconciliation Act requires each State to spend on hypertension activities in fiscal year 1982 at least 75 percent of the amount of Federal funding for such programs in the State in fiscal year 1981. The percentage drops to 70 percent in fiscal year 1983, and 60 percent in fiscal year 1984.

The Reconciliation Act contains language to continue existing grants under the emergency medical services program. In addition it requires that, of the amount appropriated for any fiscal year under this program, at least $3 million shall be set aside for an allotment to each State on the basis of population for rape crisis centers.

The authorizations for the preventive health and health services block grant are: $95 million for fiscal year 1982; $96,500,000 for fiscal year 1983; and $98,500,000 for fiscal year 1984.

*2. Primary care block grant*

The Reconciliation Act extends the community health centers program for 1 year, through fiscal year 1982, with an authorization of $284 million. Starting in fiscal year 1983, the bill replaces this authority with a new primary care block grant. From amounts appropriated under this authority in fiscal years 1983 and 1984, States will be allocated the same proportion of funds awarded to community health centers in fiscal year 1982.

Under the new primary care block grant authority, State will be required to match Federal funds in order to be eligible for grants under the block. The matching rate is 20 percent for fiscal year 1983, and 33⅓ percent for fiscal year 1984. In addition, States will be required to award grants in fiscal year 1983 to every community health center funded in fiscal year 1982. These grants will have to be as large as those awarded in fiscal year 1982. During fiscal years 1983 and 1984, the Secretary of DHHS will continue to administer the community health centers program in any State which did not apply for State administration of the program.

The authorizations for the primary care block grant are: $2,500,000 for fiscal year 1982 to help States to plan to assume responsibility for the program; $302,500,000 for fiscal year 1983; and $327 million for fiscal year 1984.

*3. Alcohol, drug abuse, and mental health block grant program*

The Reconciliation Act establishes a formula for allocating funds under this program that is intended to provide approximately equal national allocations for mental health and for substance abuse programs. Of the funds available for substance abuse programs, States will be required to spend at least 35 percent for alcohol abuse programs and 35 percent for drug abuse programs, with the remaining 30 percent left to the State's discretion. At least 20 percent of the total funds for alcohol and drug abuse programs must be used for prevention and early intervention activities.

With its mental health funds under this block grant, each State will be required to provide funding to qualified community mental health centers which received grants in fiscal year 1981 under the Community Mental Health Centers Act and which would be eligible under that legislation, if it were still in effect.

Authorizations under the alcohol, drug abuse, and mental health block grant are: $491 million for fiscal year 1982; $511 million for fiscal year 1983; and $532 million for fiscal year 1984.

*4. Maternal and child health block grant*

This block grant includes the following programs: Maternal and child health and crippled children's programs, supplemental security income for disabled children, lead-based paint poisoning prevention, sudden infant death syndrome, hemophelia treatment centers, genetic diseases, and the adolescent pregnancy program.

The authorization for this program is $373 million for fiscal year 1982, and each fiscal year thereafter.

In addition to the above provisions, the Reconciliation Act reduces funding for health maintenance organizations, health planning, and health professions education and training. The act also provides for the closing of the Public Health Service hospitals and clinics which cannot be transferred to local control.

ADMINISTRATION ON AGING

The Administration on Aging (AoA) implements most of the programs authorized by the Older Americans Act. Under title III of the act, the Federal Government finances the activities of State agencies on aging in each State, including technical assistance to over 600 area agencies on aging throughout the Nation. State agencies receive Federal funds, on a formula grant basis, which they award to area agencies based on State-approved area plans on aging. Area agencies coordinate and implement the plans and, where needed, purchase social and nutrition services with the formula grant funds.

In addition to funding social and nutrition services and service systems for the elderly, the Older Americans Act authorizes, under title IV, a program of discretionary grants for training, research, discretionary programs, and multidisciplinary centers of gerontology. These efforts help to train personnel in the field of gerontology, increase knowledge about the service needs of the elderly, and demonstrate systems to improve the quality of services. Finally, the law provides a system of direct grants to qualified Indian tribal organizations (title VI) and funding for the National Clearinghouse on Aging and the Federal Council on the Aging (title II).

The Reagan budget proposal included $744.6 million for programs administered by AoA. It was assumed that legislation would be adopted consolidating into one authorization the funding authority for social and nutrition service. In addition to $597 million requested for social and nutrition services, the President proposed a transfer to AoA of $95.5 million from the U.S. Department of Agriculture's (USDA) food commodities program for the elderly, bringing the total request for title III services to $692.5 million. The Reagan administration also proposed consolidation of all training and other discretionary research activities into a single discretionary program at an authorized level of $23.2 million in fiscal year 1982. A request of $6 million was made for title VI; no funds were requested for the National Clearinghouse on Aging.

The Omnibus Budget Reconciliation Act of 1981 includes a budget ceiling of $715 million for fiscal year 1982, and $793.3 million for fiscal year 1983 for all titles of the act, except title V, the senior community service employment program for older Americans (see "Employment" section). The House and Senate conferees included language in the report accompanying the Reconciliation Act that the total appropriation for discretionary activities under title IV should not exceed $23.2 million for fiscal year 1982 and $24.7 million for fiscal year 1983. The conferees emphasized that the budget reconciliation measure does not amend the existing USDA elderly commodity program as currently authorized. Congress has not yet taken final action on separate legislative proposals to consolidate authorizations for social and nutrition services, and training and other discretionary activities.

[1] Includes transfer of $95,500,000 for elderly commodities programs from the USDA to Administration on Aging.
[2] See "Employment" section.
[3] Report of conferees accompanying the bill states that fiscal year 1982 appropriations for title IV should not exceed $23,200,000.

SENIOR VOLUNTEER PROGRAMS

Authorized under the Domestic Volunteer Service Act of 1973, as amended, the senior companion program (SCP), the retired senior volunteer program (RSVP), and the foster grandparent program (FGP) provide opportunities for persons aged 60 and over to volunteer their services to the community. In fiscal year 1981, $88.9 million was appropriated for these programs. The Reagan budget proposal requested $89.5 million in fiscal year 1982 funding. The Omnibus Budget Reconciliation Act of 1981 includes a total of $95 million for the three volunteer programs as shown in the table below.

[In millions of dollars]

| | Fiscal year— | | |
|---|---|---|---|
| | | 1982 | |
| | 1981 | Reagan | Omnibus Budget Reconciliation Act |
| SCP | $12.8 | $11.1 | $16.6 |
| FGP | 48.4 | 49.7 | 49.7 |

| Total | 88.9 | 89.5 | 95.0 |

SOCIAL SERVICES

The current title XX program assists States in funding a variety of social services for individuals and families. Types of services include homemaker services, family planning, preparation and delivery of meals, transportation, counseling, substitute care and day care for adults. Title XX also provides funds to States for training social services personnel. In fiscal year 1981, approximately $3 billion was available to the States for social services and training under title XX.

The Reagan administration proposed consolidation of title XX with a number of child welfare and other social services programs, including most activities of the Community Services Administration (CSA). The Reagan proposal would have consolidated these programs into a block grant to States funded at $3.8 billion in fiscal year 1982, which represents a 25-percent reduction from the fiscal year 1981 funding levels for all of the consolidated programs ($5 billion).

The Omnibus Budget Reconciliation Act of 1981 amended the existing title XX to establish a new social services block grant to States. However, contrary to wishes of the Reagan administration, the act does not consolidate any programs other than title XX social services and training. All remaining programs proposed for consolidation by the administration, except for CSA, were retained as categorical activities. (To replace CSA, a new community services block grant was established that will fund antipoverty activities at the State and local level. See "Community Services Block Grant" section.)

The social services block grant agreed to under the Reconciliation Act will be permanently authorized and funded at $2.4 billion in fiscal year 1982, $2.45 billion in fiscal year 1983, $2.5 billion in fiscal year 1984, $2.6 billion in fiscal year 1985, and $2.7 billion in fiscal year 1986 and thereafter. This funding level in fiscal year 1982 represents about a 20-percent cut from the fiscal year 1981 funding level for title XX services and training. Under the new block grant, States will receive allotments based on population. Unlike current law, there will be no income eligibility guidelines or provisions targeting assistance on certain population groups. States will be free to design their own social services programs subject to certain general prohibitions against using funds for capital improvements, most education and medical care, and certain other activities. Prior to spending funds each fiscal year, States will publish a report on their intended use of funds and every 2 years, States will report on their actual use of funds. Audits also will be required every 2 years. State plans and public participation requirements, continued in current title XX law, will be eliminated as will State matching requirements.

| Fiscal year 1982: | |
| Reagan proposal | [1] 2.25 |
| Omnibus Budget Reconciliation Act | [2] 2.4 |

[1] Would have been consolidated with child welfare programs, child abuse prevention, runaway youth, CSA, and programs for handicapped into larger social services block grant with total 1982 funding of $3.8 billion.

[2] Funding levels for title XX social services block grant will increase to $2.45 billion in fiscal year 1983, $2.5 billion in fiscal year 1984, $2.6 billion in fiscal year 1985, and $2.7 billion in fiscal year 1986 and thereafter.

COMMUNITY SERVICES BLOCK GRANT

The Community Services Administration (CSA) currently is an independent executive branch agency which supports a variety of programs to alleviate poverty. The chief function of CSA is to fund a nationwide network of local antipoverty programs, known as community action agencies, which exist in more than two-thirds of the Nation's counties. In addition, CSA administers a number of small categorical programs, including senior opportunities and services, which is designed to promote the self-sufficiency of low-income elderly and serves about 1.5 million elderly each year. Total appropriations for CSA in fiscal year 1981 are $526.4 million.

The Reagan administration proposed to abolish CSA in fiscal year 1982 and consolidate most of its activities and a portion of its budget into a social services block grant to States. CSA would have been combined with 11 other social services programs under the Reagan proposal, which also would have reduced the budgets for each program by approximately 25 percent. In the case of CSA, $363 million would have been transferred into the block grant.

The Omnibus Budget Reconciliation Act of 1981 abolished CSA, as requested by the Reagan administration, but did not consolidate antipoverty activities into a larger social services block grant. Instead, the CSA programs will be replaced by a community services block grant, to be administered by the Department of Health and Human Services (DHHS) and funded annually at $389.4 million. States will receive allotments based on the amounts they receive from CSA in fiscal year 1981, and will be required to pass most of their allotments to local governments and private nonprofit agencies to conduct antipoverty activities. Further, the Secretary of DHHS will be authorized to reserve up to 9 percent of total appropriations each year for discretionary use.

| Omnibus Budget Reconciliation Act | [2] 389.4 |

[1] This amount would have been included in a larger ($3.8 billion) social services block grant to States, CSA as a national agency would be abolished.

[2] This amount is authorized for a community services block grant to States, CSA as a national agency will be abolished.

LEGAL SERVICES

Last year, more than 150,000 low-income elderly were served by the locally controlled legal aid offices of the Legal Services Corporation. These older citizens represented more than 12 percent of the program's total clients. In fiscal year 1981, the Corporation is funded at $321 million. To maintain the existing level of operation in local offices, the Corporation estimates about $332 million would be needed in fiscal year 1982. The Reagan administration proposed termination of the Corporation but would have allowed States to use social services block grant funds to provide legal services to the low income. House and Senate conferees on the Omnibus Budget Reconciliation Act of 1981 agreed not to include the Legal Services Corporation in the reconciliation bill, but instead to consider the question of reauthorizing the program through separate legislation. The House already has passed a 2-year reauthorization with an annual funding level of $241 million, while the Senate Labor and Human Resources Committee has reported a 3-year, $100-million-per-year reauthorization. The reconciliation bill's silence on the Legal Services Corporation does not preclude Congress from subsequently approving a reauthorization bill.

| Reagan proposal | ------ |
| Omnibus Budget Reconciliation Act | (1) |

[1] The Budget Reconciliation Act is silent on the Legal Services Corporation. Conferees on the act agreed that a separate reauthorization bill will be considered for the Corporation.

WEATHERIZATION

The present weatherization program is administered by the Department of Energy (DOE). In fiscal year 1981, the program will provide $182 million to States for weatherizing the homes of people with incomes at or below 125 percent of the poverty line. The Reagan administration requested no funds for this program in fiscal year 1982. Instead, it was proposed by the administration that either community development block grant funds or low-income energy funds could be used for home weatherization.

The Omnibus Budget Reconciliation Act of 1981 includes $336 million for DOE State and local energy conservation programs. The conference agreement on the legislation pro-

vides that as much as $175 million of this amount may be used for the low-income home weatherization program. (In addition, the Reconciliation Act provisions relating to low-income home energy assistance program provides that up to 15 percent of the total appropriated for that program may be used for weatherization. The total authorized for the low-income home energy assistance program, under the conference agreement, is $1.875 billion each year for fiscal years 1982, 1983, and 1984. See "Low-Income Energy Assistance" section.)

| Reagan proposal | ---- |
| Omnibus Budget Reconciliation Act | [1] 175 |

[1] The Omnibus Budget Reconciliation Act provides $336 million for State and local energy conservation projects. The conference report on the act states that as much as $175 million of this total should be made available for low-income home weatherization.

EMPLOYMENT

The senior community service employment program (SCSEP) is authorized under title V of the Older Americans Act and administered by the Department of Labor. The program provides part-time work opportunities in community services activities for low-income persons aged 55 and over who have been poor employment prospects. The fiscal year 1981 appropriation level is $277.1 million which supports 54,200 job slots. The Reagan administration requested the same level for fiscal year 1982. The Omnibus Budget Reconciliation Act of 1981 includes a level of $277.1 million for fiscal year 1982, and $293.7 million for fiscal year 1983, and such additional sums as may be necessary for each fiscal year to support 54,200 part-time employment positions for eligible individuals.

Title III, section 308 of the Comprehensive Employment and Training Act (CETA)), authorizes funding of projects for middle-aged and older workers. In fiscal year 1981, $2 million was provided for the program. The Reagan budget included $1 million for fiscal year 1982. The Omnibus Budget Reconciliation Act of 1981 did not provide a specific authorization for section 308 activities. There was a specific authorization included for all title III programs of $219 million. Up to 5 percent of these amounts could be used for the section 308 program.

Public service employment is funded under two separate CETA programs (structural employment, title II-D), and countercyclical, title VI). It is estimated that in fiscal year 1981 a total of 450,000 to 500,000 persons have been served by these two programs, over 5 percent of whom are age 55 and over. Following the Reagan proposal, the Omnibus Budget Reconciliation Act of 1981 allows no funds for public service employment in fiscal year 1982.

[In millions of dollars]

| | Fiscal year— | | |
|---|---|---|---|
| | | 1982 | |
| | 1981 | Reagan | Omnibus Budget Reconciliation Act |
| Title V: OAA | $277.1 | $277.1 | [1] $277.1 |
| Title III: Sec. 309—CETA | 2.0 | 1.0 | [2] 10.95 |
| Title II-D:CETA | [3] 2,195.0 | 0 | 0 |
| Title VI: CETA | 495.0 | 0 | 0 |

[1] The act also provides authorization for additional amounts to support at least 54,200 part-time job slots.
[2] Ceiling for possible funding from total title III authorization.
[3] The amount of $852,000,000 was reprogramed to other activities.

EDUCATION

The continuing education program provides funds to States and higher education institutions to meet the educational needs of adults inadequately served by instructional programs in their communities (title I-B, educational outreach programs, Higher Education Act). For fiscal year 1981, $2.2 million was appropriated for these activities. The Reagan administration budget requested no funds for title I-B for fiscal year 1982. The Omnibus Budget Reconciliation Act of 1981 places a ceiling of $8 million on the authorization for this program for fiscal year 1982. Thus far, there has been no action on fiscal year 1982 appropriations legislation for this program.

TRANSPORTATION

Section 16(b) of the Urban Mass Transportation Act of 1964, as amended, allows 2 percent of urban discretionary grant funding to be set aside for capital assistance grants to States, local agencies, and private nonprofit groups for transit services to the elderly and handicapped. The Reagan budget would have made $34.4 million available in fiscal year 1982 for capital assistance under this section, a decrease of $9.4 million from fiscal year 1981 funding levels. The fiscal year 1982 budget as approved in the Omnibus Budget Reconciliation Act of 1981 allows for a slightly greater level of assistance, $36 million.

HOUSING

The Department of Housing and Urban Development administers three major programs to improve rental housing conditions for low-income individuals and families. The section 202 program provides direct Federal long-term loans for the construction of rental housing for lower income persons who are elderly or handicapped. Section 8 lower income housing assistance payments are used in conjunction with the section 202 program. The section 8 program provides assistance, in the form of rental payments, to encourage the construction of new units, substantial rehabilitation of units, and the use of standard existing units. No household assisted under section 8 may pay more than 25 percent of its income for rent. The rental payment may be as low as 15 percent, depending on family income, size, and medical or other unusual expenses. Last, the public housing program is a locally operated program in which public housing agencies engage and assist in the development of public housing projects which may be newly constructed, existing, rehabilitated, or leased. Tenants in public housing have low incomes and usually must pay up to 25 percent of their incomes for rent.

The Reagan budget requested funds for 175,000 assisted housing units. In addition, the administration proposed to increase gradually, over the next 5 years, the maximum allowable rent contribution paid by tenants living in federally subsidized housing from 25 to 30 percent of their adjusted income.

The Omnibus Budget Reconciliation Act of 1981 limits the number of units to an estimated 152,500. The rent payments of assisted housing tenants would increase from 25 to 30 percent of income, phased in over a 5-year period. No tenant's payment could increase by more than 10 percent in any 12-month period, as a result of the changes in definition of income and required rent payments. Increases because of rising income are exempt from this restriction. This change is expected to produce an estimated savings of $100 million in fiscal year 1982, rising to an annual savings of more than $1.3 billion by fiscal year 1986. No authorization is given for funding congregate housing services programs.

ASSISTED HOUSING (UNIT RESERVATIONS)

[2] A nonadd item, units are included in sec. 8 unit reservations.●

## LEGAL SERVICES

● Mr. MATHIAS. Mr. President, during the last week before the August recess, the House and Senate conferees on the budget reconciliation measure decided to take the question of funding for the Legal Services Corporation out of the budget bill and leave it to the normal authorization and appropriations channels. Since we are now in the final stretch of this process, I want to urge all my colleagues to join me in supporting this important task now before us. During the first 6 months of this Congress, we have devoted most of our energies to putting into law the desire the people have expressed for substantial cutbacks in the Federal budget and the public sector of the economy.

Everyone realizes that these new policies, whatever their long-range beneficial consequences for the economy, are going to make many aspects of life more difficult in the short run for the poor in our country. For this reason, it is critical that the Legal Services Corporation be preserved intact and be given the strong vote of confidence it deserves from this body. As the impact of budget cuts begins to be felt at the local level, the need for insuring continued access to our country's system of justice for low-income individuals and families will become more and more pressing.

On June 18, the House passed a Legal Services reauthorization measure for fiscal years 1982 and 1983, agreeing to a $241 million funding level. In July, the House also agreed to the same funding level in the appropriations bill for the Corporation. On July 29, the Senate Labor and Human Resources Committee filed its report on the reauthorization bill it approved earlier this summer, S. 1533, authorizing a spending ceiling of $100 million for the Corporation. I was a cosponsor of the original Legal Services reauthorization bill in the Senate, S. 939, which would have maintained the Corporation's current $321.3 million funding level through next year.

I regret that the Labor and Human Resources Committee reduced this figure by over two-thirds in its authorization bill. However, I am also cosponsoring the committee bill, in anticipation of an effort on the floor to raise the funding level in S. 1533 to at least the House-

approved figure, which I will vigorously support. One promising sign is that the Subcommittee on State, Justice, and Commerce Appropriations, under the leadership of Senator WEICKER, is planning to adopt the House's $241 million figure for the Corporation in the appropriations bill it is marking up this week.

Although the prospects for reauthorizing the Legal Services Corporation are looking bright, we should not fool ourselves that this will be more than a partial answer to the need for legal services for the poor. Especially in view of the anticipated reduction in the current funding level of the Corporation ($321.3 million), it is imperative that the voluntary efforts of the private bar in this area be redoubled to compensate for the budget cuts and resulting reduced resources for local legal assistance offices. Both the House and Senate Legal Services authorization bills this year contain a provision instructing the Corporation to devote greater attention to ways of involving private attorneys in legal assistance programs on this basis.

In this connection, I was pleased to note the recent creation of the Maryland Volunteer Lawyers Service, a statewide coordinating office for organizing voluntary legal services to the poor by the private bar. The primary purpose of the service will be to establish a referral procedure that will insure that law firms and individual attorneys, who wish to volunteer some of their time and expertise to providing legal assistance to the poor, will be able to spend their time in the most productive way with the most clients. In addition, the service will offer educational programs and distribute literature as well as develop a library in the areas of law that volunteer attorneys are most likely to become involved in.

The Maryland Volunteer Lawyers Service was established on July 1, with the support of the American Bar Association, the Legal Aid Bureau, the Legal Services Corporation, the Marvland Bar Association, the Maryland Bar Foundation, and the Maryland Judicial Conference. I have been proud of what Maryland's Legal Aid Bureau has been able to accomplish with the help of the Legal Services Corporation, and I am confident that the Volunteer Lawyers Service will also become an exemplar for similar initiatives in other States. The time has come for shoring up our legal services and reaffirming our commitment to equal justice under law.●

## WEBB DRUGSTORE MARKS CENTENNIAL WITH EXPANSION

● Mr. SASSER. Mr. President, small business is the backbone of our economy and our Nation, not only economically but socially as well. And there is nothing more important in this vital sector of our economy than the family drugstore in a small town or neighborhood where there is a special relationship between the druggist and his neighbors in the community.

Such a drugstore is F. Z. Webb & Sons of Smithville, Tenn. and such a man is Norval Webb, Jr., who is the owner and proprietor of this fine institution which recently observed its centennial anniversary and a major expansion. It was like an old-fashioned barn-raising and husking bee or quilting party, a century ago when folks would travel long distances to be together. The Webb drugstore is believed to be the oldest drugstore in Tennessee still owned by the same family.

People came from miles around to visit Norval, his wife, Gail, his son, Alan, and other members of the family, who came from as far away as Texas to share in the event. There were contests of various kinds and organ music and singing. It was the best of the old tradition of Tennessee hospitality combined with the best of new techniques of merchandising. The expanded store has gleaming new fixtures—but the soda fountain and the "philosophers' corner" are still there where folks come to sip coffee or have a soft drink and discuss the issues of the day.

This is not to say that other drugstores in Smithville are not fine stores operated by fine people also. But the Webb store tradition and heritage deserve recognition at this time.

Because this saga of the Webb family is a symbol of the ability and determination of small business families throughout the country, I ask permission to place in the RECORD excerpts from the local newspapers—the Smithville Review and the Star—of the centennial event.

The excerpts follow:

[From the Smithville Review, July 29, 1981]

IN MEMORY OF F. Z. WEBB AND THE LEGACY HE LEFT

(By Felix LaFever)

The hundredth year anniversary of the founding of F. Z. Webb & Sons Drug Store brings to mind F. Z. Webb—a man of great purpose and character. His dedication to his God, his community, and his family was well established.

His greatest landmark founded in 1881 is now in the care of his grandson, Norval, and his great-grandson, Alan. They are living up to and perpetuating his idea of quality service to the community.

F. Z. Webb & Sons is one of the greatest landmarks in Middle Tennessee because of its past and present contributions. It is keeping abreast with changing times in order to continue serving the community in the best way possible. This, his legacy, is in very good hands.

F. Z. Webb was a deacon in his church. He loved people—during hard times if one didn't have the money one still got the medicine.

His son-in-law, Bill LaFever, at the other end of the block, owned Bill's Place. He was also instilled with the very same way of thinking for he supplied many families for months with groceries before they were able to pay. Perhaps this was one of the reasons why Sally was attracted to him, because of his altruistic nature.

F. Z. was very dedicated to his family, which was, of course, his greatest legacy. His children were Caeser, Georgia, Eugenia, Norval and Sally. Caeser and Norval were pharmacists trained at Vanderbilt, Georgia, Eugenia and Sally had taught in the county schools.

All of F. Z.'s children were given the advantage to learn academically. They were also taught to understand and care for others. In regards to learning, Sally was typical of the women in her family. Apart from teaching, she played the piano and painted beautiful pictures.

In 1860, F. Z. Webb was born in Warren County near the DeKalb County line in the community known as Middleton. Middleton is now known as Moore's Community College. His father was Daniel Watkins Webb and his mother was Sarah, called Sally.

Sarah was the daughter of Percy Green Magnus and his wife Polly Cantrell. Many children were born to this union, mostly girls.

F. Z. had two brothers who lived close to him in Smithville. One brother was a doctor and the other was a lawyer and judge of the chancery court. F. Z. passed away in 1924, but his memory still lives with his gift of love to his God, his community and to the ones he left.

I'm deeply in debt to Tommy Webb for information supplied about my grandfather, Felix Zollicoffer Webb.

[From the Smithville (Tenn.) Star, July 29, 1981]

WEBB & SONS PHARMACY TURNS 100

A family drug store that has prospered into an institution in Smithville and DeKalb County history for the past 100 years will be recognized the rest of this week and all next week.

F. Z. Webb & Sons Pharmacy on the courthouse square in Smithville plans its centennial celebration as visitors from as far away as Texas and who knows where else come to Smithville.

The drug store enjoys the distinction of being the oldest drug store in Tennessee to be operated by one family and has stayed at very nearly the same location for most of its century-old history.

Latest in the chain of store owner/operators is Norval Webb, Jr., past president of the State Board of Pharmacists and still a sitting board member.

Webb and his son Alan are among the Webb family members and store employees who will greet the many visitors and customers expected to drop by the store during the special anniversary activities.

For three generations, the store has been the scene of more than the mixing of prescriptions.

County commissioners and county officials have discussed many a matter over a cup of coffee, which still costs a dime.

Deals more than a dime's worth, sometimes depending on your point of view, have also been discussed over coffee, cokes, candy bars, sandwiches, and hamburgers by countless teenagers, parents and grandparents.

With its 7 p.m. closing hour, the store, which has steadily expanded since the days when a turkey feet collection graced the walls, has the latest closing hour of any business on the downtown square.

The cutting of an anniversary cake has been scheduled for Monday at 10 a.m. at the store.

Among those invited have been DeKalb County Judge Billy J. LaFever, Smithville Mayor Gary "Gus" Johnson, various elected officials from the city of Smithville and throughout DeKalb County, University of Tennessee Pharmacy School Dean John Aution, Nashville Judge Bob Sutton, who is a family friend, and members of the State Board of Pharmacies.

Former Fourth District Representative Joe L. Evins, who has visited the pharmacy during numerous visits home from Washington, D.C., has also been invited to the special cake cutting Monday morning.

Members of the Smithville Rotary Club, Downtown Merchant's Association, and Smithville-DeKalb County Chamber of Commerce have also been invited.

Hefting the knife to formally cut the cake will be Winnie Webb, the oldest living family member and wife of the late J. C. Webb.

Family members from as far away as Texas have also been invited to Smithville for Monday's cake cutting and celebration.

A drawing for a television set will be held Aug. 8 and entries will be accepted up to the time of the give-away.

Among the items donated by various companies and businesses as part of the celebration are:

An infant toy donated by the Gerber Co., which will be given to the youngest registrant for the drawing.

Brite-lite flashlights donated by Ray-O-Vac.

An Osteringer compliments of American Paper and Twine.

Soft-Pak Luggage donated by American Paper and Twine.

Coke picnic basket compliments of M&M Plastics, Inc.

Stainless steel bowls compliments of TGVD.

Weatherproof lanterns compliments of Ray-O-Vac.

Gillette razors, compliments of the Gillette Co.

Men's watch, compliments of Tennessee Wholesale Drugs.

Automatic coffee maker, compliments of American Paper & Twine.

Ladies' watch, compliments of Timex Corp.

Congress Bridge Cards, compliments of U.S. Playing Card Co.

Coppertone Beach bag filed with vacation supplies, compliments of Plough, Inc.

Road Atlas, compliments of CIBA.

Thermal blanket to be given to the oldest person registering during the celebration.

---

[From the Smithville Review, July 29, 1981]

WEBB'S DRUG IS OLDEST BUSINESS

(By Thomas G. Webb)

The summer of 1881 was the driest that has ever been known before or since. Gardens dried up, much livestock literally starved to death, and no corn crop at all was made on most farms. Twenty-one-year-old Felix Zollicoffer (Zollie) Webb was working on his mother's farm, and by the end of that dry summer, he was ready for a change. He hardly had to give his decision a second thought when his two older brothers asked him to operate a drug store they had just bought in Smithville. They were far too busy to run it themselves—Bethel Webb was a lawyer and Julius Webb was a medical doctor, and they had bought the drug store as an investment when George Dillard went out of business.

While Zollie Webb had a good education for his time, he had not been educated to be a druggist; but then neither had the other druggists of that day. The State of Tennessee had no requirements to meet and pharmacists did not have to have a license. In fact, even medical doctors were not required to have a license until 1889. All that Zollie needed to become a druggist was a drug store, and that he had. He soon found that the drug store, like the farm, was not the road to prosperity. In 1881, his first year in the store, there were many days when he took in only 50 cents a day. Things improved during the next two years as the weather returned to normal, and the farmers had more money. The countryside around Smithville furnished most of the drug store's customers; Smithville itself had only about 400 residents.

Work in the store was easier than that on the farm, but the hours were about as long. The store opened at daylight and usually closed at nine o'clock at night. There were not many customers, but whenever they came, the store was open. By working long hours, Zollie prospered enough that he bought the store's goods and equipment from his brothers, and even expanded his stock to include a line of shoes. This was a fortunate addition, for it brought his future wife, eighteen-year-old Amanda Smith, into the store to look at a pair of shoes. She only came in once, for her father made it clear to her that ladies of any age did not go into the stores for any purpose. Town was much too rough for ladies, and anything they required could be bought for them by a male member of the family.

At any rate, Zollie found it convenient to visit the Smith home, and in 1885 he and Amanda were married. By 1895 they had two sons and three daughters. Zollie was now an established family man and an established business man. Then in 1898 fire destroyed all the stores in the block where the drug store was located, including Webb's Drug Store, of course. Zollie had no insurance, and nothing was saved from the fire except a string of turkey feet, trophies of several years of Zollie's hunting.

Zollie Webb now made an important decision, which marked a turning point in the history of the drug store. Until this time, he had not owned the building in which the store was located, but had rented from his cousin, Billy Potter. The store was located on the west side of the public square, in the same block where the present store now stands. The first building was the third store north of the corner; its location now occupied by a building bought in 1980 for use as storage by the present drug store.

Zollie decided he had rented long enough and he determined to build his own store. His father-in-law, George Smith, owned the lot on the corner of West Main Street and the public square. On January 5, 1900, F. Z. Webb purchased this lot, and the drug store was located where it would remain for most of the next 80 years.

Since all the stores in the block had burned, all of them had to be rebuilt. The owners of the four lots facing the square were Zollie Webb, Billy Porter, Jim Moore, and Will Smith. They agreed to build their stores with similar fronts in order to present an attractive appearance. A sidewalk was built in front of the block and a well was dug beside the walk in the middle of the block. This was long before air-conditioning, so for summer comfort a metal awning was placed over each store front. Fast-growing locust trees were planted beside the walk, and benches were placed in front of the stores. The owners could sit outside when they were not busy, and on Sunday afternoons the people of the town sat on the benches and enjoyed the music of the Smithville Concert Band as they played in the bandstand on the square.

There were changes inside the store as well as outside. The Pure Food and Drug Act of 1909 placed addictive drugs under strict control. Prior to that time opium was kept on the counter just like cheese, and anyone with the money could buy a chunk of it. DeKalb County had a number of drug addicts, though they were different from those of today. Whereas most present-day addicts are young people, the addicts of that time were mostly older people. Many of them had become addicted by taking drugs to kill the pain of arthritis or some other chronic disease. They spent considerable amounts of money in their addiction; some spent as much as $100 at one time, an enormous amount for that time.

The drug store continued to prosper, and Zollie sent both his sons to Vanderbilt University, where both graduated with degrees in pharmacy. Caesar returned to work in the store in 1912; by 1914 he was making a monthly salary of $40. He lived very well on this; his house rent was $8 a month. Norval returned from Vanderbilt in 1917. He and Caesar had some new ideas. The drug store had been selling Coca-Cola and other drinks for several years, using ice from Eli Evans' ice plant. Now that electricity had come to Smithville, they felt that a popcorn machine would pay off. Not only would they make a profit on popcorn, but the demand for cold drinks would be increased. The popcorn machine cost $500, which was an outrageous price, but they felt it would soon pay for itself. However, the popcorn machine had barely been bought and installed, when once again the drug store burned, along, with all the other stores in the block. Manful efforts were made to save the popcorn machine, but it was lost, and Caesar barely escaped injury. Once again, there was no insurance on the store.

Zollie was now sixty years old and not in the best of health. Caesar was twenty-five. They decided that all three would become equal partners in the store, now to be known as F. Z. Webb and Sons. The first thing the partnership did was to buy Harlan Mason's drug store. Mr. Mason's store was located on Main Street where Jenkin's and Darwin's store now is. On September 25, 1920, F. Z. Webb and Sons bought Mr. Mason's store, lot, drugs, furniture, and fixtures for $9,250, to be paid within three years. Thus with one stroke they continued their own business and eliminated their competition.

In the new location the partners decided on a new business venture. Smithville had had electricity for three or four years now. Though it went out every time a storm came up, it was considered dependable enough to put in a freezer for ice cream and to install a complete soda fountain. The soda fountain was bought from Vernon Gothard at Liberty; it was made of brown marble and had a large mirror that hung on the wall behind it.

There were also small tables and wire-back chairs where customers could sit to enjoy their sodas, sundaes, and milkshakes. Young Freddie Tramel was employed to operate the soda fountain and do other odd jobs. He proved to be a valuable addition to the drugstore, as Zollie Webb died in 1924, leaving Caesar and Norval to manage the store. Then in 1929 Norval found it necessary to spend several months in Albuquerque, New Mexico, with his wife, who had tuberculosis. This was a difficult time for him to be away, as construction was begun that year on the new store.

The Webbs had always intended to rebuild in the corner of the square and West Main Street. The lot had stood vacant for nine years until they felt financially able to build a new store. In 1929 Norval and Caesar Webb contracted with John Congress to build a one-story brick building on the corner. This building, with a few changes, served as the F. Z. Webb and Sons Drug Store for the next fifty years.

When the building was finished, it not only had the usual glass doors and showwindows on the front; it also had a door with a large window facing Main Street. The soda fountain and chairs were placed in this window, and the customers who sat there could both see and be seen. Freddie Tramel continued to work in the drug store until 1938 when he was elected county court clerk. His niece, Ina May Tramel, later worked at the soda fountain. Then in the 1940s, high school girls were hired to work at the soda fountain; Betty Tittsworth and Joyce Lawson were among those employed. During the 1930s and 1940s, the drug store was a popular stopping place for high school students on their way home; a Coke or a chocolate sundae was great refreshment after a hard day at school. Another reason for students to stop was that the drug store was where they bought their school books. Free textbooks were not issued until the early 1950s; before that time each student bought all his own school books at Webb's Drug Store.

The drug store was not only a gathering place for students, it was also a popular gathering place at night. It seldom closed before nine o'clock, and men of the town

would often walk down to the drug store after supper. In those days before television, the drug store offered a respectable place where they could gather and discuss the day's events. Smithville was still small; in 1940 it had less than a thousand people, so everybody knew everything about everybody else.

Changes came to the drug store; in 1920 F. Z. Webb and Sons became affiliated with the Rexall chain. The famous Rexall One-Cent sales were a great help to the store's customers, especially during the Depression. Another change was that women began to work in the store. The popular lines of cosmetics and perfumes now handled by the store were felt to need a woman's touch, so Caesar Webb's wife Winnie worked part time at the store. Later Norval's wife Lucille also worked there.

More changes were to come. Norval Webb's only son, Norval Jr., graduated from the University of Tennessee with a degree in pharmacy, and in 1953 he returned to work at F. Z. Webb and Sons Drug Store. In a few months he bought Caesar's share of the store, and Caesar Webb retired after 41 years. He continued to keep books for the store for several years after he retired, until he suffered a stroke. He was an invalid for some years before his death in 1966. Since Caesar's illness, the account books have been kept by Norval Jr.'s wife, Gail Hudgens Webb.

The new partners, Norval Webb, Sr. and Norval Webb, Jr., decided that the store needed a remodeling. The door and window on Main Street were closed and bricked up, leaving only the entrance on the square. The soda fountain was moved from the north side to the south side, and the old marble was discarded to be replaced by more modern formica. The wire-back chairs and tables also went; their place was taken by cushioned booths and formica tables. Little further change was made during the next twenty-five years.

In 1961 Norval Webb, Sr., died unexpectedly of a heart attack. For the next twenty years Norval Webb, Jr., was in charge of F. Z. Webb and Sons Drug Store, while his son Alan was growing up and going to school. Finally, in 1980 Alan Webb returned to Smithville and the drug store, having completed his training and earning a degree in pharmacy at the University of Tennessee.

Once again a remodeling was decided on. After fifty years in the same building, the store had become very crowded. In 1980 the two adjoining buildings on the square were acquired by the drug store. The store doubled its size by removing a wall between the original store and the adjoining building. Currently used for storage, the third building stands where F. Z. Webb's original store stood in 1881.

Some things have changed; some have not. F. Z. Webb and Sons Drug Store now stands where it has been for all but nine of the past hundred years. For seventy-five years it has had a soda fountain; of the five drug stores in Smithville it is the only one that now has a soda fountain. Once again there are wire-back chairs with tables. The price of coffee is still five cents a cup, unchanged from the first cup that was sold there. Today few prescriptions have to be compounded by the pharmacist, but it is more important than ever for the pharmacist to know the effects of the prescribed drugs on the patient.

Besides the owners, the drug store has had many employees over the years. Some have worked a short time; some have worked for many years. The present employees and their years of service are: Mrs. Frances Patterson, 17 years; Mrs. Mary White, 16 years; Mrs. Marie Stewart, 15 years; Teresa Johnson Caldwell, 2 years; and with less than one year, Mary Price, Brenda Driver, and Keely Smith, Norval and Gail's daughters, Annette Webb Greek and Amanda Webb, also work in the store when needed.

The owner, Norval Webb, has been a pharmacist for 30 years, while his son Alan has two years experience. With the fourth generation of the Webb family beginning service in the drug store, prospects are good for F. Z. Webb and Sons Drug Store to be in business for another hundred years.●

## THE NEED TO LOCATE CORPS OF ENGINEERS DISTRICTS IN A MORE UNIFORM MANNER

● Mr. DOMENICI. Mr. President, earlier this year I introduced S. 1026. That legislation seeks to assure that the U.S. Army Corps of Engineers will not lessen the strength of any district office in a region of the United States where the corps is presently underrepresented. I believe that such a directive is essential if the corps is to meet the challenging water needs of our Nation.

To cite an example with which I am familiar, only one corps district office exists between the west coast and the Midwest—that one is located in Albuquerque, N. Mex. I am convinced there is a strong need to increase the corps' representation in the Rocky Mountain and Intermountain States. This is not simply to protect Albuquerque, but to strengthen the corps' understanding of the water problems across a vast water-short portion of our Nation.

It is particularly gratifying to me that S. E. Reynolds, New Mexico's distinguished State engineer, has expressed his strong support for S. 1026. I ask that a copy of Mr. Reynolds' letter be printed in the RECORD.

The letter follows:

STATE OF NEW MEXICO,
NATURAL RESOURCES DEPARTMENT,
*May 27, 1981.*

Hon. PETE V. DOMENICI,
*U.S. Senate,*
*Dirksen Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR: I recently received a copy of S. 1025 which you introduced to assure the continuation of an adequate regional distribution of offices under the direction of the Chief of Engineers, U.S. Army.

It is my understanding that this legislation was introduced because the Corps of Engineers had announced tentative plans to close several of the Corps' district offices.

New Mexico currently enjoys a Corps of Engineer district office in Albuquerque which handles much of the Corps' work in New Mexico. However, the San Juan River drainage in New Mexico is under a Corps district office in Sacramento, California, the Lower Colorado River drainage in New Mexico is under a Corps district office in Los Angeles and portions of the Canadian River drainage in New Mexico are under a Corps district office in Tulsa, Oklahoma. Our experience has been that, while these district offices are responsive, they are too distantly located to be totally familiar with local problems.

The Corps district office in Albuquerque has been most cooperative and responsive to state and local needs in water resource projects and problems; its closure would be a serious blow to New Mexico.

I support enactment of S. 1026.

Sincerely,

S. E. REYNOLDS,
*State Engineer.*●

## EXECUTIVE SESSION

Mr. BAKER. Mr. President, I have certain items on today's Executive Calendar that I am prepared to consider. I inquire of the minority leader if they are items that he is prepared to consider at this time.

Mr. ROBERT C. BYRD. Mr. President, on the minority side, the following nominations have been cleared: Beginning with the Judiciary Committee, page 2 of the Executive Calendar, going through Department of State on page 3, with the exception of the third nominee there, and excluding the nomination under Inter-American Development Bank, but proceeding with the last nomination on the calendar, Board for International Broadcasting.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the following nominations: Robert F. Chapman, D. Brook Bartlett, John R. Gibson, Joseph E. Stevens, Jr., Frank W. Donaldson, J. Frederick Motz, W. Stephen Thayer III, Alfred E. Eckes, William Courtney Sherman, Dominick L. DiCarlo, and Ben J. Wattenberg.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I believe that conforms to the statement made by the minority leader; and with his concurrence in that listing, I ask unanimous consent that the nominations just identified be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

Robert F. Chapman, of South Carolina, to be a U.S. circuit judge for the fourth circuit.

D. Brook Bartlett, of Missouri, to be U.S. district judge for the western district of Missouri.

John R. Gibson, of Missouri, to be U.S. district judge for the western district of Missouri.

Joseph E. Stevens, Jr., of Missouri, to be U.S. district judge for the eastern and western districts of Missouri.

DEPARTMENT OF JUSTICE

Frank W. Donaldson, of Alabama, to be U.S. attorney for the northern district of Alabama.

J. Frederick Motz, of Maryland, to be U.S. attorney for the district of Maryland.

W. Stephen Thayer III, of New Hampshire, to be U.S. attorney for the district of New Hampshire.

U.S. INTERNATIONAL TRADE COMMISSION

Alfred E. Eckes, Jr., of Virginia, to be a member of the U.S. International Trade Commission.

DEPARTMENT OF STATE

William Courtney Sherman, of Virginia, to be the Deputy Representative of the United States of America in the Security Council of the United Nations, with the rank of Ambassador.

BOARD FOR INTERNATIONAL BROADCASTING

Ben J. Wattenberg, of the District of Columbia, to be a member of the Board for International Broadcasting.

NOMINATION OF W. STEPHEN THAYER III

Mr. HUMPHREY. Mr. President, it is with great pleasure that I endorse W. Steve Thayer III for U.S. attorney for the district of New Hampshire. Mr. Thayer has played an important and active role in legal and political arenas in New Hampshire.

I cannot stress enough, the high esteem and reputation Mr. Thayer holds in the legal community in New Hampshire. His experience and competence as a practicing attorney will prove beneficial in his duties as U.S. attorney.

Mr. Thayer graduated from the John Marshall Law School in 1974 after serving his country in the Vietnam war. Since that time, he built his reputation in private law practice, as well as in State legal counseling. Mr. Thayer was the attorney for the New Hampshire State Senate, and later acted as legal counsel to the Reagan campaign in New Hampshire. In fact, Mr. Thayer played an extraordinary role in helping to elect President Reagan.

Finally, I would like to say that knowing Steve Thayer personally, there is one word I would use to describe his character: Integrity. Steve Thayer is a man of integrity and deserving of his appointment as U.S. attorney in the State of New Hampshire. It is my strong conviction that Mr. Thayer will discharge his responsibilities with excellence.

NOMINATION OF ALFRED E. ECKES, JR.

Mr. DOLE. Mr. President, on September 15, 1981, the Committee on Finance held a hearing on the nomination of Alfred E. Eckes, Jr., to be a Commissioner of the U.S. International Trade Commission. As chairman of the committee, it is a privilege and a pleasure to report the committee's decision to report favorably the nomination of Mr. Eckes.

Mr. President, the committee has reviewed Mr. Eckes' financial statement and the report of the Office of Government Ethics. We are confident that there are no problems in either area.

Mr. Eckes has been nominated to fill an extremely important position in the international trade field. The ITC is uniquely situated as an independent advisor to both the President and the Congress on trade matters. It also plays a key role in the implementation of our fair and unfair trade practice statutes. The strength of the international trading system depends on a vigorous enforcement of our trade laws. The ITC must continue to exercise its jurisdiction in this area in an expeditious and impartial manner.

Mr. Eckes has an excellent background and experience for the position to which he has been nominated. He received a B.A. degree from Washington and Lee University and achieved Phi Beta Kappa and magna cum laude honors. He was a Fulbright scholar at Cambridge in international economics. Thereafter, he received an M.A. from the Fletcher School of Law and Diplomacy, Tufts University, and a Ph. D. from the University of Texas.

He was a foreign service officer, a history professor and an editorial page editor in Columbus, Ohio. He also has had congressional experience with the House Republican conference.

Mr. President, Mr. Eckes is well qualified to serve in this important position. I urge my colleagues to approve his nomination.

Mr. BAKER. Mr. President, I move en bloc to reconsider the vote by which the nominations were confirmed en bloc.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

## LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

## CONSIDERATION OF CERTAIN ITEMS ON THE CALENDAR

Mr. BAKER. Mr. President, there are certain items on the calendar which have been cleared on this side of the aisle, and I call the attention of the minority leader to the following items: Calendar Nos. 267, 268, 269, 270, and 271. I am prepared to proceed with those matters if there is no objection from the minority.

Mr. ROBERT C. BYRD. Mr. President, those matters have been cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the items I have just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

## FIFTIETH ANNIVERSARY OF RADIO CITY MUSIC HALL

The Senate proceeded to consider the resolution (S. Res. 155) saluting the 50th anniversary of Radio City Music Hall.

Mr. MOYNIHAN. Mr. President, 2 days after Christmas in 1932 the Radio City Music Hall in New York City opened its doors for the first time and today the Senate has taken notice of what a grand gift that hall has been to the Nation.

I am delighted that the Senate has approved Senate Resolution 155, which I introduced on June 19 and which has been cosponsored by 27 other Members of the Senate. That resolution recognizes the splendid role Radio City Music Hall has played in the cultural life of the Nation and expresses our deep appreciation to all those who have managed the hall and performed on its stage over these many years.

For five decades, musical stage shows, the Rockettes dance troupe and countless other films and productions have appeared in the hall to universal acclaim. While uniquely American in tone, origin and character, the productions at Radio City Music Hall have appealed to more than 255 million people from all nations, all walks of life, and their patronage of the hall has made it the most popular entertainment attraction in the world.

Mr. President, many of America's greatest motion pictures and musicals have premiered at Radio City Music Hall and the structure itself has been declared an architectural landmark.

It is altogether appropriate that the Senate should take special notice of this 50th anniversary for Radio City Music Hall and say once again how much we appreciate an institution which has meant so much to so many.

Mr. President, I ask unanimous consent that the text of Senate Resolution 155 be printed at this point in the RECORD along with a list of those Senators who cosponsored the measure.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATE RESOLUTION 155—RESOLUTION RELATING TO THE 50TH ANNIVERSARY OF RADIO CITY MUSIC HALL

Mr. MOYNIHAN submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 155

Whereas, in 1932, the Radio City Music Hall in New York City opened its doors to a public longing for the uplift and optimism that emanated from its stage, and

Whereas, for five decades, the musical stage shows and Rockettes dance troupe presented at the Radio City Music Hall have been universally acclaimed, though they are uniquely American in origin and character, and

Whereas, America's greatest motion pictures have premiered and played at Radio City Music Hall, and

Whereas, Radio City Music Hall has been declared an architectural landmark, and

Whereas, the majesty of the Radio City Music Hall and the magic of its performing arts have enchanted audiences drawn from all over America and the world: therefore, be it

*Resolved*, That the Senate hereby acknowledge the fiftieth anniversary of Radio City Music Hall in 1982, and expresses the appreciation and admiration of the Nation for all those who have performed in or managed the Radio City Music Hall and who have thereby contributed significantly to the cultural achievement of the United States.

The list of cosponsors follows:

The Senator from New York, Mr. D'Amato.
The Senator from Idaho, Mr. Symms.
The Senator from Oregon, Mr. Hatfield.
The Senator from Indiana, Mr. Lugar.
The Senator from New Mexico, Mr. Schmitt.
The Senator from Oregon, Mr. Packwood.
The Senator from Utah, Mr. Garn.
The Senator from Tennessee, Mr. Baker.
The Senator from New Mexico, Mr. Domenici.
The Senator from Idaho, Mr. McClure.
The Senator from Wisconsin, Mr. Kasten.
The Senator from New Jersey, Mr. Bradley.
The Senator from Rhode Island, Mr. Pell.
The Senator from New Jersey, Mr. Williams.
The Senator from Massachusetts, Mr. Tsongas.
The Senator from Michigan, Mr. Riegle.
The Senator from Nevada, Mr. Cannon.
The Senator from Tennessee, Mr. Sasser.
The Senator from California, Mr. Cranston.

The Senator from South Carolina, Mr. Hollings.

The Senator from Kentucky, Mr. Huddleston.

The Senator from Michigan, Mr. Levin.

The Senator from Hawaii, Mr. Matsunaga.

The Senator from Ohio, Mr. Metzenbaum.

The Senator from Montana, Mr. Melcher.

The Senator from California, Mr. Hayakawa.

The Senator from Maryland, Mr. Sarbanes.

The resolution, with its premable, was agreed to, as follows:

S. RES. 155

Whereas, in 1932, the Radio City Music Hall in New York City opened its doors to a public longing for the uplift and optimism that emanated from its stage; and

Whereas, for five decades, the musical stage shows and Rockettes dance troupe presented at the Radio City Music Hall have been universally acclaimed, though they are uniquely American in origin and character; and

Whereas America's greatest motion pictures have premiered and played at Radio City Hall; and

Whereas Radio City Music Hall has been declared an architectural landmark; and

Whereas the majesty of the Radio City Music Hall and the magic of its performing arts have enchanted audiences drawn from all over America and the world: Now, therefore, be it

*Resolved,* That the Senate hereby acknowledge the fiftieth anniversary of Radio City Music Hall in 1982, and expresses the appreciation and admiration of the Nation for all those who have performed in or managed the Radio City Music Hall and who have thereby contributed significantly to the cultural achievement of the United States.

## NATIONAL HIGH SCHOOL ACTIVITIES WEEK

The joint resolution (S.J. Res. 101) designating "National High School Activities Week" was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, together with the preamble, is as follows:

S.J. RES. 101

Whereas more than half of the students in this Nation's senior high schools are involved in at least one extracurricular activity;

Whereas this "other half of education" plans a significant role in the total educational development of high school students;

Whereas participation in activities such as athletics, speech, music, debate, drama, and others generally leads to positive development for all and often leads to superior achievement;

Whereas participation and achievement in those areas often contribute to increased interest and performance in strictly academic areas;

Whereas both academic and extracurricular achievement contribute greatly to the social development and interaction of all high school students;

Whereas that development directly benefits local communities by channeling young people's interests and talents into positive efforts, and by instilling in them an early sense of civic duty and community pride;

Whereas, former President Gerald R. Ford has agreed to act as honorary national chairman of the effort to recognize the important role of extracurricular activities in this Nation's high schools: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President should designate the week of October 19 through October 25, 1981, as "National High School Activities Week", in recognition of the valuable contribution that such programs make in developing the interests and talents of young people at the community level.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

## NATIONAL PORT WEEK

The Senate proceeded to consider the joint resolution (S.J. Res. 103) to authorize and request the President to issue a proclamation designating the 7 calendar days beginning October 4, 1981, as "National Port Week."

Mr. THURMOND. Mr. President, I am pleased that the Senate is taking action today on Senate Joint Resolution 103, designating the week beginning October 3, 1981, as "National Port Week." This resolution was introduced on July 30 of this year by Senator HOLLINGS, on behalf of himself and this Senator from South Carolina. A number of our colleagues have joined us as cosponsors of Senate Joint Resolution 103. We appreciate the support and interest of the following Senators: Senator WILLIAMS, Senator SARBANES, Senator STAFFORD, Senator TSONGAS, Senator NUNN, Senator CHILES, Senator HEFLIN, Senator STENNIS, Senator JOHNSTON, Senator TOWER, Senator MATSUNAGA, Senator COCHRAN, Senator CRANSTON, Senator METZENBAUM, Senator CANNON, Senator BRADLEY, Senator MOYNIHAN, Senator LONG, Senator MITCHELL, Senator BENTSEN, Senator INOUYE, Senator BIDEN, Senator HAYAKAWA, Senator COHEN, Senator EAST, Senator KENNEDY, Senator DURENBERGER, Senator STEVENS, Senator DENTON, Senator MATHIAS, Senator WARNER, Senator DOLE, Senator PACKWOOD, Senator HELMS, and Senator MURKOWSKI.

Senate Joint Resolution 103 calls attention to the very important role which our ocean and inland ports have played in our Nation's economic growth and development and points out the continuing need for a viable and competitive system of commercial ports. This resolution also emphasizes the importance of a national network of ports to a vigorous international trade and to the attainment of a favorable balance of trade. Recognizing this vital role of our commercial ports, Congress has, in recent years, passed similar resolutions proclaiming the first calendar week in October as "National Port Week."

I am pleased to inform my colleagues that the current president of the American Association of Port Authorities, Don Welch, is a South Carolinian. The service of Mr. Welch as president of this national association highlights the importance to South Carolina of its commercial ports and the extent to which our State's port system has grown and obtained the respect of the international maritime transportation industry.

Mr. President, there is a similar measure, House Joint Resolution 302, pending in the House of Representatives. This resolution was introduced by Representative BIAGGI of New York. I hope that both the Senate and the House will soon take favorable action on these important resolutions.

The joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and was passed.

The preamble was agreed to.

The joint resolution, together with the preamble, is as follows:

S.J. RES. 103

Whereas the past development of the public ports of the United States is the result of a fruitful partnership in which State and local authorities have assumed major responsibilities for land-based port development with the Federal Government constructing and maintaining the navigable waterways and harbors of the United States;

Whereas our Nation's commercial seaports and inland river ports are indispensable to foreign and domestic waterborne commerce and to the economic well-being and national security of the United States;

Whereas the maintenance and development of a national network of commercial ports is vital to expanded international trade and to the attainment of a favorable trade balance;

Whereas commercial ports serving the waterborne commerce of the United States are responsible for the continued employment of more than one million workers and in 1980 generated a total of $66,000,000,000 in direct and indirect dollar income from gross sales and services to their users;

Whereas there is a continuing need to focus public attention upon the value to our Nation of a viable and competitive system of commercial ports; and

Whereas the "National Port Week" observance promotes public recognition of the vital role that our ocean and inland ports have played in the economic growth and development of the United States: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States is authorized and requested to issue a proclamation designating the seven-day period beginning October 4, 1981, as "National Port Week" and to invite the Governors of the several States, the chief officials of local governments, and the people of the United States to observe that week with appropriate ceremonies and activities.

## NATIONAL PTA MEMBERSHIP MONTH

The Senate proceeded to consider the joint resolution (S.J. Res. 105) to designate October 1981 as "National PTA Membership Month."

Mr. TOWER. Mr. President, I take this opportunity to commend the National Parent-Teacher Association for their continuing contribution to the development of our society's most precious and irreplaceable resources—human resources. We must never forget that the education of our children is among the most important long-term investments our country can make. As a former educator, I am especially aware of this basic tenet which is crucial to the future strength of our great Nation.

Over the years, the National Parent-Teacher Association has enabled us to build for that future by helping to improve the educational opportunities and learning environment for all children. By bridging the gap between professional

administrators and local communities, this vital organization accomplishes its goals through local participation in addressing the particular needs of the communities involved. In my view, this is one of the most noteworthy aspects of the Parent-Teacher Association—it recognizes that the Federal Government does not have a monopoly on formulating workable solutions to all problems which might arise and that many situations can best be dealt with at the local level by concerned citizens.

Further, Mr. President, it gives me particular pleasure to recognize that a Texan, Mary Ann Leveridge, presently serves as the national president of the Parent-Teacher Association. Ms. Leveridge has served in the past as president of the Texas Parent-Teacher Association, and more recently, as first vice president of the national association. I am confident that she will continue in her new capacity to be a strong advocate for the furtherance of the Parent-Teacher Association's goals, and Texas is most honored to have her in this position.

Therefore, Mr. President, I am proud to add my name to the list of cosponsors to Senate Joint Resolution 105 to designate the month of October 1981 as "National PTA Membership Month."

The joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and was passed.

The preamble was agreed to.

The joint resolution, together with the preamble, is as follows:

S.J. RES. 105

Whereas the National Congress of Parents and Teachers was founded in 1897 as an advocate for children and youth; and

Whereas the National Parent Teacher Association represents over twenty-nine thousand State and local units with over six million active members and is a volunteer organization concerned with improving the educational opportunities and quality of life for all children and youth; and

Whereas the Parent Teacher Association seeks to raise the standards of home life and to secure for all children and youth the highest advantages in physical, mental, social, and spiritual education: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the month of October 1981 is designated "National P.T.A. Membership Month", and the President is requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

## NATIONAL FAMILY WEEK

The Senate proceeded to consider the joint resolution (S.J. Res. 4) to authorize the President to issue annually a proclamation designating that week in November which includes Thanksgiving Day as "National Family Week," which had been reported from the Committee on the Judiciary with an amendment:

On page 1, line 5, strike "on the Sunday preceding the fourth Thursday in November of each year", and insert September 22, 1981".

So as to make the joint resolution read:

S.J. RES. 4

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is hereby authorized and requested to issue annually a proclamation designating the week beginning September 22, 1981, as "National Family Week", and inviting the Governors of the several States, the chief officials of local governments, and the people of the United States to observe such day with appropriate ceremonies and activities.

The amendment was agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and was passed.

The amendment to the title of the joint resolution was agreed to.

Mr. BAKER. Mr. President, that completes the matters that I have cleared for consideration on today's legislative calendar.

## TIME AGREEMENTS FOR THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I have an agreement in respect to the business of the Senate on Monday next which I believe has been cleared on the minority side and I wish to state the request at this time.

Mr. President, as in executive session, I ask unanimous consent that at 10 a.m. on Monday, September 21, the Senate go into executive session to consider the nomination of Sandra Day O'Connor, to be an Associate Justice of the U.S. Supreme Court under the following time agreement: 4 hours on the nomination to be equally divided between the chairman of the Judiciary Committee and the ranking minority member or their designees, with 30 minutes of the majority's time to be under the control of the Senator from North Carolina (Mr. HELMS);

That following the conclusion of debate on the O'Connor nomination, the Senate then turn to the consideration of the nomination of James C. Miller III, to be a Federal Trade Commissioner under the following time agreement: 2 hours on the nomination to be equally divided between majority and minority leaders or their designees, and 1 hour under the control of the distinguished Senator from Ohio (Mr. METZENBAUM);

That following the conclusion of debate on the Miller nomination, the Senate then turn to the consideration of the nomination of James R. Richards, to be Inspector General of the Department of Energy under a 3-hour time limitation entered into on Wednesday, September 9; and

That at 6 p.m. on Monday, September 21, a rollcall vote will then occur on the confirmation of Sandra Day O'Connor, to be an Associate Justice of the U.S. Supreme Court. Following the disposition of the vote on the O'Connor nomination, any rollcall votes ordered on the confirmation of nominees Miller and Richards will then occur, back-to-back, with the first rollcall vote following the O'Connor vote to be 15 minutes in length and any remaining back-to-back rollcall votes ordered to be 10 minutes in length.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDERS FOR THURSDAY

### ORDER FOR RECESS UNTIL 9:15 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:15 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

### ORDER FOR RECOGNITION OF SENATORS BAKER AND THURMOND

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, there be special orders, of not to exceed 15 minutes each, in favor of the Senator from Tennessee (Mr. BAKER) and the distinguished Senator from South Carolina (Mr. THURMOND).

The PRESIDING OFFICER. Without objection, it is so ordered.

### ORDER FOR CONSIDERATION OF AGRICULTURE AND FOOD ACT OF 1981

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate resume consideration of the farm bill at 10:15 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

### ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order and the two Senators on special orders, there be a brief period for the transaction of routine morning business, not to extend beyond 10:15 a.m., in which Senators may speak for not more than 3 minutes each

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECESS FROM FRIDAY UNTIL 9:30 A.M. MONDAY, SEPTEMBER 21, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business on Friday next it stand in recess until the hour of 9:30 a.m. on Monday, September 21.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PROGRAM

Mr. BAKER. Mr. President, the Senate will convene tomorrow at 9:15 a.m. After the recognition of the two leaders under the standing order and the recognition of two Senators on special orders of not to exceed 15 minutes each, there will be a brief period for the transaction of routine morning business to extend not past the hour of 10:15 a.m. At 10:15 a.m., according to the order previously entered, the Senate will resume consideration of the farm bill.

It is my hope and I have a reasonable expectation that the Senate can complete work on the farm bill tomorrow.

It is the intention of the leadership, as previously indicated, to remain in late tomorrow, Thursday being the announced and regular late evening.

Mr. President, the Senate will continue consideration of the farm bill if necessary on Friday and thereafter until the matter is disposed of.

However, it is the hope of the leadership that if we complete consideration of the farm bill on Thursday or early Friday the Senate will then turn to the consideration of the Interior appropriations bill.

After the disposition of the Interior appropriations bill it is the intention of the leadership to ask the Senate to turn to the consideration of the foreign assistance bill on the calendar.

Mr. BAKER. Mr. President, I believe there is no other business that I wish to present to the Senate for its consideration this evening.

I inquire of the minority leader if there is any further matter that he wishes to address.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I have none.

Mr. BAKER. I thank the minority leader.

## RECESS UNTIL 9:15 A.M. TOMORROW

Mr. BAKER. Mr. President, in that event, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:15 a.m. tomorrow.

The motion was agreed to; and at 6:46 p.m., the Senate recessed until Thursday, September 17, 1981, at 9:15 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 16, 1981:

ALASKA LAND USE COUNCIL

Vernon R. Wiggins of Alaska, to be Federal Cochairman of the Alaska Land Use Council (new position).

FEDERAL MARITIME COMMISSION

James J. Carey, of Illinois, to be a Federal Maritime Commissioner for the remainder of the term expiring June 30, 1985, vice Peter N. Teige, resigned.

IN THE NAVY

The following-named chief warrant officers, W-3 of the U.S. Navy for permanent promotion to the grade of chief warrant officer, W-3, pursuant to title 10, United States Code, sections 563 and 5791, subject to qualifications therefor as provided by law:

Morgan, Franklin H.
Moulis, Charles L.
Rhodes, Francis S.
Scarbrough, Travis E.

The following-named chief warrant officers, W-4 of the U.S. Navy for permanent promotion to the grade of chief warrant officer, W-4, pursuant to title 10, United States Code, sections 563 and 5791, subject to qualifications therefor as provided by law:

Adams, Donald E.
Anderson, Donald E.
Anthony, Patrick L.
Ashworth, Robert A.
Bargy, Philip M.
Beatty, Arthur
Bolstad, Richard J.
Bolton, Harold L., Jr.
Book, Roy L.
Bowers, William E.
Bradley, Gene F.
Brammer, Russell G.
Brayman, Thomas E.
Britts, Haven J.
Busch, Danny G.
Busseno, Henry W.
Chapin, Ronald C.
Cherry, Stephen W.
Clements, David L.
Collins, James E.
Connell, James L.
Cooper, Gary D.
Corder, Clifford W.
Coupland, Steve J.
Cox, Anderson H.
Culberson, Edward M., Jr.
Dechene, Philip E.
Deese, David S.
Dreiling, Richard E.
Duffy, Mark E.
Eberle, Richard R.
Evergin, James F., Jr.
Favaloro, Francis A.
Garrison, Rolland R.
Glover, Andrew L.
Goodell, Edward C.
Griggs, Edward C.
Gschwend, David A.
Haller, Bernard J.
Harvey, James L.
Haworth, James R.
Hendrix, Bobby E.
Henry, James, III
Hewitt, Earl J., Jr.
Hicks, Edward K.
Hurd, William D.
Hutt, Eden A.
Iannetta, John M.
Jones, Douglas W.
Kale, James E.
Kanaski, Richard S.
Kenyon, Robert J.
Kuhnert, Howard J., Jr.
Langmaid, Robert V., Jr.
Leach, Clifford, Jr.
Loonam, John F.
Lutz, James R.
MacDonald, Richard C
Malboeuf, Ernest J.
May, Bobby E.
McDonough, James F.
McElhaney, Paul R.
Milne, Marion K.
Morrison, Herbert E.
Olander, Raymond E.
Oliver, Julian D.
Olson, John T., Jr.
Patino, Donald V.
Peszynski, Walter F.
Peterson, John E.
Petrick, Robert G.
Price, Earl J.
Reed, Frank G.
Robey, Olen W.
Salinas, Amando S.
Santonil, Rosendo T.
Schroedor, William
Singletary, Joe W.
Smith, Howard P.
Smith, Lester C.
Smith, Robert J.
Stapp, Alton E.
Stephens, Hugh L.
Stowe, Abraham R.
Stowe, Dorothy J.
Tarr, Robert M.
Taylor, Henry H.
Thompson, Robert M.
Townsend, Paul, Jr.
Turner, Donald P.
Vandenburg, Richard J.
Ventgen, Robert J.
Villanueva, Anastacio L.
Wilke, James G.
Yarmy, William J., Jr.
Yeatts, Harold
Yoneda, Minoro M.

The following-named lieutenants (junior grade) of the U.S. Navy for temporary promotion to the grade of lieutenant in the line and staff corps, as indicated, pursuant to title 10, United States Code, sections 5769 (line officers), 5773 (staff corps officers), and 5791, subject to qualifications therefor as provided by law:

LINE

Samsel, Donald G.

SUPPLY CORPS

Messman, John R.
Buchner, Marc E.

The following-named women lieutenants (junior grade) of the U.S. Navy for permanent promotion to the grade of lieutenant in the line, pursuant to title 10, United States Code, sections 5771 and 5791, subject to qualifications therefor as provided by law:

Sanderson, Vicky R.
Thomas, Violette H.

The following-named officer of the line of the U.S. Navy, for appointment in the Civil Engineer Corps, as permanent ensign, pursuant to title 10, United States Code, sections 5582(b) and 5572, subject to qualifications therefor as provided by law:

Henderson, Robert W.

## CONFIRMATIONS

Executive nominations confirmed by the Senate September 16, 1981:

BOARD FOR INTERNATIONAL BROADCASTING

Ben J. Wattenberg, of the District of Columbia, to be a Member of the Board for International Broadcasting for a term expiring April 28, 1983, vice John A. Gronouski, term expired.

DEPARTMENT OF STATE

William Courtney Sherman, of Virginia, a Foreign Service officer of class one, to be the Deputy Representative of the United States of America in the Security Council of the United Nations, with the rank of Ambassador.

Dominick L. DiCarlo, of New York, to be Assistant Secretary of State for International Narcotics Matters.

Langhorne A. Motley, of Alaska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

D. Brook Bartlett, of Missouri, to be U.S. district judge for the western district of Missouri, vice John W. Oliver, retired.

John R. Gibson, of Missouri, to be U.S. district judge for the western district of Missouri, vice Elmo B. Hunter, retired.

Joseph E. Stevens, Jr., of Missouri, to be U.S. district judge for the eastern and western districts of Missouri, vice William R. Collinson, retired.

U.S. INTERNATIONAL TRADE COMMISSION

Alfred E. Eckes, Jr., of Virginia, to be a Member of the U.S. International Trade Commission for the term expiring June 16, 1990, vice Italo H. Ablondi.

THE JUDICIARY

Robert F. Chapman, of South Carolina, to be a U.S. circuit judge for the fourth circuit, vice Clement F. Haynsworth, Jr., retired.

DEPARTMENT OF JUSTICE

Frank W. Donaldson, of Alabama, to be U.S. Attorney for the northern district of Alabama for the term of 4 years vice Jesse Roscoe Brooks, resigned.

J. Frederick Motz, of Maryland, to be U.S. attorney for the district of Maryland for the term of 4 years vice Russell T. Baker, Jr., resigned.

W. Stephen Thayer III, of New Hampshire, to be U.S. attorney for the district of New Hampshire for the term of 4 years vice William H. Shalheen, resigned.

# EXTENSIONS OF REMARKS

## ADDRESS BY NAVY SECRETARY JOHN LEHMAN

HON. CHARLES F. DOUGHERTY
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. DOUGHERTY. Mr. Speaker, on Tuesday, August 4, 1981, the Honorable John Lehman, Secretary of the Navy, addressed those present in Seattle, Wash., for the keel laying of the LSD-41. That event, most significant in the history of America's amphibious defense efforts, was a turning point and a renewal of our commitment to our Nation's security. I would like to share Secretary Lehman's words on that occasion with all Americans.

ADDRESS BY HON. JOHN LEHMAN, SECRETARY OF THE NAVY

General Barrow, Mr. Smith, Distinguished Guests, Ladies and Gentlemen, it is certainly my pleasure to be with you here in the Great Northwest.

Since assuming my duties as Secretary of the Navy—and Secretary of the Marine Corps—few events have been more pleasurable than to preside today at the keel laying of the LSD-41, the lead ship of a new amphibious class. Beginning a new class is always an important milestone in the history of the Navy, but the LSD-41 represents much more:

It is the first amphibious ship to be started since the keel was laid for the LHA-5, almost five years ago.

It is the first amphibious ship to be funded in ten years.

It is designed to carry the air cushion landing craft, or LCAC, which adds a revolutionary dimension to amphibious warfare. As such, it represents a commitment to a new technology.

The keel laying of the LSD-41 also signifies the reversal of one of the most senseless conditions in the Navy today. The fact is that the U.S. Marines—that splendidly-trained, superbly-disciplined team, and the most ready fighting force found in the world today—are fully prepared to go wherever necessary in the world . . . yet are unable fully to utilize that splendid readiness because we lack sufficient sealift to get them there.

Let me state my position unequivocally: the amphibious forces will be at the very forefront of the Navy in the decade ahead. The strategic requirements of the decade cry out for amphibious capability—forces with the flexibility and combat power embodied in the Marine Air Ground Task Forces—forces capable of safeguarding our vital interests by deterrence, but if deterrence fails, by performing on the battlefield as Marines have always performed. In this regard, the Department of the Navy, in the first months of the Reagan Administration established, in a dramatic break from Carter policies a firm policy to develop sufficient amphibious lift to transport simultaneously the assault echelon of a Marine Amphibious Force and a Marine Amphibious Brigade. Thus we shall have the capability to undertake major amphibious operations to secure our maritime security simultaneously in two separate areas of the world.

Finally, and most importantly, this new class represents a large step in the revitalization of our key national asset, the U.S. Navy, and a quantum improvement in our ability to safeguard U.S. interests overseas, through the ability to project power from sea to shore when needed.

This ship class has been a long, hard time coming. Many of you here today are veterans of the Washington skirmishing necessary to bring this ship into being. Your vision and your persistence have triumphed. I congratulate you on that persistence. And I do not speak of triumph in a narrow, bureaucratic sense. I speak of triumph in a national sense, as our country strives to regain its sense of purpose and confidence and builds to restore the unquestioned maritime superiority so vital to our existence.

Clearly, an immense change has taken place in the United States in the past year. We have come to realize that, as leaders of the free world, we have been possessed of a dangerous uncertainty for some time over the utility of committing military force for national purpose. We had forgotten the lessons of two terrible world wars; That strength, not weakness, halts aggressors; that strength is the only real deterrent, weakness an open invitation. Today it is obvious that America has now recalled these important lessons. We are revitalizing. We are renewing our traditional American character. And we are again becoming strong and filled with resolve.

The clear mandate of the last presidential election was a call for renewed national strength, prestige and self-confidence. This resurgence of demand for national strength—and a Commander in Chief and Congress dedicated to carrying out the will of the people—will inevitably ask the U.S. Marine Corps to shoulder a major burden in any commitment of military force for national purpose, as has always been the case in the past. A Marine Corps of Americans who represent the best in soldierly virtue. A Corps which has held high the concepts of duty and honor, and the qualities of strength and self-confidence, even in the lean years of the recent past. A Corps which, in the face of social and other pressures, changed what needed to be changed, but staunchly maintained a tradition of disciplined excellence and a world-recognized expertise in amphibious warfare—a form of warfare which may be more important to our Nation's future in the years ahead than it has been anytime in our history, with the possible exception of the Pacific Campaign in the Second World War.

It is not enough, however, to build ships and recruit men. We must begin with the formulation of the strategy itself. It is a difficult matter, in that we have long focused largely on the technical aspects of our naval problems. Too often, naval strategy was merely a function of the momentum of force structure and modernization. The strongest arguments for new ships were that old ships were old and due to retire. The misuse of systems analysis and computerized war games within the Defense Department had forced a mechanistic fixation on programs, and a knee jerk response to military force problems. That fixation brought forth a generation of military leaders conditioned to think mechanistically, to manage "programs" but disdain military intuition and judgment. On the national level, strategy often focused on areas of immediate concern, despite an increasing array of geopolitical shifts, which should have been accommodated by adjustments in the planned use of naval forces. It is not necessary to match Soviet force levels on a man-for-man or ship-for-ship basis. Instead, what was and is needed, is a maritime strategy which concentrates superior power at the point of confrontation, and does so with precisely "tailored" forces.

An important prerequisite in formulating a maritime strategy, is to pay more attention to those military leaders who possess the foresight to recognize the requirements ahead, and the seasoned judgment to grasp its strategic implications. Such leaders clearly foresaw the requirements of amphibious warfare in the decade preceding the Second World War. Fully a decade before that war, Admiral Chester Nimitz and General Holland Smith conceived and practiced the strategy of crossing the Central Pacific. There were Marine and Navy officers who ignored the experts' suggestions in the late 1940's that amphibious warfare was anachronistic. Those men knew there would be an "Inchon" in the 1950s. Others, on sighting the helicopter in the fifties, knew it would add a revolutionary dimension to amphibious warfare in the sixties and they were correct. These were great and daring thinkers, not unlike those who today recognize the value of VSTOL, the LCAC, the LAV, and the LSD-41 class,—and have the military judgment to grasp the strategic implications of the 1980s and beyond.

Our task in the decade ahead is clearly to deter Soviet aggression, a formidable goal in the wake of unprecedented Soviet military expansion. Our response cannot be in numbers alone. It must be in the ability to concentrate warfighting capability at the point—or points—of confrontation. The large number of Soviet options is such that landbased defenses overseas will never be sufficient for our needs, given even the most optimistic budgetary and procurement environments, and assuming that the necessary basing arrangements were politically achievable. Nor is it prudent to assume that a Soviet military confrontation, if it comes, will occur where we are best able to counter it. If history teaches us anything, the reverse will probably be the case. The Soviets must be made to understand—and be shown—that we intend to confront them militarily wherever our interests require. If we succeed in doing that, we may never have to use our capability. It is the deterrent value of strong naval forces which we seek, not confrontation.

What I propose strategically is not new. Mahan called armed naval capability seaforce. He postulated that a maritime nation should aim at acquiring a superiority in seaforce that enables it to project its seapower to the most distant quarters of the earth. It

is from that imperative that Mahan derived the concept of "Command of the Seas" so relevant today.

The perceived capability to concentrate the Nation's naval resources and to project power ashore stabilizes the global environment, according to Mahan, into a condition favorable to that nation possessing command of the seas. Recently, for the first time ever, Soviet naval expansion has threatened to overtake our sea superiority. Obviously, Admiral Gorshkov has carefully read the lessons of Mahan.

Critical to the Soviets perception, is the naval capability to provide presence. This unique naval mission is particularly relevant to a strategy which seeks to influence and deter. Naval presence does not require regional basing, a political irritant in many parts of the world. Naval presence is also a sine qua non in the perception of our allies and the Third World, and has much to do with the way in which they regard Superpower balance.

The world of the eighties is not only a world becoming more interdependent. It is also a world of increased turbulence. Our strategy must include the protection of sources of raw materials and their conveyance to us and our allies, including the protection of our source of vital fossil products and strategic materials.

The Middle East and Southwest Asia will probably dominate the world's stage in the 1980s, as did Europe in the 1940s, Northeast Asia in the 1950s, and Southeast Asia in the 1960s. If we have learned from history, the correct question today should be how best to protect our vital interests in the region, without placing half a million or more ground troops in the area for an indeterminate period of time.

The kind of ground force presence which we have in Europe and Korea will not work in Southwest Asia—or in the Caribbean or Africa for that matter. The U.S. simply does not have sizeable forces in place, nor supplies prepositioned. Neither does it possess the host-nation support agreements, nor the binding alliances that we have in Europe and elsewhere.

These combined problems of access and distance compel the U.S. to rely principally on seapower, supplemented by amphibious assault. Its "over the horizon" presence would not be a political liability, nor provide a raison d'etre for increasing instability. Amphibious forces can move ashore without the degree of permanence—and thus risk—associated with other ground forces.

The comparative attractiveness of sea-based forces for the kinds of tasks required by the situation in Southwest Asia, and elsewhere, has long been recognized. The distinguished British strategist B. H. Liddell Hart, observed in 1960:

"An amphibious force of modern type, operating from the sea and equipped with helicopters, is free from dependence on airfields, beaches, ports, and land bases with all their logistical and political complications: The use of . . . any land-based force is a more irrevocable step, since its commitment is more definite and its withdrawal more difficult. A self-contained and sea-based amphibious force, of which the U.S. Marine Corps is the prototype, is the best kind of fire extinguisher, because of its flexibility, reliability, logistic simplicity and relative economy."

Naval presence in Southwest Asia will clearly transmit the desired message, militarily as well as diplomatically. The multi-faceted projection capabilities which a balanced naval force of air, surface, subsurface, and amphibious elements brings to any situation may find application in the entire range from diplomatic signalling and crisis containment, to on-scene military action.

In the event of a Soviet attack on our vital interests in Southwest Asia, defeat of Soviet naval forces at sea will be absolutely crucial. Lacking secure sea lines of communication, no other military effort—afloat or ashore—can be sustained. The sea is the Soviets' greatest vulnerability—a place where geography greatly disfavors them. As a consequence, it is here that our superiority must be strongly maintained, enhanced, and exploited. Naval forces will also make a major contribution to the U.S. Air Force's responsibility for air superiority ashore, which must certainly be attained before there can be a successful employment of ground forces in Southwest Asia. The geostrategic realities are such that naval air and surface forces would probably have to provide both security of the seas and the air, working together as never before. Amphibious forces would then be the likely spearhead to secure a lodgement area, followed by the introduction of other forces, as necessary.

Geographic reality, the growing threat, and our balanced Navy-Marine Corps capability combine together, then, to mandate a strong and effective maritime strategy as the key U.S. national security requirement of the next decade. The effectiveness of such a strategy is unmatched, in that the capability is exercised only at the point of confrontation, whether it be in Southwest Asia, the Caribbean, Africa, or elsewhere. The unexceeded flexibility and mobility of naval forces enable them rapidly to provide a powerful instrument of U.S. foreign policy in the most distant quarters of the earth.

Continued equipment modernization will be critical in developing this vital instrument to its maximum utility. Several promising programs, all designed to provide substantially increased tactical mobility for the Marines, are uniquely associated with the LSD-41. A new medium helicopter will eventually replace the over-aged tactical assault transport helicopters. Increased numbers of heavy lift helicopters will satisfy the need for more battlefield and ship-to-shore lift. Four of the new landing craft air cushion vehicles will be carried in the well deck of each LSD-41.

These revolutionary craft will enable rapid ship-to-shore operations from stand-off positions, and expose about three quarters of the world's littorals to amphibious operations.

I have referred to the partnership of the Navy and Marines in meeting the amphibious challenges through the years. That partnership always includes, and must rely heavily upon, the experience and know-how of American industry. It is only through the dedicated efforts of the designers, managers, and workers at this shipyard and others around the country that our plans for a strategy of unquestioned maritime superiority and a thoroughly revitalized amphibious capability can be turned into reality. As the Secretary of the Navy—and, as the Secretary of the Marine Corps—I feel that I can speak for both services in extending heartfelt thanks for your cooperation and your contributions—in the past, today, and into the future.

We are all in this together—with the Navy and Marine Corps Team—as we move forward through this dangerous decade. We are now moving quickly in the right direction, but we still face a time of testing and high risk, the legacy of our past mistakes. Let the historians say in the decades to come, that we did not fail that test.

I recall that Secretary of the Navy James Forrestal, observing from aboard a ship the raising of the flag from the stormed heights of Iwo Jima, turned to General Holland Smith and said: "The raising of that flag on Suribachi means there will be a Marine Corps for the next 500 years."

I hesitate to refute a very distinguished predecessor but that statement isn't true any longer—if it ever was. The future existence of the U.S. Marine Corps simply will not be dependent on an event that took place 36 years in the past, however inspiring that scene may still be. The Corps must justify its existence and its claim to scarce Defense resources not on what it has done in the past, but what it can do now and in the future to smite our enemies and confound their threats to the peace. No one with any real understanding of the complex and challenging requirements of the decade ahead questions the utility of the Corps. Perhaps more than ever before in American history, our Nation will come to realize in the decade ahead just how vitally important the Corps is. And that says a good deal.

The survival of America could well depend on the capability resident in the Marine Air/Ground Task Forces and the Navy Team that takes them to the distant quarters of the earth where America's interests lie. The U.S. Marines know well the sacrifices which may be entailed in the commitment of military force for national purpose. And they stand ready to make those sacrifices. All the Corps asks for is sufficient sea lift to do their job; and our Marine Corps is going to get it.●

## DYNAMIC TELEVISION PROGRAMING

**HON. JAMES M. COLLINS**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. COLLINS of Texas. Mr. Speaker, for many years in serving on the Communications Committee, I have wondered why TV does not have more actual true life stories. All this TV soap usually is humorous but provides no inspiration.

Nothing is more interesting than the truth. The young people in America need to hear the exciting stories of people who have built great businesses in America.

I would like to see some of these foundations in America invest in preparing a series of 1-hour documentaries based on the lives of great industrial leaders of this country. I think the oil industry would do well to make one on John D. Rockefeller. The Ford Foundation would provide a great service to this country if they would develop a series on Henry Ford. The Firestone Co. could do well to give us one on Harvey Firestone. A series of programs on Thomas Edison would be most valuable.

In my home State I thought of so many opportunities. In our neighbor-

ing city of Fort Worth, the Amon Carter Foundation should prepare one on Amon Carter. We have a living legend in Eddie Chiles and I wish the Western Co. would film the story of his initial years.

In my city of Dallas we could prepare the most exciting as well as motivational series of shows.

The excitement of seeing how Texas Instruments was started by Eric Jonsson, Cecil Green, and Gene McDermott would make a great series. Two great insurance executives would be Ted Beasley of Republic National and John Carpenter of Southland who sparked their companies to greatness.

The story of Jodie Thompson who started the 7-11 stores from a small ice house to where it is now a retailing milestone would be a good show. There are so many great oilmen like H. L. Hunt and Ed Cox where their history should be told through their experiences.

Perhaps the Haggar Co., which sells more slacks than any company in the world, would prepare the story showing how J. M. Haggar started as a traveling salesman and eventually built this great clothing Haggar factory.

Two of our current business leaders are Norm Brinker and Ross Perot who started from scratch and became giants in industry.

Or take Mary Kay Cosmetics which is one of the success stories of all times. Or we can study Mary Crowley whose character is an inspiration.

With production costs needing to be underwritten, we need to have foundations prepare these programs for public television. Many privately owned TV stations would also run them as a public service.

We need more of the Horatio Alger message to America. And what could have more of an impact on young Americans than to have actual true stories.●

## MORE ACTION ON THE ECONOMY

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 16, 1981, into the CONGRESSIONAL RECORD:

MORE ACTION ON THE ECONOMY

Crucial decisions await the President and Congress as we return from the August recess. These decisions will be made in a political atmosphere remarkably changed from that of a month ago. Many legislators who went home pleased with the work of Mr. Reagan and Congress have come back in a panic on account of high interest rates. Some are even suggesting remedies as drastic as credit controls to bring interest rates down. Members of Congress have been listening to their constituents, many of whom are deeply worried about the economy and doubtful that the President's economic program will provide relief soon. Mr. Reagan remains a popular Chief Executive, but the developments of the past few weeks present him with a formidable challenge.

Before the recess, the President was riding the crest of a major legislative victory. He had persuaded Congress to pass a radically reduced budget and a massive tax cut. These initiatives were the fundamental elements of Mr. Reagan's economic program, which promised faster economic growth and lower inflation. His hopes were that economic problems had been tentatively solved—at least in the short term—and that he could turn his and Congress' attention to other issues.

But things have not worked out as the President expected. The economy, rather than spurting ahead, has shown some troubling signs. Interest rates have soared to record levels, and they seem to be holding there. On Wall Street, the Dow Jones average has dropped more than 100 points to a 15-month low. The Consumer Price Index rose strongly during July. Huge and inflationary budget deficits are looming just ahead. Older persons are very nervous about proposed cuts in social security. To compound the problems, there are rumblings of discord within the President's administration. One indication of discord among his top advisors is the unusual number of contradictory statements from them on the place of military spending in the budget.

The bad economic news will force Mr. Reagan and Congress to tackle economic issues again. Indeed, it is now clear that economic issues will dominate the congressional agenda for several months, just as they did before the August recess. Yet other matters put off during action on the budget and tax bills are crowding in upon us. Among them are extensions of the voting rights and clean air legislation, the sale of radar-equipped aircraft to Saudi Arabia, major "surgery" on social security, decisions on the basing of the MX missile and the production of a new strategic bomber, the nomination of Mrs. O'Connor to the Supreme Court, and social items such as crime, abortion, and prayer in school. These matters cannot be postponed indefinitely.

In order to keep his pledge to slash taxes, rearm America, and balance the budget, the President apparently decided during August to recommend a new round of budget cuts even before the $36 billion in cuts already passed take effect. Out of a spending total of about $700 billion in 1982, $225 billion will go for defense, $250 billion for social security and other retirement, $100 billion for interest on the national debt, and $25 billion for veterans' programs. Only $100 billion will be left for all other government functions. Large reductions in defense and social security may be forced upon Congress. The scope and details of possible reductions in defense are not known, but figures of $30 billion to $50 billion for the multi-year plan have been discussed. While such reductions would be significant, the size of the tax cut makes me doubt that they would be sufficient to prevent a deficit greater than the $42.5 billion which Mr. Reagan is projecting. Most estimates now put the deficit at least $20 billion higher. Likewise, the chance for a balanced budget by 1984 is thought to be slipping away.

Complicating the upcoming work of Congress is the doubt about the President's economic program. An underlying tension in the program—it stimulates the economy with an expansionary budget while restraining it with tight money—has led many observers to believe it will not work. Its principal objectives—economic growth, high employment, and low interest rates and inflation—now seem to be out of reach.

As Congress sets to work on the economy, there will be the usual wrangle to keep money flowing after the government's appropriated funds run out September 30. The deadlines for the second budget resolution and the appropriations bills will be missed, so it is likely that the government will be financed again by continuing resolution, a stopgap, emergency measure. The resolution itself will produce some of the fiercest legislative battles of the remaining months of the session. The President is expected to use the resolution to do more budget cutting, and there may be a "yes-or-no" vote on a single large package of cuts, rather than a series of votes during which members would be subject to strong pressures from their constituents.

So, as the President and the Congress begin business again, we find ourselves in an uncomfortable situation largely of our own making. The tax cut was exceedingly large—probably too large. The country may be deprived of revenue to support important military and domestic programs. One solution is a tax increase, but a tax increase is unlikely under present circumstances. Another solution is a leaner budget in which all items—including defense and entitlements—are scaled back to keep them in line with revenue. The Congress must now act vigorously to prevent larger deficits by making further reductions.●

## BETHLEHEM STEEL LOOKS TO FUTURE

### HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. RITTER. Mr. Speaker, while media profess gloom and doom about the effect of President Reagan's program on American industry and the economy, I would like to share an editorial that appeared in one of my local newspapers, The Easton Express, August 19, 1981, regarding Bethlehem Steel, whose home office is located in the city of Bethlehem, Pa., in my congressional district.

In the words of a top official at Bethlehem Steel Corp., "I am thoroughly convinced that the Reagan administration is on the right track * * *." As the editorial points out, Bethlehem Steel Corp. has made a solid commitment to revitalize that industry.

Mr. Speaker, we all hope to see other industries follow the example of Bethlehem Steel and make their commitment to get America moving again.

The editorial follows:

[From the Easton Express, Aug. 19, 1981]

BETHLEHEM STEEL LOOKS TO FUTURE

Bethlehem Steel Corp. took full page advertisements this week, not only in The Ex-

press and area newspapers, but in the nation's major publications like the New York Times to tell the United States it was planning to make a solid commitment to improve steel production.

The announcement contrasts with those of many other major industries lately which have been using their profits, not to modernize their own plants, but to diversify into other industries.

Bethlehem Steel's board is showing that it is listening to President Reagan's economic philosophies, that it is going to prove that revitalization of the industry will not only return the United States steel making to the foreground, but will aid in the nation's economy recovery.

In fact, the key message of the advertisement is "Mr. President, we're in steel to stay. And to prosper."

It is those kinds of words that could boost receptivity of President Reagan's programs, the ones that he spoke about in pre-election days and the ones that he has been discussing in national television talks. The president has promised that if taxes for business are cut and the national expenditures reduced, then industry will have more money to put into modernization. The results that should come, Steel says, will be more jobs, more production, more demand for steel. And the by-product will be to end the spiraling inflation and to make the United States economically sound again.

This prime Lehigh Valley industry points out that its projects, when completed, will bring about increased efficiency, substantial energy savings, better product quality, improved customer service and job security.

It is heartening to see any industry make this kind of commitment today, but as Bethlehem Steel said, it only demonstrates its confidence in the future.

For too many years, United States industry has been developing its own negative image. Workers have felt that they were easily discarded resources as one industry after another closed outdated plants to relocate in modern ones in cheaper labor markets.

The example set by Bethlehem Steel should be followed by other industries. The re-investment of profits by many industries in their own plants—instead of being used to try to take over other lucrative industries to fatten profits only—will demonstrate to the American people that industry is no longer the ogre of the economy.

It could go a long way to rebuilding the faith Americans have in its industrialized society, dispelling the almost universal belief that industrial and business leaders thought only of the buck and not the society as a whole.●

## ROBERT STEPHENS HONORED

### HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today to honor an outstanding public servant, Mr. Robert Stephens, who is retiring as the city manager of Campbell, Calif., after serving the city for over 17 years.

The city of Campbell will be honoring Bob with a testimonial dinner on September 11, 1981, to thank him for his valuable contributions to the city.

When Bob came to Campbell in 1964, the city was in poor financial condition. There was only $1,500 in the general fund and no one to manage the city's $200,000 in annual expenditures. Bob quickly assessed the situation and did what was necessary to get the city back on its feet.

Over the last 17 years, the city of Campbell has grown and prospered under Bob's guidance. The city has gained a national reputation as being a stable and fun community that is willing to try something new. For example, the babysitting program that was started by the firefighters and supported by Bob has received national attention and has been copied by many cities around the country. And this year the city's fire department has become the first in northern California to join the We-TIP program to try to control the problem of arson, a program Bob was behind all the way.

Bob's tenure in Campbell has also seen a growth of community spirit. In 1967, a major bond issue was passed by the city's voters and later a program entitled "Congress for Community Progress" was established to involve local residents in identifying community needs and goals for the future. Bob helped bring about this kind of spirit.

Bob received his bachelor of science and master's degree from the University of Washington. In addition, he has taken many courses in continuing education programs on city management and has received his secondary teaching credentials.

Bob has participated in many conferences and seminars on labor relations and enjoys a reputation as an able labor negotiator. He is currently a member of the International City Management Association, the League of Cities, the Kiwanis, and the Elks Club. Much of his community involvement centers around his love for sports and recreation. Bob has always worked closely with the city's recreation programs.

Mr. Speaker, I ask you and all my colleagues in the House to join with me in thanking Bob for his 17 years of service to the city of Campbell and to encourage his continued involvement in our community.●

## GEN. DRAZA MIHAILOVICH

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. DERWINSKI. Mr. Speaker, this year marked the 35th anniversary of the death of Gen. Draza Mihailovich, the savior of American airmen during World War II. Dr. George M. Radojevich recently authored a tribute to this outstanding Serbian resistance leader, which appeared in the July 31 edition of "The Diocesan Observer," a leading Serbian newspaper published in Libertyville, Ill.

During World War II, over 500 Americans who were shot down over Yugoslavia were rescued by the forces of Gen. Draza Mihailovich. Most of the American airmen were evacuated to safety by a series of dramatic air rescue missions, which picked them up in the heart of Axis-occupied Yugoslavia and flew them to Italy.

The American airmen involved have organized into a National Committee of American Airmen Rescued by General Mihailovich, and are continuing their efforts to build a memorial in Washington, D.C., to honor him. As sponsor of a bill to authorize this monument, I believe that the time has come for the great role which General Mihailovich and his Chetniks played in the cause of freedom during World War II, to be properly recorded in history. Therefore, I urge my colleagues to join with me in supporting this legislation. I wish to insert Dr. Radojevich's comments at this point to provide information on General Mihailovich's heroic actions:

THE SERBIAN PEOPLE AND GENERAL MIHAILOVICH

(By Dr. George M. Radojevich)

Serbia and her people have a long and glorious history. From the time of their arrival in the Balkans in the sixth century, the Serbs were constantly improving the regions in which they lived and they often had to fight to protect them from foreign enemies. The great contributions of the Serbian people to western civilization and the culture of enlightened society are well known everywhere and are accorded generous treatment in all encyclopedias of the cultured world.

The heroic struggle of the Serbian people for liberation from Turkish captivity and from other occupiers, lasting for five centuries, is also well known to the world.

Also generally recognized is the contribution of the Serbian people in the Balkan War of 1912, when all the Balkan nations became free after five centuries of Turkish captivity.

Indeed, the heroic struggle of the Serbian people on the side of the Allies in World War I won the admiration of the entire world. Even the Germans, their Emperor, and General Staff, were forced to publicly admit that they were amazed by the heroism of the Serbian people and soldiers.

The Serbian King Peter I and Crown Prince Alexander, together with the government of Nikola, Pasic, insisted pertinaciously to the Allies that a Second Front be formed in Greece. This proposal finally resulted in the creation of the famed Salonica Front. On this front, the defenses of the Central Powers were smashed for the first time, the troops of Austria-Hungary and Bulgaria capitulated, and from that front the entire Balkan peninsula was liberated. While the Serbian, French and English forces fought shoulder to shoulder in the Salonica campaign, the Serbian units bore more than their share of the battle and suf-

fered the heaviest losses. This fact was publicly recognized by all the Allies as well as by the Central Powers.

Almost immediately after the Allied victory on the Salonica front, the German and Austro-Hungarian Empires also collapsed on the Western front, and all the peoples of the Intermarium gained their liberty, with the exception of Byelorussia and the Ukraine.

With British and French sponsorship, the Serbs entered into a larger South Slav state—Yugoslavia—which also embraced the Croat and Slovene peoples, who had just been liberated from Hapsburg rule.

In the Second World War, again, Serbian people amazed the world. History will almost certainly record that Yugoslavia—in reality the Serbian people—prevented Russia from being completely crushed by the Nazi offensive before the winter of 1941 and, in doing so, helped the Allies to win the war.

Prince Paul and the Yugoslav Government were forced, after offering resistance for two years, to sign an agreement with the Axis powers on March 25, 1941. Had that agreement stood, Germany would not have had reason to attack Yugoslavia, and Yugoslavia might have emerged from the war a free country.

However, the Serbian people could not tolerate the shame of being allied to their traditional enemies against their proven friends. For this reason the Serbian people, and no other nationality of Yugoslavia, deposed the pro-Axis government on March 27, 1941, and formed a new democratic, pro-Allied regime.

At this point, Hitler dared not leave behind his back a hostile and well armed Yugoslavia which, in cooperation with Allied armies in Greece, could become for Germany a danger comparable to the Salonica Front in World War I.

On April 6, 1941 Hitler attacked Yugoslavia with vastly superior forces and conquered it by pouring in troops from all sides, reinforced by massive bombardment of its cities from the air. This action postponed Hitler's planned attack against Russia from the beginning of May to June 22, 1941, which left little time to occupy Moscow before the bitter Russian winter set in. This delay played a major role in bringing about Hitler's downfall.

Immediately upon the capitulation of the Yugoslavian Army, Colonel Draza Mihailovich fled into the Serbian mountains and mobilized the remaining soldiers and the Serbian youth in the cities and villages. With Serbian guerrillas he tied up powerful German and Italian armies and disturbed Balkan communications—which, for Hitler, were his lifeline to both the Russian and North African front. In both of these battles, Hitler finally lost—and much of the credit goes to the Serbian people, for the coup of March 27, 1941 and the guerrilla movement of Draza Mihailovich.●

## REAGAN'S BUDGETARY DUNKIRK

**HON. JOHN J. LaFALCE**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. LaFALCE. Mr. Speaker, the Reagan administration is facing its most serious credibility test since the November 1980 election. Having won thorough victories in pursuit of its economic recovery program, it now faces the prospect of geometrically expanding Federal deposits and continued high interest rates. The administration is at odds with its strongest ally—Wall Street—and is in serious conflict with leaders of its own party in Congress. The fiscal policy which it so confidently sold to the public and a majority of Congress is now in disarray.

Last week, James R. Schlesinger, one of America's most serious public servants in recent history, called the crisis of confidence the equivalent of a Budgetary Dunkirk. In this same essay, Mr. Schlesinger, an individual not prone to exaggeration, commented that the recent tax legislation "seems likely to go down in history as the single most irresponsible fiscal action of modern times." For a man who served Republican Presidents as Acting Budget Director, Director of the Central Intelligence Agency, and Secretary of Defense, and a Democratic President as Secretary of Energy, these are not simple partisan slogans. They are a stinging indictment of the chaos now facing the Nation in the wake of an ill-conceived economic policy.

Less than a year ago, the American people were told by a confident campaigner that we could balance the budget by 1984, undertake a massive defense buildup, and cut taxes in a manner unprecedented to modern tax policy. All of this was to be accomplished by cutting out only the waste and fat in the Federal budget and adopting the theories of supply-side economics.

Today, in light of those promises and subsequent actions, there should be nothing surprising about the crisis of confidence. The administration has sought and attained budget cuts going well beyond what was suggested to the American people. Similarly, a tax bill of monumental proportions has been enacted. And yet, we find ourselves observing an administration which is fraught with serious internal divisions as it grapples with a potential budget deficit of $120 billion in 1984.

Is it any wonder, having made these promises and facing the bleak results of its supply-side economic policies, that a conservative public servant of James R. Schlesinger's stature deems this period a Budgetary Dunkirk for the Reagan administration?

The essay by Mr. Schlesinger follows:

[From the Washington Post, Sept. 9, 1981]

(James R. Schlesinger)

REAGAN'S BUDGETARY DUNKIRK

The last rites have now been pronounced over the great rearmament boomlet of 1981. Its demise has been expected by the diagnosticians for some time. Like Halley's comet, it visited us and then departed quickly, trailing only a long (though quite insubstantial) tail deserving further observation.

For the past six months the defense debate has focused on the wrong issue: could the "immense" funds ostensibly being made available to the Department of Defense be usefully spent in significantly enhancing the security of our international position. With the Soviet Union outspending the United States by some 50 percent on defense generally and by a disturbing 85 percent in the critical area of military investment (procurement), with conventional capabilities in Europe porous and relatively weak and theater nuclear forces now overshadowed by those of the Soviet Union, with deterrence flimsy (at best) in the region of the Persian Gulf despite the West's enhanced interests and responsibilities, with the naval balance deteriorating in the Far East, and with trouble even in the Caribbean (and an evanescent threat "to go to the source")—not to mention concern about the strategic balance, Minuteman vulnerability and aging B52s—that should have been an issue in principle easy to resolve. Yet, all along the real question should have been—given the administration's fiscal proposals—how to maintain adequate deterrence with growing responsibilities in the Indian Ocean and with resources dramatically less than those invested by the Soviet Union.

Seven months have been wasted on an irrelevant debate. We shall now have to make do with a smaller growth in defense resources than that projected by the Carter administration—previously denounced as hopelessly inadequate. So much for "making America strong again," "closing the window of vulnerability" and the vaunted "superiority" so casually endorsed in the Republican platform.

The unavoidable outcome, given its fiscal goals, seems genuinely to have surprised the Reagan administration. Disregarding the normal laws of arithmetic, and bemused by its own distortions of supply-side economics, (alternatively known as "voodoo economics," snake oil or the Tooth Fairy), it lulled its pro-defense supporters (and itself) with farfetched projections supposedly demonstrating that the proposed rearmament effort could be achieved in the face of a massive shrinkage of the tax base.

According to the initial mythology, dramatically lower interest rates and cutting the "balance of government" almost in half (everything beyond interest payments, defense and the "social safety net") would permit the achievement of a balanced budget by 1984. But interest rates have risen rather than fallen, and only so much blood can be squeezed from the "balance of government" turnip, so the cuts unavoidably must now come from the fenced "social safety net" or from defense. More significantly, the recent tax legislation—which seems likely to go down in history as the single most irresponsible fiscal action of modern times—reduced the tax base to 19 percent of the GNP by 1984 (with expenditures running some 22 percent of the GNP), a revenue reduction of $150 billion or roughly 17 percent. As an offset, some $35 billion in non-defense expenditure reductions have now been achieved—less than one-third of those projected for 1984, less than one-fourth of the revenue loss.

The budget director, occupationally debarred from an abiding faith in the Tooth Fairy, has now read the grim arithmetic—the equivalent of a Budgetary Dunkirk. The

fiscal consequences may be briefly, if sadly, stated. Unless the tax reductions are reversed—which seems unlikely—on the basis of present legislation and projected defense spending, the nation faces growing budget deficits of $65 billion in 1982, $90 billion in 1983 and $120 billion in 1984. Non-defense reductions will be increasingly hard to achieve. Thus, only the total jettisoning of the administration's goal of a balanced budget will permit even a modified defense buildup to survive.

Nor should one believe that with the half-announced cuts for defense of $20-$30 billion we have reached the end of likely defense reductions. The best current estimate for fiscal year 1982 outlays is $715-$720 billion ($20-25 billion over ceiling). The ceiling for fiscal year 1983 in the revised Reagan budget is $732 billion—a total in crease over 1982 of $12-$17 billion. Limiting spending to this ostensible ceiling, given probable inflation rates, would imply a reduction of real federal expenditures by 6-7 percent. Not very likely. Far more probably 1983 expenditures will run roughly to $775 billion—a sum $45 billion over the presumptive ceiling. Substantially to reduce the outyear deficits, given the growing difficulty in achieving non-defense cuts, would probably require that some three out of four dollars in reductions come from defense.

One can always spend less—by doing less. Gone now are the fancies of nine additional tactical air wings, of three additional Army divisions. Gone, too, in all probability, is the 600-ship Navy—unless, like Jefferson, we provide mostly frigates or gunboats. Embarking on major new systems like MX or B1 or new acquisitions like carrier task forces will ultimately lead to an ill-balanced force by leaving insufficient funds for operation, readiness and sustainability.

The planned buildup for NATO will have to be reduced—especially so in light of Indian Ocean requirements. What an ideal moment, given the anti-nuclear tide running in Europe, to increase the degree of dependence on nuclear weapons and diminish conventional capabilities.

The international ramifications are disquieting—to say the least. The already apprehensive Europeans will conclude that, while the United States is prepared to disturb the international scene by threatening to launch an arms race, it is now seen to be unwilling to provide the resources either to run the race or to provide additional military muscle. The Soviets will not be loath to exploit those European apprehensions. Moreover, the Soviets will conclude that, despite American bluster, they have little to fear in terms of additional forces to narrow the growing disparity in military capabilities. As for the Japanese (and others), this notable example implies that we might as well abandon the effort to persuade them significantly to increase defense spending.

In creating and maintaining forces, wishful thinking is no substitute for an adequate tax base. In this ill-fated venture the cycle from bold words to budget cuts has been the shortest on record—a kind of instantaneous New Look. The historic failure lies in so casually dissipating the carefully forged national consensus supporting higher defense spending—while leaving in the public mind the illusion that a sizable new defense effort has actually been launched.●

## COMMEMORATION OF MRS. EDNA M. CURTIN

### HON. JAMES K. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. JAMES K. COYNE. Mr. Speaker, it is my privilege today to rise in commemoration of an extraordinary resident of Pennsylvania's Eighth Congressional District who passed away on September 4 of this year—Mrs. Edna M. Curtin.

When she died at the remarkable age of 107, Mrs. Curtin was Bucks County's oldest resident. She also had the distinction of being the mother of a gentleman familiar to many of the Members of this body—former Congressman Willard Curtin.

Born in Staffordshire, England, in 1874, Mrs. Curtin emigrated to this country in 1900. Her family settled in Trenton, N.J., where her father managed a pottery firm.

Mrs. Curtin married her husband William in 1911. The Curtins made their home in Morrisville, Pa., while Mr. Curtin formed an electrical contracting business in nearby Trenton.

She was a charter member of the Episcopal Church of the Incarnation in Lower Makefield, and was also a member of the Order of the Eastern Star, Chapter No. 22, in Trenton.

In addition to her son, she is survived by two grandsons, Lawrence B., of Tampa, Fla., and Jeffrey H., of Morrisville; three great-grandchildren and several nieces and nephews.

Mr. Speaker, last April on the occasion of Mrs. Curtin's 107th birthday, I had the privilege of attending a celebration in her honor. Even at her advanced age, Mrs. Curtin was a woman of infectious warmth and vitality; she thoroughly charmed everyone at the party. And I am delighted to report that her son Willard has inherited much of her good humor and gregariousness.

Congressman Curtin was first elected to the 85th Congress in November of 1956 and served in this body with distinction for a decade. Mr. Curtin is a personal friend and has been of inestimable help to me. It has been a pleasure commemorating his mother.●

## HIGH-GRADE FORMING WIRE

### HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. GOODLING. Mr. Speaker, today I am introducing a bill to reclassify and eliminate the current duty on high-grade forming wire used in the production of capacitor paper. Capacitor paper is a principal insulating component which keeps stored electrical charges contained and is used in the manufacture of electrical capacitors which are vital to the florescent light industry, the electronics industry, the electric motor industry, and a variety of other important industries. Capacitor paper manufacturers use a specific high-grade forming wire on highly specialized papermaking machines in the production of capacitor paper, to be distinguished from forming wire used in the production of less specialized types of paper. All forming wire used in the production of capacitor paper is imported from France and West Germany.

This bill would create a separate category for forming wire used in making capacitor paper and eliminate the tariff currently levied upon it. The United States presently imposes a 21.3 percent tariff on forming wire from MFN—most favored nation—column 1 of the Tariff Schedules of the United States—countries. As a result of the Tokyo round of MFN negotiations, 642.30, the category in which these wires are now placed, will be reduced from its 1980 level of 23.1 percent duty to 10 percent in 1987. Because forming wire specifically for use in the manufacture of capacitor paper is not manufactured domestically, it should be classified in its own category with no applicable duty.

Removal of this tariff will further the goals of the Trade Act of 1974 by fostering economic growth in the United States and reducing barriers to trade—19 U.S.C. §2102 (1976). In addition, removal of the tariff on forming wire should reduce the total production costs for capacitor paper. For example, one domestic producer of capacitor paper paid almost $100,000 in duties on forming wire in 1980.

The assignment of a new category and removal of this tariff will not harm domestic industry because, as noted earlier, no U.S. company manufactures the high-grade forming wire used to manufacture capacitor paper. Because there is no domestic producer to protect, there is no justification for imposing any tariff on imports of such wire.●

## JOB OPPORTUNITIES

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. COLLINS of Texas. Mr. Speaker, my wife reads the newspapers closely. She frequently is quoting William Raspberry of the Washington Post. This morning she gave me Raspberry's column which was headed up "Too Great Expectations."

It is a pragmatic, positive approach about the transition of the minorities

into entry jobs that provide a great future. Raspberry hit it right on the head when he emphasized the point that too many young people want to start too high up the ladder. I remember so well that the best training I ever received was when I was going to Northwestern University at night and working all day for 50 cents an hour at Carson, Pirie, Scott Department Store.

My wife is always quoting Raspberry and I think you will be interested in these high points of his commonsense.

TOO GREAT EXPECTATIONS

(By William Raspberry)

You may have seen him on the CBS Evening News the day the government released figures showing that more than half of America's jobseeking black teen-agers can't find work. He was standing there in the unemployment line, good-looking, well-dressed, explaining to reporter Ray Brady what he was looking for.

"You know, I want a job where—how I am now—dressed with a tie and a suit, you know. I want a job where I can go to work every day, you know, and have a nice set of clothes on, have a nice house, have a nice family, you know, and come home, you know. And I want to live like I want to live—like I should live."

I don't want to judge the young man too harshly. Maybe he is qualified, or at least eminently trainable, to work as an assistant buyer, an administrative aide or some other job that would allow him to wear a tie and a suit, you know.

All I know is that he had several seconds of precious network time to sell himself as a potential employee, and all he could think to talk about was how he wanted to live, and particularly how he wanted to dress. Not a word about specific aptitudes or experience, no hint of any willingness to learn a skill, or to work hard, or anything else that an employer would be interested in.

He was, to hear him, looking not so much for work as for a position and the benefits that he was sure would follow. And the clear impression was that he thought he had it coming.

Some who watched the news that evening may have thought the young man insufferably arrogant, or concluded that he didn't really want a job.

I saw him as merely an exaggeration of the kind of attitude I see so often in inner-city youngsters like him. Their problem isn't arrogance or laziness or lack of ambition. Their problem is that they have no sense of what work is really about.

From their viewpoint—the only viewpoint they seem capable of considering—a job is a conduit for delivering money to people who need it. They think of jobs the way the wives in the old comic strips used to think of joint checking accounts; with utter unconcern about how the money got in, so long as they were privileged to take it out.

How do these youngsters become so separated from reality? Many of them, I suspect, live in homes where unreality is the norm: homes where income means a welfare check unrelated to any regular exertion. Some may have been misled by the well-intentioned job programs whose emphasis is on the needs of the kid who applies for work and not on his ability to produce anything of value to an employer.

The disjunction between being handed a paycheck and producing something of value becomes more pronounced all the time, particularly in cities like Washington, where work often doesn't look like work.

Congressmen seem to spend their time making speeches; television reporters go around wearing nice clothes, asking absurd questions and laughing it up on the 6 o'clock news; lawyers and consultants and executives disappear into office buildings in the morning and leave in the afternoon, with a generous break for an expensive lunch in between. None of it seems, to the youthful observer, to have anything to do with providing a service or producing a product.

But too many youngsters conclude that a high-school diploma—and certainly a college degree, in any field whatever—is a certified ticket to a decent income. If the money isn't forthcoming, then there's something wrong with the system.

But thousands of others could find work if their expectations were a bit closer to reality and if they learned something of what work really is. Those of us who see clearly the private tragedies behind the public statistics will have to teach them.●

## NATIONAL SYMPHONY AND MAESTRO MSTISLAV ROSROPOVICH; A REMINDER ON OPENING NIGHT OF A NATIONAL TREASURE

### HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. PORTER. Mr. Speaker, in the 18 months that I have been privileged to serve in the Congress, not once have I felt I had the time to enjoy the cultural advantages that abound at the Kennedy Center.

Last night, my feeling had not changed—I still do not have the time—but I and my wife, Kathryn, went anyway to the opening performance of the beginning of the second half century of the National Symphony.

It was a delightful evening in every way with the program including symphonies by Haydn and Stravinsky and then, for the finale, the magnificent third Organ Symphony of Saint Saëns, one of my favorites, to which the audience responded with a prolonged standing ovation.

Perhaps the most stirring moment, however, occurred at the beginning of the evening when the music director, Russian-born Maestro Mstislav Rosropovich, just introduced to deafening applause, took to the podium, called the orchestra to attention and then turned to conduct us with great enthusiasm and feeling in singing the Star-Spangled Banner. It was played for the first time in my memory in a key that almost all could sing, and did. It was as moving to me as the inauguration, and I recommend an evening at the symphony to all you new Members and even to us older ones who have forgotten perhaps that a little uplift to the soul and spirit is important to our own performances.●

## SOLIDARITY DAY IS FOR ALL AMERICANS

### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. KILDEE. Mr. Speaker, on Saturday, September 19, thousands of America's labor union members and their supporters and allies will hold a Solidarity Day rally on the Mall. It is in answer to a call by the AFL-CIO to demonstrate the widespread opposition to the Reagan administration's assault on vital domestic programs, to assert demands for jobs and human rights, and to reaffirm America's historic commitment to social and economic justice. The rally is being held in alliance with organizations affiliated with the Leadership Conference on Civil Rights and the Budget Coalition to focus the Nation's attention on the public needs which are being either ignored or attacked by the Reagan administration.

I am looking forward to welcoming hundreds of my constituents to Washington, D.C., for this great rally. I will be joining them as they petition the White House and the Congress for attention to their concerns.

Solidarity Day is being characterized as a labor union rally in many cases, but it is in truth a rally for all Americans regardless of whether they belong to a labor union. The organized labor movement has been a stabilizing force in our national economy and a bulwark of our democratic society. The gains that unions have been able to achieve have brought benefits, direct and indirect, to the public as a whole. In this past century, organized labor has played a central role in the elevation of the American standard of living. The benefits which unions negotiated for workers are, in most cases, now widespread in the economy and enjoyed by millions of their fellow citizens. It is often not remembered that many benefits we now take for granted never existed on any meaningful scale until unions, and labor's supporters in legislative halls, won them for working people.

This perspective was eloquently stated by AFL-CIO Secretary-Treasurer Thomas R. Donahue in his Labor Day broadcast this year, a portion of which I would like to share with my colleagues:

FOR ALL AMERICANS

[Broadcast by AFL-CIO Secretary-Treasurer Thomas R. Donahue]

All Americans have benefitted from organized labor's uphill struggle to improve the standard of living for all workers.

It was the unswerving efforts of trade unions that won the basic eight-hour day most Americans now enjoy.

Unions fought for and won a decent minimum wage, and that is something we still

defend in spite of the fact that virtually no union member earns so little.

Unions brought an end to child labor and they fought and they continue to fight, indeed, the sweatshops that exploit the desperately poor.

America's trade unions led the fight to establish both the private pension system and social security to insure working people a decent and a dignified old age.

We fought tirelessly—against very stiff oppostion—for protections such as unemployment insurance and workers' compensation.

Because of the perseverance of unions, all American workers today enjoy greater safety and freedom from health hazards on the job.

The labor movement's concerns go far beyond the workplace and the size of the pay envelope.

American trade unionists have always been deeply concerned with human rights, human dignity and social justice.

We will continue to defend the right of all Americans to vote, to have the job of their choice, to live in the neighborhoods they choose, to educate their children to the best of their ability.

Our fight against tyranny in the workplace and in the domestic affairs of our nation translates easily into opposition to tyranny anywhere in the world.

The trade union movement has been a vehicle for the expression—in the United States and around the world—of the basic human need for solidarity. People who share common goals, have a natural interest in banding together to achieve them.

We in the labor movement plan to write another chapter in the history of that labor movement on Sept. 19 in Washington, D.C.

We are calling it Solidarity Day, and on that day, the labor movement will be joined by our allies in the civil rights movement, the women's movement, by environmentalists and consumers, by senior citizens, the religious community and many more people all united by the common bond of a dedication to human rights.

We are going to march together, to reaffirm our belief in the future of America and the promise of life, liberty and the pursuit of happiness it holds out to all. We are going to march to reaffirm, in our centennial year, the labor movement's historic commitment to social and economic justice for everyone in America.●

## HIGH INTEREST RATES

### HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. WINN. Mr. Speaker, as high interest rates continue to cause concern throughout the business and government sectors of our economy, I believe my colleagues will be interested in and intrigued by the following letter written by a constituent of mine to the editor of the Wall Street Journal. I trust this view from the heartland will prove enlightening to all who read it.

R. L. SWEET LUMBER CO.,
*Kansas City, Kans., September 1, 1981.*

Mr. ROBERT L. BARTLEY,
*Editor, the Wall Street Journal,*
*New York, N.Y.*

DEAR MR. BARTLEY: This is, as they say, a "letter to the editor" . . . which probably won't get printed—but it sure is fun to write.

It is a wondrous thing these days to sit out here . . . in the real world . . . and watch the folks fret and stew if they are located near the corner of Broad and Wall. From all I read in The Wall Street Journal (which is about the best newspaper we have) and elsewhere, there is mass confusion at Broad and Wall as to why these cotton-pickin' interest rates stay so high.

There is, in my opinion, not all that much confusion out here . . . but then we are in Kansas and no self-respecting resident of New York City probably gives much of a damn what anybody thinks in Kansas.

The reason that interest rates stay so high is that there is a liquidity squeeze in this county at the moment . . . to say nothing of the rest of the world. Or, if you prefer, you could also call it a "credit squeeze".

Every time I read about how some Wall Street Wizard is confused as to why interest rates don't go down, precipitously and immediately, I have to stifle the urge to laugh loudly. I read this kind of stuff often. Sometimes I even read it in the Journal . . . but you are usually quoting someone else.

More often I read it in some dispatch created by one of the other great dailies . . . and if any of these organizations have many really smart, understanding, knowledgeable economic writers on their respective staffs, I guess I have missed the opportunity to read much of their stuff.

The truth is, of course, that most business writers were schooled in the Roosevelt-Keynesian theories and they find it difficult to understand that the Federal Government has been robbing Peter to pay Paul since about 1933. In that length of time, best characterized by long-term profligate spending, a whole lot of people have lost track of history. . . .

When I went to college, in the proverbial Dark Ages, they taught me about a subject called "accounting". And one of the things they emphasized then was that any company would do well to have a "current ratio" of at least two-to-one. Later, I even heard that some folks would prefer something closer to three-to-one. But, somehow, a lot of folks apparently never got the word.

Look at the balance sheets of the titans of American industry. I find few with a current ratio of even two-to-one. I even found today that one of the real giants is apparently trying to operate these days with a current ratio of 1.3 to one . . . whereas only as far back as 1972 they had a current ratio of 2.1 to one. They were a whole lot better off then.

There was a signal, in 1978, that apparently a lot of people missed. It was the signal in September and October of that year that the dollar was dropping like a rock overseas . . . and finally Mr. Carter had something that he called a "save the dollar program"—which went into effect about November 1, 1978.

That was a signal that was, to us, unmistakable . . . but I guess not too many believed it—or chose to ignore it.

Then, on October 6, 1979, after Mr. Volcker flew back early from that international banker's meeting in Greece or Yugoslavia or somewhere . . . and raised the discount rate a full point that day, from 11 to 12 percent, that was another signal. That signal was clear to us . . . it meant the end of one era—and the beginning of another!

If one cares to look it up, one might look back and see what the stock market did in the weeks that followed . . . most notably on October 8, 9 and 10, 1979. That signal was clear enough, too.

Now we have a discount rate of 14 . . . with a four-point penalty for banks that the Fed thinks "borrow too much". So maybe for some banks, the discount rate is now 18 . . . and that is very damn high.

In the private sector, we have many companies, large and small, who have had to borrow too much and find it extremely difficult to pay it back. In fact, it is even difficult for them to pay the interest . . . what with having to pay anywhere from 20½ percent to Lord knows how high.

And in the public sector, we have schools without enough money, cities ditto, counties ditto, states ditto, to say nothing of the Federal Government. So it is that the Treasury has to pay well over 15 percent for money in the Treasury Bill auctions, and it may well get a whole lot higher as the liquidity squeeze gets worse, if it does, and it probably will.

Now the fact of the matter is that the U.S. economy has some pretty sick parts. Housing is sick as a cat, so are autos, so are some savings and loans . . . and, horror of horrors, so are some banks. Wall Street Wizards and Treasury Wizards do not like to talk overly much about these latter situations . . . but they seem to be there nonetheless, and may not go away too soon.

Thus, the liquidity squeeze is on. And may get worse. Look at your balance sheets, gentlemen. How close is your current ratio to the old rule of two-to-one? (Or the balance sheet of the company whose stock you love to invest in these days.) Not many of the ones I look at are anywhere close . . . including some that S&P even rates "A plus".

There are some "old canards" that some Wall Street Wizards find difficult to forget. There is the one about the "price-earnings ratio" . . . which some wizard devised back in the "Golden Days". The "price-earnings ratio" means very little indeed today . . . but I still occasionally read about how some guy says the stock market is bound to go up—simply because price-earnings ratios are now so low. Baloney.

Lately we hear some thing about a "new" canard. This new myth has to do with the fact that some of the Wizards say that the stock market is dropping because Wall Street is now "disenchanted" with the new Reagan economic programs, spending cuts and tax cuts, et al. I notice that when all the new budget cuts and tax cuts were first announced, everyone I heard of from Broad and Wall cheered . . . or so it was reported out here. Now, lo and behold, the stock market drops and the bond market drops and things look not so good and so some genius blames it on a "lack of confidence" . . . which, supposedly, has recently struck Wall Street . . . in Mr. Reagan's program.

Lord help us. Mr. Reagan's program does not even go into effect until October 1. Any reasonable man ought to give it some time after that to watch the thing and see if it does work . . . without giving up on it now, weeks before it even is on the law books. It is very difficult to correct years and years and years of funny money economics in five minutes . . . or even five months!

There is still a liquidity crisis. I repeat, look at the balance sheets.

That is the problem . . . whether some of the wizards of Wall Street believe it or not, to say nothing of the governors of the Federal Board and/or the Treasury. People are still trying to do business in the Roosevelt Era and this is the Reagan (God bless him) Era (only the problem didn't start with Reagan, he just inherited it).

There are even solutions to the problem. But they are difficult and hard to take politically . . . and besides no one east of the Hudson wants to listen to anyone west of the Hudson, so I won't bore you with them.

Right now, I have to close this letter because there is an Indian uprising across the way and we must attend to that. Furthermore, the buffalo stampede in the opposite direction has been going on for some time now and that is a worry. Besides, my sod house needs caulking and my wife is tired of doing it herself . . . and the teepee next door needs new skins to cover up a nasty crack in one of the hides over there.

So we are busy out here on the frontier.

But, if it is any consolation, I also know some people out here who are happily singing "tra-la-la all the way to the bank" every time some guru back there complains that there really is no reason whatsoever for interest rates to be this high. We wonder what that guru will do if interest rates get even higher.

Sincerely,

M. H. CLINGAN,
*President.*●

## HONORING THE 500TH SHIP MEMORIAL AT THE VALLEJO NAVAL AND HISTORIC MUSEUM, CALIFORNIA

### HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. JOHN L. BURTON: Mr. Speaker, on September 19, 1981, the Vallejo Naval and Historic Museum will celebrate the dedication of the 500th Ship Memorial in tribute to Mare Island's distinguished shipbuilding service to our fleet for more than a century.

The history of the 500th Ship Fund, set up to raise moneys that would establish a memorial, is some two decades long and it is an inspiring story that well deserves the special recognition we are giving it this week and a permanent memorial gallery.

On December 9, 1961, the nuclear submarine U.S.S. *Plunger* was launched at the Mare Island Naval Shipyard. The *Plunger* was the 500th craft built at Mare Island since the yard was founded in 1854 by David Glasgow Farragut, the Commandant of America's first naval facility in the Pacific.

Following the launching of the 500th ship, Senator Luther E. Gibson founded and spearheaded a campaign to raise funds for a memorial to Mare Island's century of distinguished shipbuilding. The funds raised by the community were placed into trust and a board was appointed to find a suitable site for the memorial. The emerging Vallejo Naval and Historic Museum proved to be the most attractive alternative and in September 1980, the museum began work on the project.

The memorial includes a gallery of artifacts from Mare Island's past, a corridor of ship models, a functional World War II periscope, a monumental sculpture of a sailing ship's prow, and four murals by artist Richard Cook of San Francisco. Some other features of the 500th Ship Memorial include a special "Staircase of Sea Power" containing a sculpture which symbolizes the sailing ships that brought the first naval personnel to the Vallejo Area. The staircase also contains a number of murals which show the progression and types of craft—sail, steam, and nuclear—that have been built at the Vallejo Yard.

In addition, The Saginaw Gallery offers both permanent and changing exhibitions of significant Mare Island artifacts from the collections of the museum and the Department of the Navy. The periscope that is displayed once served aboard a World War II submarine. It now offers a spectacular 360 degree view of the inner Golden Gate region. This scope was salvaged, restored, and installed by several volunteer Mare Island optical, design, and metal workers. The periscope is standing on a recreation of a submarine fairwater stamped with the number 595, the number of the U.S.S. *Plunger*, which was Mare Island's 500th ship.

I am very pleased to be able to call the attention of my colleagues to the 500th Ship Memorial. I commend the community and public support that helped to make this dream a reality, and most importantly, the fine craftsmenship and care of the personnel at Mare Island who have made the making of this memorial such an important goal.●

## THE CRIMINAL CODE SENTENCING ACT

### HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. CONYERS. Mr. Speaker, during the past months, I have been assessing the various proposals for reform of Federal criminal laws. After discussions with persons and groups who have experience in the criminal justice system and who have been actively involved in the past efforts to revise the Federal Criminal Code, I am convinced that a revision of the Criminal Code is desperately needed.

In particular I have concluded that a reform of current sentencing practices cannot wait. Sentencing is the cornerstone of any criminal justice system. Arcane questions involving the elements of crimes, the appropriate mental states, or the definitions of defenses are of little importance to the vast majority of defendants; over 80 percent of them in the Federal courts plead guilty. The critical question for defendants, prosecutors, and society is usually the nature of the sentence to be imposed.

In accordance with these conclusions, I am today introducing the Criminal Code Sentencing Act of 1981. This legislation would for the first time define the purposes of sentencing in Federal courts. It establishes separate sentences of conditional discharge, probation, fines, restitution, and imprisonment. Alternatives to imprisonment, in the forms of conditions of conditional discharge or probation, are explicitly set forth. A sentencing hearing is required, at which the defendant is entitled to present evidence and rebut adverse evidence. In imposing sentence, judges are required to choose the least restrictive alternative necessary to achieve the purposes of sentencing, and to state in the record the reason for choosing a particular sentence.

The bill would also establish new sentences for white collar and corporate crime. Fines could be used to deprive criminals of their ill-gotten gains because the courts could levy a fine in an amount equal to twice the gain or loss occasioned by a corporate crime. Courts could require a defendant to notify the victims of an offense regarding the criminal conviction, thus facilitating compensation to the victims. Offenders could be disqualified for specified periods of time from holding corporate office. Corporate functions could be subjected to judicial oversight in addition to any sentence imposed.

In addition, the bill provides for new, due process, procedures for the revocation of probation or parole.

Unlike recent proposals for sentencing reform this legislation does not dictate the issuance to Federal judges of guidelines concerning the imposition of particular sentences for particular crimes. Although such guidelines may eventually be advisable in order to control judicial discretion and reduce sentence disparity, the impact of a guidelines system has not yet been adequately studied. Many commentators are concerned that the result of such a system would be merely to transfer discretion from judges to prosecutors and police, thus having little effect on disparity or even aggravating it. A number of States have recently enacted various forms of guidelines systems. Studies of such systems are currently underway.

Thus, it would be foolhardy for the Federal Government to plunge into an enactment of a guidelines system at

this time, when in a few years, data will be available to permit Congress to make an informed decision regarding the value of such a system.

There is little question that the current sentencing procedures in Federal courts need reform. Studies have shown wide disparity in the sentencing decisions of Federal judges. By requiring a statement of the reasons for a sentence, this legislation will subject sentencing decisions to public scrutiny, and encourage judges to take into account the sentencing decisions of other judges, thus encouraging greater uniformity. In addition, the existing Federal law does not provide any coherent rationale for the imposition of sentences. Under current practices, judges are given no guidance as to congressional intent with regard to the purposes of sentences. By defining the purposes of sentencing, and relating the different types of sentences to the purpose to be served, the bill will provide judges with this necessary guidance. Sentencing in Federal courts is also hampered by the lack of clearly delineated procedures for the resolution of factual disputes, the absence of statutory provisions for the use of alternatives to incarceration, and inadequate fine levels. The legislation which I am proposing would remedy each of these deficiencies.

I am introducing the Criminal Code Sentencing Act at this time in the hope that interested persons and organizations will take the opportunity to study the legislation and will provide the Criminal Justice Subcommittee with their opinions and recommendations. A draft of the bill has already been circulated to many persons concerned with the criminal justice system. I plan to commence hearings on this bill at 10 a.m. in 2253 Rayburn, Washington, D.C., on September 23, 1981, with additional hearings during the coming weeks.●

## GEORGE WILL'S REFLECTIONS ON TAX POLICY

### HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. LaFALCE. Mr. Speaker, George F. Will, who in my judgment is one of America's most insightful political commentators, recently wrote an interesting column in the September 14 issue of Newsweek. He takes some positions that some individuals probably would be surprised at. For example, he states that "America is undertaxed"; "the public sector needs more resources than the revenue system currently will provide"; that the percentage of GNP taken by taxes is not as important as "the incidence of taxes—where they fall across society and how they affect particular behavior."

Since Mr. Will is noted as a leading conservative commentator, I wonder what the reaction of the conservative Members of the U.S. Congress will be to his remarks. Very interesting.

Mr. Will's article follows:

THE RETREAT ON DEFENSE

(By George F. Will)

The nation's long underestimation of Ronald Reagan ended recently with the swift apotheosis of him, but soon the assessment of him will turn on the success of his policies rather than on his success in enacting them. Already there is a striking contrast between the affection for him and the skepticism about his policies.

Stock and bond prices are sagging and Administration criticism of the markets resembles Mayor Beame's criticism of New York banks in 1975 for refusing to buy city bonds. The banks were right. Markets respect mathematics and they say Reagan's sums don't tally. They think he adopted optimistic projections (of growth, interest rates, spending, inflation), and they doubt that he can cut the budget enough to hold down deficits. Interest rates are the core of the contradiction in economic policy: the tax cuts are stimulating consumption but interest rates are depressing investment. And the country's problem remains the high ratio of consumption to investment. Today's interest rates do not reflect short-term demand for money. They are a prophecy embodied as a premium in the price of money, an anticipation of long-term upward pressure on inflation by Federal borrowing.

Cuts: What Reagan has done so far has been relatively small and easy. Many budget cuts came from enrichments added in the 1970s to programs that didn't even exist in 1960. Most of the cuts came from the poor and the cities, constituencies of few Republicans or "boll weevil" Democrats. Even so, the President, then in his honeymoon-and-hero stage, barely won the cuts. And they were a piece of cake compared with cuts that might touch the thin skin of the middle class, which received the bulk of the benefits of social programs. Middle-class people would not be middle-class people were they not gifted at organizing and complaining. So the Administration is retreating from its proposed defense spending—spending which still would have left the nation devoting a significantly smaller percentage of its GNP to defense than it did under Eisenhower.

In July, Democratic Rep. Patricia Schroeder of Colorado, an implacable foe of defense spending, proposed cutting $8 billion from Reagan's defense proposals. Now some of Reagan's senior aides, who are not bashful about anticipating and perhaps forcing his decisions, say he will go much further than Schroeder proposed to go.

Regarding defense, unlike domestic policy, Reagan campaigned candidly and received a mandate for substantial spending. Domestic spending cuts were not, shall we say, stressed. The theory was that the tax cuts would be basically self-financing, stimulating the economy to produce higher revenues from lower rates.

Given the tax cuts, and the assumed unwillingness of Reagan to raise new revenues, the markets can only be assuaged by cuts of a size that must come from social security or defense. Even when Reagan was bestriding Washington's narrow world like a colossus, Congress reacted vehemently against his tentative ideas about touching social security (96-0 in the Senate, 405-13 in the House). So the knife will drift toward defense. That will please liberals who think all other spending is more important than defense spending, and won't deeply distress conservatives who think nothing is more important than reducing government spending. The public is eager to believe that everything, including security, can be had cheaply. So the public wants to believe that only "will," not costly materiel is required to restore American power. Maybe a one-minute scrap with Libya makes everything all right.

Reagan's election did not solve problems, it just made some solutions possible. But the great question of the twentieth century remains: has the United States the stamina for what JFK called a "long twilight struggle" with the totalitarians? Reagan's retreat on defense is disheartening.

What is intended as a small retreat may become a rout as Congress seizes on defense cuts as alternatives to painful cuts in domestic spending. The political climate has changed a lot in two months. Legislators have returned from a recess during which they met many elderly persons afraid of social-security cuts, and almost everyone else was anxious about interest rates. Few people were demanding more spending on defense. Obviously, there is waste in defense; obviously, an accumulation of budget authority cannot be equated with enhanced defense. But by retreating from its defense program so soon, the Administration sends a signal: rebuilding defense is less important than reducing government spending.

Taxes: Reagan's philosophy of Carnegieism—half Andrew and half Dale: 1890s capitalism and 1950s charm—will not suffice. The fact that his tax cuts were wise does not alter the fact that America is undertaxed—especially in light of the conservatives' agenda. The tax cuts were actually tax-limitation measures, counteracting tax increases imposed by inflation. By 1984 income and social-security taxes will be, as a portion of personal income, about where they were in 1978. But the conservatives' correct agenda for national security, and concern for social equity and prudence (billions for prisons, courts and the crumbling infrastructures—roads, bridges—of major cities), compel this conclusion: the public sector needs more resources than the revenue system currently will provide.

Many conservatives are obsessed by a crude measurement—the percentage of GNP taken by taxes. (By that measure, Britain has been much better off than Germany.) But more important is the incidence of taxes—where they fall across society and how they affect particular behavior. Today, considerations of social policy as well as fiscal needs may call for a change in the deductibility of consumer-credit and mortgage-interest payments. And it may be time for a value-added tax—in effect, a national sales tax. Conservatives should favor a tax on consumption, one that would reduce the progressiveness of the tax system while moving the budget toward balance.

What will history say of those who sacrifice everything, including defense, to shrink the public sector's portion of GNP? In 1950 a man was arrested for creating a public disturbance. One witness said: "He was using abusive language, calling people conservatives and all that." Such a day could come again.●

## PROTECT OUR NATURAL HERITAGE

### HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. FOGLIETTA. Mr. Speaker, I join with my colleagues today in asking the President to replace James Watt as Secretary of the Interior. As many of us stated in signing a petition to the President, we risk losing our natural heritage unless Mr. Watt is dismissed.

The Department of the Interior plays a difficult and sensitive role. The public servants of that Department must protect our rich natural resources and at the same time must oversee the use and development of the public lands. It is important for the Secretary of the Interior to understand his dual role as protector and developer.

Unfortunately, the current Interior Secretary does not have that understanding. Mr. Watt has a distinct and clear bias toward the exploitation of our public lands. He has little sympathy or understanding for the lands which are ecologically sensitive and rare.

Secretary Watt seeks to change the direction of the Interior Department. He wants to divert funding for parkland acquisition to other uses. He wants to open wildlife refuges and wilderness areas to oil and gas leasing. He is defusing surface mining regulations. He would allow motorboating and snowmobiling in geologically sensitive areas, in violation of existing regulations. He does not see the need to limit grazing on public lands. He is suspending endangered species programs, some of which are just beginning to enjoy success, such as the protection of our national bird, the bald eagle. He proposes turning the management of national parks over to private concessioners whose existence depends on financial profit. Many of my colleagues are enumerating further on the long list of crimes Mr. Watt seeks to perpetrate on our environment and natural resources.

As a specific example, I would like to call your attention to the Valley Forge National Park near my own district in Pennsylvania. Valley Forge enjoys a unique and critical place in our history. George Washington and his army wintered there and depended on its facilities for protection and for food and supplies. We depended on his army in turn for the birth of our Nation. The Valley Forge National Park now represents the kinds of problems which are facing our National Park System as a whole. More than 11 million people visit it each year, and the number is growing. Recreational facilities cannot support the demand. Vegetation and natural areas suffer. Sanitary systems strain under the stress. Traffic overflows its roads. Highways are built to funnel yet more people into the park.

Several years ago Congress authorized the purchase of additional parkland for Valley Forge. Adjacent to the park are several tracts of wooded land which have thus far been spared from development. The landowners would like to hold the land for us, but developers are anxious to move in instead. It is unreasonable to expect the landowners to remain in limbo much longer.

The American people have a right to enjoy their national parks without crowding each other and endangering their assets. Congress recognized these problems and created the land and water conservation fund for the purchase of additional parkland. The future of the expansion of Valley Forge is held up because Secretary Watt has virtually eliminated that parkland acquisition fund. The land and the people face uncertainty as long as Mr. Watt is retained.

I have received an influx of letters from my constituents seeking my support for ousting Mr. Watt. Nearly every responsible environmental group in the country has called for his ouster. Many are circulating petitions seeking his replacement, and they have received hundreds of thousands of signatures. Conservation leaders have eagerly sought to work with Mr. Watt and have been rebuffed, mocked, and scorned. They are looking for an Interior Secretary with whom they can communicate. Newspapers across the Nation are editorializing against Watt. Even the private interests who would support increased leasing, mining, and harvesting on public lands cannot keep up with the extent of the expansion Mr. Watt is proposing for their programs.

I hope this outpouring of public sentiment will convince the President that he must replace his Interior Secretary with someone who is better able to balance his "multiple-use" responsibilities.

In the meanwhile, Secretary Watt has stated that he intends to make changes in direction and policy by the budget process rather than through legitimate legislative channels. Fortunately, Congress has been reluctant to cooperate. We must continue to carefully monitor him and the programs which have been placed in his trust. We must legislate to assure that his work conforms to the intent of the Congress and the will of the American people.●

## AMTRAK COST SAVING EFFORTS DESERVE CONGRESSIONAL SUPPORT

### HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. DANNEMEYER. Mr. Speaker, the omnibus budget reconciliation legislation signed into law by President Reagan on August 13 authorized $735 million for Amtrak's Federal subsidy in fiscal year 1982. While I would have favored the administration's original request for $613 million, I think it is still important that Congress stand ready to assist Amtrak in reducing its cost of operation.

It is heartening that Amtrak's management has reduced its headquarters staff by 25 percent. The route and schedule changes approved by the board of directors will only result in a 10-percent reduction in service, despite an earlier prediction by Amtrak president, Alan Boyd, that a 15-percent reduction would occur under the reduced subsidy level.

Despite some progress in the reconciliation bill, Amtrak is still saddled with costly and inefficient work rules and other encumberances. Amtrak is not out of the fiscal woods as of yet. First of all, the current budgetary climate strongly mandates additional reductions in Federal spending. All items in the budget—Amtrak included—will face reevaluation. Second, much of the breathing space that Amtrak presently enjoys stems from the decision of the conferees to accept the provision in the House-passed bill to defer interest payments that Amtrak owes the Federal Government until September 30, 1983. The interest deferral will free up $82 million in fiscal year 1982 and $100 million in fiscal year 1983 for operating costs and other expenditures. Over the long run, it goes without saying that it does not save Amtrak any money. It buys time, to be sure, but aside from the appropriateness of such a deferral, the key question is to what purpose is the extra time put in order to make Amtrak run more efficiently.

All of us in the House and Senate, regardless of our positions on the appropriate level of Amtrak subsidy, ought to be able to support efficiency-enhancing improvements. I want to take this opportunity to bring to the attention of my colleagues an excellent article written by syndicated columnist Neal Peirce, which appeared in the September 13, 1981, editions of the Washington Post. Peirce describes some of the outdated work rules and other practices that drive up Amtrak costs without justification. The 100-mile rule—which I have brought to the attention of the House on previous

occasions—allows an engineer to work a round trip between New York and Washington in a single day and earn 4½ days' pay. These and other work rules can be changed if Congress stands behind Amtrak in a supportive role when Amtrak enters into labor negotiations later in the year. These direct negotiations will provide Amtrak with a forum that it has not had since its inception to directly control its destiny. The work rule changes are by no means punitive measures against railroad employees. Rather, they represent an attempt to draw rules that are consistent with the technology of the 1980's and not the state-of-the-art in the early years of this century.

Finally, Amtrak is to be commended for acting like any smart corporation in today's business world by looking at ways to establish diversified profit centers within its overall operations. The Peirce column and other news reports indicate that Amtrak is researching business opportunities that might present themselves as a result of Amtrak's extensive real estate holdings in key areas of major cities. The objective, of course, should be to remove Amtrak from the Federal budget to the maximum extent possible by enhancing its profit potential.

Mr. Speaker, I ask permission to insert the entire Peirce article at this point in the RECORD. Thank you.

[From the Washington Post, Sept. 13, 1981]

THE SPECTER OF AN ENTREPRENEURIAL AMTRACK MAKING MONEY

(By Neal R. Peirce)

A railway locomotive engineer earns a day's pay for every 100 miles he goes—a rule set back in 1919. That means that if he guides an Amtrak train the 225 miles from New York to Washington, and then back to New York in a single day, he earns four and a half days' pay. At eight days' work a month he can earn $35,000 to $40,000 a year.

Such is the historical baggage with which Amtrak has been burdened ever since its birth in 1971. If we are ever to have an efficiently run, less subsidy-prone national passenger rail system, that kind of baggage must be unloaded along one of those stretches of rusty, abandoned railroad track enshrined in folk songs. Then Amtrak must go on, in entrepreneurial fashion, to generate new profit centers out of its far-flung physical facilities.

The good news is that Amtrak is at work on both fronts. The bad news is that it has a long, long way to go.

The "crippling load of labor costs" of which Amtrak president Alan Boyd complains can be traced back to World War I. Then, the federal government nationalized the railroads and President Wilson made his son-in-law, the politically ambitious William McAdoo, federal railway czar. Railway labor at the time did face hazardous duty and long hours, and the standard agreement McAdoo authored in 1919 seemed reasonable enough at the time. Why not a full day's pay for 100 miles, for instance, when passenger trains averaged 22 miles per hour?

But for the railroad brotherhoods, the 1919 work rule became virtually sacrosanct. Railway managements could break them only by risking strikes—for which they had little stomach. And politics kept intervening. Fast diesels were introduced in the '30s. Not only did diesels make the old idea of 100-mile workdays obsolete, they made firemen redundant, since there was no longer coal for them to fire. But the Roosevelt administration, to save jobs, pressured the railroads to keep the firemen on duty.

When Amtrak was formed in 1971, it was saddled with a legacy of expensive work rules and featherbedding. But Congress sharply limited Amtrak's ability to bargain directly with the locomotive and train crews of the lines over which it ran its trains. In the Northeast corridor where half its trains run, for instance, it could bargain with the crews of Conrail (the official operator). But, said the law, if there was an impasse, then after 60 days the work rules would revert to those of the old Penn Central. Amtrak elected not even to start the charade.

Congress, however, has just this summer repealed that provision. Amtrak is preparing direct, tough negotiations which it hopes will wipe away most of the obsolete work rules in the Northeast corridor and set a pattern for agreements with crews across the country. Instead of mileage compensation, Amtrak will demand a simple hourly pay system. It will try to abolish such relics of the steam-engine age as "crew districts" which require changes of crews every 100 or 200 miles. This rule leads to such absurdities as three different crews between Boston and New York.

But labor is sure to resist. A strike—perhaps next spring—is a distinct possibility. Congress traditionally intervenes to settle rail strikes. Will it now stand behind Amtrak management in a tough stance akin to President Reagan's action with the air traffic controllers? Or will it knuckle under to rail labor pressures, thwarting Amtrak's drive toward a subsidy-free future?

This year, Congress saved Amtrak from massacre at the hand of presidential budget-cutters. But it also disregarded Amtrak's pleadings to mandate unified work crews between regular Amtrak trains and the new, independent entity—"Amtrak Commuter"—which was set up to take over Northeastern commuter rail lines from the expiring Conrail system. Continued separate crews may help Rep. James Florio (D), a key House subcommittee chairman, appease organized labor and win election this year as governor of New Jersey. But it will cost taxpayers $55 million annually.

What excites Amtrak's top management these days is the body of new profit-making ventures it thinks would go a long way toward freeing it from its demeaning dependence on Washington. In renovating practically its entire passenger fleet, for instance, Amtrak built advanced railcar renovation facilities at Beach Grove, Ind. Now it's ready to sell conversion work to other railroads or transit authorities, as well as to provide training in railroad operations and skills for domestic or foreign railroads and transit systems.

Using its virtually uninterrupted Boston-Washington right-of-way, Amtrak plans to build—and get other investors to share in—a $30 million fiber-optics communication system with broad capacity in telephone, data communications and television signal relay.

Finally, Amtrak plans to get into real estate development in a big way, concentrating on the huge swatches of land it owns beside its big-city terminals. Agreement has already been reached with the Carley Capital Group to start a multimillion-dollar hotel-commercial-office project starting at Philadelphia's 30th Street Station and extending over the air rights of 30 acres of adjacent tracks. Construction should start next year.

Negotiations are under way with another developer for a major office structure at Chicago's Union Station. Amtrak would like a green light from Congress for a similar massive development at Washington's Union Station, a building grossly mishandled by a succession of government policies in recent years.

City by city, one can envision Amtrak exploiting its prime real estate for major profits. "We are looking," says Amtrak vice president Lawrence Gilson, "for any and all ways to reduce our reliance on Congress, to act more and more like a private company and less like a welfare recipient."

Even the Reagan administration, which so far has scorned Amtrak while continuing general subsidies for energy-wasteful fly-and-drive transportation systems, should applaud that fresh direction.●

## HOWARD WEXLER HONORED

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. LONG. Mr. Speaker, on Saturday, September 19, 1981, one of my constituents, Mr. Howard Wexler, will be honored by the State of Israel Bonds civic and religious leaders, as well as his family and friends, for his unselfish dedication to the improvment of his community.

A victim of cerebral palsy, Mr. Wexler has not allowed his physical handicap to prevent him from serving his community. Active in the Boy Scouts of America, Mr. Wexler has been awarded one of scouting's highest honors—the Order of the Arrow. He reactivated Boy Scout Troop No. 3 and serves as scoutmaster. He also serves on the Jewish Council of Scouting.

Mr. Wexler has been instrumental in making improvements for the safety of his fellow members of the Randallstown Synagogue. Widening of Church Lane, installing sidewalks and mercury vapor lights in the synagogue parking lot are just a few examples of his efforts.

A familiar figure in Baltimore County government, he is always willing to give whatever it takes to get the job done.

Mr. Speaker, it is an honor for me to join in paying tribute to this outstanding young man who serves as an inspiration to all of us.●

## PERSONAL EXPLANATION

### HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. OTTINGER. Mr. Speaker, yesterday I fulfilled a long-term commitment to attend a seminar in Detroit, Mich., on strategies for the introduction of methanol into America's transportation fleet. It was the first meeting between methanol producers and automobile manufacturers to explore the use of this important resource to relieve our dependence on imported oil.

I was therefore absent from votes on House Concurrent Resolution 153, to authorize a bust or statue of Dr. Martin Luther King in the Capitol; the conference report on H.R. 4035, Housing and Urban Development-Independent Agencies Appropriations Act of 1982; and H.R. 3380, the Armed Forces Pay Act of 1981. Had I been present, I would have voted as follows on each of these measures:

On rollcall No. 202, to authorize a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol, I would have voted "yea." Clearly, Dr. King made a magnificent and historic contribution to civil rights in America and deserves this kind of tribute. I am delighted that this measure passed by a vote of 386 to 16.

On the rollcall No. 203, the conference report on H.R. 4034, Housing and Urban Development-Independent Agencies Appropriations Act of 1982, I would have voted "yea." While I am distressed at the reduced contract authority for assisted housing, cuts in operating subsidies for troubled housing projects, and the one-half reduction from the House level in funding for the solar and energy conservation bank, it is clear that this conference report represents the best we are going to be able to obtain for the essential programs covered under this measure.

On rollcall Nos. 204 and 205, with respect to the Armed Forces Pay Act of 1981, I would have voted "yea" on both. It is on training and retaining qualified personnel that our national security efforts should really be focused. Indeed, we are experiencing a terrible manpower shortage which threatens out ability to defend ourselves. It seems ludicrous to spend billions of dollars on sophisticated weapons when you do not even have the skilled personnel to maintain or operate these systems. I strongly support the Armed Forces Pay Act of 1981, which would improve pay and living conditions for members of the Armed Forces, and increase bonuses to attract and retain qualified personnel.

Also, had I been present, I would have voted "yea" on the amendment offered by my good friend from New York, Representative ADDABBO, to provide for a pay raise averaging the same 14.3 percent that was authorized in the bill, but targeting it to those personnel in needed skilled positions. I believe pay raises should be targeted toward skilled personnel who are in short supply. Because the armed services have already been successful in achieving their recruitment goals, a 14.3 percent across-the-board pay raise for all is unnecessary and would preclude needed increases for personnel who have critically needed qualifications.●

## RUDOLF HESS—POLITICAL PRISONER NO. 1—PART IV

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. McDONALD. Mr. Speaker, there is still a cultivated misunderstanding of the Hess case, in that Hess remains a war criminal in the popular mind, despite having been acquitted of war crimes. His crime appears to have been to seek a way to bring peace between Britain and Germany in order to forestall the bloodbath on both sides which did, unfortunately, take place.

As part of the unique conditions of imprisonment which Rudolf Hess has suffered for the past 40 years, he cannot speak out in any way. There was a relaxation of this iron-gag rule between May and July of 1947, during which time Hess was able to tell his family about the flight to Scotland on May 10, 1941, the flight which was his last act as a free man, from that long-distant day to this.

Wolf Rudiger Hess, Rudolf Hess' son, writes that,

My father's flight to Scotland is considered to be one of the most extraordinary deeds in modern history. One man tried by a courageous and lonely action to end what he feared would become the greatest calamity. The approximately fifty million war dead are the dreadful proof of his vision.

Extracts from the letters of my father (from May to July, 1947) are pieced together to give a continuous story in his own words of the events of the night of the 10th and 11th of May, 1941.

What follows was written by Rudolf Hess.

The North Sea was illuminated by an evening light of unearthly loveliness, such as is found in the far north. It was utterly lonely. But how magnificent! A multitude of small clouds far below me looked like pieces of ice floating on the sea, clear as crystal; the whole scene was tinged with red. Then the sky was swept clean—alas, much too clean! There was not a trace of the "dense carpet of clouds at about five hundred metres", predicted in the weather report, and where I had thought to take shelter in case of need. For a moment I even thought of turning back. But a night landing with this machine, I reflected—that will never do. Even if I saved myself, the Messerschmitt would suffer serious damage, possibly beyond repair. Then, indeed, the cat would be out of the bag; nothing could be kept secret. The whole business would be reported in the highest quarters and then all would be over—forever.

So I told myself to "Stick it out, no matter what happens!"

Then I had a stroke of luck. A veil of mist hung over England. Its surface shone so much in the evening light that nothing down there could be seen from above. I took shelter, of course, at once, flying with the throttle full out and coming slap down from a height of two thousand metres towards the coast at a truly terrific speed. The action of that moment saved me then. There was a Spitfire in pursuit which I outdistanced before I was aware of its presence. I could not look behind; I was too enclosed in my cabin and too dazzled by the reflections. Had I not been tempted to dive for cover, but remained in the clear air at the pace I had been going he could easily have shot me down.

As it was, I crossed the East Coast a little below Holy Island at about ten o'clock and after sunset, flying low over a little town whose inhabitants must have been terrified, so low did I roar past, barely higher than the houses, at some 750 km. per hour with my two thousand h.p. engines at full throttle and the exhaust echoing through the sleepy streets. At this level the visibility was suprisingly good. I could see several miles, but I must have been invisible to my pursuer. I took good care not to rise too high, but flew on at not more than sixteen feet from the ground—even less at times—skimming over trees, men, beasts and houses; what English airmen call "hedge-hopping". It seems to have impressed them a good deal, according to the Duke of Hamilton and judging by the honour done me in a critique in an English flying journal!

I enjoyed every minute of it! At home, this sort of flying was forbidden, although I did occasionally do a bit of it—but not so drastically as on this flight over enemy territory.

"Father" Bauer [1] always said that what I really liked was to fly through barn doors, and it was in this spirit I aimed at the Cheviot, now looming out of the misty evening. This was my guiding point, as previously determined, and keeping within a few yards of the ground I literally climbed up the slope. Never before had I ascended a mountain so rapidly. With a slight alteration of course to the right, I slid down on the other side. On I went over level ground, skimming merrily over house tops and trees, and waving greetings to men working in the fields. The variometer told me I was ascending, until suddenly I was over my next point of orientation—a little dam in a narrow range of hills with Broad Dav the highest summit. Here my course bent to the left.

I had no need to bother with a map; all the details of the course, compass points, distances, etc. were already stored in my memory. After my flight from Harlaching, they may have found a sketch which I had for pinning on my bedroom wall where I could study it during the many sleepless nights, by the light of the reading lamp—the disappearance of which was, quite rightly, debited to my account by my dear wife.

[1] Hans Bauer, Hitler's chief pilot.

In the end I could have flown the whole route while asleep.

In case these sketches should, by some mistake, have been seen prematurely by my much too intelligent wife, who might become altogether too curious about the mysterious X and Y which then played a part in our lives, I had taken the precaution of simply writing Ostsee in place of Nordsee. That her womanly gift of putting two and two together during the long months of my silent preparations had inclined her to think that I intended to fly on the southern course—towards old Marshall Pétain, as she later wrote me in Nuremberg—was a thing I could not then guess. For so many years she had been educated almost to my own level of taciturnity!

At about ten forty p.m. I found myself over Dungavel, the country seat of the Duke of Hamilton, my quite unconscious future host, or so I hoped. Yet, to avoid all possibility of error, I flew on to the coast, a matter of a few minutes. The smooth sea lay beneath me, as calm as a mirror, lit by the rising moon. Just off the mainland, a towering rock, five hundred metres high, rose out of the water, magnificently illuminated, a pale reddish colour. All looked so peaceful and beautiful. What a contrast to the hazardous and exciting experience then just about to come—immediately before my first parachute jump! Never shall I forget this picture.

I flew a few kilometres along the coast until I reached a small place on a spit of land with what might have been a mole, as on my map. Satisfied that I was on the spot, I turned east again and was able to pick out the railway and a small lake which was shown on the map with a road by it and south of the residence at Dungavel. I made a curve, ready to land by parachute after rising to a safe height of some 2,000 metres. Then I switched off the engines, turned the propeller indicator to null to check rotation regardless of the following wind, so that I could drop without being churned into mincemeat—such a superfluous precaution! For I found out afterwards that it would be easier to squeeze through a solid wall than to press forward against that prodigious air pressure. The first engine did not dream of stopping but, being ignited by the red-hot cylinders, went on spinning and humming merrily and took no notice of the fact that the ignition was off and that its conduct was against the rules!

However, the motor did come to its senses finally, senses which nevertheless soon sealed its fate.

Now I fastened everything up and opened the cabin roof, with the notion of climbing out—not without some skepticism and with much curiosity but all the same in excellent spirits. It was out of the question! The air pressure was something that cannot be imagined, even when the machine was going so slowly; and it pressed me up against the back partition as if I were screwed to it. In spite of all the care I had taken to find out about everything from my good friends at Messerschmitts, there was just one thing I had overlooked. I had never asked about how to jump; I thought it was too simple!

When I think back to that time, I find it astonishing that I never once thought of using the landing gear to slow down the machine. With no motors running, I had sunk lower and lower. Then I suddenly remembered that Greim [2] had once mentioned that one had to turn the machine over on its back and allow oneself to fall out! I then began to turn the machine over but, although I had done all sorts of acrobatics in the air, this was the one thing I had never done with this 'plane. And yet even that was lucky, because I instinctively pulled the joystick as if for a semi-loop instead of setting it for horizontal flight. Coming right over, the centrifugal force held me inside. But, with my head hanging down, had I slid out even a very little, the pressure of air would have broken my neck and spine. But the centrifugal force is immense with such a machine; it made the blood drain from my head and I began to "see stars". I was just able to think: "I am only just abve the ground and flying straight down. Soon the crash must come! Is this the end?"

Then everything went black and I passed out. There I sat hurling earthwards, upside down, with no power of control. A desperate, indeed, hopeless situation! The next moment I had recovered consciousness, with full clarity of mind, and found myself staring at the speed gauge: the pointer stood at zero. I flung myself away and at the same moment the machine dropped like a stone.

I pulled at the parachute; the strands held me up, and I hovered in the air; an indescribably glorious and victorious experience all things considered. While unconscious, I had done what I should have done, had I been conscious. I had brought the plane out of its semilooping curve to finish almost perpendicular on its tail. The power of the swing spent, the maching stood motionless, immediately before plunging. Momentarily it had thrown me into a position for the blood to flow back into my head.

A second later would have meant death—Kismet!

So there I was, swaying about in the air, the mist barely illuminated by a full moon which sent no more than a thin reddish light through the night. The sudden checking of speed when I reached the ground was sufficient, after my previous experience, to send the blood again from my brain into my legs, so that I stumbled forward and once more all was as black as night; in short, I had my second "black-out". This time I recovered consciousness very slowly. Had it happened this way when I was in the machine, it would have proved fatal. Everything around me was swimming; I finally awoke, my expression, I dare say, resembling that of Adam when, having been formed from earth, he saw the world for the first time. For at first I had not the remotest idea of what had happened to me or where I was. Only gradually did it become clear to me that I had reached my goal—or rather a new beginning. Alas, more of a beginning than I dreamed!

I came down not far from the door of a farmhouse standing alone, and out of the door came a man who asked me if I was British or German and, as I could not walk easily, helped me very nicely into the house and placed me by the fire with a cup of tea. In jumping, I had hurt my ankle, probably knocked it somehow against the parachute gear.

What happened next was much less encouraging; a civil official appeared at the head of a troop of soldiers—a man who had quite evidently, judging by the smell, been celebrating Saturday with good Scottish spirits, probably having taken an extra shot when he heard that a German parachutist had come down. At any rate he staggered about in a cloud of alcoholic vapour, marching me off and prodding me all the while in the back with a large revolver, his finger never leaving the trigger. As I listened to his incessant belching and stumbling, I felt there must have been the finger of God intervening between his shaking hand and the impending shot. A little later the leader of the military asked me to enter a house, but the alcoholic official protested energetically against this and prevented my entry, poking his revolver, this time, into my stomach. I certainly did not move a muscle at this delightful little game with Fate but urged the two to unite in deciding what to do. Finally we did enter the house, where a really nice little Tommy made all well once more by offering me a bottle of milk which he had no doubt brought for himself. After five hours flying and two "black-outs", I expect I looked as if I needed it—as indeed I did, for on top of the somewhat exciting adventures of the last few hours I now knew that I was under arrest. Little did I know for how long!

Some R.A.F. officers arrived during the night to take a look at the phenomenon which had landed in their country—this being part of their "duty" as they made clear or at least asserted. An army major with them stared at me for a good while and then speaking in first-rate German, said that I was the image of Rudolf Hess. He had often seen Hess in Munich, he said. I replied very coldly that it was no news to me that I looked like Hess; and in fact it was very painful to me. The major understood perfectly.

Then, again suddenly, he produced a little photo of an Me 110 which he had with him and asked me to sign it. He no doubt thought that he was being smart and that I should give myself away. In an easy manner, I scribbled "Alfred Horn" on the photo: later I heard that this signature appeared in fascimile in the Press!

I asked to see the Duke of Hamilton. He had been told about the extraordinary similarity to Hess, and at first refused to entertain the idea that I could in fact be Rudolf Hess. When we spoke together, however, he was compelled to admit that it must be so, and, full of astonishment, exclaimed: "Can you really be Hess?"

At the time I often asked myself the same thing—was I really Rudolf Hess? Or was I, perhaps, in a dream, and would soon awake peacefully in Berlin in the Wilhelmstrasse, or in my own room at Harlaching, looking at the big map pinned on the wall? In the opposite sense, I did dream, again and again, that I was still at home and had not yet got things ready for my flight, or that I had returned from England, my mission having failed. Each time it was like some horrid nightmare. In the dream I did everything possible to attain my aim and became desperate at the idea of returning with nothing achieved.

When I woke up in England after such a nightmare and found myself really there, my first reaction was a sensation of relief but without any clear realization of the actual position of things—so powerfully had my peace objective taken possession of the subconscious mind. That which I had planned and hoped for was perhaps too gigantic; just how gigantic and yet how right we realize perhaps only now.

Ah—well! Peace. Our chaplain, who came to see me recently, was of the opinion that "At last, God has come to us!" I regret to say that—to the distress of the chaplain above all—this view does not entirely coincide with mine. I have a strong impression that, for the time being, it is the Devil who honours us with his presense and now dem-

[2] General Ritter von Greim.

onstrates it powerfully in many parts of the world. Nevertheless, I am convinced that God will sometime really come to us, conquer Lucifer, and bring peace to tortured humanity.

When I was in England, playing the part of a man who had lost his memory, I learned many things by heart as a means of saving myself from the fate which I was carefully pretending to have suffered; I regarded this as a sort of "training". Together with many other pieces I often repeated to myself—not merely by way of training either—a piece from Goethe's Egmont, with which I now conclude my factual account of the flight:

"As if urged onward by invisible spirits, the fiery steeds of the Age run away with the slender chariot which carries our fate. We can do nothing, but courageously hold fast to the reins, swerving now right, now left; avoiding here a rock; there a precipice. Where are we going? No one knows. Hardly can we remember whence we came. . . ." ●

## A SALUTE TO MEXICAN INDEPENDENCE DAY AND HISPANIC HERITAGE WEEK

### HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. ROYBAL. Mr. Speaker, we are now in the midst of Hispanic Heritage Week. This date, September 16, is of special importance to those of us of Mexican descent, and I would like to take this opportunity to offer a special salute to our great neighbor to the south while also honoring all those of Hispanic heritage.

It is not widely known in the United States that Mexico celebrates its "Fourth of July" on September 16. On this date 171 years ago, that country proclaimed its independence from Spanish colonial rule, ending forever the reign of foreign tyranny in the Western Hemisphere. On September 16, 1810, Father Miguel Hidalgo Costilla urged the citizens of the small town of Dolores to take up arms against the oppressive Spanish rulers. Like the proclamation of our own Declaration of Independence, "el grito de Dolores" of 1810 inspired the revolt that brought freedom from European colonial domination.

The independence of spirit of the people of Mexico is certainly a match for our own, and the United States must recognize and honor that fact. For too long we have regarded Mexico as a second-rate nation, but we are now discovering that its problems and interests parallel our own. I applaud the expressed desire of this administration to establish closer ties with Mexico. As equal partners our two nations will make great progress in the years ahead, both economically and socially.

This week is a celebration not only of Mexican heritage, but of Hispanic heritage in general. Although Hispanic Heritage Week has been celebrated every year for over 12 years, very few people realize just how important Hispanics have been to the development of the United States, both in physical and cultural terms. Most people are familiar with various aspects of Hispanic art, music, food, and language, but few are aware of the extent to which our society has been shaped and enriched by the Hispanic presence.

Too many of us have for too long considered Hispanics to be only the latest wave of immigrants to enter the United States, bringing with them all the problems that immigration entails. In fact, many of us have ancestors that began settling this country long before the Pilgrims landed at Plymouth Rock. Historians have tended to overlook the role of Hispanics in the development of our great Nation, glossing over Hispanic participation in the American Revolution, ignoring the Hispanic defenders of the Alamo and the mixed Hispanic-Anglo troops of the Texas revolution. This ignorance will not continue.

Recently, Hispanics have begun to speak up as a group. We are celebrating our heritage, taking pride in our ethnicity, making our presence known. We now number over 15 million in this Nation, and are estimated to become the largest minority in this country as soon as 1990. For the first time, we see political leaders and office-holders courting the Hispanic vote, expressing concern over Hispanic problems and needs. We celebrate this recognition, and at the same time call for a fair solution to our common problems of discrimination, education, and immigration. I invite you all to join the Hispanic community in celebration of our proud heritage, and in recognition of the force we have been and will continue to be in the shaping of this country.●

## EXPORT TASK FORCE HEARINGS ON THE FOREIGN CORRUPT PRACTICES ACT

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. BONKER. Mr. Speaker, the House Subcommittee on Telecommunications, Consumer Protection and Finance, under the chairmanship of my distinguished colleague, Representative WIRTH, has begun a series of hearings today on the amendments to the Foreign Corrupt Practices Act of 1977, offered in H.R. 2530 and introduced by Congressman RINALDO. As chairman of the House Export Task Force, I must stress the importance of this piece of legislation if we are to promote U.S. exports and increase our share of world trade.

Identified by businessmen and attorneys as one of the most significant export disincentives, the FCPA contains too many uncertainties and ambiguities. It is considered a disincentive to exports because of uncertainty within the business community about the meaning and application of some of its key provisions. Conduct prohibited and conduct permitted is often unclear.

The problem of uncertainty is compounded by a lack of guidance from the enforcement agencies as to proper interpretation of the act's provisions. This problem, in turn, is exacerbated by the dual enforcement authority of the Justice Department and the Securities and Exchange Commission over the act's payments provisions.

In a report issued in early March of this year, the General Accounting Office was highly critical of the enforcement and administration of the FCPA, stating that ambiguity and uncertainty associated with the antibribery provisions make compliance difficult and costly. Moreover, there is controversy over accounting standards and the degree of precision required by them.

H.R. 2530 offers precise and specific guidelines as to what is prohibited and what is not prohibited, rather than the vague standards now in effect. It must be emphasized that H.R. 2530 merely provides changes in the original statute without compromising the original intent; that is, the prohibition of bribery of foreign officials in order to obtain or retain business.

H.R. 2530 offers the following changes to the Foreign Corrupt Practices Act of 1977: The Act shall be named the Business Accounting and Foreign Trade Simplification Act; accounting provisions of the law would be in conformance with the generally accepted accounting principles (GAAP) instead of the ambiguous and overly detailed standard that now exists; violation of the recordkeeping and accounting controls provision would occur only if it was knowing and willful; jurisdiction for antibribery enforcement would be transferred from the Securities and Exchange Commission to the Department of Justice; the prohibition against bribery of foreign officials is rewritten to clarify what is permitted and what is not; Department of Justice actions to assist with compliance would include guidelines describing specific types of conduct which would be permissible. In addition, H.R. 2530 expresses the sense of Congress in supporting bilateral and multilateral agreements on international business practices so that competitive disadvantages against U.S. businessmen would be eliminated.

We must take steps to remove those disincentives to exports caused by the Foreign Corrupt Practices Act of 1977.

H.R. 2530 provides the needed precision, clarity, and simplicity.

The American businessmen, our constituents, have the right to know specifically what they can and cannot do in international business. We must work with them to promote U.S. exports, expand trade, and provide increased employment opportunities for Americans. I commend Mr. WIRTH for launching this series of hearings so that the full House can consider this important issue.●

## JUDGE ROY FERKICH HONORED BY BOY SCOUTS

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. ANDERSON. Mr. Speaker, on September 19, the Boy Scouts of America will honor Judge Roy Ferkich, an outstanding South Bay leader and a close personal friend of mine, as San Pedro's "Citizen of the Year." This honor is being bestowed upon him in recognition of the many contributions he has made to the South Bay area through his active participation in numerous community activities over the years he has been a resident of the area.

Roy moved to San Pedro as a child of 10, and has lived there ever since. He graduated from San Pedro High School, and pursued his education at Compton Junior College, completing his law studies at the Southwestern University School of Law in 1953. A year later, Roy Ferkich was admitted to the California bar and began a legal career that has now spanned over a quarter of a century.

During all these years, Judge Ferkich has repeatedly offered his services to the community. He served on the board of harbor commissioners for the Port of Los Angeles, as a board member and most recently as board president, from 1973 until his appointment this year as municipal court judge for San Pedro. Judge Ferkich is presently a member of the board of trustees of the San Pedro Peninsula Hospital Foundation, and for many years has been a leader in ethnic affairs in the San Pedro area.

He was a cofounder and is now president of the Harbor Area Ethnic-Political Coalition. This group, established in 1972, encourages political participation by the sizable black, Chinese, Filipino, Italian, Mexican, Russian, Samoan, and Yugoslav communities of the harbor area. Roy has been a particularly active member of South Bay's Yugoslav community. He is currently a member, and has been a past president, of both the Yugoslav American Club of San Pedro and Yugoslav Americans for Political Action. Ferkich was, in fact, a cofounder of the latter group. In addition, the judge is a board member and legal counsel of San Pedro-Komiza, a "Sister Cities" organization pairing our own San Pedro with the Yugoslav Adriatic city of Komiza.

My wife, Lee, joins me in wishing the very best to Judge Roy Ferkich, his mother Florence, his brother Eugene, and his sister Lorraine Norton, in the years ahead.●

## SAUL LEVY

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. LEHMAN. Mr. Speaker, the life of Saul Levy gave witness to the fact that it is never too late to get involved in one's community and to be of real service to one's neighbors. Mr. Levy moved into my district only 3 years ago, but he made a significant contribution toward improving the quality of life in North Miami Beach. He became a leader in the fight against excessive noise, and we will all miss the dedication and high level of energy he brought to his cause.

I offer my sincere condolences to Saul's widow, Celia, and I would like to include in the RECORD the following tribute to Saul Levy which was printed in Vibrations, published by the National Association of Noise Control Officials.

WE ARE ALL HEIRS OF SAUL LEVY

(By Marina Vitale)

When Saul Levy died suddenly in Miami May 30, he left a legacy for noise control. He had lived to see passage of a Dade county ordinance establishing a procedure to ban railroad whistle and horn noise—a goal he had made a "life's work" after retirement at age 63 as a textile salesman and owner of a Manhattan textile business.

Mr. Levy and his wife Celia moved from Valley Stream, New York to North Miami Beach about three years ago and, his son said, "he planned to sit by the pool and do the other things that old men do." He had a serious heart condition and, Mrs. Levy believes, "It was only because he was participating in an experimental program on arrhythmia at Harvard Medical that he was given these past two years which he used to create a new career in public service." That began after the Levys moved into a condominium with a view of Biscayne Bay; a railroad whistle awakened them at 3 o'clock in the morning and jolted him out of bed into a new interest.

Mr. Levy held that citizens have a right to quiet on their property in the same way they have the right to build fences to keep out other intruders. Figuring that the whistle sounded more than a half-mile from his home must disturb many other people, he formed a group that eventually was incorporated as Project Whistle Stop. He argued for use of new technology for crossing safety and quiet, recruited political and business leaders, collected materials about railroad crossings and signals into probably the most extensive library on the subject owned by a layman, and got resolutions of support from many communities. He also worked for some time as a Community Noise Counselor.

He was the kind of man who, after he was hospitalized once in 1980, sent a bulletin to all hospitals in Dade and Broward counties suggesting ways to have a quieter hospital environment. He was instrumental in getting a noise barrier along an Interstate highway. He distributed anti-noise buttons and stickers everywhere he went. Mrs. Levy, who is called Cyl, remembers, "Saul was very noisy in expounding his cause for a quiet environment. He was exasperated at the low priority noise excesses were given by the public."

An attempt to get a statewide railroad whistle law died in committee; Mr. Levy and his group concentrated on the local level and the Dade County Commission eventually entertained an ordinance which allows whistle bans to be imposed on crossings on a case-by-case basis after public hearings on petition of at least 100 crossing-area residents. (The first copy of the petition form was presented to Mrs. Levy at her husband's funeral.)

The railroad had argued that whistle and horn blasts are a safety measure. Some commissioners were undecided and the railroad offered them a ride in the cab of a train. "I think we would do better to outlaw whistles throughout the county in one fell swoop," Commissioner Barry Schrieber was quoted as saying after his ride. "The train whistles are in no way a safety factor whatsoever." The commission accepted the train whistle ordinance without dissent May 19.

"Saul envisioned that the passing of the Dade county ordinance was to be the forerunner of many of these ordinances up the Florida coast," Mrs. Levy said. "He had assurances from mayors that they were just waiting for such a precedent." He estimated two million Floridians lived along the mainline of the railroad.

He planned to continue working against noise pollution. He organized a Citizens Against Noise about six months ago to broaden his scope. He planned to promote updating of the county noise code. He had an idea that developers should be required to include noise impact statements in any housing prospectus, based on 24-hour studies and listing excessively high decibel levels and their sources. He was spreading the word about quiet compressors made in England.

Mrs. Levy helped her husband in his work, both before and after his "retirement," but she is not inclined to take his place. "I was always interested, always proud. We made a good pair. I always saw the trees; he saw the forest. He always had a broad view and the sense of knowing where to go, who to go to. I hope someone will take up the cudgel."

Besides his wife, Mr. Levy's surviviors include three grown children: a son, Lawrence C., and two daughters, Mara H. and Joyce; a sister, brother and grandson. We believers in noise control are his family, too. And we have suffered a loss.●

## DIAMOND JUBILEE FOR MINEOLA

HON. JOHN LeBOUTILLIER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. LEBOUTILLIER. Mr. Speaker, this week, the Long Island village of Mineola is celebrating its Diamond Jubilee, commemorating 75 years as an incorporated village in a region that has undergone a radical transformation from agrarian quietude to suburban sprawl.

Since 1906, Mineola—which is now the county seat of heavily populated Nassau County—has been a jewel in the crown of communities that make up Nassau County. Mineola has always been at the center of things—as a vibrant farm community, market center, depot, meeting place, and seat of county government.

Since 1945, Nassau County has undergone one of the most radical changes in population. The county has gone from a largely potato-farm-studded place to one where nearly 2 million people live and work. In spite of this rapid and dizzying change, Mineola has retained its special sense of community. Like the traditional village of the days of old, Mineola is a true community. Her people are proud of where they live and contribute in many ways to the livelihood of their community.

Mineola is no bland, faceless suburb. It has a distinctive life of its own, and is a most pleasant place to live.

Mayor Ed Smith and the Mineola Board of Trustees govern a village that has given much to the past of Long Island, and will add greatly to her future.

North Hempstead town clerk, John DaVanzo has organized a jubilee festival that reflects the special and decent character of his hometown. Most important of all, Mr. Da Vanzo's efforts are truly uniting Mineola.

Main Street used to be populated by cows, then trolleys, and then by a few cars. Today, it is a bustling place, but not in so much of a hurry that the community cannot look backward to a worthy past.

In 1976, during this Nation's Bicentennial, the village of Mineola printed a small history of their community. Entitled "Mineola: Heartbeat of Nassau," the tract is authored by Thomas Barrick.

The history is an excellent description of a smalltown atmosphere, and I am taking the liberty of offering it here for the benefit of my colleagues.

MINEOLA: HEARTBEAT OF NASSAU

(By Thomas Barnick)

1870–80

In a travel brochure of 1877, Mineola was described as "an important junction and the center of the transportation of farming products. Many of the wealthiest farmers on Long Island live in this district, the surrounding country bearing the evidence of high cultivation." Corn, potatoes and radishes were grown on the farms surrounding the station on Main Street. "The Mineola Hotel and the various saloons are liberally patronized, but for the traveler Mineola is more interesting as a junction for Hempstead."

1880's

By the eighties Mineola had a population of 313. Deitz's tubular lamps illuminated the village streets but "of the various street lamps in our place, it is rarely that more than two are burnt at night." Across the eastern part of the village was the Meadow Brook Hunt Club where Mr. Hitchcock, master of the hounds, would go streaking after a little, red fox across the Jackson and Titus farms, starting at the fair grounds.

According to the Gazetteer of Long Island, 1885, "Farming is largely and profitably carried on about these neighborhoods, a level surface and rich soil and convenient railroad facilities affording favorable conditions." Every Monday, Wednesday and Friday mornings a market train would stop at the station to bring produce into New York. "The market train is so liberally patronized by our farmers and those from Hempstead that trains are run in sections, each containing thirty to forty wagons."

MINEOLA

In 1844 John S. Wood opened the first Branch post office. He received mail for the Albertson, Allen, Hewlett, Willis, Searing, Woodnut, Simonson and Smith families. In 1928 Henry W. Skinner wrote, "When the Branch wanted a post office the United States postal authorities informed the people of the Branch that it would be necessary to have a name. Samuel V. Searing told the writer that he read in a daily paper an account of an Indian uprising in the state of Nebraska, led by an Indian chief by the name of Mineola, and liking the musical sound of the word, immediately sent the name on to Washington which was approved and adopted by the postal authorities." The Branch was officially changed to Mineola in 1858.

At the tenth anniversary of the incorporation of the village in 1916, George Littlejohn wrote a letter to the Smithsonian Institution Bureau of American Ethnology asking them if they knew what Mineola meant. They wired back saying that it means "pleasing and pleasant," from the Delaware or Algonquin stock Indian name of the original Meniologamike, which is "a pleasant or palisaded village."

1910's

Before the roads were paved the streets would resemble one large, muddy, hog wallow whenever it rained. After a storm in 1912, the residents on Willis Avenue proposed changing the name of the village to "Muddyola." During the summer, the roads would become dusty so a water wagon would come around and sprinkle the streets to keep the residents from choking to death. "On some avenues," in 1913, "residents are so indifferent to its condition that weeds in the gutters almost hide the concrete curbing." These complaints kept Street Commissioner Silas Andrews very busy.

GAS LIGHTING

In 1911 the Nassau and Suffolk Lighting Company was awarded the contract to light the village streets with gas. Every evening Robert DeSteffano would mount his little pine stepladder and light every lamp individually and put it out in the morning. Five miles of gas mains were laid and residents were installing gas in their homes. "When walking through the village streets at night it is easy to see what stores and houses are using the new 'Reflex' gas light." Electric lines were put up in 1903 but few people made use of them until the 1920's when practically everyone had converted.

MAIN STREET

Main Street was the center of village business. Ehrich's big country general store sold everything: wool, dry goods, feed and grain, hardware, dolls, silk stockings and groceries. Fred Unser also had a general store on the northwestern corner of Harrison and Willis Avenues, but the building burned down in 1915. On the southeast corner of Main and Firsts Streets was Van Wagner's General Store, with a large section of hay, grain and feed.

The post office was a little building next to Ehrich's store. The boxes for mail and delivery windows filled the whole north side. Each family called for the mail once or twice a day, until 1919 when carrier service was installed. The post office moved in 1920 to the Meyer Building, on the northwest corner of Mineola Boulevard and First Street, then to the southwestern corner of Third Avenue and Second Street until 1932 when the old Seaman homestead was torn down to make way for the present post office.

The first motion pictures were shown in Allen's Hall on Main Street (now the Allstate Plaque Company). Movies were shown in different halls around town until 1914 when The Century Opera House opened on Main Street (now a warehouse). The picture ran once in the afternoon and once in the evening, changing pictures every day, rarely having a vaudeville act. A male violinist and a woman pianist accompanied the silent picture with "the same fast banging tune when horses trotted on the screen." The reels always took a long time to change so during the intermission the moviegoers would go next door to Rushmore's Pharmacy for an ice cream soda.

1920's

In the 1920's Mineola was affected by the post-war housing boom which spread across the adjacent farmlands; the business district moved from Main Street to Jericho Turnpike and the town acquired its present look.

TROLLEY LINE ABANDONED

In 1923 the Port Washington, Mineola to Hicksville trolley line was abandoned "since this line traversed rather rugged terrain, it suffered badly in poor weather and had to fight a constant battle to operate during winter storms. From 1913 to 1920, its business gradually dropped on the Nassau section of the line. Poor finances and power troubles finally spelled the end of the line in May of 1920." The Mineola to Freeport line was in operation until Easter Sunday, April 4, 1926. "Only a few residents mourned the demise of the ten-cent ride from Freeport to Mineola on the clattering trolleys."

NEW BUSINESS DISTRICT

During the 1920's the village business district moved from Main Street to Jericho Turnpike and Mineola Boulevard.

In 1920, Hugh Kennedy purchased Allen's Hotel, and the adjoining property on Main Street, and built small stores that commanded high rent since they were near the trolley terminal and railroad station. When

the traction company discontinued the Mineola line, and the railroad station moved in 1923 to its present site, these stores lost most of their business.

The Century Opera House became outdated when the new Mineola Theatre opened in 1927. Ehrich's General Store was sold in 1925 to the Dordan Realty Company of Manhattan, who tore it down and erected the present brick building, which was used as a dress factory. In 1928 the new Village Hall and Firehouse was dedicated and Fireman's Hall was sold for land speculation. The first bank in Mineola, The Nassau County Trust Company (now Davenport Press building), incorporated in 1899, moved to the large building on the southeast corner of Second Street and Mineola Boulevard in 1922. As can be seen, the business section was shifting.

"The village had very few stores," Sister Virginia Marie said, "it was only after Jericho Turnpike had been started and many stores opened, that one could really do shopping. Before that took place, one had to go to Hempstead."

1930'S

Since few people in Mineola owned any appreciable amount of stock, the crash of 1929 passed overhead almost unnoticed. It was the ensuing Depression that made the residents aware of October 21, 1929.

In 1933, when Franklin D. Roosevelt became President, one out of every six persons in the county was unemployed, and applying for work relief. In the emergency, President Roosevelt inaugurated the Works Progress Administration which found, or made, jobs for unemployed workers. In Mineola, men were put to work building all the concrete gutters and where they weren't already, curbs. Each man worked three or four days a week for $3.20 to $4.00 a day. "Just enough," as one resident said, "to put bread on the table."

Jackson Avenue and Hampton Street Schools were both built as part of the W.P.A. project, as was the post office on Main Street. Local men were also put to work painting the buildings at the Mineola Fairgrounds, at government expense.

PRICES IN THE 1930'S

When a housewife moved to Mineola in 1929, her husband's salary was $125 a week, which was way above the approximately $15 the W.P.A. workers were getting. In her account book during the 1930's she wrote:

| | |
|---|---|
| May 19, 1936: | |
| Long Island Lighting | $5.76 |
| Nassau & Suffolk Lighting Co. (a separate bill of gas) | 3.36 |
| Monthly commutation ticket | 10.56 |
| Mineola village tax, 1936 | 34.25 |
| Dr. Frank Barnes, bill | 6.00 |
| New York Telephone | 4.55 |
| September 18, 1936: | |
| Mineola coal bill | 12.25 |
| School taxes | 23.09 |
| November 1, 1936: | |
| Water bill | 6.00 |

To help save money, school classes ran on part time. The same teacher would teach one class in the morning then another in the afternoon.

Ruth C. Smith recalls: When I came to teach French at Mineola High School, in the fall of 1934, there was no Jackson Avenue School. The first floor of the building on Emory Road had grades one through eight, and the high school occupied the second and third floors.

Since this was a depression era, teachers were required to live in Mineola—the theory being that it would help the village's economy. There were some married women already on the faculty, but the unmarried women were required to leave if they married, this was also a depression measure. Needless to say, there were some secret marriages.

AFTER THE 1930'S

In the 1930's and 1940's, daisies and violets grew in abundance, as did locust and sumac trees, in the lots and fields surrounding Mineola, that were once farms. By 1940 Mineola's population was 10,064. After WW II, small, Cape Cod-style houses began springing up in the center of the village. A large unincorporated area spreading from Mineola and north New Hyde Park to Hericks increased by 40,000 residents from 1950 to 1960.

"Mineola has changed," George Pappas said, "but there are still some of the old spots left behind."●

## NATIONAL JOB CORPS COMPETITION/EXPO

### HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1980*

● Mr. PERKINS. Mr. Speaker, more than 200 proud young men and women from Job Corps centers across the country will gather on the Mall in front of the Capitol September 22-24 to take part in the first National Job Corps Competition/Expo. For the first time in the program's 16-year history, Corps members will have an opportunity to demonstrate to the entire Nation the practical job skills and educational training they have gained through Job Corps.

In addition to showing the Nation that these young men and women representing the Job Corps program are ready and able to begin successful new careers in the labor force, the competition/expo also is a celebration of the program's 16th successful year. Since the program began in 1965, more than 730,000 young people have joined Job Corps to gain the training and education needed to launch them from backgrounds of unemployment and poverty into productive, responsible careers. Job Corps continues to provide educational and vocational training, work experience, counseling, and health services to help these young men and women begin meaningful new lives.

Performance records of Job Corps graduates prove that the program is a major success. And the program works because it enjoys the cooperation of private industry as well as labor and trade unions in providing the practical career training and educational programs which help the Corps members find and keep jobs.

This first National Job Corps Competition/Expo will be highlighted by 3 days of job skills competitions in 20 occupational and educational areas. Corps members will be visiting Hill offices on September 21. Luncheons for the House and Senate will be held on September 22 and 23. There also will be an awards dinner, where the master of ceremonies, Secretary of Labor Raymond J. Donovan, will be joined by approximately 1,000 corporate executives, labor officials, political leaders, and center directors to honor the competition winners.

Following is a complete schedule of events:

JOB CORPS COMPETITION/EXPO SCHEDULE OF EVENTS

TUESDAY, WEDNESDAY, THURSDAY, SEPTEMBER 22-24

(NOTES.—Competition schedule is the same for all 3 days.)

10:00

Culinary arts—Conclusion of brunch preparation and chef's salad preparation, tent A.
Solar energy installation, tent A.
Auto mechanics, tent A.
Surveying, outside area No. 3.
Basic education (oratory and spelling), tent A.
Business/clerical, tent A.
Nursing assistant, tent A.
Auto body repair, tent B.
Brick masonry, tent B.
Tile setting, tent B.
Cement masonry, tent B.
Welding, tent C.
Carpentry, tent C.
Electrical, tent C.
Plastering, tent C.
Painting and wallcovering, tent C.

11:45

Culinary arts—Roast meat preparation, tent A.

12:00

Equipment operator, outside area No. 3.

12:45

Culinary arts—Luncheon to include short order hot entree with vegetable, tent A.

1:00

Solar energy installation, tent A.
Culinary arts—Cake sculpture and decorations, tent A.
Auto mechanics, tent B.

2:00

Equipment operator, outside area No. 3.

3:00

Solar energy installation, tent A.
Auto mechanics, tent B.
Surveying, outside area No. 3.

4:00

Culinary arts—Team ice carving, tent A.
Equipment operator, outside area No. 3.

5:30

Culinary arts—Turkey carving, fruit, cheese and turkey tray arrangement, tent A.

CONGRESSIONAL EVENTS

Corpsmembers visit Hill offices, Monday, Sept. 21.

Luncheon for Congressmen and other honored guests, Tuesday, Sept. 22, 12:00 p.m.

Luncheon for Senators and other honored guests, Wednesday, Sept. 23, 12:00 p.m.

Barbecue dinner and awards ceremony, Thursday, Sept. 24, 7:30 p.m.

The luncheon and awards dinner will be held in the banquet tent, on the Mall in front of the Air and Space Museum.

I urge my colleagues to find time in their schedules to meet with Job Corps Members on September 21, attend the House luncheon on September 22 or the Senate luncheon on September 23, and participate in the awards dinner on September 24.●

## HANDGUN BODY COUNT

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. LEHMAN. Mr. Speaker, during the month of July there were 690 more victims of handguns in the United States. Again many of the dead are children who were "just playing" but ended up as tragic victims.

Not long ago, Miami News columnist, Jack Roberts, wrote a column entitled, "Gun Control? 10,728 Victims Would Say Yes." Noting that the gun used to shoot President Reagan was manufactured in Miami, Mr. Roberts lent his own voice to the growing chorus calling for handgun control. His reaction to the statistics—10,728 killed by handguns in 1979 and 60 million handguns existing in the United States today—is one shared by many. He wrote, "Lord help us all."

The list follows:

HANDGUN BODYCOUNT, JULY 1981

ALABAMA (3)

Anita Colquit, Winfield Jewers, Charles McGatha.

ALASKA (3)

Richard Glenn, D. Higginbotham, unidentified female.

ARIZONA (7)

Margaret DeHerera, Peter Dominguez, Angel de la Cruz, Margaret Neumann, John Vidal, unidentified female, unidentified male.

ARKANSAS (11)

Henry Adams, Carl Bellamy, Norman Block, Robert Boyd, Darrel Gooden, Bruce Johnson, Rose Owens, Ray Rainbolt, Charles Branson, Michael Pickens, Trigg Jacobs.

CALIFORNIA (92)

Alfred Blaydes, Beverly Brown, Carol Brown, Walter Bunch, Douglas Callis, Hector Carillo, Clendria Casteel, Nina Chavez, Mrs. Childress, Conrad Chiquet.

Lonnie Clevenger, Americo Cordova, Louis Correa, Garret Davis, James Delgadillo, Cheri Domingo, Mr. Dozier, Lam Duong, Charlene Fales, Reza Fathollahi, Grant Fowlkes, Jr., Lynn Fuchino.

Neil Fuchino, Robert Ford, Joseph Gableman, Jose Garcia, Oscar Garcia, Inocente Garcia-Junco, Rene Gonzales, Rogelio Gonzales, Judy Green, Jeffrey Hamby, Earl Hargrove, Jose Iniquez.

Michael Jaramillo, James Jones, Florian Karl, Riyad Khatib, Rodney Kiest, Kli Lopez, Jose Lopez, Martin Lopez, Russell MacKay, Juan Marin, Manuel Marin, Cindy Marosy.

Josephy Marshell, Robert Martin, Carlos Martinez, Carol McBroom, Reginald McGuire, Kathleen Merrill, Estelle Mullins, Nariciso Neri, Jr., Patricia O'Donnell, Martin Ortiz, Matilda Pla, Salvador Ramos, Herbert Reardon, Zack Ritsos.

Mr. Rodgers, Gerald Rodrigues, Frank Rose, Hale Ryan, Jr., David Sadillo, Greg Sanchez, Saturnio Santos, Loelia Salverria-Neal, Publo Salverria-Neal, Mark Schwartz, Jeremy Steven, William Swartz.

Sieamheing Tia, Gilbert Trejo, Jr., Estevan Valenzuela, Norberto Valles, Walter Vaughn, Maureen Whalen, Thomas Wood, James Young, Estban Zaragoza, two unidentified females, nine unidentified males.

COLORADO (27)

Salvador Archuleta, Juanita Bird, Fred Brown, Sherry Call, Armand Carabello, Ray Foster, Elvin Fuster, Robert Gilley, Clarence Harris, Larry Hartshorn, Bill Hird, Bobby Kolen.

Edward Konnaughton, Hipolito Lara, Eileen Leday, Carla Lewis, Paul Lopez, Nabil Mansour, Thomas Mix, Robert Pacheco, David Sanchez, Tony Smith, James Trujillo, Manuel Villela, Jospeh Zaharias, Mercedes Zamora, Richard Carroll.

CONNECTICUT (10)

Francisco Burgos, Virginia Garcia, Arthur Humphrey, Barbara Kelly, John Kelly, Sylvester Kinsey, Frank Mitchell, Miguel Sanchez, Gilberto Suarez, Haniscasis Suarez.

DELAWARE (2)

Michael Skinner, John Wall III.

DISTRICT OF COLUMBIA (8)

Mary Boatwright, Charles Carter, Edward Harris, Theodore Miller, Timothy Miller, Stanley Weldon, James Winzlor, unidentified male.

FLORIDA (63)

Larry Allen, Robert Barach, Ann Barach, Sergio Banculli-Salano, Michael Barr, Ed Bland, Ulbert Botero, Larry Brown, Howard Burns, Jose Comas, Dorothy Croft, Donald Custor.

Harry Desravines, Lidia Diaz, Edvareo Escudero, John Eubanks, Bobby Farmer, Henry Fester, Juan Gamoa, Jr., Robert Gass, Charles Gervil, William Grant, Leonard Grice, Marvin Harper.

Pedro Hernandez, Gregory Higgs, Luis Hincapie, Barbara Kelley, John Kelley, Sr., Dorothy Lane, Randolph Lanton, Paul Lohlein, Mario Londono, John Long, Estevan Macridis, Luis Martinez, John McQuillan, Willie Mann, Miguel Ordaz, Jerome Palacino, Karl Patterson.

Manuel Ramirez, Jose Ramos, Gerald Rauft, Annie Roberts, Michael Roberts, Susie Robinson, Benjamin Sanders, Phyllis Schwartz, Joseph Smith, Albert Swain, Frank Thomas, Jario Tobon, Jimmy Thompson, Jose Vargas, Nathaniel Williams, Eugene Wilson, six unidentified males.

GEORGIA (16)

John Brown, Andrew Bigham, Emma Bigham, Harold Connell, Clarence Davidson, Jr., William Johnson, Jr., Dorothy Lane, Jerry Lester.

Alan Reeves, Alan Shirley, Police Chief Stainaker, Lucious Stone, Alicie Watts, Hattie Watts, Ricky Watts, Nolan Jones.

## DEALING WITH VIOLENT CRIME: A NONPARTISAN ISSUE

### HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. MAZZOLI. Mr. Speaker, on September 10, the Federal Bureau of Investigation (FBI) reported that the rate of crime in the United States rose 9 percent in 1980; 23,044 people were murdered in the United States in 1980. That works out to one murder every 23 minutes.

This is absolutely intolerable. Something must be done—and now.

On August 17, 1981, the Attorney General's Task Force on Violent Crime submitted its final recommendations on actions needed to make Americans safe in their homes and on the streets.

The eight-member task force was appointed by Attorney General William French Smith. On it were experts in criminal justice at the Federal, State, and local levels including, I am proud to say, Jefferson County Commonwealth Attorney David Armstrong.

I am encouraged by signs that the Congress plans to make these recommendations a top-priority legislative issue. This is a nonpartisan issue, and one which deserves the strong support of all Members of Congress.

I look forward to working with other members of the House Judiciary Committee, on which I serve, so that Americans can again live free from fear.

Following is a summary of the task force's recommendations:

SUMMARY OF RECOMMENDATIONS

PHASE I. RECOMMENDATIONS

1. The Attorney General should examine the feasibility of designating a single federal law enforcement agency to coordinate all federal and state unlawful flight to avoid prosecution and other fugitive activities.

2. The Attorney General should request the United States Navy to assist in detecting air and sea drug traffic.

3. The Attorney General should work with the appropriate governmental authorities to make available, as needed and where feasible, abandoned military bases for use by states and localities as correctional facilities on an interim and emergency basis only. Further, the Attorney General should work with the appropriate governmental authorities to make available, as needed and where feasible, federal property for use by states and localities as sites for correctional facilities.

4. The Federal Bureau of Investigation should establish the Interstate Identification Index (III).

5. The Federal Bureau of Investigation should examine the feasibility of a separate registry of firearms violators.

6. The Attorney General should mandate the United States Attorneys to establish law enforcement coordinating committees in each federal district.

7. The Attorney General should expand the program of cross-designation of Assist-

ant United States Attorneys and state and/or local prosecutors.

8. The Attorney General should direct the National Institute of Justice and other branches of the Department of Justice to conduct research and development on federal and state career criminal programs.

9. The Attorney General should take all steps necessary to reduce substantially the delay in processing criminal identification applications.

10. The Attorney General should take all steps necessary to reduce substantially the delay in processing requests for technical assistance from state and local criminal justice agencies.

11. The Attorney General should expand, where possible, the training and support programs provided by the federal government to state and local law enforcement personnel.

12. The Attorney General should exercise leadership in informing the American public about the extent of violent crime. In that connection, the Attorney General should seek to build a national consensus that drug abuse, crime, and violence have no rightful place in the schools and, when these conditions are found to exist, vigorous criminal law enforcement should ensue.

13. The Attorney General should take a leadership role in ensuring that the victims of crime are accorded proper status by the criminal justice system.

14. The Attorney General should require, as a matter of sentencing advocacy, that federal prosecutors assure that all relevant information about the crime, the defendant, and, where appropriate, the victim, is brought to the court's attention before sentencing.

15. The Attorney General should direct officials in appropriate branches of the Department of Justice to give high priority to testing programs to reduce violent crime and to inform state and local law enforcement and the public about effective programs.

PHASE II. RECOMMENDATIONS

*Federal law and its enforcement*

*Narcotics*

16. The Attorney General should support the implementation of a coherent, and consistent enforcement policy with regard to narcotics and dangerous drugs including—

a. A foreign policy to accomplish the interdiction and eradication of illicit drugs including the responsible use of herbicides domestically and internationally.

b. A border policy designed to effectively detect and intercept the illegal importation of narcotics, including the use of military assistance.

c. A legislative program, consistent with recommendations in this report, to reform the criminal justice process to enhance the ability to prosecute drug-related cases.

*Guns*

17. The Attorney General should support or propose legislation to require a mandatory sentence for the use of a firearm in the commission of a federal felony.

18. The Attorney General should support or propose legislation to amend the Gun Control Act of 1968 to strengthen its ability to trace firearms used during the commission of an offense and prohibit dangerous individuals from acquiring firearms. Specifically, the Act should be amended to provide the following:

a. That, on a prospective basis, individuals be required to report the theft or loss of a handgun to their local law enforcement agency.

b. That a waiting period be required for the purchase of a handgun to allow for a mandatory records check to ensure that the purchaser is not in one of the categories of persons who are proscribed by existing federal law from possessing a handgun.

19. Title I of the Gun Control Act of 1968 prohibits the importation of certain categories of handguns. However, the Act does not prohibit the importation of unassembled parts of these guns. It is recommended that the Act be amended to prohibit the importation of unassembled parts of handguns.

20. The Attorney General should support or propose legislation to authorize the Bureau of Alcohol, Tobacco and Firearms to classify semi-automatic weapons that are easily converted into fully automatic weapons as Title II weapons under the Gun Control Act of 1968.

21. The Attorney General should direct the United States Attorneys to develop agreements with state and local prosecutors for increased federal prosecutions of convicted felons apprehended in the possession of a firearm.

22. The Attorney General should direct the National Institute of Justice to establish, as a high priority, research and development of methods of detecting and apprehending persons unlawfully carrying guns.

*Crimes against Federal officials*

23. The Attorney General should support or propose legislation to make a federal offense any murder, kidnapping, or assault of a United States official or of a federal public servant who is engaged in the performance of official duties.

24. The Attorney General should support or propose legislation to make a federal offense any murder, kidnapping, or assault on a state or local law enforcement officer or on a private citizen committed in the course of a murder, kidnapping, or assault on the President or Vice President.

*Arson*

25. The Attorney General should conduct a study of the feasibility of transferring the anti-arson training and research functions of the United States Fire Administration to the Bureau of Alcohol, Tobacco and Firearms.

26. Arson should be the subject of a special statistical study on a regular basis by an appropriate agency as determined by the Attorney General.

27. To eliminate problems that often emerge when gasoline or other flammable liquids are used in arson, current law creating federal jurisdiction over arson started by explosion where interstate commerce is involved should be amended to encompass arson started by fire as well as by explosion.

*Tax cases*

28. The Attorney General should support or propose legislation to amend the Tax Reform Act to balance legitimate law enforcement needs with personal privacy interests by permitting the limited use of Internal Revenue Service records and information by other law enforcement agencies.

29. The Internal Revenue Service should be afforded adequate resources to investigate tax offenses and financial dealings of drug traffickers and other illegal business activities that are associated with violent crime.

30. The Attorney General should review and restructure if necessary the "Dual Prosecution Policy" as it relates to prosecution of tax offenders who have committed other offenses prosecuted by the Department of Justice.

*The Freedom of Information Act*

31. The Attorney General should order a comprehensive review of all legislation, guidelines, and regulations that may serve to impede the effective performance of federal law enforcement and prosecutorial activities and take whatever appropriate action is necessary within the constitutional framework.

32. The Attorney General should seek amendments to the Freedom of Information Act to correct those aspects that impede criminal investigation and prosecution and to establish a more rational balance among individual privacy considerations, openness in government, and the government's responsibility to protect citizens from criminal activity.

*Centralizing Federal law enforcement functions*

33. The Attorney General should study whether to transfer the firearms, alcohol, and arson law enforcement functions of the Bureau of Alcohol, Tobacco and Firearms to the Department of Justice; to transfer the Border Patrol functions of the Department of Justice to the Department of the Treasury; and to transfer the licensing and compliance functions of the Drug Enforcement Administration to the Food and Drug Administration of the Department of Health and Human Services.

*Housing Federal detainees in local jails and State prisons*

34. The Attorney General should seek a waiver of the requirements of the Federal Procurement Regulations for contracts entered into for temporary housing of federal prisoners in local detention facilities and/or should seek legislation to amend the Grant and Cooperative Agreement Act of 1977 (Public Law 95-224) to establish and authorize the use of intergovernmental agreements with local governments for detention space and services for federal prisoners.

35. The Attorney General should support or propose a legislative appropriation for the implementation of a Cooperative Agreement Program that would allow the United States Marshals Service to assist local governments in acquiring equipment and supplies necessary for jails to meet requirements for housing federal prisoners and should support or propose a legislative appropriation for capital improvements of detention facilities used to house federal prisoners, with priority given to those facilities under litigation or court order for overcrowding.

36. The Attorney General should support or propose legislation to amend 18 U.S.C 5003 to permit a quid pro quo arrangement whereby the federal government could house state prisoners and the states house a similar number of federal inmates without requiring an exchange of funds.

*Adequate personnel resources for Federal responsibilities*

37. The Attorney General should seek a substantial increase in personnel resources for federal law enforcement and prosecutorial agencies to enable them to effectively perform their present responsibilities and the additional responsibilities recommended by this Task Force.

CRIMINAL PROCEDURE

*Bail*

38. The Attorney General should support or propose legislation to amend the Bail Reform Act that would accomplish the following:

a. Permit courts to deny bail to persons who are found by clear and convincing evidence to present a danger to particular persons or the community.

b. Deny bail to a person accused of a serious crime who had previously, while in a pretrail release status, committed a serious crime for which he was convicted.

c. Codify existing case law defining the authority of the courts to detain defendants as to whom no conditions of release are adequate to assure appearance at trial.

d. Abandon, in the case of serious crimes, the current standard presumptively favoring release of convicted persons awaiting imposition or execution of sentence or appealing their convictions.

e. Provide the government with the right to appeal release decisions analogous to the appellate rights now afforded to defendants.

f. Require defendants to refrain from criminal activity as a mandatory condition of release.

g. Make the penalties for bail jumping more closely proportionate to the penalties for the offense with which the defendant was originally charged.

*Insanity defense*

39. The Attorney General should support or propose legislation that would create an additional verdict in federal criminal cases of "guilty but mentally ill" modeled after the recently passed Illinois statute and establish a federal commitment procedure for defendants found incompetent to stand trial or not guilty by reason of insanity.

*Exclusionary rule*

40. The fundamental and legitimate purpose of the exclusionary rule—to deter illegal police conduct and promote respect for the rule of law by preventing illegally obtained evidence from being used in a criminal trial—has been eroded by the action of the courts barring evidence of the truth, however important, if there is any investigative error, however unintended or trivial. We believe that any remedy for the violation of a constitutional right should be proportional to the magnitude of the violation. In general, evidence should not be excluded from a criminal proceeding if it has been obtained by an officer acting in the reasonable, good faith belief that it was in conformity to the Fourth Amendment to the Constitution.

*Sentencing and parole*

41. The Attorney General should support the enactment into law of the sentencing provisions of the proposed Criminal Code Reform Act of 1979 which provide for greater uniformity and certainty in sentencing through the creation of sentencing guidelines and the abolition of parole.

*Habeas corpus*

42. The Attorney General should support or propose legislation that would:

a. Require, where evidentiary hearings in habeas corpus cases are necessary in the judgment of the district court, that the district court afford the opportunity to the appropriate state court to hold the evidentiary hearing.

b. Prevent federal district courts from holding evidentiary hearings on facts which were fully expounded and found in the state court proceeding.

c. Impose a 3-year statute of limitations on habeas corpus petitions. The 3-year period would commence on the latest of the following dates:

(1) the date the state court judgment became final,

(2) the date of pronouncement of a federal right which had not existed at the time of trial and which had been determined to be retroactive, or

(3) the date of discovery of new evidence by the petitioner which lays the factual predicate for assertion of a federal right.

d. Codify existing case law barring litigation of issues not properly raised in state court unless "cause and prejudice" is shown, and provide a statutory definition for "cause."

FEDERALISM IN CRIMINAL JUSTICE

*Fugitives*

43. The Attorney General should seek additional resources for use in the apprehension of major federal fugitives and state fugitives who are believed to have crossed state boundaries and who have committed or are accused of having committed serious crimes.

*Training of State and local personnel*

44. The Attorney General should establish, and where necessary seek additional resources for, specialized training programs to allow state and local law enforcement personnel to enhance their ability to combat serious crime.

45. The Attorney General should seek additional resources to allow state and local prosecutors to participate in training programs for prosecutors.

46. The Attorney General should ensure that the soon-to-be established National Corrections Academy will have adequate resources to enable state and local correctional personnel to receive training necessary to accommodate the demands on their agencies for managing and supervising increased populations of serious offenders.

*Exchange of criminal history information*

47. a. If the eight-state prototype test of the Interstate Identification Index (III) is successful, the Attorney General should direct the Federal Bureau of Investigation to begin immediately the development of the index and should ensure that adequate computer support and staff are available to develop and maintain it for the federal government, all 50 states, the District of Columbia, and appropriate areas of federal jurisdiction outside of the United States.

b. If the prototype test demonstrates that such an index is not feasible, the Attorney General should direct the FBI to develop alternative proposals for the exchange of federal, state, and local criminal history information, which may include a national data base of such records or message switching.

48. The Attorney General should support or propose legislation to authorize and provide adequate resources for grants to state governments to establish the central state repositories of records and the criminal justice information systems required for participation in the III program, or alternative criminal history exchange programs as discussed in Recommendation 47.

49. The Attorney General should direct the FBI to revise its long-range plan to reduce duplication of criminal history information services between the Identification Division and the National Crime Information Center to take into account the results of the eight-state prototype test of the III.

50. The Attorney General should seek additional resources for the FBI to reduce the backlog of requests for fingerprint and name checks and to enable it to respond to such requests more promptly, including those from non-law enforcement users, and should assign high priority to swift completion of computerizing fingerprint files.

*Justice statistics*

51. The Attorney General should ensure that adequate resources are available for the collection and analysis of statistics on crime, its victims, its perpetrators, and all parts of the justice system at all levels of government and for the dissemination of these statistics to policymakers in the Department of Justice; other agencies of federal, state, and local government; the Congress; and the general public.

*Disaster assistance*

52. The Attorney General should support or propose legislation to allow direct financial assistance to supplement the resources and efforts of state and local governments that have demonstrated that they are suffering a criminal justice disaster or emergency of such unusual nature and proportion that their own resources fall short of addressing the need, and he should request adequate funds to support such assistance.

*Federal funding for research, demonstration, evaluation, and implementation of innovative programs*

53. The Attorney General should ensure that:

a. Adequate resources are available for the research, development, demonstration, and independent evaluation of methods to prevent and reduce serious crime; for disseminating these findings to federal, state, and local justice agencies; and for implementing these programs of proven effectiveness at the state and local level.

b. Grant awards for implementing such demonstrated programs require a reasonable match of state or local funds and be limited to a reasonable time period.

*Assisting State and local corrections*

54. The Attorney General should seek legislation calling for $2 billion over 4 years to be made available to the states for construction of correctional facilities. Criteria for a state's obtaining federal assistance under this program include (1) demonstration of need for the construction; (2) contribution of 25 percent of the overall cost of the construction; and (3) assurance of the availability of operational funds upon completion of construction. Funds should be allocated by a formula which measures a state's need for prison construction relative to all states.

55. Within 6 months the National Institute of Corrections (NIC), which would administer the program described in Recommendation 54, would develop models for maximum, medium, and minimum security facilities of 750 and 500 (or fewer) beds, from which states would choose the appropriate model(s) for construction. In addition, over the 4-year period, NIC would complete studies pertaining to the possible establishment of regional prisons, the feasibility of private sector involvement in prison management, and the funding needs of local jails. The Attorney General should review NIC's findings and other relevant information to determine the need for additional funding upon completion of the 4-year assistance program.

56. The Attorney General should support or propose legislation to amend the Federal Property and Administrative Services Act of 1949 to (1) permit the conveyance or lease at no cost of appropriate surplus federal property to state and local governments for correctional purposes and (2) ensure such conveyances or leases be given priority over requests for the same property for other purposes.

57. The Attorney General should support or propose legislation to amend the Vocational Education Act and other applicable statutes to facilitate state and local correctional agencies' ability to gain access to existing funds for the establishment of vocational and educational programs within correctional institutions.

JUVENILE CRIME

*Juvenile fingerprints*

58. The Attorney General should direct, and if necessary seek additional resources for, the Federal Bureau of Investigation to accept fingerprint and criminal history information of juveniles convicted of serious crimes in state courts and should support or propose legislation to amend Section 5038 of the Juvenile Justice and Delinquency Prevention Act to provide for fingerprinting and photographing of all juveniles convicted of serious crimes in federal courts.

*Federal jurisdiction over juveniles*

59. The Attorney General should support or propose legislation to amend Section 5032 of the Juvenile Justice and Delinquency Prevention Act to give original jurisdiction to the federal government over a juvenile who commits a federal offense.

*Youth gangs*

60. The Attorney General, where appropriate, should expand the use of federal investigative and prosecutorial resources now directed against traditional organized crime activities to the serious criminal activities of youthful street gangs now operating in metropolitan areas of the country.

*Federal juvenile justice program*

61. Funding of juvenile justice programs should be done according to the criteria set forth in Recommendation 53; such programs should be considered for funds along with all other programs within the administrative framework for general funding.

VICTIMS OF CRIME

*Federal standards for the fair treatment of victims of serious crime*

62. The Attorney General should establish and promulgate within the Department of Justice, or support the enactment of legislation to establish, Federal Standards for the Fair Treatment of Victims of Serious Crime.

*Third-party accountability*

63. The Attorney General should study the principle that would allow for suits against appropriate federal governmental agencies for gross negligence involved in allowing early release or failure to supervise obviously dangerous persons or for failure to warn expected victims of such dangerous persons.

*Victim compensation*

64. The Attorney General should order that a relatively inexpensive study be conducted of the various crime victim compensation programs and their results.●

## HONORING CHIEF EDWIN T. GIBSON

### HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mrs. HECKLER. Mr. Speaker, there is no higher calling in our Nation than public service—and no more crucial brand of public service than working on the frontline of defense for our society, protecting the residents of cities and towns from the dangers of fire and disaster.

Tomorrow, the city of West Bridgewater, Mass., will honor a man whose record of devoted public service is unsurpassed in the Commonwealth: former Fire Chief Edwin T. Gibson.

Chief Gibson served the people of West Bridgewater for 48 years, during which time he earned the respect, admiration, and friendship of all who were privileged to work with him. He exemplified the courage, resourcefulness, and integrity that are the hallmark of the municipal firefighting forces of Massachusetts. Upon his retirement he has left behind one of the most proud, and one of the most efficient, fire departments in the Commonwealth.

The citizens of West Bridgewater have lost the services of a great leader and a great friend. But as he marks his retirement tomorrow night he must know that that friendship, and that sense of respect and appreciation he earned over so many years, will not fade with time. I am proud to offer him my most sincere thanks and congratulations here today, and I ask all my colleagues in this House to join me in tribute to this most distinguished public servant, Edwin T. Gibson.●

## IDENTIFYING CANDIDATES FOR CONTINUOUS AMBULATORY PERITONEAL DIALYSIS

### HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. EDGAR. Mr. Speaker, if the Government is serious about saving money in the health care area, all of us should become aware of an innovative new procedure of self-care dialysis. Susan Perras, R.N., and Dr. Anthony R. Lappacosta, of the Bryn Mawr Hospital in Pennsylvania gave me a tour and a complete briefing of continuous ambulatory peritoneal dialysis. Their article which follows explains in some detail the process. It is now up to us to make sure that our regulations of dialysis do not discourage home or self-care. The article follows:

[From Dialysis & Transplantation, February 1981]

IDENTIFYING CANDIDATES FOR CONTINUOUS AMBULATORY PERITONEAL DIALYSIS

Continuous ambulatory peritoneal dialysis (CAPD) requires meticulous adherence to procedure by the patient. An attempt is made to associate patient characteristics with success in performing CAPD, as measured by incidence of peritonitis and deterioration of blood chemistries.

One of the most recent developments in dialysis methods is continuous ambulatory peritoneal dialysis (CAPD),[1] a method designed primarily for home and self-care dialysis. A machine is unnecessary in this procedure, and the patient is fully ambulatory. The technique involves the instillation by gravity of 2L fresh dialysis solution into the peritoneal cavity through a permanent peritoneal device. The solution is removed by siphon after six to eight hours, and replaced. This is repeated every six to eight hours, seven days per week.

The procedure is simple and can be learned quickly. Because the dialysis is continuous, there are no fluctuations of body chemistry, and as a result, patients report feeling nearly normal most of the time, in contrast to intermittent dialysis.

CAPD, however, demands strict adherence to procedure in order to avoid peritonitis—the major drawback of this method. Peritonitis results almost exclusively from failure to maintain compliance with the aseptic technique of the procedure,[1] and it can be fatal or result in loss of function of the peritoneal membrane for further dialysis. Compliance has presented a special problem with CAPD, because the dialysis procedure itself must be repeated at least three times a day, seven days per week. This repetition and the fact that the procedure is relatively easy to integrate into one's daily lifestyle places a unique stress on continued compliance that is not present with intermittent forms of self-care dialysis. The procedure inevitably becomes routine and the absence of machinery and monitoring devices tends to de-emphasize the importance of technique.

Because of its great simplicity, CAPD appears to be very adaptable and widely applicable; however, in the majority of cases, CAPD is used only for home or self care. When initially presented with the options of dialysis methods, patients may choose CAPD without having adequate insight into the difficulties of self-care. A patient who is compliant in an outpatient dialysis setting may not be compliant with CAPD; reliability varies in the same patient with different treatment situations. Errors in patient selection will result in increased morbidity and mortality.

For these reasons, we have found it necessary to try to identify the factors which characterize a successful CAPD candidate and an unsuccessful one. Certain characteristics of patients and their environment may be considered risk factors. An attempt was made to associate these characteristics with patient success or failure measured by the incidence of peritonitis or deteriorating blood chemistries.

From February 1979 to February 1980, 14 patients with end-stage renal disease of diverse etiologies and various clinical backgrounds were started on CAPD. New end-stage renal disease patients chose CAPD after being presented with the Patient Bill of Rights and various options of end-stage renal disease management.

Our CAPD procedure is similar to that of Doctors Moncrief and Oreopoulos.[2,3] The

[1] Moncrief, J. W. Continuous ambulatory peritoneal dialysis. *Dial. Transplant.* 8(11):1077, 1979.

[2] Moncrief, J. W. "Exchange Instructions and Sterile Tubing Change" (unpublished manuscript), 1979. (Available from The Austin Diagnostic Clinic, Acorn Research Lab, Austin, Texas).

[3] Oreopoulos, D. G., et al. a simple and safe technique for continuous ambulatory peritoneal dialysis (CAPD). Trans. Am. Soc. Artif. Intern. Organs 24:484–489, 1978.

teaching methods included audiovisual aids, sterile technique, handwashing, etc., lectures by the nephrologist, dialysis nurses, nurse epidemiologist, and objective written tests. Patients were considered competent to do CAPD on their own after all members of the training team concurred.

As time went on, some of the patients proved unsuccessful, as evidenced by their deteriorating blood chemistries caused by incomplete dialysis or infection caused by poor technique. All 14 patients were carefully observed in the hospital and home situation and the patients and their families were interviewed in detail. Four factors were tentatively identified as predictors of patient success or failure with CAPD: motivation, mental acuity, health beliefs, and social support. Of the 14 patients studied, one returned to outpatient hemodialysis, three returned to intermittent peritoneal dialysis, one died, and the remaining nine continue to do well on CAPD.

MOTIVATION

Motivation has been assessed by observing various traits such as punctuality with treatment schedule, questioning of material or difficult areas, and serious attitude toward the educational process. The nonmotivated patient will exhibit opposite traits. The exhibited behavior of patients does not, of course, provide the observer with anything but an indication of the degree of the person's motivation. In conjunction with other factors, emotional readiness to learn or motivation can serve to predict the individual's willingness to put forth the effort necessary to learn and comply with the procedure. Motivation that is internally generated causes the learner to value the subject matter. If the patient does not value the information taught, it is unlikely that he will achieve a high degree of understanding or compliance.[4]

The CAPD technique is not difficult, but it does require meticulous aseptic technique and attention to detail and schedule. It is essential that the patient thoroughly understand that breaks in technique increase the probability of infection, and that inattention to the frequency of the procedure increases the likelihood of deteriorating blood chemistries. In order to accomplish this, the patient must maintain enthusiasm and determination to perform correctly each time, regardless of how boring or repetitious it may become.

Observations have revealed that this is possible if the patient is internally motivated. When the patient desires to learn and values the information given, it is more likely that compliance with procedure will be given a higher priority. Conversely, if the motivation is generated from an external source (i.e. the family), it may be more difficult for the patient to maintain compliance to a potentially monotonous procedure. It may be of little or no value for this individual to extend the effort necessary to learn or comply. Two case histories are illustrative:

Patient 1 is a 46-year-old white male who had been on outpatient non-self-care hemodialysis for two years. During this time, he maintained a full-time job. He presented us with the following history: He had no complaints about outpatient hemodialysis but had read about CAPD in a popular magazine and wanted to try it because it appeared to offer a better lifestyle. His family felt that he would be more independent, would not be tied to a machine, could be at home more, and would be free to travel; essentially, they felt that the patient would lead a more normal life.

Patient 1 outwardly agreed with his family's rationale, but subsequent interviews revealed that he also felt he would miss the support offered at the outpatient center. As training progressed, he admitted that his primary motivation to try CAPD had been to provide a more normal lifestyle for his family, not necessarily for himself.

CAPD training went quickly and well. However, it was discovered on periodic home vistis that Patient 1 was careless with sterile technique in spite of re-education attempts. During the first three months on CAPD, he developed two cases of peritonitis. The second case was extermely severe and required hospitalization, and at this time he requested to be transferred back to outpatient hemodialysis. He convinced himself that he would never be able to master the CAPD technique, and his family and the dialysis team agreed with the necessity to end CAPD. He was transferred back to outpatient hemodialysis.

The problems Patient 1 had with the CAPD procedure stemmed not from his mental inability to comprehend the procedure, as he rated high on mental acuity, but rather from lack of internal motivation. Consequently he would not maintain the simple sterile technique required for the procedure. By his own admission, it was not important for him to remember all the details when he felt a shortcut would do just as well. Even after an episode of peritonitis, he did not pay attention during retraining. Further interviewing revealed that he had been satisfied with his lifestyle on outpatient hemodialysis and that he wanted to try CAPD for his family's sake. In spite of this strong external motivation, Patient 1 was unsuccessful at CAPD because he was not sufficiently internally motivated to comply with the procedure on his own. It is possible that his satisfactory two years on outpatient hemodialysis affected his internal motivation to try a different, more independent type of dialysis. However, this assumption cannot be extended to all patients who desire to switch from non-self-care dialysis to CAPD.

Patient 2 is a 58-year-old white female who had been on outpatient hemodialysis for five years. She learned about CAPD through the local endstage renal disease network and actively sought information on it. Although she was not employed, she was very active politically, and the freedom allowed by CAPD was the major attraction for her. Patient 2 had a history of chronic colitis, and during the anxiety of switching programs and training, she experienced repeated exacerbations of this problem. The colitis attacks stopped after the initial week on CAPD. However, a second problem—leakage of dialysate from around her catheter site—appeared. When this problem stopped, she developed drainage problems and required replacement of her catheter. After the new catheter was in place, she required two weeks of maintenance intermittent peritoneal dialysis in the out-patient center. She also had one early, mild case of peritonitis which was treated with oral antibiotics at home. This case of peritonitis did not result from improper technique, but from equipment failure in the form of a small hole in the dialysate bag that was not noticed until use. In spite of these obstacles, she learned the CAPD procedure and continues to do well at home six months later.

Patient 2 was internally motivated to try CAPD. She electively switched from non-self-care to outpatient hemodialysis to self-care CAPD. In spite of the many obstacles she encountered, she persevered and succeeded with CAPD because of strong internal motivation to achieve greater personal freedom.

MENTAL ACUITY

A high degree of intelligence is not a prerequisite for CAPD, but some degree of mental acuity is necessary. The procedure itself is simple but requires strict attention to detail; the patient must be able to learn the items of equipment and remember to perform the steps of the procedure in a particular order. He must be able to comprehend that the procedure is to be done without shortcuts or variations. In addition, the ability to understand basic principles of sterile technique is necessary so that this knowledge can be transferred to unexpected situations, as in the case of equipment failure. When this occurs, for example, it is necessary that the patient understand basic concepts of sterile technique in order to solve the immediate problem before calling the dialysis unit for assistance.

Patients from a variety of educational backgrounds have been trained and have received intensive education in CAPD requiring return demonstration. This training technique has usually been able to single out the individuals who do not have the mental acuity to perform CAPD. However, follow-up home visits are absolutely essential to identify those patients who are able to perform under the intensive supervision of the training instructor but unable to perform the procedure properly or recognize their weaknesses when they are at home.

Patient 3 is a 48-year-old female who was on maintenance IPD for four months when CAPD became available. Both the patient and her husband were anxious for her to try this method of dialysis because of the independent lifestyle it promised. Patient 3 appeared to have the intelligence necessary to perform the procedure and retain it.

Within a few weeks of being on home CAPD, however, she began to get recurrent cases of peritonitis. Home visit observations showed that she was unable to recall how to perform the procedure correctly, and attempts at reeducation only produced further anxiety for her. She varied her procedure each time she was observed, but was unable to recognize her inconsistencies or lack of knowledge. She did not see the necessity to consult her instruction manual or request any clarification from the dialysis unit staff. The repeated cases of peritonitis made it necessary to stop CAPD and restart IPD in the outpatient center. The switch back to IPD was distressing for this patient because she was highly motivated to become successful in home CAPD.

HEALTH BELIEFS

The health belief model, although only partially developed, is probably the most complete theory regarding readiness to take health action.[4] This model suggests that people are not likely to take health action unless the following factors are present:

They believe they are susceptible to the disease in question;

They believe that the disease would have personal effects on their lives if they should contract it;

They are aware that certain actions can be taken, and believe that these actions may reduce the likelihood of contracting the disease or reduce the severity of the disease;

[4] Redman, B. K. "The Process of Patient Teaching in Nursing." St. Louis: The C. V. Mosby Co., 1976.

They believe that the threat to them of taking the action is not as great as the threat of the disease itself. Although a critical body of evidence regarding the health belief model for understanding chronic illness has not been accumulated, it is still valuable in assessing CAPD candidates.

The evaluation of CAPD candidates includes the determining whether they believe the following:

That they have end-stage renal disease;

That they will suffer personal effects if they do not dialyze or if they use improper techniques in dialyzing;

That the threat of dialysis is less than the threat of progressive end-stage renal disease;

That the inconvenience of a detailed procedure is less than the discomfort of peritonitis. All these health beliefs will influence compliance, and if the patients' beliefs and behaviors are adequate, they can be maintained on CAPD.

A variety of beliefs have been observed among the patients, and these are common to all patients. Some patients do not perceive the threat of peritonitis as being greater than the threat of being inconvenienced by performing a detailed procedure; peritonitis does not seem to be a personal or important threat. Ideally, this health belief should be changed before a patient is trained on CAPD. If peritonitis is not perceived as a threat, there is very little impetus to maintain the tedious and time-consuming sterile technique, and the risk of peritonitis will be very high. It has been found that education concerning the dangers of peritonitis is helpful, but caution must be exercised with this information. Over-emphasis on peritonitis may make the threat of peritonitis outweigh the advantages of CAPD and discourage patients needlessly.

Patient 4 is a 31-year-old, very intelligent, white female with a history of poor compliance with medical advice since age 27, when interstitial nephritis, apparently secondary to chronic pyelonephritis, was diagnosed. End-stage renal disease was first managed with home IPD, but this had to be discontinued after four months because she refused to dialyze herself sufficiently. She was then maintained on outpatient IPD until CAPD became available and she expressed great enthusiasm for learning it.

Training was uneventful. During the first three months of CAPD at home, however, she experienced two cases of mild peritonitis each month. All were treated successfully with oral antibiotics on an outpatient basis. The frequency of peritonitis concerned and confused the dialysis team. When questioned, the patient appeared to be very knowledgeable about procedure, equipment, and sterile technique. She was able to demonstrate the procedure under questioning without error. In spite of her apparent compliance to procedure, the patient was told that CAPD was not a suitable method of dailysis for her because of the frequency of peritonitis.

It was at this time that she explained her personal health beliefs. She had never perceived peritonitis as a serious problem. She viewed it as a minor infection causing some pain but with no long-range, serious consequences. She often felt frustrated at having a chronic illness, and during these periods of frustration, she would deliberately not use sterile technique. She looked at this as a way of punishing herself for having a chronic illness.

The patient has been under psychiatric guidance since she expressed these beliefs. Counselling has been effective, and she is still on CAPD but has not had peritonitis in the last five months. Although she does not like having a chronic illness, she no longer feels the need to punish herself for it. She understands the implications of peritonitis now and views it as a greater threat than she did before.

SOCIAL SUPPORT SYSTEMS

CAPD candidates were viewed from a holistic point of view. The patient's environment and social support systems had to be assessed, as well as his or her motivation, mental acuity, and health beliefs.

Patients on intermittent dialysis in an outpatient setting can build social relationships and a sense of belonging with other patients and the staff, but CAPD is designed to be performed by the patient in the home setting. Therefore, as with other forms of self-dialysis, CAPD may effectively isolate a patient from one of the few opportunities for socialization he may have.

Responsibility for the dialysis and the loneliness of chronic illness can be addressed by center dialysis support systems. Outpatients are not so burdened with the idea that they alone are responsible for their dialysis therapy; the staff is always present to handle problems and be of assistance as necessary. A unit also provides proximity to other patients and this helps to decrease the feeling that the patient is alone in his chronic illness.

Patient 5 is a 70-year-old white male, a former engineer, who lives alone. He was quite physically capable of performing the CAPD procedure and certainly intelligent enough. However, he had no social support systems at home, and when CAPD training was completed, he had to leave the close contact with other patients and the dialysis staff. He developed three episodes of peritonitis in three months and had to be returned to outpatient IPD. He had no regret in making this change, although he had never expressed objections to CAPD and was always very well-motivated during training. The sense of belonging that occurs in an outpatient setting became less available to this patient on home dialysis, and the secondary gain obtained from socialization in the outpatient setting appeared to be the reason for poor compliance.

From the observations and interviews conducted over the last 12 months, the following conclusions have been drawn: One cannot assume compliance with CAPD simply because the patient was compliant with another form of dialysis. The dialysis team should be no less vigilant in seeking out the compliant patient when dealing with CAPD than they would be in evaluating the patient for any other form of self-dialysis. Indeed, a special effort must be made when evaluating a patient for CAPD because of its unique characteristics: great simplicity and potential for catastrophic consequences by error.

We have also found success in the transfer of interested patients from nonself-care dialysis to CAPD but we stress the need for critical evaluation both initially and in follow-up care.

Interview objectives for selection of patients for CAPD should include the following:

Assessment of mental acuity. Is the patient going to be able to learn and retain the procedure? Will the patient be able to recognize areas of uncertainty and ask about them?

Assessment of motivation. Can the patient explain why he wants to learn this method of dialysis? Is he going along with the wishes of others, i.e., family, friends or physicians? Can the patient describe the advantages of this method of dialysis over its disadvantages and over the disadvantages of other methods? Can the patient explain why this method of dialysis is attractive to him?

Assessment of health beliefs. Can the patient explain his illness and his belief of how CAPD will help? Can he explain that there are personal consequences to insufficient dialysis and not following procedure? Does he comply with other medical regimens?

Assessment of social support systems. Can the patient explain why he would want to be independent and free of a center dialysis situation?

This patient assessment serves as a starting point for the patient who is considered for the CAPD program. If the patient is selected as a CAPD candidate, this assessment is only the first step, and a continuing evaluation of the patient for his suitability for this method of dialysis therapy must take place.●

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, September 17, 1981, may be found in the Daily Digest of today's RECORD.

### MEETINGS SCHEDULED

SEPTEMBER 18

9:00 a.m.

Joint Economic

Monetary and Fiscal Policy Subcommittee

To hold hearings to examine policy initiatives designed to deal with specific problems of American ethnic groups.

S-207, Capitol

9:30 a.m.

*Governmental Affairs

Federal Expenditures, Research, and Rules Subcommittee

To hold hearings on S. 719, requiring the disclosure of Federal agency use of consultants.

3302 Dirksen Building

10:00 a.m.
Foreign Relations
To hold hearings on the nominations of Robert P. Paganelli, of New York, to be Ambassador to the Syrian Arab Republic, David E. Zweifel, of Maryland, to be Ambassador to the Yemen Arab Republic, Michael H. Nelin, of Maryland, to be Ambassador to the Democratic and Popular Republic of Algeria, Richard W. Murphy, of Maryland, to be Ambassador to the Kingdom of Saudi Arabia, and other pending nominations.
4221 Dirksen Building

SEPTEMBER 21

9:30 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 1593 and S. 125, bills revising and clarifying U.S. regulation of international liner shipping in the U.S. foreign trade.
235 Russell Building
Small Business
To hold hearings on S. 1620, extending the Small Business Administration's section 8(a) pilot procurement program to March 31, 1983.
424 Russell Building
10:00 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on the implementation of the photovoltaic program of the Department of Energy.
3110 Dirksen Building
* Foreign Relations
To hold hearings on the nominations of George S. Vest, of Maryland, to be the Representative to the European Communities, with the rank and status of Ambassador, Jack F. Matlock, Jr., of Florida, to be Ambassador to the Czechoslovak Socialist Republic, John E. Dolibois, of Ohio, to be Ambassador to Luxembourg, Raymond C. Ewing, of Virginia, to be Ambassador to the Republic of Cyprus, Faith R. Whittlesey, of Pennsylvania, to be Ambassador to Switzerland, David B. Funderburk, of North Carolina, to be Ambassador to the Socialist Republic of Romania, and Arthur A. Hartman, of New Jersey, to be Ambassador to the Union of Soviet Socialist Republics.

SEPTEMBER 22

9:00 a.m.
Office of Technology Assessment
The Board to hold a general business meeting.
Room S-138, Capitol
9:30 a.m.
Commerce, Science, and Transportation
Business, Trade and Tourism Subcommittee
To hold hearings on the State Department's plan to implement a visa waiver program for foreigners who are required to apply for American visas.
235 Russell Building
Small Business
Business meeting, to mark up S. 881, to stimulate technological innovation and to increase economic productivity by using business more effectively in Federal research and development programs, and S. 1620, extending the Small Business Administration's section (a) pilot procurement program to March 31, 1983.
424 Russell Building
Special on Aging
To hold hearings to explore the scope of criminal activities against the elderly.
6226 Dirksen Building
Budget
Closed hearings on the defense provisions of the proposed second concurrent resolution revising the Congressional budget for the Federal Government for fiscal years 1982, 1983, and 1984.
6202 Dirksen Building
10:00 a.m.
Environment and Public Works
To resume mark up of an original bill authorizing funds for the municipal wastewater treatment construction grant programs of the Clean Water Act.
4200 Dirksen Building
Governmental Affairs
To hold hearings on S. 1417, establishing a Commission to recommend policies and standards to reduce the risk of criminal assaults against the President, and review the criminal laws relating to the safety of the President.
3302 Dirksen Building
Judiciary
To hold hearings to review the President's proposal to admit refugees to the United States in 1982, and to receive the President's annual report to Congress on U.S. refugee programs.
2228 Dirksen Building
Select on Indian Affairs
To hold hearings on S. 503, providing for the purchase, sale and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation, North Dakota.
5302 Dirksen Building
Joint Economic
To hold hearings to examine the problems of the Social Security system.
2118 Rayburn Building
10:30 a.m.
Governmental Affairs
Governmental efficiency and the District of Columbia Subcommittee
To resume hearings on S. 744, authorizing the District of Columbia to issue general obligation bonds to pay specified eligible liabilities.
Room to be announced
11:00 a.m.
Veterans' Affairs
To hold hearings on fiscal year 1982 legislative recommendations of the American Legion
318 Russell Building
2:00 p.m.
Foreign Relations
To hold hearings on the nomination of John G. Dean, of New York, to be Ambassador to Thailand, and M. Virginia Schafer, of Washington, to be Ambassador to Papua, New Guinea, and to serve concurrently as Ambassador to Solomon Islands.
4221 Dirksen Building
Governmental Affairs
To hold hearings on the nominations of Charles M. Girard, of Virginia, to be an Associate Director of the Federal Emergency Management Agency, and Bruce Chapman, of Washington, to be Director of the Census.
3302 Dirksen Building
*Judiciary
Criminal Law Subcommittee
To hold hearings on S. 904 and S. 907, to provide penalties for the assassination, kidnaping, and assault of Presidential, and Vice Presidential staff members.
5110 Dirksen Building
Labor and Human Resources
To hold hearings on the nominations of Gary L. Jones, of Virginia, to be Deputy Under Secretary for Planning and Budget, Department of Education, Edward A. Curran, of Maryland, to be Director of the National Institute of Education, Jean Tufts, of New Hampshire, to be Assistant Secretary for Special Education and Rehabilitative Services, Department of Education, and William M. Bell, of Michigan, to be a Member of the Equal Employment Opportunity Commission.
4232 Dirksen Building

SEPTEMBER 23

9:00 a.m.
*Small Business
To hold hearings on the impact of high interest rates on small business, and to examine their future credit needs.
424 Russell Building
Select on Intelligence
Closed business meeting.
Room S-407, Capitol
9:30 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To resume hearings on S. 1593 and S. 125, bills revising and clarifying U.S. regulation of international liner shipping in the U.S. foreign trade.
235 Russell Building
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold hearings on proposed legislation to apply the medicare tax to Federal employees and to increase the Government contribution to the Federal employees health benefit program.
1318 Dirksen Building
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on block grant reform.
3302 Dirksen Building
Judiciary
Constitution Subcommittee
To resume hearings on proposed legislation to amend the Federal Criminal Code with respect to the circumstances under which a person charged with or convicted of a crime may be released on bail or personal recognizance.
2228 Dirksen Building
10:00 a.m.
Banking, Housing and Urban Affairs
Business meeting, to mark up S. 1230, authorizing the minting of special coins commemorating the 1984 summer Olympic games in Los Angeles, California.
5302 Dirksen Building
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building
Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee
To continue hearings on S. 744, authorizing the District of Columbia to issue general obligation bonds to pay specified eligible liabilities.
Room to be announced

Labor and Human Resources
Investigations and General Oversight Subcommittee and Labor Subcommittee
To hold joint oversight hearings on the activities of the Occupational Safety and Health Administration.
4232 Dirksen Building

10:30 a.m.
Environment and Public Works
To hold hearings on the nominations of Matthew N. Novick, of the District of Columbia, to be Inspector General, Environmental Protection Agency, and Lee M. Thomas, of South Carolina, to be an Associate Director of the Federal Emergency Management Agency.
4200 Dirksen Building

SEPTEMBER 24

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 1402, establishing uniform width and length standards for commercial motor vehicles on interstate highways.
1224 Dirksen Building

*Small Business
To continue hearings on the impact of high interest rates on business and to examine their future credit needs of business.
424 Russell Building

9:30 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To continue hearings on S. 1593 and S. 125, bills revising and clarifying U.S. regulation of international liner shipping in the U.S. foreign trade.
235 Russell Building

Judiciary
*Constitution Subcommittee
To resume oversight hearings on the implementation of the Freedom of Information Act, and on S. 1247, S. 1235, and S. 587, bills providing for the protection of certain confidential information from the disclosure requirements of the Freedom of Information Act.
2228 Dirksen Building

10:00 a.m.
Foreign Relations
To hold hearings on the proposed Convention with Canada with Respect to Taxes on Income and Capital (Ex. T, 96th Cong., 2d sess.).
4221 Dirksen Building

2:00 p.m.
Budget
To resume hearings on the proposed second concurrent resolution revising the Congressional Budget for the Federal Government for fiscal years 1982, 1983, and 1984.
6202 Dirksen Building

Foreign Relations
To hold hearings on pending tax treaties.
4221 Dirksen Building

SEPTEMBER 25

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on miscellaneous tax proposals.
2221 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on the viability of the domestic uranium mining and milling industry.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Foreign Relations
To hold hearings on the nominations of Ronald I. Spiers, of Vermont, to be Ambassador to the Islamic Republic of Pakistan, and Harry G. Barnes, Jr., of Maryland, to be Ambassador to India.
4221 Dirksen Building

Judiciary
Juvenile Justice Subcommittee
To hold hearings to explore certain issues relating to the early detection of juvenile crime.
2228 Dirksen Building

SEPTEMBER 28

9:00 a.m.
*Select on Indian Affairs
To hold hearings on S. 874, providing for additional protection of steelhead trout as a game fish.
1202 Dirksen Building

9:30 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on international investment policy.
4221 Dirksen Building

Labor and Human Resources
Aging, Family, and Human Services Subcommittee
To resume oversight hearings on the role of the Federal Government in family planning programs of Title X of the Public Health Services Act.
4232 Dirksen Building

10:00 a.m.
Judiciary
To hold hearings on proposed legislation to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

SEPTEMBER 29

9:30 a.m.
Veterans' Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans, and H. Con. Res. 76, expressing the sense of Congress that the Secretary of the Army provide for a plaque in Arlington National Cemetery honoring members of the U.S. Armed Forces who died during the rescue attempt in Iran.
412 Russell Building

10:00 a.m.
Governmental Affairs
To hold hearings on proposed legislation to extend certain provisions of the Inspector General Act of 1981 to the Departments of Justice, Defense, and Treasury.
3302 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

2:00 p.m.
Judiciary
To continue hearings on proposed legislation to reform the Federal criminal laws and streamline the administration of criminal justice.
228 Dirksen Building

SEPTEMBER 30

9:30 a.m.
Commerce, Science, and Transportation
To hold joint oversight hearings with the House Committee on Science and Technology on Federal patent policy.
235 Russell Building

Environment and Public Works
Transportation Subcommittee
Business meeting, to mark up S. 1024, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on matters relating to the hiring of illegal aliens.
412 Russell Building

*Judiciary
Separation of Power Subcommittee
To hold hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on the social impact of forced busing.
2228 Dirksen Building

2:00 p.m.
Environment and Public Works
Transportation Subcommittee
Business meeting, to continue markup of S. 1024, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

OCTOBER 1

9:30 a.m.
Foreign Relations
To hold hearings on the Airborne Warning and Control System (AWACS) and F-15 enhancements arms sales package to Saudi Arabia.
1202 Dirksen Building

Labor and Human Resources
To resume hearings on S. 234, to encourage the establishment of home health care programs and to provide expanded coverage of home health services under the medicare and medicaid programs.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume hearings on S. 1542, prohibiting a company operating a common carrier railroad from holding Federal coal leases unless the coal is used for railroad purposes.
3110 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To continue hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on the legal and constitutional issues of busing.

2:00 p.m.
Foreign Relations
To continue hearings on the Airborne Warning and Control System (AWACS) and F-15 enhancements arms sales package to Saudi Arabia.
318 Russell Building

OCTOBER 5

9:30 a.m.
Judiciary
*Constitution Subcommittee
To resume hearings on proposed constitutional amendments relating to abortion issues.
2228 Dirksen Building
Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

2:00 p.m.
Judiciary
*Criminal Law Subcommittee
To hold hearings on S. 101 and S. 751, bills to eliminate and establish an alternative to the exclusionary rule in Federal criminal proceedings.
6226 Dirksen Building

OCTOBER 6

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 709, prohibiting the sale of beverage containers without a minimum refund value, and prohibiting the sale of metal beverage containers with detachable openings.
235 Russell Building

# HOUSE OF REPRESENTATIVES—*Thursday, September 17, 1981*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. FOLEY).

## DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
*September 16, 1981.*

I hereby designate the Honorable THOMAS S. FOLEY to act as Speaker pro tempore on Thursday, September 17, 1981.

THOMAS P. O'NEILL, Jr.,
*Speaker of the House of Representatives.*

## PRAYER

The Reverend Corbin Cherry, chaplain, Veterans' Administration, Washington, D.C., offered the following prayer:

Almighty God, as this day begins, we turn to You for guidance and strength to meet the tasks that this day sends our way. As we gather from all parts of this great Nation to aid this Nation in the fulfillment of aged dreams, we ask for courage to climb the mountains of adversity that lie ahead of us, for the ability to exist in the days of tranquility and, above all, for the desire to bring about within our hearts and minds, and the hearts and minds of our brothers and sisters, the great beauty of our country and its history and the joy in relating to a God who grants us all the beauty of freedom, with the hope that all this is possible.

As these Representatives begin this, another day, grant them deep insight, ever-present love of this country, and a profound sense of duty, realizing the joy that can be real in coming to grips with God, country, and fellow man. We offer this prayer in Your name. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 105. Joint resolution to designate October 1981 as "National P.T.A. Membership Month."

## THE REVEREND CORBIN L. CHERRY

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, it is my privilege to welcome as our guest chaplain today, the Reverend Corbin L. Cherry, who is head of the Chaplain Service for the Veterans' Administration's hospital system.

The first combat wounded chaplain to hold that post, is a Methodist minister and was born in Norfolk, Va. He was eductated at High Point College in North Carolina and the Candler School of Theology of Emory University, where he received his bachelor of divinity degree in 1962.

When Reverend Cherry was appointed to his present position in 1978, the former VA Chief Max Cleland said:

I can think of no one better qualified to counsel and inspire our hospitalized veterans than Corbin Cherry. He will provide inspiration to our patients as well as to the dedicated chaplains who serve them. His courageous recovery from his wounds and his leadership in a variety of community and pastoral activities since that time will, I know, make for an exciting and vital period in the annals of this extremely important and useful service.

Born on May 16, 1938, Chaplain Cherry has served in a pastoral capacity in the communities of Bath and Goldsboro, N.C., as well as a chaplain in the Army. During his Army career he was assigned to duty at Fort Bragg, N.C., for a year, served in Vietnam for a year, at Walter Reed Army Hospital for an additional 12 months, and at Letterman Army Hospital in San Francisco for 3 years.

His military decorations include the Silver Star, Bronze Star, three Air Medals, two Purple Hearts and the Vietnamese Cross of Gallantry. Reverend Cherry is an avid golfer and skier and enjoys music and singing among his leisure activities. He has served on the board of directors of both the Western International Amputee Golfers Association and the National Inconvenienced Sportsman's Association.

Mr. Speaker. In closing I would note that the VA Chaplain Service consists of over 900 ministers, priests, and rabbis, who provide 24-hour coverage in the VA's nationwide hospital, nursing home, and domiciliary network. Over 400 chaplains serve on a full-time basis, about 290 part-time and another 220 are on intermittent duty. An additional 125 serve on an on-call basis.

I join my colleagues in welcoming Chaplain Cherry to the House of Representatives today and express our appreciation to him for his service to his Nation.

## THE PRESIDENT'S FURTHER SOCIAL SECURITY CUTS

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend this remarks.)

Mr. PICKLE. Mr. Speaker, I realize that the President has said he will not cut social security benefits further than what he has already proposed. I think that this ought to be pointed out, because what he has already proposed are cuts in social security amounting to $280.1 billion between now and 1990.

Through the Gramm-Latta II budget reconciliation, based almost entirely on the President's recommendations, we have cut some $4 billion out of social security in 1982—and some $90 billion out of social security between now and 1990. But in addition, the President has already sent to the Congress proposals for further cuts in social security benefits amounting to an additional $4.8 billion in 1982—and at least $190.1 billion between now and 1990. He has not backed off these proposals for cutbacks, which include severe penalties for early retirement and which eliminate approximately one-third of the entire disability program.

I think it should be clear that when the President says he is not proposing more cuts in social security, he means no more than the $280.1 billion he has already proposed. This is how he proposes to make social security solvent and this is how he proposes to balance his budget.

I have proposed instead that we recognize the fact that we will not make these enormous cuts in social security and that we go ahead and recognize we must guarantee social security payments over the short run with some general revenues, directly or indirectly. That is not a decision I came to easily, but I am not afraid of that decision either. Our choices are simple. We can hope that the economy has no downturns for the rest of the decade and we can therefore scrape by with little more than we have done now. We can enact deep cuts either all together or piece by piece through the budget process as each year the fund is in trouble once again. Or we can go ahead and shore up the social security reserves with general funds for the

short term and let the public have some peace of mind on this issue.

I hope the Members will consider this carefully as they decide what to do on this issue in the coming months, and do it on a bipartisan basis.

## MR. WATT SUBSTITUTES EXPLOITATION FOR STEWARDSHIP OF AMERICA'S PUBLIC LANDS

(Mr. AuCOIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AuCOIN. Mr. Speaker, when President Reagan picked James Watt to be his Interior Secretary, Mr. Watt cautioned in advance that he intended to be zealous, outspoken, and controversial in his pursuit of the administration's resource policies.

Whatever else one might say of Mr. Watt's performance to date, no one can accuse him of not living up to his own billing. With a single-mindedness unmatched by any other high priest of this administration, Mr. Watt has set for himself the goal of substituting exploitation for stewardship of America's public lands.

He has let it be known that there is no room in his Department of the Interior for preservationists or anyone who doubts the new dogma, which is that the worth of our public lands and resources is to be measured solely by the dollar value of the gas, oil, and minerals that can be exploited from them.

Mr. Dan Lufkin, chairman of the President's Task Force on the Environment recently said this to Mr. Reagan:

> Your appointees to Cabinet positions must of necessity reflect your views. Thus it is up to you to decide whether they are serving you well.

Mr. Speaker, I do not know if James Watt is serving the President. But I do know he is not serving the American people.

## SECRETARY WATT ALLOWS FOREIGNERS TO EXPLOIT PUBLIC LANDS

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEAVER. Mr. Speaker, Secretary of the Interior James Watt begins most of his speeches by saying, "I am an American." Yet this same American, Mr. Watt, has put into the Federal Register a rule change for the Department of the Interior which would allow foreigners temporary use permits or access across public lands. Previously only American citizens or U.S. corporations could have permitted access across our public lands. These lands belong to Americans.

Now this Mr. Watt, who says he is an American, is proposing a regulation to allow foreigners to come in and use our public lands to help them exploit our Nation's resources.

## COOPERATION IN THE MONETARY SYSTEM

(Mr. WATKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WATKINS. Mr. Speaker, on Monday of this week I sent a letter to the President of the United States. I sent the letter in the spirit of cooperation and in the spirit of wanting to help.

I asked the President to appoint a bipartisan Presidential commission to study the monetary system and the Federal Reserve Board of this country. There has been tremendous change in the monetary system in the last 10 years; however, the changes have not been recognized and we have not monitored these changes. Just utilizing high interest rates as controls on investment capital will not solve the problem of inflation. In fact, high interst rates add to the inflation. It is just a simple truth. It is just a simple fact that high interest rates will not allow supply side economics to work.

Therefore, I am calling on the President. I am calling on the Congress to work together in harmony, in the spirit of wanting to solve the economic problems of this country by appointing a Presidential commission, one to study the monetary policies—the growth and the changes—and also the Federal Reserve Board.

## SECRETARY WATT'S EFFRONTERY TO THE CONGRESS

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, at the beginning of this summer the House Interior Committee under the emergency provisions provided it by the Forest Land Practices Management Act directed the withdrawal of 1½ million acres of the Bob Marshall Wilderness complex in Montana from oil and gas leasing and therefore required the Secretary of the Interior, James Watt, to carry out that withdrawal.

Secretary Watt, in a very generous gesture, privately came to Capitol Hill to visit Congressman MORRIS UDALL bringing with him the withdrawal papers. He told Congressman UDALL that he was signing those papers in his presence because he wanted to establish a harmony with the Interior Committee and with the Congress. The Interior Committee and the Congress appreciated that new mood of cooperation.

However, last week, Secretary Watt was in Montana and when asked about the action of the Interior Committee, which he had agreed to support, he called it a politically manufactured controversy.

As the administration seeks to identify the reasons Secretary Watt has difficulty with this Congress, they should examine this incident of effrontery to the U.S. Congress and the Interior Committee.

## SECRETARY WATT'S REORGANIZATION OF OFFICE OF STRIP MINING

(Mr. WALGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALGREN. Mr. Speaker, the Secretary of the Interior is the steward of the Nation's natural resources. He is the manager of one-fifth of our Nation's land. I am very concerned about the course Secretary of Interior James Watt is pursuing and I question whether his approach insures a proper balance between preserving the environment and using natural resources appropriately.

I am particularly concerned about Secretary Watt's reorganization of the Office of Strip Mining. It is more than shuffling bureaucratic boxes around because it means a diminishing of commitment to mine coal in a way that does not destroy the environment. On May 21, Secretary Watt announced that the number of field offices for the Office of Surface Mining would be cut almost in half, from 42 to 22 and that personnel would be cut almost in half. I question whether most States have the technical support or the enforcement capability to step in where the Federal Government will stop off. I think there is some evidence that important functions like the review of petitions to designate areas as unsuitable for mining will be delayed.

I also question certain changes in regulations published in July. These regulations, if adopted, would remove the requirement of on-the-ground inspection; would delete all provisions dealing with public participation in enforcement; would allow the termination of notices of violations simply on the basis of a signed statement by a mineowner that the violation had been abated, without any inspection to determine if in fact it has been abated. This would appear to me to represent a sharp reduction in controls over abuse of sound strip mining practices.

In Pennsylvania, we are blessed with abundant coal reserves. I have often pointed out that Pennsylvania is the Saudia Arabia of coal. At the same time, Pennsylvania has in place one of the most effective strip mining laws in

the country. If any State has an economic stake in the expeditious extraction and marketing of coal, it is Pennsylvania. But we fully recognize that economic health and growth can be compatible with effective and environmentally responsible management of natural resources. What I am saying is that Pennsylvania should stand as an example to Federal efforts to strip mine responsibly and can show those whose motives are largely profits that we do not have to destroy our resources as we mine coal.

I had hoped that the days of rampant strip mining were over, the days when peoples' homes and farms were flooded and land eroded because of strip mining. I am afraid that the Secretary's actions are taking us down a road of recklessness.

## DISAGREEMENT BETWEEN ADMINISTRATION AND SAUDI ARABIA ON AWACS SALE

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, open disagreement between the administration and Saudi Arabia regarding the purpose of the AWACS sale should raise serious concern from the Congress.

The administration consistently claims that AWACS aircraft are necessary for Saudi defenses against Iran and Soviet-sponsored threats. The Saudis, however, list Israel as their number one enemy, and profess that defense of the Islamic holy places have priority in Saudi military planning. It should concern the Congress that the Islamic holy places, Mecca and Medina, are a good distance from the Persian Gulf, where the administration would like the AWACS to patrol, and are closer to the Red Sea—and Israel—than the vital oil fields. Congress should also question the ability of tiny Saudi Arabia to seriously resist a Soviet military advance, even if AWACS were employed.

It is time for Congress to face reality. The AWACS represent no serious threat to the Soviet Union, but they do represent a genuine danger to Israel and to United States interests in the Middle East.

□ 1015

## COMMEMORATION OF VON STEUBEN DAY

(Mr. NELLIGAN asked and was given permision to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, September 17 is the anniversary of the birth of Gen. Friedrich Wilhelm von Steuben, one of the leading patriots of the Revolutionary War. Von Steuben was second only to General Washington as a shaper of the Continental Army.

Under George Washington, the Continental Army suffered through the winter of 1777 at Valley Forge. With his arrival in February 1778, General Von Steuben lent military expertise to an army whose performance had been inconsistent. One of Washington's last official acts as Commander in Chief of the American forces was to write of his gratitude and respect for General Von Steuben's help in forming the American Army.

I extend my greetings and best wishes to German-Americans in the 11th District of Pennsylvania, which I am honored to represent. I join with them in commemorating General Von Steuben's outstanding contribution to American greatness.

Incidentally, today is also the anniversary of the birth of another wonderful person of German descent, Mary Melissa Gansel Nelligan, my mother. Happy birthday, Mom.

## PRINTING OF BROCHURE ENTITLED "HOW OUR LAWS ARE MADE"

Mr. GAYDOS. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged concurrent resolution (H. Con. Res. 106) to provide for the printing of the brochure entitled, "How Our Laws Are Made," and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 106

*Resolved by the House of Representatives (the Senate concurring),* That the brochure entitled "How Our Laws Are Made", as set out in House Document Numbered 96-352 of the Ninety-sixth Congress, be printed as a House document, with a suitable paperback cover of a style, design, and color, to be selected by the chairman of the Committee on the Judiciary of the House of Representatives, with emendations, and with a foreword by the Honorable Peter W. Rodino, Junior; and that there be printed two hundred and forty-six thousand additional copies, of which twenty-five thousand shall be for the use of the Committee on the Judiciary and the balance prorated to the Members of the House of Representatives.

Mr. GAYDOS (during the reading). Mr. Speaker, I ask unanimous consent that the concurrent resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 1 hour.

Mr. GAYDOS. Mr. Speaker, House Concurrent Resolution 106 authorizes the printing of the brochure entitled, "How Our Laws Are Made" with emendations, as a House document. In addition to the usual number of 1,500, the concurrent resolution, further, authorizes the printing of 246,000 copies of the brochure of which 25,000 shall be for the use of the Committee on the Judiciary, and 221,000 shall be prorated to the Members of the House. The Government Printing Office has estimated that the cost of this printing will be as follows:

For the first 1,500, $1,739.01; 246,000 additional copies will cost $80,245.20. The total cost is $81,984.21.

At this time I yield to my colleague, the gentlewoman from Illinois (Mrs. MARTIN), for purposes of debate only.

Mrs. MARTIN of Illinois. I thank the gentleman for yielding.

Mr. Speaker, I would just note for the record that this bill enjoyed bipartisan support and, in fact, received a unanimous vote from the entire House Administration Committee.

Mr. GAYDOS. I thank my colleague.

I think a point should be made at this time that the Members have been waiting for a resupply for the last 4 months. The requests have been numerous and continual.

I want to conclude by suggesting that this handbook is intended to provide a readable and nontechnical outline of the background and the numerous steps of our Federal lawmaking process from the origin of an idea for a legislative proposal through its publication as a statute. Since a significant number of laws originate in the House of Representatives, the document focuses principally on the procedures in the House and is presently being revised by the Office of the Law Revision Counsel in the House of Representatives.

In the past, as a matter of general practice, Members have made this document available to constituents and other visitors to Members' offices. Additionally, many Members distribute it to community groups and schools within their district.

This brochure was last authorized by concurrent resolution during the 96th Congress, 2d session. The supply of this document for Members has been exhausted for the last 4 months.

Mr. Speaker, I move the previous question on the concurrent resolution.

The previous question was ordered.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

## PROVIDING FOR THE CONSIDERATION OF H.R. 3136, OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1981

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 216 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 216

*Resolved,* That upon the adoption of this resolution it shall be in order to move, sections 401(a) and 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3136) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Foreign Affairs now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI and of sections 401(a) and 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 216 is an open rule providing for the consideration of H.R. 3136, Overseas Private Investment Corporation Amendments Act of 1981.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs.

The bill shall be read for amendment under the 5-minute rule, and House Resolution 216 provides for one motion to recommit with or without instructions.

It should be noted that the rule makes in order the amendment in the nature of a substitute recommended by the Committee on Foreign Affairs now printed in the bill as an original bill for the purpose of amendment under the 5-minute rule.

House Resolution 216 further waives points of order against the substitute for failure to comply with the provisions of clause 5 of rule XXI. Clause 5 of rule XXI prohibits appropriations in a legislative bill. Section 5(c) of the committee amendment, which mandates the continued transfer of OPIC resources to the Direct Investment Fund and the use of such funds for eligible small business investment projects, could involve appropriations in a legislative measure.

The rule waives points of order against both the bill and the committee amendment in the nature of a substitute for failure to comply with section 401(a) of the Congressional Budget Act. Section 401(a) bars consideration of any bill which provides new contract authority unless that bill also provides that such new authority is to be effective for any fiscal year only to such extent or in such amounts as are provided in advance in appropriation acts. Section 5(b) of the committee amendment in the nature of a substitute relating to risk insurance involves contract authority. Since the section fails to limit the availability of such contract authority, the measure would be subject to a point of order under section 401(a) of the Budget Act.

In addition, the rule waives points of order against both the bill and the committee amendment in the nature of a substitute for failure to comply with section 401(b)(1) of the Congressional Budget Act. Section 401(b)(1) bars consideration of any bill which provides new entitlement authority which is to become effective before the first day of the fiscal year which begins during the calendar year in which such bill is reported. Section 3(a)(1) of the committee amendment in the nature of a substitute expands the OPIC Board of Directors from 13 to 15 members, thereby providing new entitlement authority in the form of fixed compensation amounts for such new members. Since the section would be effective upon enactment—and thus, arguably before October 1, 1981—it would be subject to a point of order under section 401(b)(1) of the Budget Act.

I have been advised that the Foreign Affairs Committee intends to offer floor amendments to sections 5(b) and 3(a)(1) to correct the Budget Act violations. Accordingly, the Committee on the Budget has informed the Rules Committee that it has no objections to technical waivers of sections 401(a) and 401(b)(1) of the Budget Act in order to permit consideration of the bill and the committee amendment in the nature of a substitute.

The purpose of H.R. 3136 is to provide for the continuation for an additional 4 years of Overseas Private Investment Corporation insurance and guaranties of U.S. investments which complement U.S. foreign assistance programs and contribute to economic development of less developed countries. In the absence of this legislation, OPIC's authority to issue further insurance and guaranties under existing law would expire at the end of the current fiscal year. Since OPIC operates on a self-sustaining basis, no additional funds have been requested by the executive branch for OPIC, and none is authorized to be appropriated by this bill.

The bill also increases from $1,000 in 1975 dollars to $2,950 in 1979 dollars the per capita gross national product ceiling for developing countries above which OPIC is required to restrict its insurance and financing activities. The measure mandates continuation of the direct investment program, which provides financing for developmental projects sponsored by or significantly involving smaller U.S. firms.

Additionally, the bill removes categorical statutory restrictions upon OPIC support of projects involving copper, palm oil, citrus, and sugar. Further, it expands the political risk insurance the corporation is permitted to offer to include losses due to civil strife.

I am not aware of any opposition to the rule on H.R. 3136, and I urge my colleagues to adopt it.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Ohio (Mr. HALL), has gone into depth on the provisions of the rule. I know of no objection to the rule. It is an open rule. The Budget Committee has no objection.

I urge adoption of the rule.

Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of House Resolution 216, the ruling providing for consideration of H.R. 3136, the Overseas Private Investment Corporation Amendments Act of 1981.

In addition to the unanimous approval of this legislation by our subcommittee and the full Foreign Affairs Committee, the House Republican Policy Committee endorses this legislation to continue the operation of OPIC for another 4 years.

OPIC serves the dual purpose of aiding development overseas at the same time it supports expansion of American trade benefits, by encouraging private investment in developing countries. I have long believed that private investment is a key ingredient in bolstering development, and OPIC has played an important part in securing investment where it is needed.

I believe OPIC offers a valuable contribution both to America's own domestic economic health and to the developing countries, where private U.S. investment serves to promote both development and trade.

Mr. Speaker, I urge my colleagues to give their full support to legislation reauthorizing the operation of OPIC and to pass this rule providing for consideration of OPIC at an early date.

Mr. Speaker, I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## PROVIDING FOR THE CONSIDERATION OF H.R. 3518, DEPARTMENT OF STATE AUTHORIZATION ACT, FISCAL YEARS 1982 AND 1983

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 182 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 182

*Resolved*, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3518) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes, the first reading of the bill shall be dispensed with, and all points of order against the bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit. After the passage of H.R. 3518, it shall be in order, sections 401(a), 401(b)(1), and 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to take from the Speaker's table the bill S. 1193 and to consider said bill in the House, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 3518 as passed by the House.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR) for purposes of debate only, pending which I yield myself such time as I may consume.

□ 1030

Mr. Speaker, House Resolution 182 is an open rule providing for the consideration of H.R. 3518, the Department of State Authorization Act for fiscal years 1982 and 1983.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs.

In order to expedite consideration of the bill, the rule states that the bill shall be read for amendment under the 5-minute rule by titles instead of by sections. House Resolution 182 further provides for one motion to recommit.

It should be noted that the rule waives a point of order against the bill under section 402(a) of the Congressional Budget Act. Section 402(a) provides that it shall not be in order to consider any bill which authorizes the enactment of new budget authority for a fiscal year unless that bill has been reported on or before May 15 preceding the beginning of such fiscal year.

Section 302 of H.R. 3518 authorizes the appropriation of $100.3 million in fiscal year 1981 for the Board for International Broadcasting.

Various other provisions of the bill may indirectly authorize appropriations for fiscal year 1981. For example, section 119 grants to the Secretary of State basic authorities concerning the activities and operations of foreign missions in the United States which might indirectly authorize appropriations for the current fiscal year. Since this bill was not reported on or before May 15, 1980, it would be subject to a point of order under section 402(a) of the Budget Act.

The chairman of the Budget Committee has advised the Committee on Rules that the Budget Committee supports a waiver of section 402(a) of the Budget Act. The Budget Committee has noted that the fiscal 1981 funds authorized to be appropriated for the Board for International Broadcasting were included in the Supplemental Appropriations and Rescission Act of 1981. This is Public Law 97-12, which was approved on June 5, 1981. The Budget Committee further has brought to the attention of the Rules Committee that the bill will not be enacted until fiscal year 1982, so the indirect authorizations actually will not be used to provide budget authority for fiscal year 1981. Therefore, the Budget Committee does not object to a waiver of section 402(a) of the Budget Act for H.R. 3518.

House Resolution 182 also waives all points of order against the bill for failure to comply with the provisions of clause 5 of rule XXI. Clause 5 of rule XXI prohibits appropriations in a legislative bill.

Several provisions of H.R. 3518 could be considered appropriations in a legislative bill. For example, section 107 provides for the transfer of certain funds to an appropriation account. Other sections, such as section 114 and section 207, provide for the crediting of certain funds to appropriations. Therefore, the rule waives all points of order against the bill for violations of clause 5 of rule XXI.

Finally, the rule waives certain provisions of the Budget Act in order to facilitate a conference with the Senate on the State Department Authorization Act. The Senate passed its version of this legislation, S. 1193, on June 18.

After the passage of H.R. 3518, the rule makes in order the consideration of S. 1193, and waives the following provisions of the Budget Act against the Senate bill: Section 401(a), new spending authority for a fiscal year not provided for in advance in appropriation acts; section 401(b)(1), entitlement authority effective before October 1, 1981; and section 402(a), requiring new budget authority to be reported by May 15 preceding the beginning of the fiscal year for which it becomes effective.

It is the intention of the Committee on Foreign Affairs, upon the passage of H.R. 3518, to take up for consideration Senate companion bill, S. 1193, for the purpose of striking everything after the enacting clause and inserting in lieu thereof, as an amendment, the text of H.R. 3518, and requesting a conference thereon. The Rules Committee has been advised that the House Budget Committee supports the waivers of the Budget Act with respect to S. 1193 in order to facilitate a conference on the legislation.

This legislation authorizes appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting. According to the Committee on Foreign Affairs, the fiscal 1982 authorization of $3.13 billion is identical to the administration's request. The authorization amount increases in fiscal 1983 in order to adjust for inflation. In this regard, the Foreign Affairs Committee points out that the overseas rate of inflation is 18 percent.

This authorization bill also establishes a new Office of Foreign Missions in the Department of State to regulate the operation of foreign missions in the United States. Further, it extends from 5 to 10 years the period in which U.S. passports not subject to special regulation will remain valid.

This provision will apply only to passports issued after the date of the bill's enactment.

Section 119 of the bill grants to the National Capital Planning Commission the authority to decide issues concerning the location of foreign missions in the District of Columbia. The Committee on the District of Columbia received sequential referral of H.R. 3518 in order to consider section 119, which contains matters that traditionally have been within the jurisdiction of the District of Columbia Committee.

The District of Columbia Committee reported an amendment to H.R. 3518 which strikes the provision granting the Commission authority over the location of foreign missions in the District of Columbia. The committee's amendment is an interim measure while negotiations continue between the Federal and city governments about authority over foreign mission locations in the District of Columbia.

The District of Columbia Committee, which received sequential referral of H.R. 3518, supported the rule request of the Foreign Affairs Committee, which was granted by the Rules Committee.

I am not aware of any opposition to the rule on H.R. 3518, and I urge my colleagues to adopt it.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 182 is an open rule to facilitate consideration of H.R. 3518, the Department of State and related agencies authorization bill for fiscal 1982 and 1983. The resolution waives points of order that would otherwise lie against consideration of the bill for failure to comply with the Budget Act, as well as points of order that would otherwise lie against the bill for failure to comply with clause 5 of rule XXI.

Section 402(a) of the Budget Act prohibits consideration of any bill which authorizes the enactment of new budget authority for a fiscal year unless that bill has been reported on or before May 15 of the preceding year. In this case, the Committee on Foreign Affairs has reported H.R. 3518, which authorizes the appropriation of funds in fiscal 1981, but it did not report the bill on or before May 15, 1980.

Clause 5 of rule XXI prohibits appropriations in a legislative bill, and the waiver provided by this rule is necessary because several paragraphs of H.R. 3518 may constitute appropriations in a legislative bill.

While these paragraphs are not specified in the resolution, I will ask unanimous consent at the appropriate time to place in the RECORD a brief summary of the provisions of the bill for which waivers of points of order are provided for in this resolution.

Mr. Speaker, in addition to granting these waivers, the resolution provides that the bill shall be read for amendment under the 5-minute rule by titles instead of by sections and one motion to recommit is provided for.

After passage of the bill, it shall be in order under this rule to take from the Speaker's table the Senate companion bill, S. 1193, and to consider that bill in the House with a motion to insert the provisions of H.R. 3518 as passed by the House. For this procedure, three waivers of the Budget Act are necessary and are provided for in House Resolution 182.

In the interests of time, I will include a summary of the provisions of this rule, including the specific provisions of the Budget Act that are being waived, in the RECORD.

Mr. Speaker, in essence, this rule provides for orderly consideration of the bill in a situation where the 1981 funds have already been appropriated, and this authorization bill was not reported by May 15 of last year. As far as taking up the Senate companion bill, this rule is designed to facilitate a conference with the Senate on the matter.

I do think it important to point out to the Members that there was no controversy about the necessity for these waivers in our Rules Committee hearing, and the waivers themselves are supported by the Committee on the Budget.

In his letter to Chairman BOLLING, Chairman JONES pointed out that section 302 of the bill, H.R. 3518, authorizes the appropriation of funds in fiscal year 1981 for the Board of International Broadcasting. And, various other provisions of the bill may indirectly authorize appropriations for fiscal year 1981, such as section 119.

According to Chairman JONES' letter, the Committee on the Budget met on July 14 and voted to support the waiver as requested by the Committee on Foreign Affairs because—

(1) The 1981 funds authorized to be appropriated for the Board of International Broadcasting were included in the Supplemental Appropriations and Rescission Act of 1981 (approved June 5, 1981), and (2) the bill will not be enacted until fiscal year 1982 so the indirect authorizations will not be used to provide budget authority for fiscal year 1981.

As to the bill itself, H.R. 3518 authorizes appropriations totaling $3.133 billion for the Department of State, the International Communication Agency, the Board for International Broadcasting, and the Inter-American Foundation for fiscal 1982.

The amounts appropriated for fiscal 1982 are in line with the request of the Reagan administration.

For fiscal 1983, however, the committee bill is approximately $800 million more than the administration's request. For this reason, the administration opposes H.R. 3518 in its reported form and would support amendments to reduce the amounts to be authorized for fiscal 1983.

Mr. Speaker, I support the rule as reported by the Committee on Rules so the House can proceed to consider the measure.

Mr. Speaker, at this point I place in the RECORD a brief summary of the provision of House Resolution 182 and a brief summary of the provisions of H.R. 3518 for which the waivers contained in the rule apply:

SUMMARY OF HOUSE RESOLUTION 182

1. Open Rule.

2. Waives Section 402(a) of the Congressional Budget Act (requiring new budget authority to be reported by May 15 preceding the beginning of the fiscal year for which it becomes effective) against consideration of the bill.

3. Waives clause 5 of Rule XXI (appropriations in a legislative bill) against consideration of the bill.

4. Bill to be read by titles instead of by sections.

5. Provides one motion to recommit.

6. After passage of H.R. 3518, makes in order consideration of S. 1193 and waives the following provisions of the Congressional Budget Act against the Senate bill: Section 401(a) (new spending authority for a fiscal year not provided for in advance in an appropriation act); Section 401(b)(1) (entitlement authority effective before October 1, 1981; and Section 402(a) (requiring new budget authority to be reported by May 15 preceding the beginning of the fiscal year for which it becomes effective.)

PROVISIONS OF H.R. 3518 FOR WHICH WAIVERS OF POINTS OF ORDER ARE PROVIDED FOR IN RULE

The following sections represent authorities requested by the Executive branch and would permit the use of already-appropriated funds for slightly different purposes:

Section 107. *Currency Fluctuations.*

This section provides a means for the Secretary of State to maintain approved levels of activities under rapidly changing economic conditions. The authority has been in existence for two years, and this section, effective October 1, 1981, would clarify provisions of current law to insure authorization of the amount of appropriations necessary for the purpose.

Sections 110 and 112. *Pan American Institute of Geography and History, and Pan American Railway Congress.*

These sections provide legal authority for the United States to pay its past assessments to these two organizations by removeing an authorization ceiling which no longer covers the actual financial obligation of the United States.

Section 114. *Living quarters for the staff of the U.S. Representative to the United Nations.*

This section authorizes the lease or rental of living quarters for the use of the staff of the U.S. Representative to the United Nations and permits more efficient use of available funds to meet the high costs of the New York housing market.

Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding. I would certainly argee with the gentleman

with regard to the rule. I see no problems with the details of this rule at all.

The problem I have with the rule is the bill that it brings onto the floor. The bill as far as fiscal year 1982 is totally in line with the administration's budget. However, if we look toward fiscal year 1983, we all of a sudden realize that what this bill is proposing is about a 26-percent increase in spending.

That is the kind of spending rate which has the financial markets in this country concerned at the present time. They are concerned that this Congress is not going to stick to the projected targets we have in spending, and here we have a bill coming to us that authorizes spending for the upcoming year and increases the rate of spending by a figure which far exceeds any predicted rate of inflation. So, this is my concern. We are raising most of that cost just in the administration of foreign affairs within the Department of State, and it seems to me that we have an obligation to try to stick as closely as possible in these authorization bills to the Executive requests for the upcoming fiscal year.

This far exceeds the Executive requests for the upcoming year, and it seems to me an $800 million increase in a buget that averages just little over $3 billion a year for the 2-year period of time is an excessive increase in the bill.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I will be glad to yield.

Mr. FASCELL. Mr. Speaker, the gentleman is absolutely right. We followed the 1982 request right to the dollar. There was a down curve, however, in the 1983 request with respect to ICA and the State Department. What the committee did was to take only the average overseas inflationary factor. We did not add a single job or a single program.

What we are talking about is the responsibility of manning the U.S. posts around the world, and we are talking about the kinds of programs that are very important, such as those in ICA. It is not the U.S. domestic inflation factor that affects our operations overseas. We are talking about an average overseas inflation rate over which we have no control.

What we tried to do is to be sure that with the cuts that the administration made, because we are already cutting 550 positions, at least we would not aggravate an already critical resource shortage and end up letting overseas inflation rates control the operations of the State Department, ICA, and BIB and that is the reason for the percentage increase.

One final thing; this is within the reconciliation figure. It is in the budget.

Mr. WALKER. I thank the gentleman for his explanation. It still seems to me right now that we have got a situation in this country where financial markets are reacting to whether or not we are going to stick close to our spending figures, or whether they think the administration over a period of 3 years is going to stick close to its figures. The administration's figures are substantially lower than what are in this bill for 1983. I think that is an improper signal to be sending at the present time.

I thank the gentleman for his explanation, and I thank the gentleman from Missouri for yielding.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LAGOMARSINO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 385, nays 5, not voting 43, as follows:

The Clerk announced the following pairs:

Mr. Young of Missouri with Mr. Lujan.
Mr. Crockett with Mrs. Heckler.
Mr. Pepper with Mr. Young of Alaska.
Mr. Weiss with Mr. O'Brien.
Mr. Ginn with Mr. Stanton of Ohio.
Mr. Barnard with Mr. Goldwater.
Mr. Rostenkowski with Mr. Wampler.
Mr. Hightower with Mr. Rudd.
Mr. Rosenthal with Mr. Smith of Alabama.
Mr. Ford of Michigan with Mr. Dougherty.
Mr. Santini with Mr. Burgener.
Mr. Roybal with Mr. Coughlin.
Mr. Clay with Mr. Bliley.
Mr. Phillip Burton with Mr. Daub.
Mrs. Byron with Mr. McKinney.
Mr. de la Garza with Mrs. Schneider.
Mr. Rangel with Mr. McCloskey.
Mr. John L. Burton with Mr. Craig.
Mr. Savage with Mr. Ralph M. Hall.
Mr. Aspin with Mr. Michel.
Mr. Fithian with Mr. Jenkins.

Mr. MINISH changed his vote from "present" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO FILE REPORT ON H.R. 4284, LELAND BOWMAN LOCK

Mr. BREAUX. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight to file a report on the bill (H.R. 4284) to name the lock authorized as a replacement for Vermilion Lock, Louisiana, as "Leland Bowman Lock."

The SPEAKER pro tempore (Mr. BRINKLEY). Is there objection to the request of the gentleman from Louisiana?

There was no objection.

## UNSTABLE PRICES THREATEN U.S. SUGAR INDUSTRY

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, in Hawaii we produce 1,100,000 tons of sugar per year. That is about 20 percent of all sugar grown in the United States. Sugar is the State's largest crop and many areas of my State are highly dependent on sugar production for their economic well-being.

In fact, in many areas of my State, sugar is the only source of support for hundreds of families. On the islands of Maui, Kauai, and Hawaii—and I represent these islands—more than one-third of all cropland is devoted to sugar. Any decline in sugar production would result in a dramatic rise in unemployment. The shutdown of a sugar plantation or refinery would spell economic disaster for many areas of my State.

What the domestic sugar industry needs is insulation from the volatile sugar prices of recent years. Since 1978, prices have ranged from 9 cents a pound to 45 cents a pound. The price instability is the greatest threat to our domestic growers. Without a healthy domestic sugar industry, the United States will be entirely dependent upon uncertain foreign sources to meet its needs for sugar.

Both 1979 and 1980 were years of decline for world sugar production. In both years, consumption exceeded world production. Three of the four largest producing countries experienced serious decline in production and yield this year.

Farmers understand that production losses are part of their way of life. Natural events often result in losses even on the best of farms. When the commodity involved is sugar, however, the American consumer also suffers when poor yields cause shortages.

If the American industry is allowed to decline as cheap foreign supplies of surplus sugar are dumped on the United States, the result will be dependence on these foreign supplies. During years of low production, this dependence will mean that prices at the supermarket may double or triple.

The facts are very simple: The domestic sugar industry needs a program of nonrecourse loans if we are to have a healthy sugar industry. And, we need a healthy domestic sugar industry.

## DEPARTMENT OF STATE AUTHORIZATION ACT, FISCAL YEARS 1982 AND 1983

Mr. FASCELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3518) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. FASCELL).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HOPKINS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 3, answered "present" 1, not voting 50, as follows:

□ 1115

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3518.

The SPEAKER pro tempore. The Chair designates the gentleman from Ohio (Mr. HALL) as Chairman of the Committee of the Whole and requests the gentleman from Louisiana (Mr. BREAUX) to assume the chair temporarily.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida (Mr. FASCELL) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 3518, a bill to authorize appropriations for the Department of State, the International Communication Agency, the Board for International Broadcasting, and the Inter-American Foundation for fiscal years 1982-83, and to authorize a supplemental appropriation for the Board for International Broadcasting for fiscal year 1981.

The total in this bill is $3,133,587,000 in funding authority for 1982, and $3,674,422,000 for fiscal year 1983, and, of course, $600,000 supplemental request for the Board for International Broadcasting.

The bill was approved in the Committee on Foreign Affairs on May 12, 1981.

Mr. Chairman, let me say at the outset that all of us who participated in the hearings and considered this bill have been gravely concerned about the capability of the agencies that are involved to meet their growing international obligations and their responsibilities while their financial and human resources and their ability to keep pace with increased diplomatic and security needs continue to decrease.

The budget figures presented in this bill represent the minimum amounts that, in all good conscience, the committee could recommend and maintain the notion that the agencies could effectively carry out their duties.

The recommended 1982 authorization is identical to the executive branch request for these agencies. And although the figure reflects a numerical increase in dollar expenditures over the present 1981 figures, in real or constant dollar terms the increase barely covers the 1981 estimated average rate of overseas inflation, which has been set by the administration at 18 percent.

The committee did not feel that the 1982 executive branch request, in many accounts lower or identical to the 1982 estimates, would be adequate to even allow these agencies to maintain their present operating capacity. In fact, it represents a further cut of about 1,000 positions and the closing of numerous posts, among other things. Therefore, for the major Department of State administrative accounts for ICA and BIB we have recommended a 17-percent increase above the executive branch request for 1983; but we have kept that amount within the reconciliation figure so that it is within the overall Federal budget. It just means that we have made an adjustment within the account because of other actions taken in that account by the Budget Committee and by the Congress.

Now, let us talk for a moment about this budget in realistic terms. What it does, Mr. Chairman, is mandate a reduction, a cut, of 550 positions in the Department of State, leaving the Department with a total manpower of 16,285 people.

I want to emphasize this for my colleagues who are genuinely interested and concerned about the budget: This puts the Department of State, which is already the smallest Department in Government, at a 1959 operating level. Yes; I said 1959—which was 22 years ago. That is where they are today with the budget. And, of course, we all know how their responsibility has increased from the time in 1959 when we recognized only 77 nations and now we recognize 146. We have responsibilities all around the globe. We are all aware of the fact that life in the diplomatic service is not a cakewalk any longer. You cannot really kind of giggle and sneer about the striped pants set that has martinis for breakfast, a myth, if there ever was one, but nevertheless a lot of people believed it. We have had people brutalized, terrorized, killed, we have had our embassies burned, attacked, we have had hostages taken. We have to recognize the fact that our people who are doing this service on behalf of our country are in the frontlines. And while we all have to take budget cuts, I can tell the Members, after years of careful examination of the budgets of these agencies, that they have been brutally cut, and that the least we can do, in our own national interest and security, is to keep them at the cut level at which they are and not cut them further unless we are really in desperate straits because what we have to say then is that we are just going to have to reduce even more personnel, going back beyond our 1959 level, closing Embassies, closing consulates, doing all kinds of things that will ultimately harm the national security.

Today, the Department operates 278 posts overseas. At a time when Congress expects the Department to supply better security for our diplomats overseas, to collect the best information available to enable us to con-

duct our foreign policy, and to aid the peacekeeping process worldwide, the U.S. Government responds with a no-growth, make-do budget.

The International Communication Agency, telling the story of America around the world, is hardly the emissary of the United States that it once was. That Agency's levels of expenditure have steadily dropped over the years; the exchange program no longer provides the stipends on which people can live overseas; VOA is telling the world of America's advances on 1942 transmitters.

Telling our story around the world is one of the most important things we can do. This administration has a keen realization of that fact, and we need to stay in that fight. They have continued the support of the radios, both RFE, RL, VOA, and USIA, and it is absolutely urgent that we continue at least this reduced level in these agencies if we are going to stay in this fight. And I think we have to. They are diplomatic tools of the first order, just as essential as our military tools, just as essential as our economic tools. All I want to emphasize to my colleagues here is, believe me that this is a tough, barebones budget that takes into consideration what the administration has to face, what we have to face, in terms of the overall budget request.

Now, we have done some other things here that the Members ought to know about. We have provided authority to increase the cost of passports to meet the real costs of providing them. This will, of course, increase the revenues that will return to the Treasury. We think this is a reasonable amount, consistent with modern times.

I just want to say one thing. If you compare what the Soviets spend in this area—and that is not the only criterion, but let us face it, it is uppermost in some minds—if you consider just in one area, and that is on exchange programs, cultural presentations, whatever you want to call it, they are spending so much more money than we are, it is unbelievable—unbelievable that a country that has a responsibility of not only maintaining our own national security, but of espousing around the world the principles of democracy, representative government, human dignity, and individual freedoms, that we are here cutting back on the very programs that allow people to understand what we are all about. We just give up the fight. It is as if you were running a political campaign and you decided that: "Well, I do not need any campaign workers. I can do without that. It is just too costly. Oh, I can cut back on my radio advertising. I do not need any of that, what the heck." And your opponent is out there outspending you 5 to 1. And then you say: "Why is it that we aren't doing a better job out there?" Well, I tell you, that is one of the reasons.

So I want us all to be sure what we are doing. We are for the budget cuts and we are for carrying out programs that the President has a responsibility for carrying out. But our sense of priorities needs to be sharpened on this issue. That is all we are trying to do here. We urge the Members to do that and to support this bill.

□ 1130

We have also provided an overdue remedy in this bill which is new authority for the Secretary of State. Translated in pure slang, it means that we are tired of being mistreated by other countries with respect to our diplomatic missions and our representatives and having no way to be able to reciprocate and provide equality of treatment of our own people. We have therefore included authority in this bill which at long last gives the Secretary of State the mechanism to deal with this kind of unequal treatment or mistreatment, if you will, or just sheer capricious political action.

So, we think this is a very important step forward.

Mr. Chairman, these agencies are our diplomatic tools. Their people are our first line of defense. Their function is to make sure that we do not have to rely totally on the hardware of the Department of Defense in order to protect our people and our boundaries. But which agency of Government is receiving the funds to keep pace with the international demands of a peaceful world? I must reluctantly report that no agency charged with foreign policy responsibilities is being given the resources to cope effectively with their responsibilities—even though the foreign policy budget is barely 2½ percent of the defense budget and one-half percent of the total Federal budget, and has no discernible impact on domestic inflation.

Among the wide variety of diplomatic activities which facilitate our relations with 146 nations and more than 90 international organizations this authorization contains funds which: First, provide the U.S. assessed contribution to the United Nations, its specialized agencies and the OAS; second, provide access to a free press for people living under totalitarian rule through the broadcasts of the Voice of America, Radio Free Europe, and Radio Liberty; third, provide passport services for Americans who wish to travel abroad; and fourth, facilitate student and other scholarly exchanges as well as technical and cultural exhibitions abroad, promoting friendship and wider understanding for foreign cultures.

Let me use this latter provision to give an example of some of the less obvious programs funded by this bill and to indicate the immediate domestic benefits to be realized from them. The value of educational and cultural exchanges is one that has been significantly underestimated by U.S. citizens and Members of this body. I can tell you that the Soviet Union does not underestimate the power of such programs and places great weight on the benefits which they generate.

To our knowledge, the Soviets have spent approximately $1 billion over the past 25 years on scholarship grants to students form "disadvantaged economic and social backgrounds." U.S. programs come nowhere near this figure. For example, in 1980, the United States offered 24 grants to Costa Rica. In fiscal year 1982 we intend to offer 20. The U.S.S.R., on the other hand, administers 500 scholarships in that country. The United States counters the Soviet's 4,650 grants to the American republics with a grand total of 875 as alternatives to Soviet education. It has been estimated that the Soviet Union spends $200,000,000 for educational exchanges in the Third World alone. The United States plans to spend $66,000,000 for all of its programs in fiscal year 1983.

Let me ask you, who are Third World businessmen, educated in the Soviet Union, going to do business with and whose business methods are they going to use? We feel that we must match the Soviet military buildup, but we neglect the other elements of our defense policy—the radios and the spread of knowledge about our system and our culture through people-to-people relationships. We match military hardware, but fail to offset the ideological and political offensive aimed at the vast world population.

I urge you to endorse all of these efforts by supporting the funding levels in this bill.

H.R. 3518 contains one vital new authority for the Secretary of State which will provide the long-overdue means to remedy a serious and growing imbalance between the treatment accorded by many countries to official missions of the United States abroad, and that accorded to foreign government missions in the United States. Section 119 specifically would provide for the establishment of an independent Office of Foreign Missions in the Department of State through which the operations of foreign missions in the United States and the benefits available to them from Federal, State, and local authorities, public utilities and private persons may be reviewed and, if necessary regulated through a central authority. The Office will assist foreign missions in procuring needed benefits and services, in accordance with our international legal obligations. Such benefits and services

would include the procurement of real property, public services, supplies, maintenance contracts, transportation, travel, and other services.

The Office of Foreign Missions will also have the authority to deny benefits or services or take other action in cases where our personnel overseas are not receiving appropriate treatment. In this way, the conditions under which foreign missions operate in the United States, can be made to reflect the conditions under which missions of the United States are required to operate in the countries represented by such foreign missions.

Such conditions occur because foreign missions operating in the United States are currently free to negotiate services and benefits independent of any government sanctions within our free enterprise economy. U.S. missions abroad are often subject to government controls and whims. These manifest themselves in the form of inflated hotel rates, and other charges for diplomats, various discriminatory import duties, and taxes on heating oil, among other things.

Many nations have diplomatic service bureaus which exist solely to provide or regulate services to foreign missions and prevent contact with individual service organizations. Section 119 of this bill simply provides the United States with a similar office which would provide the means to enforce reciprocity and carry out our obligations in a more effective manner.

As a result, the foreign governments and entities represented by missions in the United States will have an incentive to provide governments and entities fair, equitable, and nondiscriminatory treatment to U.S. missions and personnel in their territories. This, in turn, will contribute to significant savings in the costs of operating U.S. missions overseas, improved morale and working conditions for U.S. personnel, and mutual respect in U.S. bilateral and multilateral relations. These authorities may also be applied to international organizations where necessary to give effect to the policy of this legislation.

The bill also makes changes in certain administrative authorities to enable the agencies to adapt to changes in international monetary conditions and to more efficiently discharge their responsibilities. Some of these are money saving provisions. One would cut down on U.S. Government insurance costs covering employees involved in short term State Department and ICA projects overseas. Another provision authorizes the State Department and USICA to enter into multiyear contracts when such contracts can be negotiated at lower costs than may be realized in contracts which must be renegotiated annually. As I previously stated, a revenue-raising provision has also been included which eliminates the statutory charge attached to passport issuance in favor of flexibility in determining fees which reflect increasing costs. This provision would extend the period of passport validity from 5 to 10 years. Another provision would clarify existing State Department offset adverse fluctuations in foreign currency exchange rates and overseas wage and price changes by authorizing a buying power maintenance fund in the Department, which will enable the Department to meet overseas operating needs in a timely manner that will insure more efficient use of the funds provided to the Department of State.

Other provisions are: First, provide for an ex gratia payment to the Government of Yugoslavia for inquires incurred by a Yugoslav national in New York City; second, provide payments of U.S. assessments to the Pan American Institute of Geography and History, the Hague Conference on Private International Law, the International Institute for the Unification of Private Law, and the Pan American Railway Congress; third, provide for a single U.S. representative in Vienna to represent U.S. interests in a variety of international organizations; fourth, allow private sector experts to serve on U.S. delegations to international telecommunications meetings and conferences; and fifth, provide for the distribution within the United States of the ICA film "Reflections: Samuel Eliott Morison."

I would also like to mention that, due to a clerical error, the authorization for ICA's special foreign currency account was not broken down in the budget table as a separate account. Although it is included in the total, it was grouped with the Agency's acquisition and construction account. For the record, I have included with this statement, a revised budget chart, breaking out the $11,451,000 in ICA's special foreign currency account.

This account covers local costs in countries where the Treasury Department finds that the supply of U.S.-owned foreign currencies is excess to the normal requirements of the U.S. Government. ICA has requested an increase of $848,000 for 1982 over the 1981 amount. These funds will be used to cover local rates for rent and utilities and other local operating costs, wages for foreign national employees, and payments to the Department of State for shared administrative support services. This authorization involves no actual budgetary outlays. It merely permits the Agency to utilize excess foreign currencies which are in U.S. account overseas.

| | *Thousands* |
|---|---|
| Salaries and expenses: | |
| Overseas missions | $146,194 |
| Exchange of persons | 92,380 |
| Broadcasting service | 106,669 |
| Program coordination, production, and support | 39,456 |
| Agency direction and management | 33,412 |
| Administrative support from other agencies | 34,076 |
| Subtotal | 452,187 |
| Salaries and expenses (special foreign currency program) | 11,451 |
| Center for Cultural and Technical Interchange Between East and West | 16,880 |
| Acquisition and construction of radio facilities | 80,884 |
| Total | 561,402 |

For all of these reasons, Mr. Chairman, I would hope that my colleagues could enthusiastically support the authorization bill as it is now printed before them, the appropriation bill having already been considered and having passed the House last week.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Wisconsin.

Mr. ROTH. I thank the gentleman for yielding.

I wish to compliment the gentleman from Florida (Mr. FASCELL), who is the chairman of our Subcommittee on International Operations, and our fine committee staff, for the wonderful job they have done.

We hear so much about how many billions we are going to spend on defense to build up our military, on how many billions we are to spend to promote peace. Yet the most important issue for peace, I think, facing this country, as leader of the free world, is determining how we are going to influence the views of the peoples of the world regarding democracy and in particular of America.

We can have all the weapons and military hardware in the world, but nothing can compare to what people think, and we are not doing enough in that area.

The Soviets spend billions of dollars on their propaganda apparatus. Information stressing the Soviet point of view is disseminated throughout the world in every format: Radio, television, and the printed word. Thousands of students are brought to the Soviet Union, thereby gaining firsthand exposure to the Soviet view of the world.

The American effort in this field has steadily declined. We spend today, in real-dollar terms, less than half of what we spent in the mid-1960's on our public diplomacy efforts. We know, because of public opinion surveys and through interviews with refugees, that American information sources fill a void in many parts of the world. We offer correct, accurate, and timely information on important subjects. Yet without the proper level of funding, our public diplomacy cannot keep pace.

In the race for ideas and for world public opinion, we face a challenge from the Soviets just as we face a challenge in the field of armaments.

On ideological grounds, we here in America have an excellent foundation. We have a democracy which reflects the will of the citizens of this Nation. The people of America are in control of their destiny. There are privileges and rights denied to millions around the world. No matter how much money the Soviets put into their propaganda effort, they cannot hide the fact that personal freedom and liberty disappear under a Communist system.

We have a success story to broadcast to the world. Our democracy works, and we must be willing to fund programs which will tell the world that the democracy of America is more than a match for the repressive regimes which are threatening freedom throughout the world. The ideas which we have long cherished are the most powerful weapons in the world.

Althought the commitment of this country to public diplomacy has declined in recent years, I want to commend the chairman of our subcommittee for persevering these many years and bringing this story home to the American people.

Mr. FASCELL. I thank the gentleman for his interest and his comments and I agree with the gentleman. I think there is a new awareness in this Congress, among the American people on the importance and necessity of our diplomatic service, of the International Communication Agency, the Voice of America, the Board for International Broadcasting and how vital they are to our own security to tell this story, to continue to persuade. And the old axiom about the power of the pen is still a very powerful one.

A thought is still the strongest weapon that exists.

Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin (Mr. ZABLOCKI), who is the chairman of the full committee.

Mr. ZABLOCKI. Mr. Chairman, I rise in support of H.R. 3518, authorizing appropriations for the Department of State, the International Communication Agency, the Board for International Broadcasting, and the Inter-American Foundation.

At the outset, I want to take this opportunity to commend the distinguished chairman of the Subcommittee on International Operations, Mr. FASCELL, and the distinguished ranking minority member of the subcommittee, Mr. DERWINSKI, and member of the Foreign Affairs Committee, Mr. BROOMFIELD, for their leadership in bringing this vitally important authorizing legislation to the floor. I also want to thank the distinguished chairman of the District of Columbia Committee, the gentleman from California (Mr. DELLUMS) for his cooperation with respect to section 201 of the bill dealing with foreign missions.

The gentleman from Florida has already ably explained in detail the various provisions contained in H.R. 3518, so I will not elaborate on them. However, I would like to make the following points.

First, as a 2-year authorization this bill follows the intent and spirit of the budget act by setting fiscal guidelines for future years, thus permitting advance planning by the departments.

Second, H.R. 3518 reconciles budgetary constraints with the needs of our foreign affairs agencies. In that respect it authorizes the exact amounts requested by the President for fiscal year 1982. For fiscal year 1983 the amounts, which in some instances are in excess of the President's request, remain within the constraints of the Budget Reconciliation Act.

Third, this bill authorizes funds for the State Department and other international agencies that have proven to be the U.S. first line of defense. While the Department of Defense has increased its budget, the Department of State has closed consulates and has suffered a reduction in personnel while its workload has increased as a result of lack of funds. The resulting closing of consulates is a serious matter which affects U.S. ability in the areas of trade, security, and intelligence.

This is why the committee felt that it was wise to increase modestly funds for salaries and expenses and other personnel matters so that the Department of State and the other international agencies will be able to conduct their vitally important diplomatic work, which serves to increase U.S. security interests through peaceful means.

Mr. Chairman, I urge the adoption of this bill.

Mr. BROOMFIELD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to praise the excellent work of Chairman ZABLOCKI, Subcommittee Chairman FASCELL, and the ranking minority member on the subcommittee, Mr. DERWINSKI, in overseeing the State Department authorization bill.

I wholeheartedly support H.R. 3518. The bill, as reported from the Foreign Affairs Committee, proposes a modest increase in spending for the State Department, International Communication Agency, and the Board for International Broadcasting. While the committee fully appreciated the need for budget austerity, and for that reason kept the authorization to the minimum necessary to do the job, the committee also realized that the foreign affairs budget process has over the years seriously eroded the effectiveness of our foreign affairs agencies. For example, the State Department is the only Cabinet Department which has fewer positions now than it did in 1959. The number of political and economic officer positions has decreased by 12 percent in the last 10 years, Yet the number of countries that we maintain relations with has jumped from 85 in 1959 to 146 today. Furthermore, due to the enormous increase in travel abroad by American tourists, consular work has increased by 900 percent. The need for U.S. representation in international organizations has also grown as more international bodies have come into existence. With regard to the International Communication Agency, it operates in real dollar terms with less than 50 percent of the funding it had 15 years ago. This amount is far less than the amount spent by our ideological opponents. Not only are we unduly restricting ourselves in getting the American message abroad, but the number of scholarships that we grant for foreign students to study in the United States, thereby learning the values of freedom and democracy, are miniscule compared to the number granted by the Soviet bloc.

In short, we must not jeopardize our ability to protect the national security by providing only insufficient resources. We must improve our monitoring of overseas political events and we need to carefully evaluate the repercussions of economic fluctuations in developing areas. Additionally, it is important that Americans traveling abroad, on business or for pleasure, have access to effective protective services on a timely basis.

I fully endorse H.R. 3518, as reported, and encourage my House colleagues to do likewise.

Mr. Chairman, I yield 3 minutes to the gentleman from Delaware (Mr. EVANS).

Mr. EVANS of Delaware. Mr. Chairman, I rise in strong support of H.R. 3518. I would like to congratulate the gentleman from Florida (Mr. FASCELL) for his statement and his support of ICA; the chairman of the committee, the gentleman from Wisconsin (Mr. ZABLOCKI), and certainly the ranking minority member, the gentleman from Michigan (Mr. BROOMFIELD).

I would also like to take this opportunity to commend the administration in their conduct of our Nation's foreign policy. We have turned away from, at times, inconsistent and sometimes incoherent foreign policy which was lacking in credibility.

I do not mean to suggest that we have achieved a utopian foreign policy, but we are certainly headed in the right direction and already there is increasing respect for America around the world. Suddenly we are talking with our allies and our opponents with new strength and purpose. The awareness of that strength has increased our credit with our allies and gained, however grudgingly, the respect of our opponents.

Such grudging respect surely was the motive behind Fidel Castro's bi-

zarre attack on America at the unlikely forum of an international meeting of parliamentarians a few days ago.

In H.R. 3518, I am especially pleased that the committee has made a firm commitment to our international broadcasting efforts. This measure authorizes increases in the budgets for Radio Free Europe, Voice of America and Radio Liberty recommended by the administration for the coming year.

Mr. Chairman, these broadcasts are an important part of our national defense, and, therefore, an essential element in our Nation's national security. They are nonmilitary, cost effective and employable now.

One of the problems we have had in our dealing with other nations is that we are often misunderstood by their people. I believe it would be incredibly foolish in these times for us not to increase our efforts in getting our message across. We do not need, nor do we want, a propaganda agency. We do not have to improve on the truth because our ideas and accomplishments speak for themselves.

This is, I believe, our greatest advantage. We need not color the truth but merely relay it to the world in a strong and clear voice.

As Thomas Jefferson said in speaking of the University of Virginia, and I believe those words apply to our country as well, "Here we are not afraid to follow the truth, wherever it may lead so long as reason is free to combat it."

He believed, as I do, that the truth will always win over lies, but it is critical that we get that truth through.

The Soviets spend as much money jamming our radios as we do broadcasting and obviously we must be having an impact they do not like.

Therefore, the importance of our efforts in this field cannot be underestimated.

The CHAIRMAN. The time of the gentleman from Delaware (Mr. EVANS) has expired.

Mr. BROOMFIELD. Mr. Chairman, I yield 1 additional minute to the gentleman from Delaware.

Mr. EVANS of Delaware. For millions of our people, our international broadcasts are their only source of truthful information about actions by their government. It was a UPI story about a year ago from Moscow which illustrated well the power of our international broadcasts. It stated that—

Andrei Sakharov's exile means sitting long hours at a bare wooden table listening to the Voice of America, often, according to his wife, learning for the first time the details of his banishment.

That story reflects vividly the value of the program, and this legislation demonstrates that we will not fail in our responsibility to the millions of people in the world who hunger for the truth.

I compliment the committee on their fine work and urge my colleagues to support this important legislation.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Delaware. I yield to the distinguished gentleman from Florida.

Mr. FASCELL. I thank the gentleman for yielding.

I want to thank the gentleman for his very fine statement. We just cannot keep saying too much, reiterating what the gentleman has said in his statement. We have just got to keep doing that until we get the recognition, not only here, and I think it is here in this Congress, and certainly is in the administration.

Mr. BROOMFIELD. Mr. Chairman, I have no further requests for time.

Mr. FASCELL. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the Clerk will read the bill by title.

The Clerk read as follows:

H.R. 3518

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

TITLE I— DEPARTMENT OF STATE

SHORT TITLE

SEC. 101. This title may be cited as the "Department of State Authorization Act, Fiscal Years 1982 and 1983".

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 102. There are authorized to be appropriated for the Department of State to carry out the authorities, functions, duties, and responsibilities in the conduct of the foreign affairs of the United States and other purposes authorized by law, the following amounts:

(1) For "Administration of Foreign Affairs", $1,318,754,000 for the fiscal year 1982 and $1,744,391,000 for the fiscal year 1983.

(2) For "International Organizations and Conferences", $563,806,000 for the fiscal year 1982 and $554,436,000 for the fiscal year 1983.

(3) For "International Commissions", $22,508,000 for the fiscal year 1982 and $24,759,000 for the fiscal year 1983.

(4) For "Migration and Refugee Assistance", $553,100,000 for the fiscal year 1982 and $555,600,000 for the fiscal year 1983.

PALESTINIAN RIGHTS UNITS

SEC. 103. Funds appropriated under paragraph (2) of section 102 of this Act may not be used for payment by the United States, as its contribution toward the assessed budget of the United Nations for any year, of any amount which would cause the total amount paid by the United States as its assessed contribution for that year to exceed the amount assessed as the United States contribution for that year less—

(1) 25 per centum of the amount budgeted for that year for the Committee on the Exercise of the Inalienable Rights of the Palestinian People (or any similar successor entity), and

(2) 25 per centum of the amount budgeted for that year for the Special Unit on Palestinian Rights (or any similar successor entity).

EX GRATIA PAYMENT

SEC. 104. Of the amount appropriated for the fiscal year 1982 under paragraph (1) of section 102 of this Act, $81,000 shall be available for payment ex gratia to the Government of Yugoslavia as an expression of concern by the United States Government for the injuries sustained by a Yugoslav national as a result of an attack on him in New York City.

ASSISTANCE FOR REFUGEES SETTLING IN ISRAEL

SEC. 105. Of the amounts authorized to be appropriated by paragraph (4) of section 102 of this Act, $12,500,000 for the fiscal year 1982 and $15,000,000 for the fiscal year 1983 shall be available only for assistance for the resettlement in Israel of refugees from the Union of Soviet Socialist Republics and from Communist countries in Eastern Europe.

BILATERAL SCIENCE AND TECHNOLOGY AGREEMENTS

SEC. 106. In addition to the amounts authorized to be appropriated by section 102 of this Act, there are authorized to be appropriated to the Secretary of State $3,700,000 for the fiscal year 1982 and $3,700,000 for the fiscal year 1983 for payment of the United States share of expenses of the science and technology agreements between the United States and Yugoslavia and between the United States and Poland.

CURRENCY FLUCTUATIONS

SEC. 107. (a) Section 24(b) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2696(b)), is amended to read as follows:

"(b)(1) In order to maintain the levels of program activity provided for each fiscal year by the annual authorizing legislation for the Department of State, there are authorized to be appropriated for the Department such sums as may be necessary to offset adverse fluctuations in foreign currency exchange rates, or overseas wage and price changes, which occur after November 30 of the calendar year preceding the enactment of the authorizing legislation for such fiscal year.

"(2) In order to eliminate substantial gains to the approved levels of overseas operations, the Secretary of State may transfer to the appropriation account established under paragraph (1) of this subsection such amounts in other appropriation accounts under the heading 'Administration of Foreign Affairs' as the Secretary determines are excessive to the needs of the approved level of operations because of fluctuations in foreign currency exchange rates or changes in overseas wages and prices.

"(3) Funds transferred from the appropriation account established under paragraph (1) shall be merged with and be available for the same purpose, and for the same time period, as the appropriation account to which transferred; and funds transferred to the appropriation account established under paragraph (1) shall be merged with and available for the purposes of that appropriation account until expended. Any restriction contained in an appropriation Act or other provision of law limiting the amounts available for the Department of State that may be obligated or expended shall be deemed to be adjusted to the extent necessary to offset the net effect of fluctuations in foreign currency exchange rates or overseas wage and price changes in order to maintain approved levels.".

(b) Section 704(c) of the United States Information and Educational Exchange Act of

1948 (22 U.S.C. 1477b(c)) is amended by striking out "preceding" and inserting in lieu thereof "calendar year preceding the enactment of the authorizing legislation for such".

(c) Section 8(a)(2) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2287(a)(2)) is amended by striking out "preceding" in the first sentence and inserting in lieu thereof "calendar year preceding the enactment of the amendments to paragraph (1) which provide the authorization for such".

(d) The amendments made by this section shall take effect on October 1, 1981.

PASSPORT FEES AND PERIOD OF VALIDITY

SEC. 108. (a) The first sentence of section 1 under the heading "Fees for Passports and Visas" of the Act of June 4, 1920 (22 U.S.C. 214), is amended to read as follows: "There shall be collected and paid into the Treasury of the United States a fee, prescribed by the Secretary of State by regulation, for each passport issued and a fee, prescribed by the Secretary of State by regulation, for executing each application for a passport.".

(b)(1) Section 2 of the Act entitled "An Act to regulate the issue and validity of passports, and for other purposes", approved July 3, 1926 (22 U.S.C. 217a), is amended to read as follows:

"SEC. 2. A passport shall be valid for a period of ten years from the date of issue, except that the Secretary of State may limit the validity of a passport to a period of less than ten years in an individual case or on a general basis pursuant to regulation.".

(2) The amendment made by this subsection applies with respect to passports issued after the date of enactment of this Act.

DOCUMENTATION OF CITIZENSHIP

SEC. 109. The State Department Basic Authorities Act of 1956 is amended by inserting the following new section 33 immediately after section 32 and by redesigning existing section 33 as section 34:

"SEC. 33. The following documents shall have the same force and effect as proof of United States citizenship as certificates of naturalization or of citizenship issued by the Attorney General or by a court having naturalization jurisdiction:

"(1) A passport, during its period of validity (if such period is the maximum period authorized by law), issued by the Secretary of State to a citizen of the United States.

"(2) The report, designated as a 'Report of Birth Abroad of a Citizen of the United States', issued by a consular officer to document a citizen born abroad.".

PAN AMERICAN INSTITUTE OF GEOGRAPHY AND HISTORY

SEC. 110. Paragraph (1) of the first section of the joint resolution entitled "Joint resolution to provide for membership of the United States in the Pan American Institute of Geography and History; and to authorize the President to extend an invitation for the next general assembly of the institute to meet in the United States in 1935, and to provide appropriation for expenses thereof", approved August 2, 1935 (22 U.S.C. 273), is amended by striking out ", not to exceed $200,000 annually,".

INTERNATIONAL INSTITUTE FOR THE UNIFICATION OF PRIVATE LAW AND THE HAGUE CONFERENCE ON PRIVATE INTERNATIONAL LAW

SEC. 111. Section 2 of the joint resolution entitled "Joint resolution to provide for participation by the Government of the United States in the Hague Conference on Private International Law and the International (Rome) Institute for the Unification of Private Law, and authorizing appropriations therefor", approved December 30, 1963 (22 U.S.C. 269g-1), is amended by striking out ", except that" and all that follows through "that year".

PAN AMERICAN RAILWAY CONGRESS

SEC. 112. Section 2(a) of the joint resolution entitled "Joint resolution providing for participation by the Government of the United States in the Pan American Railway Congress, and authorizing an appropriation therefor", approved June 28, 1948 (22 U.S.C. 280k), is amended by striking out "Not more than $15,000 annually" and inserting in lieu thereof "Such sums as may be necessary".

UNITED STATES REPRESENTATIVE TO INTERNATIONAL ORGANIZATIONS IN VIENNA

SEC. 113. Section 2 of the United Nations Participation Act of 1945 (22 U.S.C. 287) is amended by adding at the end thereof the following new subsection:

"(h) The President, by and with the advice and consent of the Senate, shall appoint a representative of the United States to the Vienna office of the United Nations with appropriate rank and status, who shall serve at the pleasure of the President and subject to the direction of the Secretary of State. Such individual shall, at the direction of the Secretary of State, represent the United States at the Vienna office of the United Nations and perform such other functions there in connection with the participation of the United States in international organizations as the Secretary of State from time to time may direct.".

LIVING QUARTERS FOR THE STAFF OF THE UNITED STATES REPRESENTATIVE TO THE UNITED NATIONS

SEC. 114. Section 8 of the United Nations Participation Act of 1945 (22 U.S.C. 287e) is amended—

(1) by striking out "representative of the United States to the United Nations referred to in paragraph (a) of section 2 hereof" and inserting in lieu thereof "representatives provided for in section 2 of this Act and of their appropriate staffs"; and

(2) by adding at the end thereof the following: "Any payments made by United States Government personnel for occupancy by them of living quarters leased or rented under this section shall be credited to the appropriation, fund, or account utilized by the Secretary of State for such lease or rental or to the appropriation, fund, or account currently available for such purpose.".

AMENDMENTS CORRECTING PRINTING ERRORS

SEC. 115. The Foreign Service Act of 1980 is amended—

(1) in section 704(b)(2) (22 U.S.C. 402(a)(2)) by striking out "411" and inserting in lieu thereof "412"; and

(2) in section 814(a)(3) (22 U.S.C. 4054(a)(3)) by striking out "on" the second place it appears in the first sentence and inserting in lieu thereof "or".

PRIVATE SECTOR REPRESENTATIVES ON UNITED STATES DELEGATIONS TO INTERNATIONAL TELECOMMUNICATIONS MEETINGS AND CONFERENCES

SEC. 116. (a) Sections 203, 205, 207, and 208 of title 18, United States Code, shall not apply to a private sector representative on the United States delegation to an international telecommunications meeting or conference who is specifically designated to speak on behalf of or otherwise represent the interests of the United States at such meeting or conference with respect to a particular matter, if the Secretary of State (or his designee) certifies that no Government employee on the delegation is as well qualified to represent United States interests with respect to such matter and that such designation serves the national interest. All such representatives shall have on file with the Department of State the financial disclosure report required for special Government employees.

(b) As used in this section, the term "international telecommunications meeting or conference" means the conferences of the International Telecommunications Union, meetings of its International Consultative Committees for Radio and for Telephone and Telegraph, and such other international telecommunications meetings or conferences as the Secretary of State may designate.

PROCUREMENT CONTRACTS

SEC. 117. The State Department Basic Authorities Act of 1956 is amended by inserting the following new section immediately after section 13:

"SEC. 14. (a) Any contract for the procurement of property or services, or both, for the Department of State or the Foreign Service which is funded on the basis of annual appropriations may nevertheless be made for periods not in excess of five years when—

"(1) appropriations are available and adequate for payment for the first fiscal year and for all potential cancellation costs; and

"(2) the Secretary of State determines that—

"(A) the need of the Government for the property or service being acquired over the period of the contract is reasonably firm and continuing;

"(B) such a contract will serve the best interests of the United States by encouraging effective competition or promoting economies in performance and operations; and

"(C) such a method of contracting will not inhibit small business participation.

"(b) In the event that funds are not made available for the continuation of such a contract into a subsequent fiscal year, the contract shall be cancelled and any cancellation costs incurred shall be paid from appropriations originally available for the performance of the contract, appropriations currently available for the acquisition of similar property or services and not otherwise obligated, or appropriations made for such cancellation payments.".

COMPENSATION FOR DISABILITY OR DEATH

SEC. 118. The State Department Basic Authorities Act of 1956 is amended by inserting the following new section immediately after section 15:

SEC. 16. The first section of the Act of August 16, 1941 (42 U.S.C. 1651; commonly known as the Defense Base Act) shall not apply with respect to such contracts as the Secretary of State may determine which are contracts with persons employed to perform work for the Department of State or the Foreign Service on an intermittent basis for not more than 90 days in a calendar year.".

REGULATION OF FOREIGN MISSIONS

SEC. 119. (a) The State Department Basic Authorities Act of 1956 is amended by striking out "That the Secretary" in the first section and inserting in lieu thereof the following:

"TITLE I—BASIC AUTHORITIES GENERALLY

"SECTION 1. The Secretary".

(b) That Act is further amended by adding at the end thereof the following:

"TITLE II—AUTHORITIES RELATING TO THE REGULATION OF FOREIGN MISSIONS

"DECLARATION OF FINDINGS AND POLICY

"SEC. 201. (a) The Congress finds that the operation in the United States of foreign missions and public international organizations and the official missions to such organizations, including the permissible scope of their activities and the location and size of their facilities, is a proper subject for the exercise of Federal jurisdiction.

"(b) The Congress declares that it is the policy of the United States to support the secure and efficient operation of United States missions abroad, to facilitate the secure and efficient operation in the United States of foreign missions and public international organizations and the official missions to such organizations, and to assist in obtaining appropriate benefits, privileges, and immunities for those missions and organizations and to require their observance of corresponding obligations in accordance with international law.

"(c) The assistance to be provided to a foreign mission in the United States shall be determined after due consideration of the benefits, privileges, and immunities provided to missions of the United States in the country or territory represented by that foreign mission.

"DEFINITIONS

"SEC. 202. (a) For purposes of this title—

"(1) 'benefit' (with respect to a foreign mission) means any acquisition, or authorization for an acquisition, in the United States by or for a foreign mission, including the acquisition of—

"(A) real property by purchase, lease, exchange, construction, or otherwise,

"(B) public services, including services relating to customs, importation, and utilities, and the processing of applications or requests relating to public services,

"(C) supplies, maintenance, and transportation,

"(D) locally engaged staff on a temporary or regular basis,

"(E) travel and related services, and

"(F) protective services,

and includes such other benefits as the Secretary may designate;

"(2) 'chancery' means the principal offices of a foreign mission used for diplomatic or related purposes, and annexes to such offices (including ancillary offices and support facilities), and includes the site and any building on such site which is used for such purposes;

"(3) 'Director' means the Director of the Office of Foreign Missions established pursuant to section 203(a);

"(4) 'foreign mission' means any official mission to the United States involving diplomatic, consular, or other governmental activities of—

"(A) a foreign government, or

"(B) an organization (other than an international organization, as defined in section 209(b) of this title) representing a territory or political entity which has been granted diplomatic or other official privileges and immunities under the laws of the United States,

including any real property of such a mission and including the personnel of such a mission;

"(5) 'real property' includes any right, title, or interest in or to, or the beneficial use of, any real property in the United States, including any office or other building;

"(6) 'Secretary' means the Secretary of State;

"(7) 'sending State' means the foreign government, territory, or political entity represented by a foreign mission; and

"(8) 'United States' means, when used in a geographic sense, the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

"(b) Determinations with respect to the meaning and applicability of the terms used in subsection (a) shall be committed to the discretion of the Secretary.

"OFFICE OF FOREIGN MISSIONS

"SEC. 203. (a) The Secretary shall establish an Office of Foreign Missions as an independent office within the Department of State. The Office shall be headed by a Director, appointed by the Secretary, who shall perform his or her functions under the supervision and direction of the Secretary. The Secretary may delegate this authority for supervision and direction of the Director only to the Deputy Secretary of State or an Under Secretary of State.

"(b) The Secretary may authorize the Director to—

"(1) assist agencies of Federal, State, and municipal government with regard to ascertaining and according benefits, privileges, and immunities to which a foreign mission may be entitled;

"(2) provide or assist in the provision of benefits for or on behalf of a foreign mission in accordance with section 204; and

"(3) perform such other functions as the Secretary may determine necessary in furtherance of the policy of this title.

"PROVISION OF BENEFITS

"SEC. 204. (a) Upon the request of a foreign mission, benefits may be provided to or for that foreign mission by or through the Director on such terms and conditions as the Secretary may approve.

"(b) If the Secretary determines that such action is reasonably necessary on the basis of reciprocity or otherwise—

"(1) to facilitate relations between the United States and a sending State,

"(2) to protect the interests of the United States,

"(3) to adjust for costs and procedures of obtaining benefits for missions of the United States abroad, or

"(4) to assist in resolving a dispute affecting United States interests and involving a foreign mission or sending State,

then the Secretary may require a foreign mission (A) to obtain benefits from or through the Director on such terms and conditions as the Secretary may approve, or (B) to comply with such terms and conditions as the Secretary may determine as a condition to the execution or performance in the United States of any contract or other agreement; the acquisition, retention, or use of any real property; or the application for or acceptance of any benefit (including any benefit from or authorized by any Federal, State, or municipal governmental authority, or any entity providing public services).

"(c) Terms and conditions established by the Secretary under this section may include—

"(1) a requirement to pay to the Director a surcharge or fee, and

"(2) a waiver by a foreign mission (or any assignee of or person deriving rights from a foreign mission) of any recourse against any governmental authority, any entity providing public services, any employee or agent of such an authority or entity, or any other person, in connection with any action determined by the Secretary to be undertaken in furtherance of this title.

"(d) For purposes of effectuating a waiver of recourse which is required under this section, the Secretary may designate the Director or any other officer of the Department of State as the agent of a foreign mission (or of any assignee of or person deriving rights from a foreign mission). Any such waiver by an officer so designated shall for all purposes (including any court or administrative proceeding) be deemed to be a waiver by the foreign mission (or the assignee of or other person deriving rights from a foreign mission).

"PROPERTY OF FOREIGN MISSIONS

"SEC. 205. (a)(1) The Secretary may require any foreign mission to notify the Director prior to any proposed acquisition, or any proposed sale or other disposition, of any real property by or on behalf of such mission. If such a notification is required, the foreign mission (or other party acting on behalf of the foreign mission) may initiate or execute any contract, proceeding, application, or other action required for the proposed action—

"(A) only after the expiration of the sixty-day period beginning on the date of such notification (or after the expiration of such shorter period as the Secretary may specify in a given case); and

"(B) only if the mission is not notified by the Secretary within that period that the proposal has been disapproved; however, the Secretary may include in such a notification such terms and conditions as the Secretary may determine appropriate in order to remove the disapproval.

"(2) For purposes of this section, 'acquisition' includes any acquisition or alteration of, or addition to, any real property or any change in the purpose for which real property is used by foreign mission.

"(b) The Secretary may require any foreign mission to divest itself of, or forego the use of, any real property determined by the Secretary—

"(1) not to have been acquired in accordance with this section; or

"(2) to exceed limitations placed on real property available to a United States mission in the sending State.

"(c) If a foreign mission has ceased conducting diplomatic, consular, and other governmental activities in the United States and there is not a protecting power or other agent designated by the sending State and approved by the Secretary which is responsible for the property of that foreign mission, the Secretary—

"(1) until the designation of a protecting power or other agent approved by the Secretary, may protect and preserve any property of that foreign mission; and

"(2) may authorize the Director to dispose of such property at such time as the Secretary may determine after the expiration of the one-year period beginning on the date that the foreign mission ceased those activities, and may remit to the sending State the net proceeds from such disposition.

"LOCATION OF FOREIGN MISSIONS

"SEC. 206. (a) In order to ensure the fulfillment of the international obligations of the United States and fulfillment of the policy of this title, and to ensure the orderly development of the national capital, the location, height, bulk, number of stories, and

size of any building or other real property of a foreign mission in the District of Columbia, and the provision for open space in and around any such building or other property, shall be subject to approval by the National Capital Planning Commission (hereafter in this section referred to as the 'Commission'). This subsection does not apply with respect to a building or other real property of a foreign mission if the Commission determines that the property will only be used by a party other than a foreign mission and will only be used for activities that do not involve the diplomatic, consular, or other governmental activities of a foreign mission.

"(b) Any determination by the Commission pursuant to subsection (a) of this section which involves approval of the location of or a use of real property for a chancery, or involves approval of site and building plans for a chancery, shall be considered rulemaking under section 553 of title 5, United States Code, and shall be based solely on the following criteria:

"(1) the Federal interest;

"(2) the chancery is in an area (A) of predominantly office use, (B) of mixed use, including residential, commercial, office, or institutional use, (C) of medium or high density residential use, or (D) in reasonable proximity to streets on which existing chanceries are concentrated;

"(3) historic preservation (as determined in accordance with regulations issued by the Commission in carrying out this section);

"(4) the extent to which the area will be served by public transit to reduce parking requirements;

"(5) the extent to which the area will have adequate public facilities, utilities, and services, including streets, street lighting, water, sewer, electricity, telephone, and refuse collection;

"(6) the area is capable of being adequately protected, as determined by a Federal agency authorized to perform protective services; and

"(7) the municipal interest.

Any other determination by the Commission with respect to real property of a foreign mission pursuant to subsection (a) of this section shall be based solely on the criteria specified in paragraphs (1), (3), (6), and (7), and such other criteria as the Commission may by regulation establish.

"(c) In any proceeding with respect to real property of a foreign mission pursuant to subsection (a) of this section—

"(1) a determination by the Secretary as to the Federal interest shall be given substantial weight; and

"(2) a determination by the Mayor of the District of Columbia as to the municipal interest shall be given substantial weight.

"(d) In any proceeding with respect to real property of a foreign mission pursuant to subsection (a) of this section, the final determination with respect to approval of a location or use or approval of site and building plans shall be made not later than five months after the date of filing an application for such approval.

"PREEMPTION

"SEC. 207. Notwithstanding any other provision of law, no act of any Federal agency or of any State or municipal governmental authority shall be effective to confer or deny any benefits with respect to any foreign mission contrary to this title.

"GENERAL PROVISIONS

"SEC. 208. (a) The Secretary may issue such regulations as the Secretary may determine necessary to carry out the policy of this title.

"(b) Compliance with any regulation, instruction, or direction issued by the Secretary under this title shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same. No person shall be held liable in any court or administrative proceeding for or with respect to anything done or omitted in good faith in connection with the administration of, or pusuant to and in reliance on, this title, or any regulation, instruction, or direction issued by the Secretary under this title.

"(c) For purposes of administering this title, the Secretary may—

"(1) accept details and assignments of employees of Federal agencies to the Office of Foreign Missions on a reimbursable or nonreimbursable basis (with any such reimbursements to be credited to the appropriations made available for the salaries and expenses of officers and employees of the employing agency); and

"(2) obtain without regard to the provisions of law governing appointments in the competitive service, by appointment or contract (subject to availability of funds), the services of individuals to provide technical and professional services which are not otherwise available and which are required to carry out the functions of the Director.

"(d) Contracts and subcontracts for supplies or services (except for personal services), made by or on behalf of the Director, shall be made after advertising, in such manner and at such times as the Secretary shall determine to be adequate to ensure notice and opportunity for competition, except that advertisement shall not be required when (1) the Secretary determines that it is impracticable or will not permit timely performance to obtain bids by advertising, or (2) the aggregate amount involved in a purchase of supplies or procurement of services does not exceed $10,000. Such contracts and subcontracts may be entered into without regard to laws and regulations otherwise applicable to solicitation, negotiation, administration, and performance of government contracts. In awarding contracts, the Secretary may consider such factors as relative quality and availability of supplies or services and the compatability of the supplies or services with implementation of this title.

"(e) The head of any Federal agency may, for purposes of this title—

"(1) transfer or loan any property to, and perform administrative and technical support functions and services for the operations of, the Office of Foreign Missions (with reimbursements to agencies under this paragraph to be credited to the current applicable appropriation of the agency concerned); and

"(2) acquire and accept services from the Office of Foreign Missions, including (whenever the Secretary determines it to be in furtherance of the purposes of this title) acquisitions without regard to laws normally applicable to the acquisition of services by such agency.

"(f) Assets of or under the control of the Office of Foreign Missions, wherever situated, which are used by or held for the use of a foreign mission shall not be subject to attachment, execution, injunction, or similar process, whether intermediate or final.

"(g) Except as otherwise provided, any determination required under this title shall be committed to the discretion of the Secretary. Except as provided in the first sentence of section 206(b), actions taken under the authority of this title shall not be considered rulemaking within the meaning of section 553 of title 5, United States Code.

"(h)(1) In order to implement this title, the Secretary may transfer such amounts available to the Department of State as may be necessary to the working capital fund established by section 13 of this Act.

"(2) Notwithstanding any other provision of law, all revenues, including proceeds from gifts and donations, received by the Director or the Secretary in carrying out this title may be credited to the working capital fund established by section 13 of this Act and shall be available for purposes of this title in accordance with that section.

"APPLICATION TO PUBLIC INTERNATIONAL ORGANIZATIONS AND OFFICIAL MISSIONS TO SUCH ORGANIZATIONS

SEC. 209. (a) The Secretary may make section 206, or any other provision of this title, applicable with respect to an international organization to the same extent that it is applicable with respect to a foreign mission if the Secretary determines, after consultation with the international organization, that such application is necessary to carry out the policy set forth in section 201(b) and to further the objectives set forth in section 204(b).

"(b) For purposes of this section, 'international organization' means—

"(1) a public international organization designated as such pursuant to the International Organizations Immunities Act (22 U.S.C. 288–288f-2) or other law authorizing such status; and

"(2) an official mission (other than a United States mission) to such a public international organization,

including any real property of such an organization or mission and including the personnel of such an organization or mission.

"PRIVILEGES AND IMMUNITIES

"SEC. 210. Nothing in this title shall be construed to limit the authority of the United States to carry out its international obligations, or to supersede or limit immunities otherwise available by law. No act or omission by any foreign mission, public international organization, or official mission to such an organization, in compliance with this title, shall be deemed to be an implied waiver of any immunity otherwise provided for by law.

"ENFORCEMENT

"SEC. 211. It shall be unlawful for any person to make available any benefits to a foreign mission contrary to this title. This section shall be enforceable in any appropriate district court of the United States by injunctive or other equitable relief upon application by the Attorney General.

"SEVERABILITY

"SEC. 212. If any provision of this title or the application thereof to any person or circumstance is held invalid, the remainder of this title and the application of such provision to any other person or circumstance shall not be affected thereby.".

(c) Section 13 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684) is amended in the first sentence by striking out "and" following the semicolon at the end of clause (3), and by inserting immediately before the period at the end thereof "; and (5) services and supplies to carry out title II of this Act".

(d)(1) Subparagraph (A) of section 2(1) of the Diplomatic Relations Act (22 U.S.C. 254a(1)(A)) is amended to read as follows:

"(A) the head of a mission and those members of a mission who are members of the diplomatic staff or who, pursuant to law, are granted equivalent privileges and immunities.".

(2) Section 3(b) of such Act (22 U.S.C. 254b) is amended to read as follows:

"(b) With respect to a nonparty to the Vienna Convention, the mission, the members of the mission, their families, and diplomatic couriers shall enjoy the privileges and immunities specified in the Vienna Convention.".

(3) Section 4 of such Act (22 U.S.C. 254c) is amended—

(A) by inserting "the mission, the" immediately after "immunities for"; and

(B) by striking out "of any sending state".

(4) Section 1364 of title 28, United States Code, is amended by striking out "as defined in the Vienna convention on Diplomatic Relations" and inserting in lieu thereof "within the meaning of section 2(3) of the Diplomatic Relations Act (22 U.S.C. 254a(3))".

(c) The Act of June 20, 1938 (Public Law 684, Seventy-Fifth Congress; 52 Stat. 797) is amended—

(1) in section 6 by striking out "(a)", and by striking out subsection (b), (c), (d), and (e); and

(2) in section 16 by adding at the end thereof the following new sentence: "In addition, the provisions of this Act shall not apply to any real property to which section 206(a) of the State Department Basic Authorities Act of 1956 (relating to foreign missions) is applicable.".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

DISTRICT OF COLUMBIA COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the District of Columbia Committee amendment.

The Clerk read as follows:

District of Columbia Committee Amendment: Page 14, beginning on line 9, strike out "and the location and size of their facilities".

Page 16, line 9, strike out "section 209(b)" and insert in lieu thereof "section 208(b)".

Page 22, strike out line 1 and all that follows through page 24, line 13.

Page 24, line 15, strike out "SEC. 207" and insert in lieu thereof "SEC. 206".

Page 24, line 21, strike out "SEC. 208" and insert in lieu thereof "SEC. 207".

Page 27, beginning on line 11, strike out "Except as provided in the first sentence of section 206(b), actions" and insert in lieu thereof "Actions".

Page 28, beginning on line 4, strike out "SEC. 209. (a) The Secretary may make section 206, or any other" and insert in lieu thereof "SEC. 208. (a) The Secretary may make any".

Page 29, line 2, strike out "SEC. 210" and insert in lieu thereof "SEC. 209".

Page 29, line 11, strike out "SEC. 211" and insert in lieu thereof "SEC. 210".

Page 29, line 18, strike out "SEC. 212" and insert in lieu thereof "SEC. 211".

Page 31, strike out line 3 and all that follows through line 12.

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. FASCELL AS A SUBSTITUTE FOR THE DISTRICT OF COLUMBIA COMMITTEE AMENDMENT

Mr. FASCELL. Mr. Chairman, I offer an amendment as a substitute for the District of Columbia Committee amendment.

The Clerk read as follows:

Amendment offered by Mr. FASCELL as a substitute for the District of Columbia Committee amendment: Page 22, strike out line 1 and all that follows through line 13 on page 24 and insert in lieu thereof the following:

"LOCATION OF FOREIGN MISSIONS IN THE DISTRICT OF COLUMBIA

"SEC. 206. (a) In order to ensure the fulfillment of the international obligations of the United States and the policy of this title, the location, replacement, or expansion of any building or other real property in the District of Columbia which is used for the diplomatic, consular, or other governmental activities (except property used exclusively for residential purposes) of a foreign mission shall be subject to the approval of the District of Columbia Foreign Missions Commission as provided in this section.

"(b)(1) There is hereby created, as an independent agency of the District of Columbia, the District of Columbia Foreign Missions Commission (hereafter in this section referred to as the 'Foreign Missions Commission') which shall consist of the five members of the Zoning Commission for the District of Columbia (as such members are designated by section 492(a) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 5-412)), the Chairman of the National Capital Planning Commission, and the Secretary of Defense, or such alternative as each person may designate from time to time.

"(2) While actually engaged in the performance of duties as a member of the Foreign Missions Commission, the Chairman of the National Capital Planning Commission (or the alternate designated by the Chairman) shall be compensated by the District of Columbia in the manner and at the rates applicable to the members of the Zoning Commission for the District of Columbia who are appointed by the Mayor.

"(3) The Mayor of the District of Columbia shall furnish such facilities and administrative services, and shall assign such employees, to the Foreign Missions Commission as may be required by the Commission to carry out this section.

"(c) The Foreign Missions Commission shall—

"(1) establish areas within which chanceries may be located as a matter of right, and

"(2) establish additional areas within which chanceries may be located.

Limitations on chancery uses shall not exceed those applicable to any other nonresidential use in the areas so established.

"(d) Any determination by the Foreign Missions Commission pursuant to this section, including the establishment of areas in accordance with paragraphs (1) and (2) of subsection (c), shall be considered rulemaking under the District of Columbia Administrative Procedure Act (D.C. Code, secs. 1-1501—1-1510).

"(e) Any determination by the Foreign Missions Commission with respect to chanceries pursuant to this section, including the establishment of areas in accordance with paragraphs (1) and (2) of subsection (c), shall be based solely on the following criteria:

"(1) The obligation of the United States to facilitate the provision of adequate and secure facilities for foreign missions in the Nation's Capital.

"(2) The chancery is in or adjacent to an area, determined on the basis of existing or planned uses, of (A) commericial use, or (B) mixed uses, including residential, commercial, office, or institutional use.

"(3) Historic preservation, as determined by the Foreign Missions Commission in carrying out this section; except that substantial compliance with District and Federal laws governing historic preservation shall be required with respect to new construction and to demolition of or alteration to historic landmarks, in order to ensure compatibility with historic landmarks and districts.

"(4) The adequacy of off-street or other parking and the extent to which the area will be served by public transportation to reduce parking requirements, subject to such special security requirements as may be determined by the Secretary.

"(5) The extent to which the area will have adequate public facilities, utilities, and services, including streets, street lighting, water, sewer, electricity, telephone, and refuse collection.

"(6) The extent to which the area is capable of being adequately protected, as determined by a Federal agency authorized to perform protective services.

"(7) The municipal interest, as determined by the Mayor of the District of Columbia.

"(8) The Federal interest, as determined by the Secretary.

Any other determination by the Foreign Missions Commission pursuant to this section shall be based solely on the criteria specified in paragraphs (1), (3), (6), (7), and (8), and such other criteria as the Commission may by regulation establish.

"(f)(1) The regulations, proceedings, and other actions of the Foreign Missions Commission pursuant to this section shall not be inconsistent with Federal elements of the comprehensive plan for the National Capital. All elements of the comprehensive plan relating to the location of foreign missions shall be based solely on the criteria set forth in this section and shall reflect the policy of this title.

"(2) Proposed determinations by the Foreign Missions Commission shall be referred to the National Capital Planning Commission for review and comment.

"(g) The Foreign Missions Commisson shall promulgate such regulations as it determines are necessary for it to carry out this section.

"(h) This section shall not be construed to authorize, and the regulations of the Foreign Missions Commission shall not provide for or require, procedures in the nature of a special exception or administrative proceedings of an adjudicatory nature.

"(i) In any proceeding with respect to approval of the location, replacement, or expansion of real property of a foreign mis-

sion pursuant to this section, the final determination by the Foreign Missions Commission shall be made not later than 6 months after the date of filing an application for such approval. Any such determination shall not be subject to administrative proceedings of any other agency or official except as provided in this title. Any such determination by the Foreign Missions Commission shall ensure the fulfillment of the obligation of the United States to facilitate the provision of adequate and secure facilities for foreign missions and shall take into account special security requirements as determined by the Secretary.

"(j) The Secretary shall require foreign missions to comply substantially with District of Columbia building and related codes in a manner determined by the Secretary to be not inconsistent with the international obligations of the United States.

"(k) The United States, acting on its own behalf or on behalf of a foreign mission—

"(1) has standing to bring an action for judicial review of a determination by the Foreign Missions Commission under this section or, where appropriate, for judicial enforcement of the requirements of this section applicable to the Commission; and

"(2) has standing to intervene in any such action which is otherwise pending.

"(l) Approval by the Foreign Missions Commission under this section or, except as provided in section 205, by any other agency or official is not required—

"(1) for the location, replacement, or expansion of real property of a foreign mission to the extent—

"(A) that authority to proceed with respect to such location, replacement, or expansion was granted to the foreign mission before the date of enactment of this section, or

"(B) that rights or interests with respect to such location, replacement, or expansion were otherwise acquired by the foreign mission before the date of enactment of this section; or

"(2) for continuing use of real property by a foreign mission for diplomatic, consular, or other governmental activity to the extent that such property was being used by that foreign mission for that activity on the date of enactment of this section.

Page 27, beginning in line 11, strike out "Except as provided in the first sentence of section 206(b), actions" and insert in lieu thereof "Actions".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment offered as a substitute for the District of Columbia Committee amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FASCELL. Mr. Chairman, I simply want to say that we discussed this in general debate, but what this substitute does is strike a compromise between our two committees and balances the Federal and municipal interests in determining the location of foreign missions in the District of Columbia.

Mr. Chairman, section 206 will strike an effective balance between the interests of the Federal Government and the District of Columbia government in determining appropriate locations for foreigh missions in the Nation's Capital. The section provides for the establishment of the District of Columbia Foreign Missions Commission, with members representing both the Federal and city governments, and sets forth criteria which promote a balancing of interests.

Section 206(a) recognizes that the location, replacement, or expansion of foreign missions in the Nation's Capital and the procedures involved in determining these matters have a substantial impact on Federal interests both in the United States and abroad. International legal obligations requiring each country to facilitate the acquistion of appropriate facilities for accredited foreign missions in the capital city of the host country cannot be subject to negation by the acts or omissions of local authorities.

Section 206(b)(1) creates the District of Columbia Foreign Missions Commission, comprised of the five members of the District of Columbia Zoning Commission and two additional members, who shall be the Chairperson of the National Capital Planning Commission and a representative of the Secretary of Defense, in order to reflect the concerns of the Congress that decisions affecting important Federal interests are made through a process which appropriately balances Federal and municipal interests.

Section 206(b)(2) provides for appropriate compensation for the Chairman of the National Capital Planning Commission during the period that individual is performing his or her duties on the Commission. The other members of the Commission are employees either of the District of Columbia or Federal Governments and therefore receive no additional compensation.

Section 206(b)(3) provides that personnel, space, and facilities will be provided by the District of Columbia government, as the Commission is a District of Columbia government agency.

Section 206(c) requires establishment of areas within the District of Columbia in which chanceries may be located as a matter of rights, as is the case with many uses in current zoning practice. Security, representation, and related factors necessitate that chancery uses be located in lesser density areas and generally in proximity to each other where possible. Security and representational functions also preclude in most cases general usage of higher density structures, such as office buildings, except for additional space needed from time to time to accommodate official activities which cannot fit into the main chancery facilities. The committee also notes that areas devoted to higher density commercial or residential uses are in most cases inappropriate for low density chancery uses, and are well beyond the financial reach of 85 percent of the foreign nations accredited to the United States, and from whom the United States must seek appropriate space within their capitals.

Section 206(c) also specifically precludes discriminatory treatment of chanceries vis-a-vis other nonresidential uses, by prohibiting limitations on chancery uses which are greater than those placed on other nonresidential uses. For example, existing regulations in some cases preclude chancery uses while at the same time permitting all other office uses to locate as a matter of right without exception or limitation.

Section 206(d) requires that rulemaking procedures under the District of Columbia Administrative Procedure Act will be applicable to such determinations. Among other things, this insures notice and opportunity to be heard for interested members of the public.

Section 206(e) sets forth the criteria to be applied to determinations by the Foreign Missions Commission. The committee notes that some of these criteria are in general usage today, but that in order to provide for effective implementation of this section, it is desirable to enumerate the criteria specifically.

Paragraphs (1) through (8) of subsection (e) set forth the criteria applicable to chanceries and chancery annexes which are intended to balance Federal and municipal interests. These criteria take into account the Federal interest, which involves international obligations of the United States and the accompanying security requirements involved, as well as concern for the impact on local matters such as transportation, housing, and environment.

Subsection (e)(1) sets forth the standard of "adequate and secure facilities" which reflects one of the fundamental purposes of the Office of Foreign Missions and the international obligations of the United States. This standard is intended to reflect the criteria of section 206(c) in order to effect the purposes of this act.

Subsection (e)(2) reflects the need to continue to locate such missions in existing mixed-used areas, in which current uses already include institutions, commercial, or governmental activities, and residential uses. The obligation to provide security for foreign missions dictates the need to locate these missions in proximity to each other and in areas of lesser density. The committee notes that areas in which current uses are entirely residential would not become available for chancery use under this amendment, except for medium-high-density or high-density apartment zones.

Section 206(e)(3) assures the continued application of historical preservation measures to facilities of foreign

missions under regulations issued by the new Commission.

Sections 206(b) (4) through (6) relate to transit, parking, public facilities and services, and special security requirements. Section 206(b)(4) also constitutes a recognition that special security factors affect parking requirements, and that similar considerations are taken into account in connection with the location of U.S. facilities abroad.

Sections 206(b) (7) and (8) specifically provide for determinations of the general municipal and Federal interests by the Mayor of the District of Columbia and the Secretary of State, respectively. Finally, the Commission is required to apply the criteria of Federal and municipal interests, historical preservation, the need for adequate and secure facilities, and adequacy of protection to other official property uses by foreign governments covered by this section.

Section 206(f) is intended to preserve the existing relationship between the National Capital Planning Commission and municipal authorities with regard to land use.

Section 206(h) is intended to assure that unreasonable burdens are not placed on chancery applicants, and that such applicants are not subjected to a process inconsistent with the conduct of official relations between nations.

Section 206(i) is intended to assure the establishment of an expeditious decisionmaking process, which will preclude overlapping and time-consuming proceedings which can result under existing law and regulations. It also emphasizes the congressional purpose in enacting this section to assure proper facilities for foreign governments consistent with international obligations.

Section 206(j) places an obligation on the Secretary to promote compliance with reasonable code requirements, taking into account special security, communications, and other factors involved in foreign government facilities in the United States, as well as with U.S. facilities abroad.

Section (k) is intended to clarify the right of the United States to intervene or bring an action concerning the activities of the new Commission, either on its own behalf or on behalf of a foreign government.

Section (l) provides "grandfather" rights with regard to existing chancery locations or uses. This subsection is necessary to protect rights and uses which were acquired prior to enactment of this section.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FASCELL) as a substitute for the District of Columbia Committee amendment.

The amendment offered as a substitute for the District of Columbia Committee amendment was agreed to.

The CHAIRMAN. The question is on the District of Columbia Committee amendment, as amended.

The District of Columbia Committee amendment, as amended, was agreed to.

□ 1145

AMENDMENT OFFERED BY MR. BROOMFIELD

Mr. BROOMFIELD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROOMFIELD: Page 19, immediately after line 23, insert the following new subsection:

"(e) Neither the Director nor any other officer or employee of the Department of State may certify or otherwise authenticate the accredited diplomatic status of a total of more than two persons for each foreign mission for the purpose of facilitating, directly or indirectly, the issuance to any such person of a diplomatic license plate for any motor vehicle by any Federal, State, or local governmental agency.

Mr. BROOMFIELD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BROOMFIELD. Mr. Chairman, this amendment is designed to discourage the wholesale issuance of diplomatic automobile license plates, of which there are reportedly in excess of 3,300 in the Washington metropolitan area. The amendment would prevent the State Department from certifying the accredited diplomatic status of more than two applicants per foreign mission who are seeking diplomatic license plates from the various local motor vehicle departments.

The proliferation of distinctive diplomatic vehicle tags serves to constantly remind Americans in the Washington area of the many special privileges accorded to the large diplomatic community and of the abuses of those privileges and the thoughtless arrogance too frequently exhibited by holders of diplomatic license plates.

To put the matter in perspective, I will give a few statistics. The U.S.S.R. has 136 accredited diplomats, but 213 vehicles with diplomatic license plates. Mexico has 42 diplomats, but 92 cars with diplomatic plates. Nigeria has 35 diplomats and 74 cars with diplomatic plates. The situation for other Embassies, both large and small, is approximately the same.

In addition to the sheer number of diplomatic vehicles in Washington, D.C., and the vicinity, we have the problem of diplomatic abuse of traffic rules and regulations. We have all heard of accidents where the diplomat has either left the scene of the accident unlawfully and/or has refused to compensate the injured American after the fact.

I sincerely hope that the person eventually designated to fill the proposed new position of Director of Foreign Missions within the State Department will give careful attention to abuses by diplomats in the operation and parking of automobiles in this area. Furthermore, I hope he or she will take prompt action to try to minimize the inconvenience and annoyance too often caused Americans by insensitive diplomatic motorists.

Mr. FASCELL. Mr. Chairman, I move to strike the last word.

The gentleman's amendment touches on a matter which has plagued us in the committee for a long time and is the reason that we wrote the authority in this bill for the Foreign Missions Office.

Now, whether it is going to be done by legislative cap of whether it is going to be done administratively, as far as I am concerned, it really does not make any difference. The point is that the Secretary has to have the authority to do what the gentleman is talking about, plus deal with other problems of this kind.

The Foreign Missions Office, as the gentleman from Michigan has said, needs to be staffed properly so they can deal with this problem. They need at least 20 people in that office. Up until now, the job has not been done because the authority has not been available. We fully expect the Department to reprogram sufficient funds to get this office off the ground very soon and to make certain that it has sufficient staff to do the job—and we do not mean just three or four people. We look forward to seeing an effective Office of Foreign Missions to finally come to grips with the very real needs in this area.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROOMFIELD).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. FASCELL

Mr. FASCELL. Mr. Chairman, I offer technical amendments.

The Clerk read as follows:

Amendments offered by Mr. FASCELL: Page 14, line 21, strike out "assistance to be provided" and insert in lieu thereof "treatment to be accorded"; and in line 22, immediately after "determined" insert "by the United States".

Page 20, line 23, immediately after "used by" insert "a".

Page 25, strike out lines 8 through 22 and insert in lieu thereof the following:

"(c) For purposes of administering this title—

"(1) the Secretary may accept details and assignments of employees of Federal agencies to the Office of Foreign Missions on a reimbursable or nonreimbursable basis (with any such reimbursements to be credited to the appropriations made available

for the salaries and expenses of officers and employees of the employing agency); and

"(2) the Secretary may, to the extent necessary to obtain services without delay, exercise his authority to employ experts and consultants under section 3109 of title 5, United States Code, without requiring compliance with such otherwise applicable requirements for that employment as the Secretary may determine, except that such employment shall be terminated after 60 days if by that time those requirements are not complied with."

Page 25, line 24, strike out "(except for personal services)" and insert in lieu thereof ", including personal services,".

Page 26, line 13, strike out "compatability" and insert in lieu thereof "compatibility".

Page 28, beginning in line 8, strike out ", after consultation with the international organizations,"; and in line 18, strike out "and" and insert in lieu thereof "or".

Page 29, line 13, strike out "This section" and insert in lieu thereof "In addition to means of enforcement otherwise available, this title"; and in line 15 strike out "equitable".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FASCELL. These amendments, Mr. Chairman, are technical and perfecting in nature resulting from the need to clarify certain provisions of the bill or to correct printing errors.

One amendment carries out a request of the Committee on Post Office and Civil Service which would permit the new Office of Foreign Missions established in this bill to meet certain temporary technical and professional requirements in a timely manner, a request which the Post Office and Civil Service Committee felt was a needed guideline to have in that office.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Florida.

The amendments were agreed to.

AMENDMENT OFFERED BY MR. BROWN OF COLORADO

Mr. BROWN of Colorado. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Colorado: On page 2, line 15, strike "$1,744,391,000" and insert in lieu thereof: "$1,248,059,000".

Mr. BROWN of Colorado. Mr. Chairman, this particular amendment deals with the authorization for fiscal year 1983. It reduces those authorizations back to the figure requested by the executive.

I might mention, this measure comes close to saving $500 million; but that the figure that results for administrative purposes is still significantly above the figure that is being expended by the Department this year.

I might also note that it leaves the sum available to the Department, about a billion and a quarter dollars, for administrative purposes which I believe should be more than ample to conduct properly the very significant responsibilities they have around the world.

I might mention, I think in the present climate of 20 percent interest rates, of skyrocketing deficits, of an economy that faces terrible problems, that it would be the height of irresponsibility for us to go ahead with a major increase in expenditures that is beyond what even the Executive has requested.

I might also mention, Mr. Chairman, that these figures here for fiscal year 1983 are not broken down or allocated by individual account, as they are in fiscal year 1982. It would seem to me that before we would approve a major increase in this area that the Members of Congress of this country would want to at least have that kind of itemized breakdown to properly legislate an increase of this kind.

So I would urge the Members of this body to at least insist on that kind of measure and be willing to go along with this amendment to provide a modest increase from fiscal year 1981.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Colorado. I would be glad to yield to the gentleman.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

I, first of all, want to congratulate the gentleman on his amendment. If I understand the amendment correctly, what the gentleman is doing is attempting to put the budget figures that we would pass in this authority bill in line with the budget that the administration desires for fiscal year 1983; is that correct?

Mr. BROWN of Colorado. That is quite correct.

Mr. WALKER. So what we are really doing is trying to implement a portion of the President's economic program here. We are talking about the kinds of spending cuts that the President feels are necessary to implement that economic program.

As I pointed out earlier today, it seems to me that is an important signal to continue to send from this body to the financial markets and other places that are deciding interest rates and other kinds of economic policies so that, indeed, we do not need this economic program to be a 1-year 1982 phenomenon; but rather when we look toward fiscal year 1983, we are determined to keep on target for fiscal year 1983. It seems to me that is what the gentleman's amendment is doing. It is keeping us on target for 1983 spending with what the administration has proposed and, therefore, sending an important signal, not only to the State Department, but to the financial markets and all kinds of other places around this country that we are determined that for the next several years we are going to implement a responsible economic policy.

I, for one, would like to congratulate the gentleman. I think it is a very worthwhile amendment.

Mr. BROWN of Colorado. I believe the gentleman has summarized it correctly. I might add one aspect to it, though. It is important to realize that if this amendment passes, we will still be spending more money on administration in fiscal year 1983, or we will authorize more money to be spent in fiscal year 1983 than we authorized in the current fiscal year; so in a real sense this is not a cut from current levels in dollar terms. It is a modest increase.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I respect the position and the logic of the gentleman who proposes this amendment. We are all aware of the necessity with respect to cutting the budget, but first let me say this.

First. We are not just talking about programs now, so we cannot just kind of writeoff with the back of our hand and say, well, we are just talking about administrative costs. OK?

What we are talking about is people who carry out the diplomatic functions. When we looked at the Presidential requests for 1983, after following it dollar for dollar in 1982, we realized that this budget would result in additional cuts in personnel beyond those to be made in 1982 of about 1,000 positions. I pointed out earlier in this discussion that the State Department, as an example, is at the 1959 level in terms of operations, and we will still cut 550 positions.

They have taken a hard slap in terms of this budget. In terms of the committee's 1983 request, what we did was look at the overseas inflation rate, the worldwide average affecting the countries where these people have to do their jobs. This budget does not represent a growth but a cut in real dollars. We are talking about taking this 1982 program, which is pretty tough on the Department as it is, and making it even rougher in terms of the ability to do the job by these agencies.

We decided, and I hope the gentleman will agree with this, that there was some need for a priority that needed to be expressed, not in terms of new programs, but simply in letting the people who are on board after this whack in 1982 to stay on board in 1983 and do that job: run the radios, run the diplomatic posts and do all the things they have to do.

In order to give consideration to the total budget problem that the President faced, we kept it as close as possible to the total reconciliation figure,

both in the budget and in the Reconciliation Act, so that the differences in the totals are not impacting on the budget to any measurable extent, if the gentleman follows me.

In other words, we shifted priorities and put the money in the accounts where we thought it would be most needed and took it from other areas, this staying within the budget resolution targets and the Reconciliation Act which was approved.

I would hope, therefore, that as well intentioned and as proper as this amendment appears to be in terms of getting back to the Presidential level in 1983, we would not inadvertently destroy those priorities.

Now, if the President wants to and has to come back at us, as he indicated he must in 1982 and in 1983 to maintain his budget deficit levels of 42½ or $24 billion for 1983, OK, he will have then established a priority; but let us not destroy the priority which has already been approved. We are not taking it away from him for all time.

□ 1200

So let us indicate that we are concerned about this. The gentleman, or the Budget Bureau, or whoever else it is who has to deal with the total problem, is going to have that opportunity.

All we did was to give recognition which has already been approved by this House. And, therefore, I hope we would not go backward. I hope the gentleman would consider withdrawing the amendment, or ask whatever other questions he cares to ask, or make whatever record he cares to make.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

I rise to oppose the amendment.

I would be pleased to yield to the gentleman for any questions he has in the process.

If I may direct the gentleman's attention, and the attention of the other Members on the floor, to page 4 of the committee report, and pick up the point that my friend from Florida just made, you notice that for fiscal year 1982 one of the figures allowed there is salaries and expenses, the $928 million.

Now, we have in the budget resolution anticipated, I believe it is, a 7-percent pay increase. So there alone you have approximately $70 million increase.

If the administration in its wisdom decides that we ought to fly the flag in the few additional consular posts, or there are new countries—for example, Belize is coming in next week as an independent country and that means a new diplomatic post, a new ambassador, a new staff, and so on—we have to have that flexibility. And that is what we have allowed for in our 1983 fiscal year figure.

While I realize that of the various entities in Government at the moment the OMB seems to be a more noble structure than, the Department of State, it is a fact that the Department of State is also part of the Government and of the administration. And it is a fact of life that the Secretary of State is a strong-willed man who probably does not realize, right at this point, that we would be doing a major surgical job on his 1983 budget.

So I would suggest to the gentleman from Florida that we write an effective record here; that the gentleman would give us an opportunity to further work with OMB and then through the Appropriations Committee, and whatever is a really final acceptable figure be worked out.

Mr. BROWN of Colorado. Will the gentleman yield?

Mr. DERWINSKI. Yes, I would be pleased to yield to the gentleman from Colorado.

Mr. BROWN of Colorado. If, taking your figures, I have added it up correctly, I am assuming a $70 million increase to the $948 million in administrative charges for fiscal 1981. Adding another $70 million in the following year for additional pay increases, that totals $140 million. Adding those two together, that relates to $1,088 million.

As I see it, even with the pay raises cranked in, we still have $160 million available for unforeseen additional expenses, even if my amendment passes. And if my amendment does not pass, we do not have $160 million unaccounted for funds, but we have something in the neighborhood of $660 million unaccounted for funds, even with the pay raises.

Would that be correct?

Mr. DERWINSKI. If the gentleman would further review the committee report, there are other items that I think are understated. For example, the emergencies in diplomatic and consular service have been running higher than the figure stated. The payment to the American Institute in Taiwan will be increased proportionately with inflation and salaries. And all along the line you have the representation allowance, inflation allowance for that.

Frankly, I think we are pennywise and pound foolish in that figure, since we do not really give our diplomats abroad the kind of expense allowance, that a traveling salesman would have.

If the gentleman would please note, in fiscal 1982 we took the exact figures requested. It was only in fiscal 1983 that we made the upward adjustments to allow for inflation, the salary increases, the built-in increases that we know are coming. And that is where we tried to allocate the proper figure.

Mr. FASCELL. Mr. Chairman, will the gentleman yield at this point?

Mr. DERWINSKI. I yield to the gentleman from Florida.

Mr. FASCELL. Let me just make two other points. One is that we expect at least, at the very least, a $100 million increase on overseas wages and prices, which are necessary for these agencies on services, personnel, and so on, over which we have no control. That is just a minimum.

If we go back with no flexibility at all, and we do not take into account the average inflation rate overseas on this, we are talking about a further reduction of possibly 1,000 people.

We are really impacting on the smallest department in Government today, which has infinitesimal impact on the U.S. budget. And what we have done is we tried to restructure the priorities within the amounts that the President was talking about.

Again, I just want to emphasize that in the final analysis, if on review the President has to make more drastic cuts in 1983, he can tell us what his priorities are.

(By unanimous consent, Mr. DERWINSKI was allowed to proceed for 2 additional minutes.)

Mr. DERWINSKI. I yield to the gentleman from Colorado (Mr. BROWN).

Mr. BROWN of Colorado. I thank the gentleman for yielding.

I might sum up very briefly, if I could, with this observation.

I can very much appreciate the deep concern that both the gentleman from Florida and the gentleman from Illinois have with regard to the vitally important function that is served by this department, and what I know is their genuine concern for this country and the appropriate purposes it serves.

From my point of view, if the amendment passes we have allowed for the additional pay increase for 1982, we have allowed for the additional pay increase in 1983, and we have left an additional amount of $160 million available for unforseen contingencies.

To go above that figure is to cause further havoc within the financial markets. It is to say a citizenry that is paying 20 percent to borrow money, and to keep businesses alive, and to provide jobs in this country, that we are going to take an even bigger share of what this country has to provide.

I must say to this body that I sincerely believe that if we do that, if we squeeze the private sector more than we are doing now, that we diminish its ability to support the Government that we have, not enhance it. And that to go beyond the levels requested by the President here would be great folly, not only for the individual citizens that have to pay those taxes eventually, but for the long-range foreign interests of this country as well.

Mr. DERWINSKI. Mr. Chairman, may I sum up the other side?

Mr. WALKER. Mr. Chairman, will the gentleman yield to me for a moment?

Mr. DERWINSKI. I would be happy to yield to the gentleman.

Mr. WALKER. If I understood the gentleman's point, his point was what the committee has tried to do is provide for a number of things that they do not think were provided in the budget submitted by the executive.

Does the gentleman really contend that he does not feel the administration took into consideration the very items that he raised when they prepared their budget for fiscal 1983?

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. WALKER and by unanimous consent, Mr. DERWINSKI was allowed to proceed for 4 additional minutes.)

Mr. DERWINSKI. In answer to the gentleman's question, that is exactly right. Let me explain what happened.

If the gentleman would recall, we marked this bill up in subcommittee in February. At that time the new administration was just groping. The OMB, under Mr. Stockman, was working with general figures. There was minimum consultation with the new team at State. And that is why we cooperated fully in the fiscal 1982 figures, which were really those inherited from the Carter administration, and by a gentleman's agreement there was no change there.

Then we tried to calculate with a touch of practicality, based on previous years' experience, what they would really need for 1983.

Now, OMB has come down with certain figures. I am not aware that the Department of State is at all satisfied with the calculations that have come from OMB.

Mr. WALKER. Would the gentleman yield further?

Mr. DERWINSKI. As a matter of fact, when these figures were prepared for the bill this week, early in the week, I was advised by State that they were unaware of why there were potential cuts being offered on the floor. And I think it is a case—I do not say this critically, but there are some times when one hand of government does not really know what the other is doing, coordination is somewhat lacking.

If the gentleman will keep in mind that we actually are in a period where we will be expanding, not contracting, the number of overseas installations. There are half-a-dozen new ministates which will soon become sovereign countries, and we will be sending our representatives there. Then there will be the pay increases, the inflation caused increases overseas that the gentleman from Florida mentioned. That is what we have calculated.

Mr. WALKER. Mr. Chairman, will the gentleman yield further?

Mr. DERWINSKI. Yes, I yield to the gentleman.

Mr. WALKER. I thank the gentleman.

The problem is what you are really doing in the committee bill is you are raising the fiscal 1982 figure for fiscal 1983 in the particular category to which the gentleman from Colorado's bill speaks.

What you are really doing is expanding that category by almost 30 percent.

You are talking about a very substantial increase in that particular category. And that is an increase which is far above inflation. It is far above what the administration requests.

I understand that there may have been a lack of coordination on this. But it seems to me that there has been a chance for review.

The gentleman said that he is not aware that the State Department had any consultation on the figures. But certainly since that time there must have been some consultation.

Was there testimony from the State Department indicating they do not agree with the 1983 figure?

Mr. DERWINSKI. There has been no indication from the State Department that they agree with the figure, which when you use the term "administration" I use "OMB." I am not so sure that they are speaking with one voice from the administration.

Mr. WALKER. That was not my question. My question was have you had any testimony that they do not agree with the 1983 figure?

Mr. DERWINSKI. We have had no testimony, of course, since we marked up the bill in subcommittee. That was 7 months ago.

Mr. WALKER. I thank the gentleman.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I would be happy to yield to my colleague.

Mr. FASCELL. The point is that the Secretary of State, I say to the gentleman from Pennsylvania, is not about to send down a letter saying that he disagrees with the President of the United States.

But let us face the practical aspects of life.

Mr. DERWINSKI. There are enough rumors of a conflict between the State Department and the White House. We do not want to start another one here on the floor this afternoon.

I yield back the balance of my time.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

I would like to call to the attention of my colleagues in support of Mr. BROWN's amendment, which I think has merit on the basis of the discussion we have heard, that in the committee report itself, on page 5—let me quote from the committee itself.

> The committee has not, however, allocated this increase by individual accounts, recognizing that specific needs in fiscal year 1983 will determine this allocation.

My point is that I believe my colleague from Colorado is correct in his analysis of the issue. There is an adequate contingency amount already in the bill in the amount of an additional $160 million. I cannot believe that since even the committee in its own report admits that the dollar amounts have not been allocated at this juncture, that this reduction for 1983 is but a reasonable suggestion. It is merely a recognition of what the administration originally requested. And knowing how efficiently this fine committee operates, I am sure that next year if it was desperately needed, the committee would come back and ask for it.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. Of course I yield to the gentleman from Florida.

Mr. FASCELL. You know, the gentleman is on target in one sense, with regard to the allocation.

Mr. ROUSSELOT. I am merely quoting from your report.

Mr. FASCELL. I understand. The gentleman stated it accurately.

We did not want to allocate the inflationary factor to all four counts on an arbitrary basis.

Mr. ROUSSELOT. I think that was wise.

Mr. FASCELL. So we put it in because the Department has that authority. They can take that money. That is just a guide to them to allocate within the other accounts if they need it, because those other accounts are going to face the same problems whether you operate a refugee camp overseas or whether you are operating a diplomatic post overseas.

□ 1215

But, we left it to their discretion and gave them some flexibility. So, that is the reason that it is allocated to that one account in that fashion. That is the only reason.

Mr. ROUSSELOT. I think, the statement of the committee in its report reinforces my colleague from Colorado's point that there already is additional flexibility in this authorization, roughly $160 million. Therefore I did not find it difficult to support the gentleman's (Mr. BROWN) amendment on the basis of the committee's own language.

Mr. FASCELL. Will the gentleman yield again?

Mr. ROUSSELOT. I will be glad to.

Mr. FASCELL. As far as the amounts are concerned in this bill, let me just say that I have been handling this bill for some years now.

Mr. ROUSSELOT. You certainly have.

Mr. FASCELL. And we have been very careful, but I do not believe in recent memory I recall a time when there was not an emergency at the State Department with respect to the need of more funds that had to be ultimately cleared by the OMB and the President and everybody else. One year, and it has just been very recently—it may have been last year, I am not sure—we had four supplementals. I do not want to do business that way. I would rather do what we did, which is try to allocate the priorities within the total amounts of this particular account 150, and try to forestall this foolishness, as I see it, of coming back over and over again with respect to supplementals. I would rather not do that.

Again, just emphasizing—and I appreciate the gentleman giving me the opportunity to reemphasize this—if the President has to do something in 1983 to maintain the $24 deficit level beyond what he contemplates, he will then have an opportunity to review the kind of priority structure that we structured in the 150 account and say, "I can't go along with that."

It is coming to the Congress, but at least what we will do is forestall the necessity of a supplemental. So, to that extent, if the gentleman could go along with that, I think it would be most helpful.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Let me just say in closing that I think, as pointed out by Mr. BROWN, the extra $160 million is more than adequate as a contingency amount in this area being discussed. If my distinguished colleague from Florida wants to raise the issue that the State Department tends to have all kinds of extra emergencies, that they are always coming back for more, so does every agency in the Federal Government. The gentleman and I know that. I cannot think of an agency that does not run down here and has to have something added in a supplemental. So, I am not sure that is a good argument for voting against the amendment of my colleague from Colorado, who is merely trying to bring this authorization into line. As my colleague from Florida is very conscious of the high interest rates we are paying all over the country, we are just trying to hold down that huge Federal deficit.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. BROWN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. BROWN of Colorado. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1230

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

For what purpose does the gentleman from Colorado (Mr. BROWN) rise?

Mr. BROWN of Colorado. Mr. Chairman, I withdraw my demand for a recorded vote, and I demand a division.

On a division (demanded by Mr. BROWN of Colorado) there were—ayes 42, noes 18.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. ZABLOCKI

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Zablocki: Page 31, immediately after line 12, insert the following new section:

REOPENING CERTAIN UNITED STATES CONSULATES

SEC. 120. (a) None of the funds made available under this or any other Act for the "Administration of Foreign Affairs" may be used for the establishment or operation of any United States consulate that did not exist on the date of enactment of this Act (other than the consulate specified in subsection (b) of this section) unless all of the United States consulates specified in subsection (b) of this section have been reopened as required by section 108 of the Department of State Authorization Act, Fiscal Years 1980 and 1981.

(b) The consulates referred to in subsection (a) of this section are the consulates in the following locations: Turin, Italy; Salzburg, Austria; Goteborg, Sweden; Bremen, Germany; Nice, France; Mandalay, Burma; and Brisbane, Australia.

Mr. ZABLOCKI. Mr. Chairman, the purpose of this amendment is to persuade the Department of State to carry out the mandate of Congress expressed in the previous Department of State Authorization Act regarding the reopening of certain U.S. consulates. A similar amendment has already been adopted by the Senate.

In 1979, the Congress directed that the following consulates should be reopened as soon as possible: Salzburg, Austria; Bremen, Germany; Nice, France; Turin, Italy; Goteburg, Sweden; Mandalay, Burma and Brisbane, Australia. Despite overwhelming congressional support for this measure, both the previous and the current administrations have blatantly ignored this directive. In fact, the current administration is planning to open three new consulates in Communist China while at the same time refusing to reopen any of the previously named consulates due to so-called budgetary pressures.

Mr. Chairman, this is not an inconsequential matter. For example, during a recent visit to Australia, we learned that the closing of the U.S. consulate in Brisbane has forced U.S. business to turn to our consulate in Sydney for any assistance they require. This makes our Sydney consulate responsible for serving the needs of Americans in half of the land mass of Australia (an area equivalent to the distance between New York and Los Angeles). Yet Sydney has insufficient travel funds for its personnel to visit other cities in the region it must now service.

U.S. businessmen pointed out that over $20 billion in resource development projects are planned in the next decade for Brisbane's state of Queensland, while no consular support is readily available to U.S. companies seeking to bid for contracts on these projects. The case of the other consulates which remain closed is equally compelling, both on economic and diplomatic grounds.

For example, Mr. Chairman, the consulate in Salzburg, Austria, was closed. That was not wise. In fact that consulate is a very important strategic information-gathering location. There are many Communist agents operating there, and yet we closed our consulate, thus denying ourselves a presence in this critical area.

My amendment would simply defer the use of State Department funds for the establishment or operation of any new U.S. consulates overseas until the consulates stipulated in existing law are reopened. The amendment would in no way affect ongoing construction or maintenance and security measures with regard to U.S. diplomatic facilities abroad. It would, however, delay the opening of new consulates planned for Communist China and Brunei.

Mr. Chairman, I regret having to offer this amendment. But it is clear that the will of Congress in this matter has been ignored, and that the only way to insure that congressional priorities are recognized is the adoption of this amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I can understand the frustration of the gentleman from Wisconsin (Mr. ZABLOCKI), the distinguished chairman of the Committee on Foreign Affairs.

It is just really sad that we have to legislate this kind of thing. Sometimes there just seems to be no way around it.

While I shall not object, of course, to the gentleman's amendment, since we in Congress have expressed time and time again our feeling that these consulates should be open, the fact is that what we have done already in the 1983 budget, taking it back to the old level, is we have guaranteed that the consulates will not be opened. We have guaranteed as a matter of fact that we are going to have to close more, maybe as many as 20 or 30. We have in effect guaranteed that at least another thousand people will have to be eliminated from the smallest department of Government.

So we are going to be frustrated and the Department is going to be frustrated, but the real net result is that the people we are trying to serve, the American citizens, are the people who are not going to get the services. The American businessman or the visitor, for that matter, overseas is the one who will ultimately suffer in these kinds of cuts.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. M'DONALD

Mr. McDONALD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McDONALD: Page 2, line 17, strike out "$563,806,000" and insert in lieu thereof $469,472,350".

Page 2, line 18, strike out "$554,436,000" and insert in lieu thereof "$469,472,350".

Mr. McDONALD. Mr. Chairman, last week, we appropriated $469,472,350 for international organizations and conferences for fiscal year 1982. Before us now, is the authorizing legislation for that appropriation. However, contained within the legislation is the authorization of the expenditure of $563,806,000, nearly $95 million in excess of what we have appropriated. What this amendment does is simply bring the authorization into line with our appropriation.

To enact the authorization contained in H.R. 3518 as is, would be to authorize an appropriation that is a 24.5-percent increase above the fiscal year 1981 appropriation—an increase of $97.5 million. I, for one, find it exceptionally difficult to ask the citizens of the United States to make sacrifices while we vote to substantially increase the authorization for international organizations. For that reason, I have introduced this amendment which will reduce the authorization for fiscal 1982 from $563,806,000 to $469,472,350, the amount which we have already appropriated.

In addition, in view of the proposed budget cuts for next year, this amendment will also hold the authorization for fiscal 1983 at the same level as fiscal 1982. I caution my colleagues not to be misled by the figures proposed in this bill. Despite the fact that the proposed authorization for fiscal 1983 reflects a slight decrease from the authorization for fiscal 1982, the fiscal 1983 authorization in its present form, reflects an increase of 18 percent, nearly $85 million above the fiscal 1982 appropriation which we approved last week.

Of the funds that we appropriated last week, over $400 million is earmarked as membership assessments to international organizations. Some of those organizations include:

The International Organization for Legal Metrology, $64,000.

The Inter-American Institute of Agricultural Sciences, $7,672,000.

The Pan American Railway Congress Association, $22,000.

The World Tourism Organization, $204,000.

The Pan American Institute of Geography and History, $396,000.

The Inter-American Indian Institute, $154,000.

The International Bureau of Weights and Measures, $379,000.

The International Bureau of the Publication of Customs Tariffs, $53,000.

The International Office for Epizootics, $64,000.

Just to name a few. There are a host of others.

In addition to the membership assessments, the United States spends millions of dollars—taxpayers' dollars—in the form of additional voluntary contributions to international organizations. During this year alone, despite the economic hard times, the United States will give the United Nations an estimated $550 million—over one-half billion dollars—in voluntary contributions in addition to the $340 million that we paid as a membership assessment.

Prior to the August recess, we concluded work on the budget and tax bills. With the reductions in the Federal budget contained in those bills, we have given notice to the American people that leaner appropriations will become a fact of life. With those leaner appropriations, our citizens must become less dependent on the Federal Government and sacrifices must be made. We, therefore, must ask ourselves: Are we prepared to ask our constituents to make these sacrifices and to expect less in the way of domestic programs and assistance while we vote to increase the number of their tax dollars that we authorize for international organizations? I think not and for that reason, I urge my colleagues to support this amendment to bring the fiscal 1982 authorization into line with the appropriation that we passed last week and that we hold the fiscal 1983 level to the fiscal 1982 level.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. McDONALD. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, do I understand the gentleman's amendment correctly, that, dollar for dollar, what it does is take the authorization level in this particular account to what the appropriation bill has in it?

Mr. McDONALD. Yes; the bill that we passed last week.

Mr. FASCELL. Mr. Chairman, I will not object to the gentleman's amendment.

Mr. BROOMFIELD. Mr. Chairman, will the gentleman yield?

Mr. McDONALD. I yield to the gentleman from Michigan.

Mr. BROOMFIELD. Mr. Chairman, we have no objection on this side to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. McDONALD).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BEARD

Mr. BEARD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BEARD: Page 3, immediately after line 21, insert the following new section 104 and redesignate subsequent sections of the bill accordingly:

RESTRICTION ON CONTRIBUTIONS TO THE UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

SEC. 104. (a) None of the funds authorized to be appropriated by section 102(a)(2) of this Act or by any other Act for "International Organizations and Conferences" may be used for payment by the United States of its contribution toward the assessed budget of the United Nations Educational, Scientific and Cultural Organization if that organization implements any policy or procedure the effect of which is to license journalists or their publications, to censor or otherwise restrict the free flow of information within or among countries, or to impose mandatory codes of journalistic practice or ethics.

(b) Not later than February 1 of each year, the Secretary of State shall report to the Congress with respect to whether the United Nations Educational, Scientific and Cultural Organization has taken any action described in subsection (a) of this section.

Mr. BEARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. BEARD. Mr. Chairman, my amendment is a simple one, but its importance cannot be overstated. It says to the members of the United Nations and the United Nations Educational, Scientific and Cultural Organization—UNESCO for short—that if they take any steps to implement a policy which

has the effect of licensing journalists or their publications, to censor or otherwise restrict the free flow of information within or among countries, or to impose mandatory codes of journalistic practice or ethics, we in the United States shall withdraw our contribution to that organization.

The Members will notice that I said, "implement." They may discuss or debate all they want; it is only when they actually try to impose such a repressive policy of journalistic suppression that my amendment would take effect.

My amendment makes it the responsibility of the Secretary of State to report to the Congress no later than February 1 of each year as to whether UNESCO has taken such action.

Mr. Chairman, UNESCO has been debating such a plan for nearly a decade, although it is only in the last 4 years that the possibility they would adopt such a plan has grown to dangerous levels. It is inspired by a group of nations represented by the Soviet bloc countries and various totalitarian governments of the Third World.

There are many proposals which have been put forth in varying degrees or forms. Most proposals involve some kind of licensing of journalists based on compliance with some sort of mandatory code of ethics. Whatever form the proposal would take, when put into implementation, it would result in a repression of the free flow of information among nations.

My amendment is so worded as to cover any attempt by UNESCO to hamper the world's international press through some kind of regulation of journalists.

Cutting off our funding to UNESCO would not be an unprecedented act by this Congress. In 1974 Congress withdrew funds from UNESCO because of three resolutions that that particular body passed aimed at Israel and favoring the PLO. So we have cut off funding from UNESCO before. We also pulled completely out of the International Labor Organization because that organization supported the PLO.

I also want to emphasize, Mr. Chairman, that we are not cutting off 1 cent with my amendment. We are merely telling UNESCO that we shall cut off our money if they take action to suppress the international press. Therefore, it should be made clear what the choice is. There is, I believe, a number of UNESCO members willing to adopt some sort of system aimed at controlling the world's press, and it is near to a majority.

Our opposition must be made crystal clear, but our opposition must not consist of a mere resolution of disapproval as some of my colleagues have suggested. We must oppose such a move by UNESCO with our most effective weapon, and that is our financial contribution. We contribute fully 25 percent of UNESCO's budget.

I might add that UNESCO's budget has tripled in the past 5 years. If we continue to provide one-fourth of its budget while they pursue such a policy, then we are accomplices to that policy. I believe it is essential that our position be made clear before they consider such a step, thus making it their own choice as to whether they want to have America's funding.

I believe that our delegates to UNESCO would be far better armed to fight off attempts to throttle the press if they could point to total and adamant opposition by the U.S. Congress. There is no more sincere message of opposition than the promise to cut off funds.

□ 1245

Some might say by adopting my amendment we are acting like the proverbial child who threatens to take his ball and go home if he does not win the game. I do not agree. Freedom of thought and information is not a game. It is a basic human right. We must not compromise on it.

Most countries in this world already live in severe material proverty. They should not have to suffer intellectual proverty as well. UNESCO proposals, if carried out, would do that.

Mr. Chairman, the United States simply cannot be a party to global repression of freedom of information. My amendment makes that crystal clear to all concerned, and I urge its adoption.

Mr. Chairman, at this point I wish to include a copy of President Reagan's letter supporting my amendment:

The letter follows:

THE WHITE HOUSE,
*Washington, September 17, 1981.*

Hon. THOMAS P. O'NEILL, Jr.,
*Speaker of the House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: I would like to convey this Administration's support for Representative Robin Beard's amendment to the State Department authorization bill concerning funding for UNESCO.

The United States has long regarded the principle of the free flow of information as a cornerstone of any democratic political order, and an essential instrument for furthering understanding among the peoples of the world and encouraging the growth of free, equitable and enlightened government. As Article 19 of the Universal Declaration of Human Rights states: "Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers." Unfortunately, this principle is today too often honored more in the breach than the observance. It is particularly worrisome that it should come under attack in an international organization that ought to be its most tenacious defender—the United Nations Educational, Scientific and Cultural Organization (UNESCO).

We recognize the concerns of certain developing countries regarding imbalances in the present international flow of information and ideas. But we believe that the way to resolve these concerns does not lie in silencing voices nor restricting access to the means of communication, but in encouraging a broad and rich diversity of opinion. Efforts to impose restrictions on the activities of journalists in the name of issuing licenses to "protect" them, and other restrictions of this sort that have been proposed by certain members of UNESCO, are unacceptable to the United States. We strongly support—and commend to the attention of all nations—the declaration issued by independent media leaders of twenty-one nations at the Voices of Freedom Conference, which met at Talloires, France, in May of this year. We do not feel we can continue to support a UNESCO that turns its back on the high purposes this organization was originally intended to serve.

With best wishes,

Sincerely,

RONALD REAGAN.

Mr. SMITH of Alabama. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I yield to the gentleman from Alabama (Mr. SMITH).

Mr. SMITH of Alabama. Mr. Chairman, I rise in support of this amendment designed to encourage and protect free press and the free exchange of ideas. It is right and fitting that the greatest free society on Earth should oppose strenuously this effort to manipulate information from country to country.

Since the licensing proposal under consideration by UNESCO was initiated by the Soviet Union it has received growing support from totalitarian and developing nations. The proposal is an obvious effort to censor and intimidate the press and the free flow of news and ideas between countries.

America appreciates the value of a free press. Therefore, we must let the world know we value dearly the competition of ideas and the free flow of information. Freedom is under assault, and we must act.

A clear and strong message must be sent to UNESCO that we find press regulation repugnant. We certainly have the power to influence this important issue because we pay such a large percentage of the UNESCO budget—25 percent of $45 million annually.

I have every confidence that if we have the resolve we will be successful. I urge passage of this amendment because it reflects our dedication to press freedom and demonstrates to the world that we are proud and vigilant of our commitment to liberty and desire that same liberty for all who would choose it.

Mr. McDONALD. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I yield to the gentleman from Georgia (Mr. McDONALD).

Mr. McDONALD. I thank the gentleman for yielding and would like to commend the gentleman from Tennessee (Mr. BEARD) for a very important amendment, one that strikes at the

very heart of the danger that is now posed against freedom of the press and freedom of speech.

The CHAIRMAN pro tempore. Time of the gentleman from Tennessee has expired.

(By unanimous consent Mr. BEARD was allowed to proceed for 2 additional minutes.)

Mr. McDONALD. If the gentleman will continue to yield, I think the gentleman has done a very important thing to put the spotlight on the proposed actions or the discussed proposed actions in UNESCO, ones that would threaten freedom of speech, freedom of the press. I would like to commend the gentleman from Tennessee for this very important amendment and I wholeheartedly support it.

Mr. BEARD. I thank the gentleman.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I am happy to yield to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of the amendment by the gentleman from Tennessee to the State Department authorization bill, which would direct the cutoff of America's financial contribution to the United Nations Educational, Scientific, and Cultural Organization (UNESCO), should that body implement a worldwide system of media control and press censorship.

We have watched over the past several years as UNESCO has seriously debated this issue and now must publically announce our adamant opposition to the Soviet bloc and totalitarian governments' desire to control the free flow of information among nations. I believe we must not allow discretion to host governments to either color or fully censor press reports from an international body whose obligations lie with all its member countries. It is my opinion, and I think you will agree, that any implementation of such journalistic censorship cannot be tolerated.

Remember, the United States contributes a full one-fourth of UNESCO's budget. Our position opposing censorship, and our intention to act in good faith, must be made clear before any decision by that body is made on this issue. I urge my colleagues who support this basic right of freedom of the press to vote in favor of this amendment.

Mr. BEARD. I thank the gentleman for those comments.

Mr. PARRIS. Mr Chairman, will the gentleman yield?

Mr. BEARD. I am happy to yield to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Chairman, I commend the gentleman for his position on this amendment and I commend it to my colleagues.

It seems to me that this is basically a kind of worldwide protection of our Nation's freedom of speech and the first amendment.

I would like to engage very briefly in a colloquy with the gentleman from Tennessee. It is my understanding that the State Department authorization has, in fact, passed the other body and there is a proposal generally known as the Moynihan-Quayle amendment. How does the gentleman's amendment compare with the Moynihan-Quayle amendment?

The CHAIRMAN pro tempore. Time of the gentleman from Tennessee has again expired.

(By unanimous consent Mr. BEARD was allowed to proceed for 3 additional minutes.)

Mr. BEARD. The other body has passed an amendment dealing with this issue. There is a major difference, though. They would only cut back our contribution to UNESCO by a percentage equal to the percentage of UNESCO's total budget that is spent on implementing a world press regulation system. That may well be a very small, even nominal amount.

UNESCO may only spend 1 percent or several million dollars of the total budget on this so-called New World Information Order, so under the Moynihan-Quayle amendment the cutoff, our cutoff would only be approximately 1 percent, which would be a meaningless amount and not have any teeth in it.

Mr. PARRIS. Does the gentleman believe, therefore, that his amendment would be more effective?

Mr. BEARD. I think my amendment would definitely get their attention if they saw the potential of the loss of $49 million to $50 million, yes.

Mr. PARRIS. If the gentleman would yield further, how does the gentleman respond to the suggestion that he is infringing on the State Department's discretion in his amendment?

Mr. BEARD. I think everyone in this body knows that it is the Congress right to decide how the taxpayers' dollars are spent and set policy. I do not see this as infringement on the State Department's rights at all.

Mr. PARRIS. One final inquiry. Does the gentleman agree with the State Department, whose position, as I understand it, is that they would rather fight this battle within UNESCO itself without congressional strings being attached?

Mr. BEARD. I am apprised that the State Department's position has probably changed on that as a result of President Reagan's letter and strong support for my amendment. So I feel that opposition is a moot point at this time.

Mr. LANTOS. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I yield to my colleague from California (Mr. LANTOS).

Mr. LANTOS. Mr. Chairman, first I want to commend my friend from Tennessee (Mr. BEARD) for bringing this all-important matter to the attention of this body.

Totalitarian regimes begin and they thrive over the suppression of the freedom of the press. There is no more important freedom in any society than the freedom of the press to investigate and to report.

I think this is a very important measure. I am proud to associate myself with my colleague's move and I commend it to my friends.

Mr. BEARD. I thank my colleague from California for his generous remarks.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I yield to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I want to commend the gentleman for this amendment. I think a free flow of information, whether it be in the United States or worldwide, is vital to the decisionmaking process. By supporting this amendment, we are simply saying that we believe in an open press and an open flow of information. I think it is fundamental to our Nation and very much in keeping with our principles.

Mr. Chairman, the importance of this amendment cannot be understated. The gentlemen from Tennessee (Mr. BEARD) has performed an important service to the institution of a free press, an institution which this country takes seriously. The import of this amendment goes beyond sending a strong message and stern warning to UNESCO. It really is a reaffirmation to the world of this country's commitment to a free and open press. Therefore, I commend the gentleman for his leadership in this important area and urge the adoption of the amendment.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I am happy to yield to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I just would like to say in reference to the remarks of my colleague from California (Mr. LANTOS) that it was on October 4, 1933, that Hitler's Reich first decided to install censorship for the press, very much a mark of the dictatorship, right or left.

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

(By unanimous consent Mr. BEARD was allowed to proceed for 2 additional minutes.)

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I yield to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Chairman, I want to also commend the gentleman for bringing this to the attention of

the House. To those who would suggest, as the gentleman said, we are taking our ball and going home with it, I suggest that is not true. At a time when many are concerned about how we would combat the menace of totalitarianism around the world without reverting to a military action here is a simple case where we can act. We can show proper moral indignation at an effort by totalitarian regimes in this world to keep the truth out.

As the Universal Declaration of Human Rights states:

Everyone has the right to freedom of opinion and expression. This right includes freedom to hold opinions without interference and to seek, receive, and impart information and ideas through any media and regardless of frontiers.

It seems strange to me that we would expect other countries to have any respect for the principles embodied in our Constitution if on a question as fundamental as this we are not willing to come forward with something more than just a slap on the wrist. So I do not think this is a childish threat. This is something which expresses in a very vivid way how strongly Americans feel about the right of free press, the right of free speech, and that any attempt by a United Nations operation to restrict that will be dealt with swiftly and very, very effectively by this Congress.

I thank the gentleman for his efforts in this regard.

Mr. BEARD. I thank the gentleman for his remarks.

Mr. LEWIS. Mr. Chairman, will the gentleman yield?

Mr. BEARD. I yield to the gentleman from California (Mr. LEWIS).

Mr. LEWIS. Mr. Chairman, I would like to commend my colleague from Tennessee (Mr. BEARD) for bringing this most important item before the House today.

Amazingly, just 2 months ago, I would say to the gentleman from Tennessee, in the Subcommittee on Foreign Operations I was astonished to see several groups come before the committee who traditionally have been very supportive of the ideals of the United Nations. They came before the committee and raised serious questions about patterns that are developing there. For example, the B'nai B'rith expressed great concern about what was happening within the United Nations where the majority of those serving in that body happen to disagree with one of their opponents.

I recall clearly the days in my college years in the 1950's where it was almost considered to be subversive to question the United Nations. I would suggest further that in America we have serious questions about the erosion of freedom of the press. In my own State in California just in the last year by a vote of 72 percent the people placed in the State constitution a shield law to assure a free flow of information between the public and their government.

In the Bill of Rights the first amendment deals with freedom of speech, of communication, to preserve our country from totalitarian efforts.

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

(By unanimous consent Mr. BEARD was allowed to proceed for 1 additional minute.)

Mr. LEWIS. If the gentleman will continue to yield, today in the world that question is all important. Efforts on the part of those in world bodies such as the U.N. who would undermine free speech should be of concern to not just all of us in this body but to all people in the world as well.

The gentleman bringing this to us today with a strong vote for this amendment today is most important in furthering that longstanding freedom.

Mr. BEARD. I thank the gentleman.

Mr. FASCELL. Mr. Chairman, I move to strike the necessary number of words.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentlewoman from California.

Ms. FIEDLER. I thank the gentleman for yielding.

I, too, would like to rise in support of the amendment being offered to us. The purpose of trying to restrict the free flow of information can only help to conceal the truth. It is absolutely imperative that we do go on record opposing UNESCO's effort to muzzle the press, and I am proud to be able to support this effort by my colleagues.

Mr. FASCELL. Mr. Chairman, the committee has expressed great concern over this matter in several ways and my colleagues need to know this. We have had numerous hearings over a course of years in following very carefully the progress and the operations of UNESCO. We have had innumerable conferences with people in the Department of State who have a responsibility, with the delegations who have gone there, either before they go or after they come back or both. We have met many times with the interested groups who have been waging not only a determined but a marvelous struggle. I am talking now about the media in this country who have led the fight and sounded the clarion call with respect to this issue.

So we have been aware of it. Our most recent action will be on the next amendment which comes up as a followup to this amendment, Mr. Chairman, which is very important, because that amendment following the Beard amendment asks the administration to undertake immediately total evaluation of our participation, the programs, the people, everything having to do with UNESCO.

So in the adoption of the Beard amendment I would hope my colleagues would keep that in mind, that the next amendment is a very important corollary.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Beard amendment.

Mr. Chairman, I rise in support of the Beard amendment which takes a forthright stand against increasing efforts of U.N. bodies to control information.

Today, we are concerned about the new world information and communication order sponsored by UNESCO. This effort is the result of Soviet initiatives begun in the mid-1970's to bring developing nations and totalitarian nations into an alliance to control, on an international basis, information and reporting the way it is controlled in their own countries. I think it is very important that we make it clear that the United States is firmly opposed to UNESCO's code to regulate the news and to control the world press, and thus shape news and information in ways that are more acceptable to Third World governments.

In 1980, the United States contributed $49 million for its share of UNESCO's operating expenses. I do not think that U.S. taxpayers want their dollars to be used to support a system that sets a new universal standard on world news flow that is ideologically opposed to the principles of a free press.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would like to just clarify a couple of points and I will make an observation of my own.

First, let us please differentiate between an entity of the U.N. and the U.N. itself. This is UNESCO. They have their own staff and delegates with totally different interests than the U.N. as a whole. So I do not want us to tar and feather the entire U.N. because of a legitimate difference of opinion we have with this one entity within that structure.

The reason I am inclined to support the amendment, and I will do so, is because I felt that when the AFL-CIO was upset at developments in the International Labor Organization they served notice they were going to withhold U.S. dues. Under the provisions of that organization it was 2 years before it went into effect. Near the end of the second year when the ILO brass realized the AFL-CIO meant business and were supported by our Government they were quick to make an accommodation and cleaned up

most of the abuses that had been allowed.

It seems to me that even though our committee has passed a resolution asking for them to reconsider this muzzling of the press, if I may use that term, it would be much more significant should we take the step of starting to withhold funds.

□ 1300

That they will understand. That is polite dollar diplomacy. And if they understand that the cost to them of trying to impose a form of censorship over the press is to lose the financial support of a major contributing country, I think that will have a sobering effect. I think it will have much more of a sobering effect than the resolution adopted by the House Foreign Affairs Committee.

So for that reason, thinking that an early, firm notice is better than a well-intended message, I support the Beard amendment.

Mr. DYMALLY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Beard amendment.

Mr. Chairman, I rise to speak against the Beard amendment. Reducing or cutting off assessed contributions, in my judgment, is a blunt instrument that should be reserved for cases involving a clear action violating an organization's charter, purposes, or vital U.S. interests. UNESCO has taken no decision to regulate news content. Therefore, the amendment offered by the gentleman from Florida (Mr. FASCELL) provides a reasonable alternative that signals to UNESCO that the U.S. Congress is monitoring their actions very closely.

It seems to me we need a thorough review of UNESCO's programs and activities. As the U.N. specialized agency with the broadest scope, many of its activities do not come to our attention. The amendment offered by the gentleman from Florida (Mr. FASCELL) will enable us for the first time to have a detailed examination of this organization's activities on which to base our future decisions.

There are many things that are good about UNESCO and some things that are critical, but it seems to me that we need to go about this in a very rational, a very reasonable manner, rather than responding hysterically to what we perceive as censorship but which censorship has not taken place.

Mr. BEARD. Mr. Chairman, will the gentleman yield?

Mr. DYMALLY. I yield to the gentleman from Tennessee.

Mr. BEARD. I appreciate the gentleman's sincerity, and I agree with the gentleman that this is not—and I do not mean for it to be—an attack on UNESCO as a total entity. I think the gentleman must not totally understand my amendment, and just for clarification in the RECORD, I would like at this time to reassure the gentleman that I am not cutting off one single penny.

Let me just read to the gentleman the wording of the amendment, if I may:

None of the funds authorized to be appropriated by section 102(a)(2) of this Act or by any other Act for "International Organizations and Conferences" may be used for payment by the United States of its contribution toward the assessed budget of the United Nations Educational, Scientific and Cultural Organization if that organization implements any policy or procedure the effect of which is to license journalists or their publications, to censor or otherwise restrict the free flow of information within or among countries, or to impose mandatory codes of journalistic practice or ethics.

So I am not cutting a single penny. I am just saying if they pursue that which they are discussing—I even say in my statement,

Let them discuss it, let them analyze it, debate it.

But the day they start implementing censorship of the press, I do not see, in a country, in all good conscience, how we can use our tax dollars to implement suppression of freedom of the press.

And I also go on to say:

Not later than February 1 of each year, the Secretary of State shall report to the Congress with respect to whether the United Nations Educational, Scientific and Cultural Organization has taken any action described in subsection (a) of this section.

So it is not the hatchet approach. And I just want to make sure that the gentleman understands that, that I am not that unreasonable on that.

Mr. DYMALLY. I thank the gentleman.

Would the gentleman support an amendment to withdraw all Government inkind support to the U.S. press so that they may have some responsibility and objectivity in their reporting?

Mr. BEARD. Will the gentleman repeat his statement?

Mr. DYMALLY. Would the gentleman support an amendment to withdraw all inkind services that we give to the American media so that they may be responsible and objective in their reporting.

Mr. BEARD. What inkind support do we give at this time?

Mr. DYMALLY. They get free space, telephone.

Mr. BEARD. I think that is our responsibility, to find a place for the press, to sit up there so that they can report on some of the insanities that go on down here, and some of the good things, like my amendment, that go on down here also.

Mr. DYMALLY. I thank the gentleman.

Mr. Chairman, I support the Fascell amendment. The gentleman from Florida (Mr. FASCELL) knows this issue more than anyone else in this committee, and I think that he has taken a more constructive approach to solving this dilemma.

Mr. SOLOMON. Mr. Chairman, I rise in support of the Beard amendment.

Mr. Chairman, I would like to add my strong support to the gentleman's amendment. For all our occasional complaints about this story or that article, America has the greatest press in the world and the people are better informed here than anywhere else.

The reason we have the best press is clear—reporters and news organizations have almost unlimited freedom to gather and distribute the news. The press really does act as a fourth branch of Government, checking abuses and rooting out corruption.

The basic first American freedoms that we take for granted, including freedom of the press, have never been very well respected in most of the rest of the world and now they are under even more attack.

There's nothing that Communist leaders fear more than a free press. The horrors or the Communist system would be exposed for everyone to see if press organizations had free access to information in Soviet-bloc countries that they have here.

So it is really no surprise that the Soviet puppets and the various dictators around the world are trying to snuff out what press freedoms still exist in their countries.

What is a surprise—a shock really—is that the United States might be put in the position of tacitly approving this suppression. To think that UNESCO—an arm of the United Nations—would ever consider some sort of journalistic licensing. It is outrageous.

The idea that Soviet bloc and Third World governments would be given permission to license and regulate the press is ludicrous. It is like having the underworld picking FBI agents and telling them to investigate parking violations. If UNESCO actually goes forward with its press regulations, then this country should wash its hands of the entire organization. America should never condone any encroachment of freedom. UNESCO must know where this Congress stands.

● Mr. TRIBLE. Mr. Chairman, I rise in support of the amendment offered by my distinguished colleague, the gentleman from Tennessee.

Freedom of the press is a right cherished in America. We believe that a free people, in order to maintain their freedom, must have unimpeded access to information about public affairs affecting their lives. We believe that only an informed public can achieve the goals of self-government.

The objectives of the UNESCO efforts to license journalists can only

serve to stifle the flow of information in the world, and thus to stifle the hope of freedom people in other lands share with us.

Thomas Jefferson recognized the vital need of a free and unfettered press to a free society. He said that, were he required to make a choice, he would choose a free press over government control of information, and he maintained that advocacy throughout his life even though, of our Presidents, he was one most vilified by the very press he argued should be free.

Another great Virginian, George Mason, the father of our Bill of Rights, included freedom of the press among those rights a people must have to remain free. He felt so strongly that this right and others were so essential to a free America that, as a delegate to the Constitutional Convention, he refused to sign the Constitution because it did not contain a Bill of Rights.

Mr. Chairman, we cannot, in good conscience, force our form of government, our Constitution and our Bill of Rights on other nations, but we can—indeed, conscience should compel us—to strike down efforts of international institutions in which we participate from suppressing freedom and the dream of freedom in the world.

I urge my colleagues to vote "yea" on this amendment.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee (Mr. BEARD).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BEARD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 372, noes 19, not voting 42, as follows:

[Roll No. 210]

□ 1315

The Clerk announced the following pairs:

On this vote:

Mr. Coelho for, with Mr. Crockett against.

Messrs. HAWKINS, BOLLING, and BEILENSON changed their votes from "aye" to "no."

Mr. KEMP changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. SHAMANSKY

Mr. SHAMANSKY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SHAMANSKY:

Page 31, immediately after line 12, insert the following new section:

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

SEC. 120. (a) The Congress finds that—

(1) a free press is vital to the functioning of free governments;

(2) Article 19 of the Universal Declaration of Human Rights provides for the right to freedom of expression and to "seek, receive and impart information and ideas through any media regardless of frontiers";

(3) the Constitution of the United Nations Educational, Scientific and Cultural Organization provides for the promotion of "the free flow of ideas by words and images";

(4) the signatories of the Final Act of the Conference on Security and Cooperation in Europe (Helsinki, 1975) pledged themselves to foster "freer flow and wider dissemination of information of all kinds, to encourage cooperation in the field of information and the exchange of information with other countries, and to improve conditions under which journalists from one participating State exercise their profession in another participating State"; and

(5) government censorship, domination, or suppression of a free press is a danger to free men and women everywhere.

(b) Therefore, it is the sense of the Congress that the United Nations Educational, Scientific and Cultural Organization should cease efforts to attempt to regulate news content and to formulate rules and regulations for the operation of the world press.

(c) The Congress opposes efforts by some countries to control access to and dissemination of news.

(d) The President shall evaluate and, not later than six months after the date of enactment of this Act, shall report to the Congress his assessment of—

(1) the extent to which United States financial contributions to the United Nations Educational, Scientific, and Cultural Organization, and the extent to which the programs and activities of that Organization, serve the national interests of the United States;

(2) the programs and activities of the United Nations Educational, Scientific, and Cultural Organization, especially its programs and activities in the communications sector; and

(3) the quality of the United States participation in the United Nations Educational, Scientific, and Cultural Organization, including the quality of United States diplomatic efforts with respect to that Organization, the quality of United States representation in the Secretariat of that Organization, and the quality of recruitment of United States citizens to be employed by that Organization.

Such report should include the President's recommendations regarding any improvements which should be made in the quality and substance of United States representation in the United Nations Educational, Scientific, and Cultural Organization.

Mr. SHAMANSKY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SHAMANSKY. Mr. Chairman, I want to commend the gentleman from Tennessee for his activity and concern over the efforts by UNESCO to develop a New World Information Order. This is also a problem that has concerned me for some time. On May 19, Congresswoman FENWICK and I introduced House Resolution 142, a resolution expressing the sense of the Congress that UNESCO should cease its effort to develop a so-called New World Information Order. This resolution currently has 55 cosponsors and was the subject of several days of joint hearings this past July before the Subcommittees on Human Rights and International Organizations, and the Subcommittee on International Operations. This morning the resolution was approved by the full Foreign Affairs Committee. My amendment is essentially the text of House Resolution 142. It contains a strong statement on the part of the Congress in opposition to any attempt to regulate the press.

While this New World Information Order has been discussed for many years, it has remained a rather vague series of proposals. Some of these suggestions are extremely dangerous, such as those to license journalists and develop government-imposed journalistic codes of conduct. Others, such as the call for aid from developed nations to less advanced countries in setting up local and regional press operations, could be beneficial.

The dangers to the Western ideal of political freedom based on the free flow of information are inherent in any broad attempt to regulate the press. We must make clear to UNESCO and the world at large that we oppose such regulations unequivocally.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. SHAMANSKY. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the Fenwick-Shamansky amendment.

This amendment is identical to House Resolution 142, which Mr. SHAMANSKY and I introduced on May 19 of this year, and which was reported by the Committee on Foreign Affairs this morning. The resolution has 55 cosponsors, including 17 members of the House Foreign Affairs Committee. In addition, the Department of State has written the Foreign Affairs Committee that it "commends this resolution as further evidence of the commitment of this Nation to defend without compromise first amendment principles."

The resolution was also the subject of 2 days of excellent and revealing hearings by the Subcommittee on International Organizations and the Subcommittee on Human Rights and International Organizations. Interestingly, at these hearings, the Assistant Secretary of State for International Organizations, Elliott Abrams, testified that it would be premature for the United States to withdraw from UNESCO or to threaten to cut off our rather substantial contribution to that body. I agree with Assistant Secretary Abrams that we should stay in UNESCO and fight for what we believe is right.

The amendment which we are proposing is very straightforward. It is a simple expression of the sense of the House in support of a free press and in opposition to the threats now being posed to it by UNESCO's continuing activities. It calls upon UNESCO to cease efforts to regulate news content and the operation of the world press. It states our opposition to the efforts of certain countries to control in this way the flow of news. Finally, consistent with an amendment to House Resolution 142 which was adopted by the Foreign Affairs Committee this morning, it asks the President to report to Congress on the activities of UNESCO, on the quality of our representation in that Organization, and on the extent to which our contributions to UNESCO serve the national interests of the United States. This amendment was adopted at the suggestion of Representative FASCELL, the chairman of the Subcommittee on International Operations.

The amendment is very similar in spirit to the declaration made in May of this year by 60 leaders of independent news organizations from over 20 countries at the Voices of Freedom Conference in Talloires, France. In fact, Congressman SHAMANSKY and I introduced House Resolution 142 on the day after the Talloires Conference adjourned. Without objection, Mr. Speaker, I would like to insert in the RECORD a copy of the resolution which the leaders of the world's free press adopted at that conference. It provides an excellent statement of the commitment of these distinguished gentlemen and women to freedom of the press. The declaration follows:

THE DECLARATION OF TALLOIRES

We journalists from many parts of the world, reporters, editors, photographers, publishers and broadcasters, linked by our mutual dedication to a free press.

Meeting in Talloires, France, from May 15 to 17, 1981, to consider means of improving the free flow of information worldwide, and to demonstrate our resolve to resist any encroachment on this free flow.

Determined to uphold the objectives of the Universal Declaration of Human Rights, which in Article 19 states, "Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media regardless of frontiers."

Mindful of the commitment of the constitution of the United Nations Educational, Scientific and Cultural Organization to "promote the free flow of ideas by word and image."

Conscious also that we share a common faith, as stated in the charter of the United Nations, "in the dignity and worth of the human person, in the equal rights of men and women, and of nations large and small."

Recalling moreover that the signatories of the final act of the Conference of Security and Cooperation in Europe concluded in 1975 in Helsinki, Finland, pledged themselves to foster "freer flow and wider dissemination of information of all kinds, to encourage cooperation in the field of information and the exchange of information with other countries, and to improve conditions under which journalists from one participating state exercise their profession in another participating state" and expressed their intention in particular to support "the improvement of the circulation of access to, and exchange of information."

Declare that:

1. We affirm our commitment to these principles and call upon all international bodies and nations to adhere faithfully to them.

2. We believe that the free flow of information and ideas is essential for mutual understanding and world peace. We consider restraints on the movement of news and information to be contrary to the interests of international understanding, in violation of the Universal Declaration of Human Rights, the constitution of UNESCO, and the final act of the Conference on Security and Cooperation in Europe; and inconsistent with the charter of the United Nations.

3. We support the universal human right to be fully informed, which right requires

the free circulation of news and opinion. We vigorously oppose any interference with this fundamental right.

4. We insist that free access, by the people and the press, to all sources of information, both official and unofficial, must be assured and reinforced. Denying freedom of the press denies all freedom of the individual.

5. We are aware that governments, in developed and developing countries alike, frequently constrain or otherwise discourage the reporting of information they consider detrimental or embarrassing, and that governments usually invoke the national interest to justify these constraints. We believe, however, that the people's interest, and therefore the interests of the nation, are better served by free and open reporting. From robust public debate grows better understanding of the issues facing a nation and its peoples; and out of understanding greater chances for solutions.

6. We believe in any society that public interest is best served by a variety of independent news media. It is often suggested that some countries cannot support a multiplicity of print journals, radio and television stations because there is said to be a lack of an economic base. Where a variety of independent media is not available for any reason, existing information channels should reflect different points of view.

7. We acknowledge the importance of advertising as a consumer service and in providing financial support for a strong and self-sustaining press. Without financial independence, the press cannot be independent. We adhere to the principle that editorial decisions must be free of advertising influence. We also recognize advertising as an important source of information and opinion.

8. We recognize that new technologies have greatly facilitated the international flow of information and that the news media in many countries have not sufficiently benefited from this progress. We support all efforts by international organizations and other public and private bodies to correct this imbalance and to make this technology available to promote the worldwide advancement of the press and broadcast media and the journalistic profession.

9. We believe that the debate on news and information in modern society that has taken place in UNESCO and other international bodies should now be put to constructive purposes. We reaffirm our views on several specific questions that have arisen in the course of this debate, being convinced that:

Censorship and other forms of arbitrary control of information and opinion should be eliminated; the people's right to news and information should not be abridged.

Access by journalists to diverse sources of news and opinion, official or unofficial, should be without restriction. Such access is inseparable from access of the people to information.

There can be no international code of journalistic ethics; the plurality of views makes this impossible. Codes of journalistic ethics, if adopted within a country, should be formulated by the press itself and should be voluntary in their application. They cannot be formulated, imposed or monitored by governments without becoming an instrument of official control of the press and therefore a denial of press freedom.

Members of the press should enjoy the full protection of national and international law. We seek no special protection or any special status and oppose any proposals that would control journalists in the name of protecting them.

There should be no restriction on any person's freedom to practice journalism. Journalists should be free to form organizations to protect their professional interests.

Licensing of journalists by national or international bodies should not be sanctioned, nor should special requirements be demanded of journalists in lieu of licensing them. Such measures submit journalists to controls and pressures inconsistent with a free press.

The press's professional responsibility is the pursuit of truth. To legislate or otherwise mandate responsibilities for the press is to destroy its independence. The ultimate guarantor of journalistic responsibility is to the free exchange of ideas.

All journalistic freedoms should apply equally to the print and broadcast media. Since the broadcast media are the primary purveyors of news and information in many countries, there is particular need for nations to keep their broadcast channels open to the free transmission of news and opinion.

10. We pledge cooperation in all genuine efforts to expand the free flow of information worldwide. We believe the time has come within UNESCO and other intergovernmental bodies to abandon attempts to regulate news content and formulate rules for the press. Efforts should be directed instead to finding practical solutions to the problems before us, such as improving technological progress, increasing professional interchanges and equipment transfers, reducing communication tariffs, producing cheaper newsprint and eliminating other barriers to the development of news media capabilities.

Our interests as members of the press, whether from the developed or developing countries, are essentially the same: Ours is joint dedication to the freest, most accurate and impartial information that is within our professional capability to produce and distribute. We reject the view of press theoreticians and those national or international officials who claim that while people in some countries already have a free press, those in other counties are insufficiently developed to enjoy that freedom.

We are deeply concerned by a growing tendency in many countries and in international bodies to put government interests above those of the individual, particularly in regard to information. We believe that the state exists for the individual and has a duty to uphold individual rights. We believe that the ultimate definition of a free press lies not in the actions of governments or international bodies, but rather in the professionalism, vigor and courage of individual journalists.

Press freedom is a basic human right. We pledge ourselves to concerted action to uphold this right.

The involvement of UNESCO in freedom of information issues is not a new development. The United Nations adopted its Declaration on Freedom of Information, which declared that "all states should proclaim policies under which the free flow of information within countries and across frontiers will be protected" in 1946. Freedom of information issues have been a central focus of discussion at UNESCO General Conferences for more than 10 years. But the debate has sharpened especially since the Nairobi meeting of 1976. As the price for tabling a draft declaration on fundamental principles governing the mass media, which was slanted toward control of the press, the United States agreed at that time to the establishment of the 16-member International Commission for the Study of Communication Problems, better known as the MacBride Commission. At the 20th UNESCO general conference in Paris 2 years later, a somewhat watered-down "Draft Declaration on Fundamental Principles Concerning the Contribution of the Mass Media to Strengthening Peace and International Understanding, the Promotion of Human Rights and to Countering Racialism, Apartheid and Incitement to War" was adopted with our assent. Unfortunately, this declaration still contained references to concepts that should have troubled our representatives greatly: The need to protect journalists, the guaranteed right of reply by those who have had seriously prejudiced information disseminated about them, and discussion of codes of ethics for journalists.

The two most recent major UNESCO meetings on information issues, in Belgrade in 1980 and in Paris earlier this year, have further demonstrated the dangers that still remain. In Belgrade, final approval was given to the International Program for Development of Communication (IPDC), a body created to assist the developing countries in improving their communications capability. The United States initiated this proposal, demonstrating our willingness to cooperate in addressing the perceived inequities in this area. Unfortunately, the U.S. contribution was not matched by an elimination of some of the more troublesome issues raised by the MacBride Commission—those concerning protection and licensing of journalists, professional regulations, codes of ethics, and other such unacceptable concepts—from the UNESCO agenda. These issues deserved further study, thus keeping them under consideration.

The events surrounding the Paris meeting earlier this year demonstrated just what type of further study UNESCO Director General M'Bow and some of the Soviet and Third World bloc had in mind. The Director General originally invited only nine press groups—mostly from the U.S.S.R. and sympathetic Third World countries—to the Paris meeting for journalists to discuss these concepts. When our diplomats learned of the meeting, we were told that it was a private meeting, even though it was listed as official. Luckily, the Western delegates who were subsequently invited to this meeting were able to block proposals for licensing journalists and adopting codes of ethics, but the continuing threat to press freedom was highlighted by the secret approach which UNESCO originally took to the meeting. Perhaps most importantly, these threatening concepts remain on UNESCO's agenda for the next general conference in Venezuela in 1983.

The reason these concepts are so dangerous to the West is that they are based on a principle which is totally contrary to a fundamental tenet of Western society. The Soviet Union and many other countries in the world believe that the press exists as an instrument—a tool—of the State; that its duty is to promote the power and stability of the State. They do not believe, as we do, and our first amendment proves it, that the press exists for the people.

This amendment is intended to provide force for the voice of the free world against any regulation of the free press. By offering it, we hope to strengthen the hand of our representatives in UNESCO. They will be able to point to the expressed view of the Congress as a demonstration of American resolve on the issue of the free press. At the same time, we hope that our American delegation will work more closely with other nations who share our view on this issue.

At the same time, this amendment avoids any premature cutoff of our contribution to UNESCO. UNESCO continues to do much valuable work in the educational and scientific fields. I agree with the administration's position that it would be premature and perhaps counterproductive to cut off our rather substantial contribution to that body. I believe that we should stay in there and fight for what is right, and I think that we should not

forego the opportunity to exert our influence in the continuing debate.

If we remain in UNESCO and prevail, we can turn the attention of that body to constructive proposals in the communication field, such as that which established the International Program for Development of Communication (IPDC) to aid the LDC's in developing their communications capabilities. If we fail, and the discussion turns to less productive ideas, we can always exercise more drastic options at a later date.

I urge the adoption of the amendment, and I hope that other Members will join me in making this strong statement in support of a free press.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this amendment was considered by the Committee on Foreign Affairs and was adopted by the full committee. We are ready on this side to accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. SHAMANSKY).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II—INTERNATIONAL COMMUNICATION AGENCY

SHORT TITLE

SEC. 201. This title may be cited as the "International Communication Agency Authorization Act, Fiscal Years 1982 and 1983".

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 202. There are authorized to be appropriated for the International Communication Agency $561,402,000 for the fiscal year 1982 and $656,505,000 for the fiscal year 1983 to carry out international communication, educational, cultural, and exchange programs under the United States Information and Educational Exchange Act of 1948, the Mutual Educational and Cultural Exchange Act of 1961, and Reorganization Plan Numbered 2 of 1977, and other purposes authorized by law.

CHANGES IN ADMINISTRATIVE AUTHORITIES

SEC. 203. (a)(1) Title III of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1451-1453) is amended—

(A) in section 301 by striking out "citizen of the United States" and inserting in lieu thereof "person"; and

(B) in sections 302 and 303 by striking out "citizen of the United States" and inserting in lieu thereof "person in the employ or service of the Government of the United States".

(2) Such title is further amended—

(a) in section 301—

(i) by striking out "Secretary" the first place it appears and inserting in lieu thereof "Director of the International Communication Agency", and

(ii) by striking out "Secretary" the second place it appears and inserting in lieu thereof "Director"; and

(B) in section 303 by striking out "Secretary" and inserting in lieu thereof "Director of the International Communication Agency".

(3) Section 302 of such Act is amended—

(A) in the second sentence by striking out "section 901(3) of the Foreign Service Act of 1946 (60 Stat. 999)" and inserting in lieu thereof "section 905 of the Foreign Service Act of 1980"; and

(B) in the last sentence by striking out "section 1765 of the Revised Statutes" and inserting in lieu thereof "section 5536 of title 5, United States Code".

(b) Section 802 of such Act (22 U.S.C. 1472) is amended—

(1) by inserting "(a)" immediately after "Sec. 802."; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) Any contract authorized by subsection (a) and described in paragraph (3) of this subsection which is funded on the basis of annual appropriations may nevertheless be made for periods not in excess of five years when—

"(A) appropriations are available and adequate for payment for the first fiscal year and for all potential cancellation costs; and

"(B) the Director of the International Communication Agency determines that—

"(i) the need of the Government for the property or service being acquired over the period of the contract is reasonably firm and continuing;

"(ii) such a contract will serve the best interests of the United States by encouraging effective competition or promoting economies in performance and operation; and

"(iii) such method of contracting will not inhibit small business participation.

"(2) In the event that funds are not made available for the continuation of such a contract into a subsequent fiscal year, the contract shall be canceled and any cancellation costs incurred shall be paid from appropriations originally available for the performance of the contract, appropriations currently available for the acquisition of similar property or services and not otherwise obligated, or appropriations made for such cancellation payments.

"(3) This subsection applies to contracts for the procurement of property or services, or both, for the operation, maintenance, and support of programs, facilities, and installations for or related to telecommunication activities, newswire services, and the distribution of books and other publications in foreign countries.".

(c) Paragraph (16) of section 804 of such Act (22 U.S.C. 1474(16)) is amended by inserting "and security" immediately after "right-hand drive".

(d) Title VIII of such Act (22 U.S.C. 1471-1475b) is amended by adding at the end thereof the following new section:

"ACTING ASSOCIATE DIRECTORS

"SEC. 808. If an Associate Director of the International Communication Agency dies, resigns, or is sick or absent, the Associate Director's principal assistant shall perform the duties of the office until a successor is appointed or the absence or sickness stops.".

(e) Title VIII of such Act is further amended by adding at the end thereof the following new section:

"COMPENSATION FOR DISABILITY OR DEATH

"SEC. 809. A cultural exchange, international fair or exposition, or other exhibit or demonstration of United States economic accomplishments and cultural attainments, provided for under this Act or the Mutual Educational and Cultural Exchange Act of 1961 shall not be considered a 'public work' as that term is defined in the first section of the Act of August 16, 1941 (42 U.S.C. 1651; commonly known as the Defense Base Act).".

(f) Section 1011(h) of such Act (22 U.S.C. 1442(h)) is amended by adding at the end thereof the following new paragraph:

"(4) Section 701(a) of this Act shall not apply with respect to any amounts appropriated under this section for the purpose of liquidating the notes (and any accrued interest thereon) which were assumed in the operation of the informational media guaranty program under this section and which were outstanding on the date of enactment of this paragraph.".

DISTRIBUTION WITHIN THE UNITED STATES OF THE FILM ENTITLED "REFLECTIONS: SAMUEL ELIOTT MORISON"

SEC. 204. (a) Notwithstanding the second sentence of section 501 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1461)—

(1) the Director of the International Communication Agency shall make available to the Administrator of General Services a master copy of the film entitled "Reflections: Samuel Eliott Morison"; and

(2) the Administrator shall reimburse the Director for any expenses of athe Agency in making that master copy available, shall secure any licenses or other rights required for distribution of that film within the United States, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

(b) Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the International Communication Agency.

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. BROOMFIELD

Mr. BROOMFIELD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROOMFIELD: Page 37, immediately after line 6, insert the following new section:

DISTRIBUTION WITHIN THE UNITED STATES OF THE I.C.A. FILM ENTITLED "AND NOW MIGUEL"

SEC. 205. (a) Notwithstanding the second sentence of section 501 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1461)—

(1) the Director of the International Communication Agency shall make available to the Administrator of General Services a master copy of the film entitled "And Now Miguel"; and

(2) the Administrator shall reimburse the Director for any expenses of the Agency in making that master copy available, shall secure any licenses or other rights required for distribution of that film within the United States, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

(b) Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the International Communication Agency.

Mr. BROOMFIELD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BROOMFIELD. Mr. Chairman, I am offering an amendment on behalf of Mr. LUJAN. This amendment which is similar to section 204(a) of the bill, would provide for the release within the United States of an ICA film entitled, "And Now Miguel."

This film was produced in 1951 and, because the Government then had worldwide rights the film was made available to the American public prior to 1972 through the U.S. Office of Education and the National Audiovisual Center. In 1972, the U.S. Information and Education Exchange Act of 1948 was amended to prohibit the Distribution of ICA program materials within the United States. The Library of the State of New Mexico, in possession of a worn copy of the film which it is unable to replace, feels that the film is an educational aid peculiarly suited to use in the State of New Mexico.

The film relates the story of a family in the Southwest which has inherited from its Spanish ancestors the tradition of sheep raising. It portrays the development of family relationships and examines a way of life in New Mexico.

This amendment would allow the General Services Administration to secure licenses or other rights required for distribution of that film in the United States and to make it available for purchase from the National Audio Visual Center.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Florida.

Mr. FASCELL. I thank the gentleman for yielding.

We have examined the amendment on this side and we are perfectly agreeable to it and will accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROOMFIELD).

The amendment was agreed to.

□ 1330

AMENDMENT OFFERED BY MR. DERWINSKI

Mr. DERWINSKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DERWINSKI: Page 37, immediately after line 6, insert the following new section:

REDESIGNATION OF THE INTERNATIONAL COMMUNICATION AGENCY AS THE UNITED STATES INFORMATION AGENCY

SEC. 205. (a) The International Communication Agency, established by Reorganization Plan Numbered 2 of 1977, is hereby redesignated the United States Information Agency. The Director of the International Communication Agency or any other official of the International Communication Agency is hereby redesignated the Director or other official, as appropriate, of the United States Information Agency.

(b) Any reference in any statute, reorganization plan, Executive order, regulation, agreement, determination; or other official document or proceeding to the International Communication Agency or the Director or other official of the International Communication Agency shall be deemed to refer respectively to the United States Information Agency or the Director or other official of the United States Information Agency, as so redesignated by subsection (a).

(c) This section shall take effect on January 1, 1982.

Mr. DERWINSKI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DERWINSKI. Mr. Chairman, I rise today to propose an amendment, on behalf of the administration, which would restore the name "United States Information Agency" to the Agency which is our principal instrument for explaining American society and policy to the peoples of the world.

For the last 3½ years, this Agency has labored under the name "U.S. International Communication Agency." When USIA and the Bureau of Educational and Cultural Affairs of the Department of State were merged, on April 1, 1978, to form ICA—or USICA as it subsequently became—a good faith effort was made to select a name which would reflect the diverse functions of the reconstituted Agency. But the name which was chosen simply has not worked. In my travels and conversations with Foreign Service officers and foreign leaders around the world, I have heard a multitude of stories about how the new Agency has been confused—sometimes deliberately, but more often honestly and unintentionally—with the CIA, ITT, the local postal service, and even, in one country, the Agricultural Extension Service which had the same initials. Even when the Agency's officers were successful in explaining to foreign audiences what the Agency was not, it was sometimes difficult to explain what a communication agency was.

A variety of other names have been suggested over the years, but they all seemed to have at least two drawbacks in common: they were unwieldy, and they were not accurate descriptions of the Agency's work. "Information" is clearly understood. The name "U.S. Information Agency" explains what the Agency does—it provides information about American policy, society, and values to the peoples of the world.

It is a name which is simple, plain English—and which translates into plain French and Spanish and Thai and Swahili. The name "USIA" also has the advantage of being known overseas where it is widely recognized and accepted. Finally, it is my understanding that there is virtually unanimous support within the Agency itself for restoring the old name, and its adoption would have a decided and positive impact upon Agency morale.

I recommend that we authorize a return to this shorter, more accurate name, and urge adoption of my amendment to accomplish this goal.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the distinguished chairman.

Mr. FASCELL. Mr. Chairman, I agree with the gentleman. It is not the most exciting thing in the world. I hate to go up the hill and down the hill, but basically this is an Executive decision, unless the Congress has strong objection; so I am prepared to go along with it.

Mr. DERWINSKI. I thank the gentleman from Florida for his diplomatic attitude.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. DERWINSKI).

The amendment was agreed to.

Mr. LOTT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to H.R. 3518, the State Department authorization for fiscal years 1982 and 1983. Mr. Chairman, we have spent the major part of this first session of the 97th Congress struggling to cut Federal spending. I think it would be safe to say that there is not a single program in the entire Federal budget that has escaped the careful perusal of the budget cutters. Many, many of the programs, some laudable, in the Federal budget and to suffer necessary reductions in funding.

I say that as a preface, Mr. Chairman, to saying that we are now considering, unfortunately, a piece of legislation authorizing in excess of $6 billion for only 2 fiscal years. The agencies are programs funded by this bill have apparently and miraculously escaped the budget-cutting knife. In 1983 alone, this bill authorizes the expenditure of approximately $805 million more than the President requested. That is $805 million that I feel could be better spent. It is absolutely impossible for this Member to justify the expenditure of $6 billion on the programs funded by this bill after the cuts this Congress has voted for in various domestic programs.

Members may ask where the $805 million, which this bill is over the President's request, is to be spent.

First, the bill authorizes an additional $496.3 million above the President's request of $1,248,059,000 for administration of foreign affairs. This is in 1983 alone. I will remind my colleagues that if there is waste, fraud, and abuse elsewhere in the Federal Government, we can all rest assured that there is plenty in the State Department and this massive increase is totally unrealistic and unjustified.

Second, the bill authorizes an excess of $95.6 million above the President's request for migration and refugee assistance. This may be a reasonable and humanitarian program but is it justified in light of the cuts we have demanded in domestic programs? I think my colleagues will agree that the answer is a resounding "no."

Finally, the bill authorizes $174.2 million more for the International Communication Agency than the President requested and $16.7 million more for the Board for International Broadcasting than the President requested. Again, when these increases are weighed in the balance against the cuts we have made in the other areas of the Federal budget, it simply is not fair and cannot be justified.

Mr. Chairman, I will not offer amendments to cut the additional $805 million in this bill. It would serve no useful purpose because the money would simply be placed back in the bill in conference. But the fact of the matter is that the fight against deficit spending, especially such an outrageous and blatant waste of the taxpayers' money as is encompassed in this bill, will be fought; if not here, then during the appropriations process. Nevertheless, Mr. Chairman, I plan to vote "no" on final passage and against this waste of money and I urge my colleagues to do likewise.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I yield to the distinguished gentleman.

Mr. DERWINSKI. May I advise the gentleman from Mississippi that, obviously in anticipation of his vigorous views, an amendment was adopted earlier which cut approximately——

Mr. LOTT. $496.3 million.

Mr. DERWINSKI. $496 million which really, in my opinion, gutted the administration and the State Department.

At the risk of being impolite to my distinguished whip, may I point out that even the State Department is part of the administration and that on the subject the gentleman is discussing——

Mr. LOTT. If the gentleman will yield, I am not sure of that yet. Go ahead.

Mr. DERWINSKI. On the subject the gentleman really is concerned with, the level of foreign aid, it is my understanding that our distinguished noble heroic Secretary of State wants the full amount pending in the budget, so we are going to have to clarify that. I have a sneaking suspicion that Mr. Haig has a little bit to say about foreign affairs. Mr. Stockman really is not in complete charge of that shop yet.

Mr. LOTT. I thank the gentleman for his comments.

I would like to say, first of all, that I am not quite sure who is in charge of that shop from top to bottom. I do not intend to be critical of our Secretary of State. I know the Secretary is trying to do his job; but just because we changed administrations and a few people at the top, I am not convinced yet that we made all the changes necessary in the State Department. I still represent the people of the Fifth Congressional District of Mississippi and as whip I am working with the Members of the House. I am not going to take everything this administration says and accept it, particularly when it applies to the State Department and foreign aid.

There is a higher duty and a higher responsibility here. I am not going to go back home and try to defend all these other budget cuts if we do not make the necessary cuts in foreign aid and the State Department.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I would be glad to yield to the distinguished gentleman.

Mr. FASCELL. I thank the gentleman for yielding. I surely do not want to persuade the gentleman or try to convince him. The gentleman knows his own politics better than I do; but I must get the record straight that, with the amendments that have been adopted, we are at the President's request.

Now, you know, if what the gentleman is saying is that he is not happy with that, and the gentleman wants to cut it even more, that is a different proposition and certainly that is the gentleman's right; but let me just say two things that I think we need to consider.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

(By unanimous consent, Mr. LOTT was allowed to proceed for 1 additional minute.)

Mr. LOTT. I yield to the gentleman.

Mr. FASCELL. I thank the gentleman. I would have gotten the gentleman the time.

One is that we are talking about three or four agencies here in that total the gentleman is talking about.

The other is that we are talking about the smallest department. No matter how much the gentleman may dislike it, it is the smallest department budgetwise, personnelwise; so there is a limit, in other words, to how far we want to go.

Now, as far as cleaning house, if the gentleman wants to appoint Republicans all the way down to the bottom level, they can do that. The gentlemen on that side are running it. That is different; but we ought to at least give the people that have got the responsibility some of the tools to do the kind of job the gentleman thinks they have to do.

I do not want to stand up here and be a spokesman for the administration. I have enough problems.

Mr. LOTT. The gentleman is doing an excellent job, Mr. Chairman.

Mr. FASCELL. So that is all I wanted to say. I just wanted to try to in some way reassure the gentleman at least with respect to this bill that the gentleman can hold his head up plenty high in talking about these other cuts because these people have been scalped to the bone.

The CHAIRMAN. The time of the gentleman from Mississippi has again expired.

(By unanimous consent, Mr. LOTT was allowed to proceed for 1 additional minute.)

Mr. LOTT. Mr. Chairman, I have asked for just 1 additional minute so I can respond, and I will be brief.

My understanding was that this bill was $805 million above what the President asked for. According to the gentleman's committee report, when we took out $496.3 million, it still left about $300 million over what the administration asked for.

Again, we can start quibbling over figures, but I want to make the point that I think it certainly would be all right with me if we could cut some of these bills below what the administration asked for.

We, after all, must make those final judgments.

I think I have made my point. I appreciate the difficult job the gentleman has done on the committee. Just keep their feet to the fire is all I am asking.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the last word.

Mr. Chairman, sitting on my desk, in my office, is an amendment to the State Department authorization bill which would require the Secretary of State to reduce funding to the United Nations organizations if the United States is denied a seat we traditionally have held on a U.N. board, committee, or commission.

I will not introduce that amendment today, but I do want to serve notice that if we continue to let opposing nations direct the course of U.N. policy against our best interests, I will work very hard to reduce, if not eliminate, our contributions to the various U.N. organizations.

Ostensibly, we belong to the United Nations because its goals enhance our foreign policy goals; however, increasingly, U.N. bodies are being exploited to promote programs and activities that are inimical to the interests of the United States and our Western allies.

There are many examples of this.

In an episode that is without precedent, the United States last spring was denied, for the first time ever, a seat on the United Nations Statistical Commission, which establishes guidelines for gathering statistical data used by other agencies.

In accordance with a longstanding tradition, permanent members of the Security Council are routinely represented on this and several other commissions. By secret vote, however, the Economic and Social Council removed the United States from the Commission. Thus, the opportunity for the United States to influence the policies of the Statistical Commission has been greatly diminished. Ambassador Jeane Kirkpatrick has said she believes the vote was orchestrated by a group of Third World nations bent on taking a slap at certain U.S. policies—especially our insistence that Israel be treated in a manner consistent with the U.N.'s formal rules of procedure.

This action establishes a precedent which should not go unnoticed by American taxpayers, who contribute 25 percent of the U.N. budget—more than twice the amount paid by any other nation—or by this Congress, which should insist that the funds we appropriate for foreign affairs in these lean years be used only to enhance our foreign policy goals.

In another ominous move, the United Nations Educational, Scientific, and Cultural Organization is embarked on a scheme to regulate news content and to control press conduct around the world. The plan is an essential part of UNESCO's promotion of the new world information order, which is hailed by its proponents—principally the Soviet Union and its Third World allies—as a systematic effort to insure so-called balanced dissemination of news and information around the world.

Apart from the absurdity of entrusting a body as political as UNESCO with formulating rules and regulations for the world's news media, the very notion smacks of censorship and conjures up the prospect of an Orwellian Big Brother which is contrary to our concepts as embodied in the first amendment and going back to John Peter Zenger's trial.

It is no wonder that representatives of major news organizations in some 20 countries met in France to condemn the proposal as a dangerous encroachment on press freedom. Unfortunately, the strong opposition from the media and many Western governments has not dissuaded UNESCO from going forward with plans to implement the proposal.

Taking swipes at Israel is another favorite exercise in the United Nations. Last spring, a bloc of Arab and African nations attempted to have Israel disinvited to an international conference aiding African refugees after a formal invitation had been extended by the conference organizers and accepted by Israel. Only when the United States threatened to boycott the conference was Israel finally allowed to attend.

A group that is particularly adept at using the United Nations for purposes in opposition to the United States best interests is the Palestine Liberation Organization. Not content with its status as an observer, the PLO has repeatedly sought to take part in U.N. activities, especially in the Security Council, as though it were a full-fledged member nation.

Rule 37 of the Provisional Rules of Procedure of the Security Council applies to nations who are members of the U.N. but not of the Security Council. Rule 39 applies to interested parties who do not enjoy U.N. membership. For several years, the PLO has attempted to gain access to the Security Council by way of rule 37. The PLO is attempting to do, behind the barn, what peace-loving nations have not allowed out front. That terrorist organization is attempting to gain recognition as a legitimate government. Unfortunately, U.S. opposition to the use of rule 37 by the PLO is ineffective as most other Western nations on the Security Council abstain on votes to allow the PLO access to the Security Council under this rule.

Mr. Chairman, I could recite other examples of actions taken in opposition to our expressed foreign policy and in attempts to prevent our influence, but the recitation would be so long that it would bore the Chamber.

The point is that the United States is losing—if it has not lost already—its efficacy in promoting American foreign policy goals through the United Nations. Increasingly, the dollars we give to the United Nations underwrite organizations which subvert or circumvent our foreign policy goals. If this continues, I, for one, will move to significantly reduce our funding for the United Nations.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this authorization bill. H.R. 3518 provides the resources for the principal elements of this country's foreign affairs programs, the principal being the Department of State which conducts our affairs with foreign governments here and abroad. At the request of the administration, we have reduced the number of State Department personnel positions in fiscal year 1982 by 500. State has fewer employees today than it did a dozen years ago—16,285, down from a peak of 17,012 in 1959, yet the burdens on our Foreign Service people continue to mount—hazardous conditions and increasing workloads, and reporting requirements continue to increase. Consular workloads, especially, are on the rise. This is a barebones bill, then, and I urge you to support it.

One particularly important feature of H.R. 3518 is the authority granted to the State Department to enforce reciprocity with other governments. With this authority, the United States will be able to act more like the power it is; the benefits, privileges, and immunities it extends to foreign governments here, under this legislation, could be directly related to those afforded the United States abroad. The treatment of U.S. missions and personnel overseas could be reflected in our treatment of the missions and personnel of foreign nations in the United States.

The International Communication Agency (ICA), whose name was, and I trust will be again, the U.S. Information Agency (USIA), is also covered by this bill. ICA's job is to provide information abroad about the United States and its objectives. It counters Communist propaganda around the world and I hope will play a greater role in exposing and countering Soviet propaganda and disinformation activities, ICA's programs, especially.

The Voice of America (VOA) radio broadcasts are necessary to give the U.S. side of the story to the rest of the world. As elsewhere, the Soviets are outspending us in the informational competition they are so clever at. We must stay in the contest in the sphere of public diplomacy.

The Board of International Broadcasting (BIB) provides for Radio Free Europe (RFE) and Radio Liberty (RL). They provide timely news and analysis to the captive peoples of the Soviet empire without which these peoples would have little or no access to the truth. They provide a communications link with the courageous defenders of human rights behind the Iron Curtain. RFE, particularly, has played a profound and salutary effect on events unfolding in Poland during the past year and more. These radios counter Soviet propaganda with a diet of truth for the information-starved peoples of the Communist world.

I urge passage of H.R. 3518.

The CHAIRMAN. Are there any further amendments of title II? If not, the Clerk will read title III.

The Clerk read as follows:

TITLE III—BOARD FOR INTERNATIONAL BROADCASTING

SHORT TITLE

SEC. 301. This title may be cited as the "Board for International Broadcasting Au-

thorization Act, Fiscal Years 1982 and 1983".

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 302. Subparagraph (A) of section 8(a)(1) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)(1)(A)) is amended to read as follows:

"(A) $100,300,000 for fiscal year 1981, $98,317,000 for the fiscal year 1982, and $115,031,000 for the fiscal year 1983; and".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

□ 1345

The CHAIRMAN. Are there any amendments to title III?

If not, the Clerk will read title IV.

The Clerk read as follows:

TITLE IV—MISCELLANEOUS PROVISIONS

INTER-AMERICAN FOUNDATION

SEC. 401. (a) The first sentence of section 401(s)(2) of the Foreign Assistance Act of 1969 (22 U.S.C. 290f(s)(2)) is amended by striking out "$25,000,000 for each of the fiscal years 1979 and 1980" and inserting in lieu thereof "$12,000,000 for the fiscal year 1982 and $20,000,000 for the fiscal year 1983".

(b) Section 401(h) of that Act (22 U.S.C. 290f(h)) is amended by striking out "actual and necessary expenses not in excess of $50 per day, and for transportation expenses" and inserting in lieu thereof "travel expenses, including per diem in lieu of subsistence, in accordance with section 5703 of title 5, United States Code".

Mr. FASCELL (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. FINDLEY

Mr. FINDLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FINDLEY: Page 38, after line 8, insert the following new section:

SCIENTIFIC EXCHANGES WITH THE SOVIET UNION

SEC. 402. (a) Prior to renewal of the General Agreement on Contacts, Exchanges and Cooperation between the United States and the Union of Soviet Socialist Republic, and prior to resumption of high-level meetings or of planning for future exchange activities or to increasing significantly individual exchange activities pursuant to the 11 agreements for cooperation in specialized fields which were entered into by United States and the Union of Soviet Socialist Republic between 1972 and 1974, or by June 1, 1982 (whichever occurs first), the Secretary of State shall submit to the Speaker of the House of Representatives and Chairman of the Committee on Foreign Relations of the Senate a report containing—

(1) an assessment of the risk of the transfer to the Soviet Union of militarily significant technology through research, exchanges, and other activities conducted pursuant to those agreements; and

(2) a detailed description on the exchanges and other activities conducted pursuant to those agreements during fiscal year 1979, fiscal year 1980, and fiscal year 1981, including—

(A) the areas of cooperation,

(B) the specific research and projects involved,

(C) the man-hours spent in short-term (less than 60 days) and long-term exchanges,

(D) the level of United States and Soviet funding in each such fiscal year, and

(E) an assessment of the equality or inequality in value of the information exchanged.

(b) The Secretary of State shall prepare the report required by subsection (a) in counsultation and cooperation with the Secretary of Defense and the heads of the other agencies involved in the exchange and other cooperative activities conducted pursuant to the agreements described in that subsection.

(c) No funds appropriated for the Department of State or the International Communication Agency may be obligated or expended after June 30, 1982, to finance any long-term scientific or technological study in the United States by citizens of the Soviet Union in the U.S.-U.S.S.R. Graduate Student/Young Faculty Exchange or in the U.S.-U.S.S.R. Senior Scholar Exchange.

Mr. FINDLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. FINDLEY. Mr. Chairman, this amendment does two things. First of all, it requires a report from the administration before the administration can resume the traditional scientific conference exchanges and other activities in the scientific field with the Soviet Union. These activities were suspended in the wake of the Afghanistan invasion, for the most part, and they may not be resumed at all. But it is my feeling that before they are resumed, the Congress should have the analysis of the executive branch as to the risk to our national security that might be involved in the resumption of these conferences.

The amendment does one other thing, and that is to assure the mutuality of any academic exchanges that may occur between the United States and the Soviet Union in the future.

Despite Afghanistan, we have continued the academic scientific exchange program with the Soviet Union under which 70 U.S. academics, mostly in their thirties and forties, hardly the high-school age level, have come to this country to study for the entire 9-month period of the academic year.

Now, in exchange we have had the opportunity to send 70 of our people over there, but never has the Soviet Union permitted our academics to study designs or technology in any aspect. Our people study opera history and humanities; that sort of thing. But the Soviets that come to our country under this program study high technology.

Let me list just a few of the examples of the scientific study that Soviet scientists are today being permitted to undertake in this country: measuring computing systems for automation; oxidation of flow discharge silicon films; interaction of ions with solid surfaces; models in rarefied gas dynamics problems; fluid mechanics; heat and mass transfer in duct flows at low velocity; synthesis of variable valency complexes for polymer materials; solar cell semiconductor problems; gas dynamics of reactive and multiphase systems; photoelectric and luminescent properties of heterojunctions; microelectronic apparatus and computer-aided design; mass transfer of gases and vapors in multicomponent polymer materials; space flight trajectories in the target plane; heating and stability of plasmas in magnetic fields; development of electronic computers for solution of nonlinear and differential equations.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Florida.

Mr. FASCELL. I think the gentleman has made his point. Frankly, the question of reciprocity in these kinds of things is a frustrating issue. I think basically it ought to be primarily an Executive decision on when and how they obtain reciprocity. However, I see nothing wrong with a congressional expression.

I would not want to lock in the President. However, I think basically, fundamentally, the amendment proceeds in the right direction, and on this I am prepared to accept it, and if we have any difficulties, we can try to straighten it out.

Mr. FINDLEY. It does require mutuality, because the Soviets are unwilling to let us study technology over there.

Mr. FASCELL. I understand that thoroughly. I am not sure we can define mutuality here specifically legislatively is the only point I was making. Ultimately that becomes an Executive decision.

Mr. FINDLEY. I thank the gentleman for his support.

Mr. BROOMFIELD. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Michigan.

Mr. BROOMFIELD. Mr. Chairman, we on this side have had the opportunity to look over the gentleman's amendment. We think it is a valuable contribution to the bill and we accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DANIELSON

Mr. DANIELSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DANIELSON: On page 38, insert the following after line 8:

REPORT TO THE CONGRESS

SEC. 402. (a) Not later than 60 days after the date of enactment of this act, the President shall prepare and transmit to the Congress a full and complete report on the total cost of Federal, State, and local efforts to assist refugees and Cuban and Haitian entrants within the United States or abroad for each of the fiscal years 1981 and 1982. Such report shall include and set forth for each such fiscal year—

(1) the costs of assistance for resettlement of refugees and Cuban and Haitian entrants within the United States or abroad;

(2) the costs of United States contributions to foreign governments, international organizations, or other agencies which are attributable to assistance for refugees and Cuban and Haitian entrants;

(3) the costs of Federal, State, and local efforts other than described in paragraphs (1) and (2) to assist, and provide services for, refugees and Cuban and Haitian entrants; and

(4) administrative and operating expenses of Federal, State, and local governments that are attributable to programs of assistance or services described in paragraphs (1), (2) and (3); and

(5) administrative and operating expenses incurred by the United States because of the entry of such aliens into the United States.

(b) For purposes of this section—

(1) the term "refugees" is used within the meaning of paragraph (42) of section 101 (a) of the Immigration and Nationality Act; and

(2) the phrase "Cubans and Haitian entrants" means Cuban and Haitians paroled into the United States, pursuant to section 212(d)(5) of the Immigration and Nationality Act, during 1980 who have not been given or denied refugee status under the Immigration and Nationality Act.

Mr. DANIELSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Florida.

Mr. FASCELL. The gentleman has been very courteous in making the amendment available to us in sufficient time to consider it thoroughly. We think it is a very important contribution. We are prepared to accept the amendment on this side.

Mr. DANIELSON. I thank the chairman.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I am pleased to yield to the gentleman.

Mr. DERWINSKI. Mr. Chairman, we recognize the gentleman's special interest and expertise in refugee problems. I realize he has worked at this as hard as any individual Member of Congress.

This bill lends itself to this amendment. Therefore, I am pleased to indicate the acceptance on this side.

May I also add, by the way, if the gentleman will permit me, that I call to the attention of the House that in this bill we do provide for an increase in funds for refugee assistance. I am pleased that in their wisdom the Members of the House have not attempted to cut into that figure because, quite frankly, given the world situation, we are apt to be facing more rather than fewer refugee problems.

Therefore, I commend the gentleman from California for his special leadership in this field.

Mr. DANIELSON. I thank the gentleman for his comments.

I will be very brief under the circumstances.

I would like to remind some of our Members who have not been totally involved in this particular issue that the cost of refugee assistance has reached astronomical proportions and, unfortunately, none of us knows exactly what it costs.

For example, in the bill before us, as I understand it, it calls for an authorization of $553,100,000 for the fiscal year 1982 and $555,600,000 for the following fiscal year, somewhat more than a half billion dollars in each year. However, this is nothing but the foam on the surface. There is a lot more that we do not know about.

There is at least another half a billion dollars in the Department of Health and Human Services for State-administered programs, voluntary agency programs, Cuban programs for those who arrived prior to 1978, education assistance for children, preventive health screening, Federal administrative costs, aid to families with dependent children (AFDC), supplemental security income (SSI), medicaid and formula grants for education of refugee children. In addition to the moneys in HHS, there are funds in the Department of Agriculture for food stamps, the school lunch and breakfast programs, the Family Extension Service and the Forest Service Job Corps Center. The Department of Commerce provides assistance through the national sea grant program and the Minority Business Development Administration. The Department of Housing and Urban Development provides assistance through public housing and section 8 housing. The Department of Justice provides services through their Community Relations Service. I know that the Department of Labor has provided services through the Job Corps, CETA, and Federal-State employment service programs. ACTION provides assistance, the INS has a major involvement, and the Defense Department is involved. The list goes on and on.

I have recently returned from a trip to Southeast Asia where most of these refugees are generated. I find that the costs are disbursed through so many different accounts, through so many different purses, that there is no place where we can truly find out what it costs.

I do know, through some information I have acquired, that although we had comparable figures 2 years ago, a more accurate estimate was that there were $1.7 billion in the 1980 fiscal year and $2.112 billion in the fiscal year 1981. But that estimate was put together before—I say again—before the invasion of Cubans and Haitians a little over a year ago. So it means absolutely nothing.

My best guess is that we may be up in the $3 billion figure at the present time, and that is just a downpayment, because when they arrive here, then we still have to put them through educational, technical training, and other programs in order to help them to assimilate and become adapted to our society and to our economy.

It is essential, I submit, that the Congress know what this costs so that we can properly evaluate our programs in the near future.

I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DANIELSON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ZABLOCKI

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ZABLOCKI: Page 38, after line 8, insert the following new section:

SUPPORTING IMPLEMENTATION OF THE WORLD HEALTH ORGANIZATION VOLUNTARY CODE ON INFANT FORMULA

SEC. 402. (a) The Congress finds that—

(1) there is overwhelming scientific evidence that breastfeeding has substantial advantages for infant health and growth, that it offers an uncontaminated food supply, an early transfer of antibodies protective against infectious diseases, and a naturally evolved and tested nutritional source, and that it is an important factor in bonding between mother and child;

(2) numerous studies, in a wide variety of developed and developing countries, over a long period of time, have shown that artificial infant feeding is associated with higher rates of illness and death and, in poor communities, with lessened growth and nutrition;

(3) the problem of unrefrigerated infant formula prepared with polluted water and placed in inadequately cleaned bottles is further complicated by flies and heat in tropical climates;

(4) 100 million of the 125 million children in the world below the age of one are born in developing countries;

(5) 10 million of these 100 million children will probably not live until their first birthday;

(6) diarrhea and other infectious diseases, when combined with the problems of malnutrition, account for more than half of these deaths;

(7) the use of infant formula rather than breastfeeding is estimated to account for up to a million of these deaths per year; and

(8) at a recent meeting of the World Health Organization, the United States was the only country, in a 118 to 1 vote, to vote against a voluntary code to encourage breastfeeding and to curb inappropriate marketing and advertising of infant formula, particularly in the Third World.

(b) Therefore, the Congress—

(1) expresses its dismay at the negative vote cast by the United States on May 21, 1981, at the Thirty-Fourth World Health Assembly of the World Health Organization on the "International Code of Marketing of Breastmilk Substitutes";

(2) urges the administration to notify promptly the World Health Organization that the Government of the United States will cooperate fully with other nations in implementation of that code;

(3) urges the United States infant formula industry to abide by the guidelines of the code, particularly with respect to exports and the activities of subsidiaries in developing countries; and

(4) reaffirms the dedication of the United States to the protection of the lives of all the world's children and the support of the United States for efforts to improve world health.

Mr. ZABLOCKI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Chairman, this is an amendment we have already passed earlier in the Congress.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I would be delighted to yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, this amendment is the same language as passed by the House previously?

Mr. ZABLOCKI. Mr. Chairman, the amendment offered is identical to language the House approved by a 3-to-1 margin on June 16.

The House is being asked to approve this language again in order to take it into conference with the Senate, since it appears the Senate will not take up the House resolution.

Senate-passed language on infant formula is much more general than the House language. Specifically, it:

First, expresses only "concern" at the U.S. vote on the issue at the World Health Assembly (House language expresses dismay);

Second, urges the U.S. Government and the infant formula only to "support the basic aim" of the code. House language urges the industry to abide by the guidelines of the code, particularly with respect to exports and activities of subsidiaries in developing countries, where problems are most severe.

In short, while the Senate-passed language speaks to the general issue of the infant formula problem, it is very gentle in its treatment of the U.S. position as expressed in the "no" vote at the World Health Assembly. By bringing the previously House-approved language into conference, a much more meaningful statement can be enacted.

Mr. FASCELL. The other body, as I understand it, has language in this bill in order to go to conference? Is that correct?

Mr. ZABLOCKI. The other body has language in their version of this bill somewhat similar. I believe our language is much more supportive of our position. I would hope that the House would accept this.

Mr. FASCELL. On this, we have no objection, if that is the only purpose.

Mr. ZABLOCKI. I thank the gentleman for accepting the amendment.

Mr. GILMAN. Mr. Chairman, would the gentleman yield?

Mr. ZABLOCKI. I would be delighted to yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of the amendment offered by the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Wisconsin (Mr. ZABLOCKI), which endorses the World Health Organization Code on the Marketing of Breast Milk Substitutes. As the gentleman explained, the language of this amendment is identical to House Joint Resolution 287, legislation which the House passed earlier this session by a vote of 301 to 100.

As a sponsor of an earlier resolution supporting that code, introduced by my colleague, the gentleman from Iowa (Mr. HARKIN), I have come to recognize the critical problems stemming from the improper use of infant formula.

The Marketing of Breast Milk Substitutes Code was developed principally in response to the improper use of breast milk substitutes in developing countries. When mixed with contaminated water and overly diluted so as to stretch out meager supplies, infant formula poses a severe and widely recognized health hazard. Under such conditions, higher rates of infant disease and death are unavoidable.

The United States was the only nation to oppose adoption of this code, doing so primarily because its delegation to the World Health Organization meeting claimed that the code would interfere with the legitimate marketing of infant formula, and that such marketing alone was not responsible for the increased use of infant formula in developing nations.

Mr. Chairman, as drafted, the code is not a regulation, but instead recommends action to be taken to help assure that infant formula is not used improperly.

In testimony before the Committee on Foreign Affairs, Mr. Stuart F. Pierson, an expert on constitutional procedures, stated that industry claims that there is a constitutional prohibition against voting to consider the recommended code are clearly invalid.

The Senate has also passed a resolution expressing concern about the U.S. vote in opposition to the code. However, the House-passed measure expresses stronger support for the infant formula code, especially as concerns implementation in developing countries where problems have proved to be most critical.

If the sense of the House, as expressed in House Joint Resolution 287, is to be given the credence it deserves on this important issue, adoption of this amendment is imperative.

Accordingly, I urge my colleagues to support this amendment to stress our Nation's strong endorsement of the code on the marketing of breast milk substitutes. The lives of millions of infants throughout the world are at stake.

Mr. ZABLOCKI. Is there acceptance on the minority side? Otherwise, I would have to perhaps reserve my time.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I am happy to yield to the gentleman from Illinois.

Mr. DERWINSKI. Given the tremendous wisdom and logic of the gentleman from Wisconsin, we naturally accept the amendment.

Mr. KINDNESS. Mr. Chairman, I move to strike the last word, and as many others as are required.

Mr. Chairman, I object strongly to this amendment being considered by so few on the floor of the House. There has been perhaps precious little attention paid to the content of this total authorization bill up to now, but I hardly understand the reason for again presenting to the House the same language which it has already acted upon back in June.

I understand that it is desired that a particular set of words be in this authorization bill so as to meet up with some different words from the other body in conference, but I am not persuaded that it is necessary to go through this same exercise that has been done already one more time in order to do that.

There is already passed by this House the resolution having to do with this very same subject matter and the same words. Why that cannot be discussed in the conference as

against the language that the other body may or may not produce is beyond me.

I think what we are really presented with is a question of whether the other body may delete the language in its comparable version of the authorization bill. If that is the case, then there would not be any such language to be discussed in conference. I would think that would be a highly desirable result.

I think it was a mistake on the part of this House to have been stampeded into acting on the resolution back in June saying, "Oh, we deplore the action that has been taken by the administration," after it had already occurred.

I do not seek to argue the question of whether breast feeding or infant formula feeding is appropriate or inappropriate in certain circumstances. That was not even the question that was presented to the House on that occasion, and it is not the question presented to the House now.

The question presented to the House now is: Shall we one more time say to the administration that "You have taken a position that is now in the past with which we disagree." All right. We have done that. Nothing really is going to be accomplished further by once more inserting these words in some legislation passed by this House.

I would implore the Members of the House not to do this one more time, simply wringing our hands over something which is a past action by the administration. I happen to have agreed with the administration. Others disagree. And it apparently runs at the ratio of about 3 to 1.

Now, I certainly do not see any reason why we should one more time go through this process of voting on some language. Despite the 3-to-1 vote on that language back in June, I trust there were a lot of those who voted for it who were really stampeded into it, and reason and logic would impel them otherwise, and perhaps we might even get a record vote on it.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. I thank the gentleman for yielding.

I want to make it indelibly clear: It is true that in June of this year, by a 3-to-1 margin, we had passed a resolution on this issue. The Senate has refused thus far to even consider our version. The only purpose of repeating our language for the sake of having some language in conference with the Senate is the purpose of my amendment. If we do not have anything in our version, then certainly the resolution we passed earlier would not be in conference.

Mr. KINDNESS. I would suggest to the gentleman that that is one of the great benefits of a bicameral legislature.

Mr. ZABLOCKI. But unfortunately, we do not have the situation here at the present time. I would hope that the gentleman understands the purpose of the gentleman from Wisconsin is to bring the issue of the two versions, the Senate and the House version, into conference.

□ 1400

Mr. KINDNESS. I thank the gentleman for that clarification, which I did state, and I did not mean to twist in what I expressed, but I think it is clear that if this action is not taken today, we may very well not have any language considered in the conference that goes to this point. And indeed the gentleman from Wisconsin, the chairman of the committee, would like to see it otherwise.

I would agree with the result that would obtain if we do not pass this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. McDONALD. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Georgia (Mr. McDONALD) for a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

The CHAIRMAN. Are there other amendments to the bill or to title IV? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. KAZEN) having assumed the chair, Mr. HALL of Ohio, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3518) to authorize appropriations for fiscal years 1982-83 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes, pursuant to House Resolution 182, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is there a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. LOTT

Mr. LOTT. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. LOTT. I am, in its present form, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. LOTT moves to recommit the bill, H.R. 3518, to the Committee on Foreign Affairs.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LOTT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 165, nays 226, not voting 42, as follows:

[Roll No. 211]

□ 1415

The Clerk announced the following pairs:

On this vote:

Mr. Pepper for, with Mr. Mottl against.

Mr. Boland for, with Mr. Miller of California against.

Mr. Santini for, with Mr. Quillen against.

Mr. Crockett for, with Mr. Rudd against.

Until further notice:

Ms. Oakar with Mr. Young of Alaska.

Mr. St Germain with Mr. O'Brien.

Mr. Early with Mr. Goldwater.

Mr. Barnard with Mr. Wampler.

Mr. Phillip Burton with Mr. Ralph M. Hall.

Mr. de la Garza with Mr. Sawyer.

Mr. Hightower with Mr. Lujan.

Mr. Scheuer with Mr. Dougherty.

Mr. Wilson with Mr. Horton.

Mr. Rostenkowski with Mr. Burgener.

Mr. Ginn with Mr. Daniel B. Crane.

Mr. Florio with Mr. Coughlin.

Mr. Dingell with Mr. McCloskey.

Mr. Holland with Mr. Beard.

Mr. Hollenbeck with Mr. Kramer.

Mr. Evans of Iowa with Mr. Craig.

Mr. Savage with Mr. Martin of New York.

Messrs. ASPIN, ANTHONY, ALBOSTA, ALEXANDER, PATTERSON, ROE, BUTLER, MOFFETT, Mrs. SCHNEIDER, and Mr. HARKIN changed their votes from "yea" to "nay."

Mr. WEISS and Mr. DICKS changed their votes from "nay" to "yea."

So the bill was not passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## PARLIAMENTARY INQUIRY

Mr. FASCELL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. FASCELL. Mr. Speaker, I assume that the motion to reconsider has been laid on the table. I hope that is true.

The SPEAKER pro tempore. The Chair will inform the gentleman that it has.

Mr. FASCELL. That is good, Mr. Speaker, because with this overwhelming endorsement of the Secretary of State I would not want to be put in the position of having to do something affirmative. I will make a request to allow all Members to have 5 days in which to extend their remarks, and in that way they can vent their spleen on whomever they want.

## GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 15 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

## THE "SURPRISE" VOTE ON THE DEPARTMENT OF STATE AUTHORIZATION ACT

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute.)

Mr. DERWINSKI. Mr. Speaker, I share with the gentleman from Florida the slight surprise at the developments this afternoon.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Speaker, I am not surprised by this vote. I predicted it before we started.

Mr. DERWINSKI. I actually thought that most of the serious opposition had disappeared. I did not expect to have the result we did.

But I have a slightly different interpretation. I interpret this to mean that the unexpected vote will of necessity have to be reversed in the next week or two. I believe it is a result of the misunderstood relationship between the operating of Government and the confusing positions taken by the Director of OMB. Given the confusion that I think comes from OMB and the overkill that is involved there this vote can be understood. We should understand that if we do not have a functioning Government, we then have anarchy. We have to have authorization of Government.

So, Mr. Speaker, when this gets turned around, the world will stay on its course and the Department of State will ultimately be saved.

Mr. Speaker, this vote should not be considered a reflection on the conduct of our foreign affairs by Secretary of State Al Haig. He is the strongest member of the Cabinet and the best appointment of the President. If there is any confusion in the conduct of our foreign affairs it is in the unseen advisers in the White House. As the Secretary is allowed to take hold, foreign policy matters will be handled effectively and well.

## REQUEST FOR CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 183, NATIONAL RUGBY TEAM OF SOUTH AFRICA

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the concurrent resolution (H. Con. Res. 183) expressing the sense of the Congress that the national rugby team of South Africa should not play in the United States.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. McDONALD. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3112, VOTING RIGHTS ACT OF 1965 EXTENSION

Mr. HALL of Ohio, from the Committee on Rules, submitted a privileged report (Rept. No. 97-229) on the resolution (H. Res. 222) providing for consideration of the bill (H.R. 3112) to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes; which was referred to the House Calendar and ordered to be printed.

□ 1430

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4, INTELLIGENCE IDENTITIES PROTECTION ACT

Mr. HALL of Ohio, from the Committee on Rules, submitted a privileged report (Rept. No. 97-230) on the resolution (H. Res. 223) providing for consideration of the bill (H.R. 4) to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying certain U.S. intelligence officers, agents, informants, and sources; which was referred to the House Calendar and ordered to be printed.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3210, FEDERAL-AID HIGHWAY ACT OF 1981

Mr. HALL of Ohio, from the Committee on Rules, submitted a privileged report (Rept. No. 97-231) on the resolution (H. Res. 224) providing for consideration of the bill (H.R. 3210) to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes; which was referred to the House Calendar and ordered to be printed.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3377, AUTHORIZING APPROPRIATIONS FOR JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

Mr. HALL of Ohio, from the Committee on Rules, submitted a privileged report (Rept. No. 97-232) on the resolution (H. Res. 225) providing for consideration of the bill (H.R. 3377), authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes; which was referred to the House Calendar and ordered to be printed.

## OBJECTION TO CONSIDERATION OF SENSE OF CONGRESS ON SOUTH AFRICAN RUGBY TEAM

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL of Maryland. Mr. Speaker, this body just had an opportunity to vote on a resolution which would have spoken to the apartheid practices of South Africa. One Member of the House objected and, therefore, with that objection it may be that the interpretation will come out that, indeed, the present administration is tilting toward South Africa and embracing the apartheid policies.

It may be that the impression will come out that this body is unwilling to stand up against a racist regime which is committing unspeakable crimes against black Africans.

Through a parliamentary maneuver, my colleagues were denied an opportunity to stand up and vote for that which is right. However, I am assured by the gentleman from Pennsylvania (Mr. GRAY) and others that there will be an opportunity to vote on this resolution and I would hope that before my colleagues vote on it they will consider the importance of it.

America cannot, must not, ever be allied with anything that is racist and anything that is as wicked and venal as the Government of South Africa.

## PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes.

Mr. PORTER reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO FILE REPORT ON HOUSE CONCURRENT RESOLUTION 179

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight to file a report on the concurrent resolution, House Concurrent Resolution 179.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## A PERSONAL EXPLANATION

(Mr. FUQUA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FUQUA. Mr. Speaker, I was unable to be here for the session of Tuesday, September 15, and missed three important votes. Had I been able to be here and vote, I would have voted "aye" on rollcall No. 202, a concurrent resolution authorizing a bust or statue of Dr. Martin Luther King, Jr.

I would also have voted "aye" on rollcall No. 203, the HUD-Independent Agencies Appropriations Act conference report.

Additionally, I would have voted "aye" on rollcall No. 205, the legislation increasing pay and allowances for members of the Armed Forces.

## LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I would like to address the House so we may be advised of the schedule for the rest of this week and the agenda for next week.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. I thank the distinguished Republican whip for yielding.

Mr. Speaker, this concludes the business for today. Tomorrow the House will meet in pro forma session at 10 a.m.

It will be my intention subsequently to ask unanimous consent that when the House adjourns on Friday it stand adjourned to meet on Monday, September 21.

On Monday, September 21, the House will consider a Suspension Calendar of 12 bills. Those bills are:

H. Con. Res. 183, expressing the sense of Congress that the National Rugby Team of South Africa should not play in the United States;

H. Res. 142, sense of Congress objecting to UNESCO's World News and Information Control efforts;

H. Con. Res. 111, sense of Congress opposing Soviet treatment of Yuriy Shukhevych;

H. Res. 193, regarding the safety and freedom of Soviet Citizen Yuri Badzyo;

H. Res. 152, sense of Congress opposing Soviet imprisonment of Anatoli Shcharansky;

H. Res. 214, condemning South Africa's invasion of Angola;

H.R. 1952, authorizations for conservation on military installations and public lands;

H.R. 3016, Fisherman's Protection Act;

H.R. 1953, CEQ (Council on Environmental Quality) authorizations;

H.R. 4084, Marine Mammals Protection Act;

H. Con. Res. 179, highway allocations authorizations; and

H.R. 3995, veterans survivors benefits.

Then we have H.R. 3136, the Overseas Private Investment Corporation amendments of 1981, an open rule, 1 hour of general debate. The rule has already been debated and adopted and we will have general debate only on Monday.

On Tuesday, September 22, we will meet at noon and there will be no suspensions, but recorded votes on suspensions debated on Monday will take place on Tuesday. I will repeat that. There are no substantive votes anticipated for Monday. All votes due on any suspensions on Monday will be considered on Tuesday.

Also on Tuesday we have the District of Columbia appropriations for fiscal year 1982.

We will then come back to H.R. 3136, to complete action on the Overseas Private Investment Corporation Amendments of 1981.

On Wednesday and Thursday the House will meet at 10 a.m. and consider:

H.R. 4, Intelligence Agents Identities Protection Act, open rule, 1 hour.

H.R. 1520, NSF (National Science Foundation) authorization, open rule, 1 hour.

H.R. 3210, Federal Aid Highway Act of 1981, open rule, 1 hour.

H.R. 3377, authorizations for nonperforming arts functions for the Kennedy Center, open rule, 1 hour.

On Friday next, that is the 25th of September, the House will meet in pro forma session only, at 10 a.m.

This announcement is made subject to the usual reservations that conference reports may be brought up and that further announcements may be made at any time.

Mr. LOTT. So the gentleman is saying that there will not be any votes on Friday, the 25th? Did the gentleman say it would be a pro forma session a week from today?

Mr. FOLEY. Yes. The House will meet in pro forma session tomorrow and a week from tomorrow, on Friday, the 25th of September.

Mr. LOTT. The votes on suspensions on Monday will be deferred until Tuesday?

Mr. FOLEY. The gentleman is correct.

Mr. LOTT. I thank the gentleman for the schedule.

## ADJOURNMENT TO MONDAY, SEPTEMBER 21, 1981

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Friday, September 18, 1981, it adjourns to meet at noon on Monday, September 21, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## EFFECT OF REAGAN BUDGET CUTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, if the breadwinner of a family earns $20,000 in a given year and he sought another, higher paying job, and he requested a salary of $30,000 and he was in fact offered that job but at a salary of $25,000, could that breadwinner rightfully charge that the offer is unfair because he is taking a cut in pay? The $25,000 is certainly less than the $30,000 he was asking for, but it is also certainly higher than the $20,000 he was making.

My point is this: What has been all too infrequently mentioned, if not conveniently overlooked, by most critics and commentators on the effect of the President's budget package is that fiscal year 1982 outlays total $723 billion compared to $685.2 billion for fiscal year 1981 and $593.8 billion for fiscal year 1980.

□ 1445

Including the so-called cuts enacted this summer by the Congress, the 1982 budget is still $37.8 billion higher than 1981 and represents a 21.8-percent increase from 1980.

How can this be called a massive, drastic and harsh cut, when we are spending more than the preceding year?

The Congressional Budget Office, which is less optimistic about administration estimates, believes 1982 will wind up costing from $48 billion to $54 billion more than fiscal year 1981. This even more clearly underlines the fact that what we have is a far cry from an actual cut.

The problem is, of course, that we cannot simply be satisfied with this relatively modest budget increase. Outgo continues to run consistently ahead of income.

Now, for those who are uneasy, skeptical, or merely appalled at my list of possible additional budget cuts, if all of these proposals were enacted, totaling $52 billion, that would most likely result in 1982 outlays being from $5 to $10 billion higher than 1981. There would still be more spending than the preceding year. And, at the worst, outlays would roughly approximate 1981 outlays.

So even if we slice off another $52 billion from what has already been reduced, there would be no actual cut from the preceding year's budget.

Budget cuts, as we call them, are cuts in proposed increases, not decreases and, as such, do not deserve the panic-instilling aura that has been created around them. This is what Wall Street knows. This is what taxpayers who look at the figures know. This is what we have to remember when we pace the floor, wondering what to do next about the killer deficits.

The Members will recall that over the course of the past 3 or 4 days, this Member has taken the well of the House for the purpose of mentioning

and describing in brief detail some of those 272 items which reflect the work product of the Republican Research Committee Economic Task Force Budget Study Subcommittee, which this Member chairs.

Today, in line with what I have been doing over the last few days, it is my intention to draw the Members' attention to those prospective cuts in the category designated as "Defense/military," a very sensitive area of our budget in this era of increased emphasis on increased military spending to protect the ability of this country to defend its interests around the world.

Briefly, this category contains one of the largest total spending cuts, some 15 in total. Of the 15, 9 are recommendations of the General Accounting Office and 1 is a recommendation of the Congressional Budget Office.

These cuts are mentioned as an indication that in the bureaucracy known as the Defense Department, we have the ability to make spending cuts which will not, in the judgment of this Member from California, impair the ability of our Nation to protect its vital interests around the world.

The first one is designated "Military personnel, Army." Eliminate the personnel slots retained after the functions have been transferred. This is a recommendation of the General Accounting Office. It has not yet been implemented. It would save, if adopted, $25 million.

"Military personnel, Air Force." Reduce active duty personnel required for strategic airlift crews. This is another General Accounting Office recommendation unacted upon. If implemented, it would save $105 million.

"Military personnel, National Guard, Army." Eliminate erroneous payment to reservists for drills which they do not attend. A recommendation of the General Accounting Office, this if implemented, would save $744,000.

"Military personnel, programwide." Incorporate cost-reducing measures, new clothing allowance method, overseas housing allowance, civilian substitutes for recreation and welfare activities, accelerate discharges for adverse reasons, and other reductions, all recommendations of the General Accounting Office heretofore unadopted. These items, if adopted, would save $259,300,000.

"Operations and maintenance, Navy." Improve stock maintenance policies, also recommended by the General Accounting Office, would save $20 million.

"Operations and maintenance, Defense agencies, CHAMPUS claims." Eliminating erroneous claims would save $146,615,000.

"Operations and maintenance, Navy Reserve." Retire obsolete World War II destroyers. The Congressional Budget Office has recommended that if we did this we would save $130 million.

"Operations and maintenance, National Board for Promotion of Rifle Practice." We propose to eliminate this board as unnecessary. If adopted, it would save $500,000.

"Operations and maintenance, programwide." Standardize aircraft ground service equipment and software computer systems, recommendations of the General Accounting Office, which, if adopted, would save $312,870,000.

"Allowances, other legislation." Deferring this supplemental appropriation would save $369,900,000.

"Departmentwide, Air Force." GAO recommended corrections of auditing procedures are necessary to combat unresolved audit findings which reveal considerable waste. If implemented, it would save an estimated $469,830,000.

"Departmentwide, Defense Audit Service." Correct auditing procedures as in the above; unresolved audit findings reveal waste in the amount estimated by the General Accounting Office to be $489,700,000.

"Departmentwide, operations and maintenance." Upgrade management techniques, recommended by the General Accounting Office. If implemented, this would save $4 billion.

"Departmentwide, contract awards." Institute competitive bidding; Government studies show, according to information released by Senator PROXMIRE of the other body, that 10 to 25 percent of $36 billion in contract awards would be saved. We have used a median between these two figures of 17.5 percent. If implemented, it would save $6.3 billion.

"Departmentwide, unobligated balance carryover." Eliminate the excess, that is, the increase from 1981 to 1982, carryover of unobligated balance, which would eliminate from spending for fiscal year 1982 the sum of $3,519,484,000.

These 15 items of the defense military category total $16,148,943,000.

Mr. Speaker, I think this list indicates that there is within the Department of Defense areas where savings can be made so as to bring down, if implemented, the tremendous demand for credit by the Federal Government which today has raised and kept interest rates to an historic high.

The next category that I would like to read this afternoon deals with recommendations in the "Defense/civil" area.

"Corps of Engineers, operations and maintenance, general." We would allow 20 percent above what was spent in 1980. If this is implemented, we would save $16,150,400.

"Corps of Engineers, general expenses." We would allow 20 percent above 1980. The proposed outlays represent a 33.7-percent increase since 1980, which we believe is excessive. If implemented, this would save $9,762,800.

"Corps of Engineers, proprietary receipts." This item, a recommendation of the Congressional Budget Office, may come as a surprise to many Members of the Congress. The taxpayers of this country are subsidizing barge transport around this country to the tune of well over a billion dollars a year. Members may recall that just recently, as a part of our reconciliation package, that with regards to financing Amtrak for fiscal year 1982, a compromise was worked out for $735 million. What we are doing, really, is financing barge transport out of the Treasury, and anything you subsidize you get more of. So we have a lot of barge transportation around the country at a less-than-market cost because the taxpayers are financing that transportation. And yet we have existing, in many cases side by side with these barge lines, railroad lines which are in some cases threatened with bankruptcy. In fact, ConRail may come to the Members' attention as one of those that our Federal Treasury has had to subsidize. It does not make sense for the taxpayers of our country to continue to subsidize barge transport. Recovering this cost through the imposition of user fees would net $980 million.

The last item in this category is "Wildlife conservation, military reservations, Navy." We would allow a 20-percent increase above 1980. The proposed outlays represent a 75.3-percent increase since 1980. We deem this excessive. If we limit it to 20 percent above what was spent in 1980, we would save $51,400.

These items under "Defense/civil" total four, and they total collectively $1,005,964,600.

These are the two categories that I will share with the Members today.

In conclusion of my remarks this afternoon, let me make this observation: This Nation has some very hard choices to make in terms of dollar priorities. The deficit today is so overwhelming, as it has been over the last 5 years. Bear in mind that of the almost $1 trillion national debt, better than 30 percent, or in excess of $300 billion, has been created in the last 5 years. The deficit for this current year is estimated anywhere from around $75 billion to $80 billion. This debt has to be financed. It is financed by the Treasury every week going into the credit markets of the country for the purpose of raising money to pay the bills of the Government, and it is because of the overwhelming demand of our Central Government for credit that the cost of credit for every business and citizen in our country is at an historic high. Bankruptcies are happening around this Nation. Why? Because the Central Government is

crowding out people who want to borrow or keep borrowing for a new plant or what have you, and this excessive demand for credit by the Central Government is the principal reason why credit rates in this country are at the level they are today.

What is the answer? You may say you do not like the items that I have been reading, that they are unfortunate or inadequate or politically unacceptable. To those Members in this Chamber who believe that, my question is: What is your recommendation as to how we can bring this runaway monster, Federal Government deficit spending, under control?

□ 1500

That is our challenge and I can assure every Member of this body that if we here today in the 97th Congress do not meet this challenge, which is coming to be appreciated more and more every day as the principal cause for inflation in this country, that is excessive Federal spending and deficits, then we will have the privilege of explaining that in the November 1982 elections to those opponents who come and ask us why we were here and did not do what we could to bring this monster under control.

It is in this spirit that this analysis is offered, and I want to, in conclusion, make the observation that the figures that I have related today, as I have on previous days, were accurate when they were published in July, but that there might be a slight modification of one or more of them as a result of the budget reconciliation bill and revised budget estimates.

That analysis is going on in my office and when it is completed I will share it with the Members.

## A TRIBUTE TO THE LATE FRANK J. BECKER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. McGRATH) is recognized for 30 minutes.

GENERAL LEAVE

Mr. McGRATH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. McGRATH. Mr. Speaker, I have asked for this time today to pay tribute to a special man, and a former Member of the House of Representatives, Frank J. Becker. Mr. Becker died at his home in Lynbrook, N.Y., on September 4 at the age of 82.

Frank Becker served with distinction in this body from 1953 through 1964, representing the Third, then the Fifth Congressional District of New York. He retired at the end of the 88th Congress to devote more time to the family which he held so dear.

Mr. Becker began his political career in 1945 as a member of the New York State Assembly. He was first elected to Congress in 1952, and was reelected five times by increasingly large margins. In fact, Frank Becker never lost an election, whether for political office, party leadership positions, or leadership in the many civic or fraternal organizations to which he belonged. As a Member of Congress, Mr. Becker served on the Armed Services Committee, and was a well-known proponent of a strong national defense.

Frank will be remembered for two causes which he championed during his tenure in the House. He was one of the first Members of Congress to take up the cause of voluntary prayer in public schools after the Supreme Court decision. He said at the time that it was his mission to save this Nation from "the curse which has befallen all civilizations that forgot and disobeyed God Almighty." Although his effort was not successful, he was truly the father of a movement which continues to this day.

He was also a defender of the rights of U.S. servicemen abroad. He was the author of legislation to permit U.S. military personnel under the command of NATO to be tried by U.S. courts martial rather than by foreign courts and, if convicted, sentenced to U.S. military prisons.

Mr. Speaker, the recitation of an individual's biography is often an impersonal thing, and it does not do justice to the man himself. Frank Becker was much more than just a former assemblyman and Member of Congress. He was a man who was loved and respected by all who were privileged to know him. He was an individual whose courage, heart, and dedication far exceeded his physical stature. He was, as my colleague from New York, Mr. STRATTON said, "feisty." In fact, he was known by those who knew him as "the Little Giant."

He was an active leader in the veterans community on Long Island and nationwide. As a veteran of World War I, he understood the problems of veterans, and worked with great diligence to preserve those ideals for which American military men have fought and died for over the years. He loved his country and all it stood for, and defended it through both word and deed.

He was an active member of his church and for many years served as chairman of the Catholic Charities fund drive on Long Island.

He was a leader of the business community and at the time of his death was an active part of the real estate and insurance firm which he founded 50 years ago.

Above all else, Frank Becker was a family man. He was guided in all his actions by his love and respect for the institution of the family. The most special time of his week became Sunday morning, when he breakfasted with many or all of his 3 children, 21 grandchildren, and 3 great-grandchildren.

Frank Becker was the epitome of what a public and private citizen should be. To me, he was a friend and adviser whose good judgment I always respected. To all members of the community he was a good friend who will be missed.

I want to extend my deepest sympathy to Frank's wife of 58 years, Claire, to his children, Robert, Francis, and Elizabeth, and the rest of his family.

[From the New York Times, Sept. 5, 1981]

FRANK J. BECKER, 82, IS DEAD; REPRESENTED LONG ISLAND IN CONGRESS

Frank J. Becker, a United States Representative for 12 years and a New York State Assemblyman for eight, died at his home Friday in Lynbrook, L.I. He was 82 years old.

Mr. Becker, a Republican, represented Nassau County in Albany from 1945 to 1953 and in Washington from 1953 to 1965. Never having lost an election, he retired after his sixth Congressional term, he said, to devote more time to his family and to make room for younger candidates.

Near the end of his career, Mr. Becker became the focus of a heated debate when he sponsored a Constitutional amendment to allow organized prayers and Bible reading in public schools, with voluntary participation. Mr. Becker said at the time that he believed it was his mission to save the nation from the "curse which has befallen all civilizations that forgot and disobeyed God Almighty."

FOUNDED REAL ESTATE COMPANY

The proposed amendment, which followed a United States Supreme Court decision ruling unconstitutional the organized recitation of a prayer in New York schools, was defeated.

Another issue that concerned Mr. Becker was the way foreign governments treated American servicemen accused of crimes. He proposed legislation that would have permitted the Americans to be tried by American military courts and, if convicted, sentenced to American military prisons. That measure also failed.

Born in Brooklyn, Mr. Becker moved with his family to Lynbrook when he was a child. During World War I, he served in France with the Army.

Mr. Becker took an active part in his real-estate and insurance company, which he founded 50 years ago. He was also chairman emeritus of the board of directors of the Suburbia Federal Savings and Loan Association in Garden City.

He was also active in a number of civic organizations, including the Lynbrook and Nassau County chapters of the American Legion and the Lynbrook post of the Veterans of Foreign Wars. He belonged to the Knights of Columbus and for seven years was chairman of the Catholic Charities fund drive on Long Island.

He is survived by his wife of 58 years, Claire, and three children, Francis X. Becker, a State Supreme Court justice on

Long Island; Robert G. Becker, of Lynbrook, and Elizabeth Ann Myers, of Torrance, Calif. In addition, there are 21 grandchildren and three great-grand-children.

A funeral mass will be offered at 10:30 A.M. Tuesday in Our Lady of Peace Roman Catholic Church in Lynbrook. Burial will be at the Long Island National Cemetery, Pinelawn.

● Mr. RHODES. Mr. Speaker, it is a privilege to join in this special order in honor of Frank J. Becker, a former Member of this body, who died recently. I had the pleasure of serving with Frank during his years in the House from 1953 to 1965. He approached his responsibilities in the House with the characteristic dedication he did in serving in the New York State legislature and the many other civic and community organizations with which he was affiliated.

He was a fine American who was proud of his patriotism and his religious fervor. The sense of awe at the prospect of serving in the U.S. Congress, which he possessed upon his arrival in Washington was no less intense when he took his leave of the House 12 years later. Frank Becker had an admirable old-fashioned sense of duty and love of country. It was an honor to have shared those several years with him as a colleague in this House.●

● Mr. HORTON. Mr. Speaker, as dean of the Republican delegation of the New York congressional delegation, I am grateful to Congressman RAY MCGRATH for taking this special order to pay tribute to our former colleague, the Honorable Frank Becker.

Frank Becker served with distinction and great honor in the House between 1953 and 1964. It was my privilege to serve with him during the 88th Congress. During our service in the House, I became well acquainted with his record of accomplishments and active representation of his Long Island district. We all regretted his decision not to seek another term. His legacy to this institution then, as now, is a stirring testament to an effective representational form of government.

I join my colleague, Congressman MCGRATH, and other Members of the House in extending our sincere condolences to his family.●

● Mr. DERWINSKI. Mr. Speaker, it was my privilege to have served with the late Congressman Frank J. Becker, during his long and eventful years in the House of Representatives, and I share my sorrow at his passing.

As a Member of Congress, Frank Becker was a sincere, hard-working representative for the people of New York. As a freshman Member, I remember that I was impressed with Frank's courtesy and his ability as a legislator. I held great admiration and respect for his judgment and counsel, and always found him to be a very warm, pleasant, and understanding individual.

During his distinguished career in the House, Frank made countless contributions to the legislative process. He had many friends on both sides of the aisle and was admired and trusted for his knowledgeable and wise counsel. Frank was truly dedicated to public service, and lived up to the full measure of this responsibilities.

Mrs. Derwinski joins me in extending our heartfelt condolences to his widow, Claire, and his entire family. We will remember him in Congress as a true friend and respected colleague.●

● Mr. QUILLEN. Mr. Speaker, I would like to take the opportunity, along with my colleagues, to pay tribute to former Congressman Frank J. Becker.

The tremendous work he did in serving his constitutents and our Nation is a shining example for others to follow, and his efforts will be long remembered. His record of accomplishments shows a great deal of dedication and ability, as well as personal integrity.

Frank's knowledge and experience on defense matters made him an effective member of the Armed Services Committee, and he made many important contributions to this country.

My sincere condolences to Mrs. Becker, his children, and other members of his family in their hour of sorrow. Their loss is shared by those who knew Frank, and his high level of service is etched in their memories.

Although I was a freshman Member when Frank retired, I admired his work and the principles for which he stood, and it is a privilege for me to join my colleagues in the House in paying tribute to him.●

● Mr. BROOMFIELD. Mr. Speaker, I rise to join my colleagues in expressing our deep sorrow at the death of our former colleague, the late Congressman Frank J. Becker, and to express our heartfelt sympathies to his wife, Claire, and their children.

Frank Becker, who passed away on September 4, served our Nation and his New York constituents with great distinction during his 11 years as a Member of the House of Representatives.

As a Member of the House, Frank was respected by all who knew him, and he is fondly remembered for his integrity, forthrightness, and willingness to fight hard for his beliefs. As a member of the House Armed Services Committee, these traits served him and our country well in seeking to maintain a credible defense.

Mr. Speaker, this body lost a very able Member when Frank decided to retire from public life in 1965. It was an honor to know him and to serve with him, and again, I wish to express my sincerest sympathies to his family.●

● Mr. GREEN. Mr. Speaker, I appreciate the opportunity afforded by the gentleman from New York (Mr. MCGRATH) to pay tribute to a former Member, Frank J. Becker.

Frank Becker devoted a lifetime of service to the residents of Nassau County as a U.S. Representative for 12 years and prior to that, a New York State assemblyman for 8. Mr. Becker also took an active part in a number of civic organizations, including the Lynbrook and Nassau County chapters of the American Legion and the Lynbrook post of the Veterans of Foreign Wars. In addition, he belonged to the Knights of Columbus and for 7 years was chairman of the Catholic Charities fund drive on Long Island.

Never having lost an election, he retired after his sixth congressional term to devote more time to his family and make room in Congress for younger candidates.

Frank Becker cared deeply for the people of New York whom he represented with dedication and skill.

I want to extend my deepest sympathy to Frank Becker's wife, Claire, and his family.●

● Mr. LENT. Mr. Speaker, it is with great sadness and feeling of personal loss that I rise today to pay tribute to a longtime friend, a great patriot, and former Member of Congress Frank J. Becker, who recently passed away at his home at the age of 82.

I did not have the privilege to serve in this Chamber with Frank but I was privileged to enjoy his friendhship for many years. He served as a role model and great inspiration to me when I began my political career in Albany almost 20 years ago. Despite his retirement from the Congress more than 15 years ago, his warm, outgoing friendliness is still remembered here in these Halls by all those who knew him.

Frank was a true public servant in every sense of the word. He began his political career in Albany as a State assemblyman in 1945 and was elected to the House of Representatives for his first term in 1952. He represented the Third and then the Fifth Congressional Districts of New York from 1953 to 1965. In addition to his arduous duties as a legislator, he was always interested and active in local civic, veterans, and fraternal organizations in the Nassau County area. He truly loved all those he served so well during his many years in office. A testimony to his excellence in representing the good citizens of Nassau County is the fact that he never lost an election in candidacies for private, organizational office, GOP committeeman, executive committeeman, the New York State Assembly, and the Congress.

Frank's dedication and hard work inspired his two sons to become active in public service. His oldest son, Francis, is the former mayor of Lynbrook and is presently serving as a justice on the New York Supreme Court. Robert, his youngest son is now serving as an ex-

ecutive committeeman for the Nassau County Republican Party. His daughter, Elizabeth Ann Meyers is a resident of Torrance, Calif.

His lovely wife of 58 years, Claire, his 3 children, 21 grandchildren, and 3 great-grandchildren were the centerpiece of his life. They all will miss Frank very much as will many other friends and relatives. To the family of this great American, I offer my sincere sympathy and share with them a true feeling of loss at his passing.●

● Mr. FUQUA. Mr. Speaker, it is with a deep sense of personal loss that I rise today to join my colleagues in commemorating the career of our good friend Frank J. Becker, who so ably served his districts in Long Island during 11 years in this House.

Though our tenures in this body overlapped by only a brief time, I found in Frank Becker the qualities of service which I have since tried to emulate; dedication to his country, responsiveness to his constituents, loyalty to his colleagues.

It mattered not that we were from different parts of the country and of different political parties.

His counsel was always valuable, his advise wise, his guidance trustworthy, and his friendship steadfast.

I extend my deepest sympathies to his lovely wife Claire, his three children, his grandchildren and great-grandchildren.●

## SUGAR RAY LEONARD IS THE CHAMPION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. HOYER) is recognized for 15 minutes.

Mr. HOYER. Mr. Speaker, I rise today with admiration to congratulate two young men of talent and courage.

I rise with an even greater sense of pride for the favorite son of Prince Georges County and Palmer Park—the undisputed welterweight champ of the world—Sugar Ray Leonard. A young man wise beyond his years whose head and heart combined to prevail in last night's confrontation between the "Sugar Man" and the "Motor City Cobra."

It was a boxing match which justified all the prefight hype and which showed both men to be worthy of the accolades heaped upon them by their supporters.

In the final analysis, however, it was a night which proved to those who still doubted that Sugar Ray Leonard was and is one of boxing history's greatest champions—a champion whose ability and character both justify our pride.

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 15 minutes.

● Mr. NELSON. Mr. Speaker, due to official business in Florida yesterday I was not present for rollcall votes Nos. 201 through 205. Had I been present I would have voted "yes" on the motion to approve the Journal for Tuesday, September 15, 1981; "yes" on House Concurrent Resolution 153, authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol; "yes" on agreeing to the conference report on H.R. 4034, making appropriations for the Department of Housing and Urban Development and for various independent agencies; "yes" on the Addabbo amendment to H.R. 3380, to provide for military pay raises varying according to rank and needs of the services; and "yes" on final passage of H.R. 3380, to increase the pay and allowances of members of the Armed Forces.●

## GENERAL VON STEUBEN—A REVOLUTIONARY WAR HERO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, September 17 is the anniversary of the birth of Gen. Friedrich Wilhelm von Steuben, one of the leading patriots of the Revolutionary War.

General Von Steuben received a large award from Congress for his outstanding contributions to the winning of American independence, and along with General Lafayette, he was second only to General Washington as a shaper of the Continental Army.

On Saturday, September 19, the United German-American Societies of Greater Chicago will sponsor Chicago's General Von Steuben parade. The parade will step off at noon on Wacker Drive and Dearborn Street and proceed past the reviewing stand at the Richard J. Daley Center. Many scores of floats will join in this commemorative tribute to a gallant patriot of our precious freedom, along with many marching units and musical contingents.

Hon. Jane Byrne, mayor of Chicago, will serve as honorary grand marshal, Karl C. Laschet is general chairman and grand marshal, Joseph Gies is the honorary general chairman, and Norbert Holzinger will serve as parade marshal.

It was in the year 1777 that Von Steuben offered his services to the fledgling Republic. This was a time of great disappointment and hardship for the Continental Army, because the frigid winter at Valley Forge could have delayed indefinitely America's hope for independence. However, through the fortitude and discipline of General Washington and General Von Steuben, the Revolutionary Army was able to emerge from the winter in fighting shape.

During that winter in 1777, Von Steuben wrote the "Regulations for the Order and Discipline of Troops of the United States." This was one of his greatest contributions to the cause of independence. Through the use of this handbook and Von Steuben's leadership, an army of irregulars was transformed into a disciplined and organized combat unit, equal to the task of fighting one of the world's most powerful armies.

General Von Steuben had a distinguished military career during his service in America. In 1781, he served in battle against Cornwallis' invasion of Virginia, and at the battle of Yorktown, he commanded one of the three divisions of the Continental Army.

In appreciation for his services, the State of New York awarded General Von Steuben a 16,000 acre estate, and Congress granted him a pension of $2,500 for the rest of his life. Just before he retired from his leadership in the Army, Gen. George Washington wrote to Von Steuben congratulating him as follows:

ANNAPOLIS,
*December 23, 1783.*

MY DEAR BARON: Although I have taken frequent opportunities, both in public and private, of acknowledging your great zeal, attention, and abilities, in performing the duties of your office; yet I wish to make use of this last moment of my public life to signify, in the strongest terms, my entire approbation of your conduct, and to express my sense of the obligations the public is under to you, for your faithful and meritorious services.

I beg you will be convinced, my dear Sir, that I should rejoice, if it could ever be in my power to serve you more essentially than by expressions of regard and affection; but, in the mean time, I am persuaded you will not be displeased with this farewell token of my sincere friendship and esteem for you.

This is the last letter I shall write, while I continue in the service of my country. The hour of my resignation is fixed at twelve today; after which, I shall become a private citizen on the banks of the Potomac where, I shall be glad to embrace you, and testify the great esteem and consideration with which I am my dear Baron, & c.

Mr. Speaker, the members and officers of the United German-American Societies of Greater Chicago are outstanding leaders and dedicated participants in the betterment of their individual communities, and I congratulate them for their resourceful service in our city of Chicago, and on their hard work to make Chicago's Von Steuben Day Parade a success. The names of the members of the Chicago General Von Steuben Parade committee follow:

Committee: Felix Bachmeier, Melvin Brandt, Stefan Dama, Rudi Dick, Ludwig Erdbeer, Willi Follmer, John Hebling, John Kraus, Elisabeth Kraus, Fred Marunde, Josef Matzer, Wolf-

gang Reinke, Horst Seyferth, Willi Scharpenberg, Nick Schneider, Alfred Schmitke, and Horst Tietz.

Helen Meiszner, parade treasurer; Joseph Zottmann, Betty Center, and Louise Jochum, trustees.

Paula Zottman, cornflower chairlady; Clara Winkler, recording secretary; Betty Center, correspondence secretary; Edward Kmiec, coordinator.

Directoren: Joseph Freiburger, Karl Kurz, Elisabeth Kraus, Willi Follmer, Joseph Anetzberger, John Katrein, Joseph Zottmann, Helen Meiszner, Alfonse Schneemann.

Finanzcommittee: Henrietta Baltis, Ernest W. Bonatz, George Bohling, Ferdinand Fritsch, and Klaus Trottmann.

I extend my greetings and best wishes to German Americans in the 11th District of Illinois, which I am honored to represent, in the city of Chicago and all over the Nation who are commemorating the birth of that Revolutionary War hero, General Von Steuben, and the German contribution to American greatness.●

## SENATOR SARBANES REPORTS ON HIGH INTEREST RATES AND THE MARYLAND ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 10 minutes.

●Mr. REUSS. Mr. Speaker, during the week of August 31 through September 4, when Congress was in the middle of its statutory recess, the Subcommittee on Investment, Jobs, and Prices of the Joint Economic Committee conducted a series of six field hearings throughout the State of Maryland to examine the effect of today's high interest rates on local economies and local communities in Maryland. The hearings were chaired by Senator PAUL SARBANES.

Upon the reconvening of the Congress, Senator SARBANES wrote to me summarizing the findings from the hearings, where testimony was received from 85 witnesses representing major interest-sensitive sectors of the Maryland economy, including homebuilders, realtors, farmers, auto dealers, small business men and women, as well as financial institutions and State and local governments. His letter follows:

U.S. SENATE,
*Washington, D.C., September 11, 1981.*

Hon. HENRY S. REUSS,
*Chairman, Joint Economic Committee, Dirksen Senate Office Building, Washington, D.C.*

DEAR MR. CHAIRMAN: I am writing to report to you on field hearings held recently in the Subcommittee on Investment, Jobs and Prices to examine the effects of high interest rates on Maryland communities, and to summarize very briefly some of the major points which emerged from the testimony received at those hearings.

The Subcommittee held hearings in six different Maryland locations during the week of August 31 to September 4; attached you will find the hearing schedule and the complete witness lists. In my view, and I believe in the view of both those who participated in and those who attended the hearings, they were extraordinarily informative. At every hearing witnesses described in detail the immediate, practical consequences for their own communities, families and businesses of the current unprecedented level of interest rates. In every instance their testimony underscored the seriousness of the distortions and the urgency of the problems which high interest rates have created.

Transcripts of the six hearings are now available and, in accordance with normal Committee procedures, will be published and made available to Members of Congress and the public at large. Examination of the testimony reveals certain recurrent issues of particular importance, and I would like to outline these briefly and to propose that the Subcommittee investigate them further in the months ahead.

First, the high interest rates, ostensibly designed to check inflation, themselves become an important contributing factor to inflation. In housing, the availability of an assumable loan or so-called creative financing, which brings down the cost of financing purchase of a home, is almost always reflected in the higher price of that home. Farmers testified repeatedly that they have no choice but to pass on the high cost of credit to consumers in the form of higher prices. Small businessmen, homebuilders, auto dealers and others expressed the same view.

Second, high interest rates are a significant obstacle in two respects to the effort to reduce the federal deficit. First of all, they increase the carrying charge on the existing debt, thereby raising expenditures. Further, and very importantly, high interest rates have provoked a recession in certain sectors of the economy, with the result that workers who are laid off cease to be taxpayers and begin instead to draw unemployment compensation from the Treasury. The consequence of the slowdown in economic activity caused by high interest rates is a double penalty imposed on the effort to balance the federal budget.

Third, current interest rates have created an absolute disincentive to investment. Businessmen and women, even in cases where they can continue to operate, now ask whether it makes good financial sense to do so when they can earn an immediate, greater return simply by investing their capital in money market funds. This striking disincentive to investment runs precisely counter to efforts to strengthen the national economy by promoting investment.

Fourth, at just the time when state and local government jurisdictions face sharp reductions in financial support from the federal government, they also face serious obstacles in the bond market. At present they are obliged to pay rates above 11 percent and to shorten significantly the term of their bond issues. Important capital improvements are being deferred, to the detriment of the economic infrastructure of local communities.

Fifth, mortgage rates have eliminated all but 5 to 10 percent of American families from the housing market. With the notable exception of luxury and vacation homes, residential construction is almost at a standstill in Maryland. Today's mortgage rates impose a special hardship on those who must relocate for job reasons or who are in the military. The only families that can cope with the challenge of buying and selling a home under the pressure of time are those associated with large firms which can offer relocation assistance as a benefit of employment. In such cases the firm takes over responsibility for the house when a move is required. The consequence of this is to place small business at an even greater disadvantage in relation to larger concerns.

Sixth, it is impossible for a young person to take up farming unless, in the words of numerous witnesses, he inherits or marries into it. There was general agreement among farmer witnesses that investment in farm equipment is being deferred, with obvious adverse effects where productivity is concerned.

These are only several of the most serious and striking distortions in business and community patterns which were brought to the attention of the Subcommittee. It is evident that if they are allowed to continue uncorrected, these distortions will do permanent damage to the social and economic fabric of our communities.

I look forward to working with you as the Committee continues its work on this vital aspect of the nation's economy to underscore the urgency of changing current interest rate policy and to recommend steps for so doing.

With best regards,
Sincerely,

PAUL S. SARBANES,
*U.S. Senator.*●

## UNITED STATES-CANADIAN RELATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 20 minutes.

● Mr. LAFALCE. Mr. Speaker, last week a number of statements were made by administration spokesmen which appeared to declare economic warfare between the United States and Canada. At a meeting, September 8, between Canadian and American officials to discuss the Canadian Government's nationalization plans aimed at limiting U.S. investment in Canada, an Assistant Secretary of Commerce stated that if certain measures proposed by the Canadian Government are taken, there could be an unfortunate reaction in the United States. Included in this discussion were threats by the representative from the Commerce Department and the U.S. Trade Representative of imposing extreme trade sanctions upon Canada. This received widespread publicity, and has caused me considerable concern.

Therefore, I would like to urge the Members of the House to reflect for a moment on Canadian-United States relations—particularly to evaluate, in the context of the long history of cordial and mature relations between our two countries, the overreaction of some in the United States to certain Canadian policies and actions.

I am appalled at the views of some in the executive branch and in the

Congress who essentially would suggest that Canadian policy be a replica of U.S. policy, or else, appear to consider it appropriate or necessary to bludgeon Canada into following U.S. policy preferences.

This attitude has been most prevalent with respect to Canada's new energy policy. There are definitely various aspects of the NEP which the United States should protest and press for revision. For example, U.S. complaints resulted in clarifications in May to assure that compensation would be paid for the 25 percent of oil and gas leases that the Canadian Government will take over and that there is no intent to discriminate against U.S. companies in procurement. We should continue to discuss the NEP with the Canadian officials to insure that the compensation is adequate, that the implementation of the procurement policy, in fact, does not discriminate against procurement in the United States, and that the investment incentives discriminate as little as possible against foreign investors.

However, too many U.S. critics have gone beyond some of the specifics of the new energy policy and would appear to question the entire NEP itself and suggest that it be abandoned. Such an attitude totally ignores the context in which the NEP was developed and the fact that if foreign interests owned 70 percent of the U.S. oil and gas industry we would have moved much earlier and more swiftly to terminate the foreign dominance. It also ignores the fact that, at least in the medium term, the NEP may benefit the United States more than Canada—as many as 150 oil rigs may have been moved in the past year from Canada to the United States, so it is United States, not Canadian, reserves which will benefit from their operations.

The recent hysteria over the efforts of several Canadian companies to take over American companies would also appear to be out of proportion. Is it not a little absurd and even hypocritical for the United States, whose business interests own 25 percent of Canadian industrial capacity, to be exercised when Canadian firms, whose collective U.S. business ownership is barely measurable, attempt to buy out an American company? The proposal to extend the 50-percent margin requirement to foreign interests is a reasonable proposal, as the purpose of this limitation is the protection of the financial stability of the U.S. financial community and as there is no reason we should grant foreign interests a financial edge over American investors. However, the suggestion of a moratorium on Canadian purchases of U.S. energy companies is not only highly discriminatory but also of little practical use, as the marketplace appears to be doing more than an adequate job of defending whatever U.S. financial interests need to be defended from Canadian takeover attempts. Also, let us not forget that there are a handful of U.S.-based companies which are Canadian-owned—such as Massey-Ferguson, Seagrams, and Moore Corp.—which most of us never think as being foreign companies and which are good U.S. corporate citizens.

As to other United States-Canadian issues, we should be pressing Ottawa on the proposed new import policy, aspects of which could be both discriminatory to U.S. interests and highly protectionist. And we should make known our views on any attempt to extend the purview of the Foreign Investment Agency.

However, we must also recognize that Canada is not the United States and Canadians have the right to structure their society and laws as they see fit. We must realize that Canada has legitimate complaints against the United States, particularly the ill-manner in which Canada has been treated over the fisheries treaties which the two governments signed but which the U.S. Senate refused to ratify. And we must also recognize that there are many interests and problems that we have in common and that require our collective actions to solve—such as the European and Japanese challenge to the North American automobile industry and the acid rain which is killing waters in both Canada and the United States.

We must conduct our relations with Canada in a manner which is cognizant of and in keeping with the long history of cordial relations and an unguarded border. Problems between our two countries have been resolved most readily when both parties have acted quietly and calmly and avoided hyperbole and empty threats.

Canada is the closest friend and the most extensive economic partner the United States has, and we must avoid damaging or endangering that relationship due to transitional difficulties over policy differences.●

## ELDERLY AND VETERANS SHOULD NOT BE MADE TO SUFFER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Dakota (Mr. DASCHLE) is recognized for 5 minutes.

Mr. DASCHLE. Mr. Speaker, this morning's news announced the intention of the administration to request a 3-month delay in cost-of-living adjustments for social security recipients, veterans, and others.

While I commend the desire to see spending reduced and the Federal budget brought into balance, it concerns me very much that every effort to achieve that balance seems to place the burden more and more heavily on the backs of those who can least afford it.

Equity: That is all we want. The American people demand the sacrifice be equitable. This body has just last month provided billions of dollars in tax relief for the oil industry and billions more for those few Americans fortunate enough to enjoy incomes in excess of $50,000. In my view it would be absolutely indefensible for this Congress to now ask only people who are elderly, or who have helped defend our Nation, to participate in the sacrifices needed to reduce the Federal budget. Surely, if senior citizens and veterans are to sacrifice, oil companies and the wealthiest individuals among us should sacrifice as well.

To make certain this equality of sacrifice is achieved, I am today introducing a resolution in Congress in opposition to any delay in social security or veterans benefit adjustment unless the tax cuts we have just provided for oil and for the wealthy are delayed or suspended for an equal period.

I hope Members will want to join me in this effort to assure the American people that oil companies and the wealthy will not be given breaks while veterans and the elderly are made to suffer.

## REAGAN HEALTH AND SOCIAL SERVICES PROGRAM CALLS FOR GREATER CONTROL BY STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Tennessee. Mr. Speaker, as we all know, part of the Reagan plan for a variety of health and social service programs is to give a greater degree of control to the States. A number of us in the Congress have expressed concern over this plan. We have questioned whether the rights and needs of the poor will be properly addressed at the State and local level. Yesterday, the Department of Health and Human Services took action which indicates that our concern was well founded. The Department has proposed eliminating a requirement that State medicaid agencies give 60 days public notice of any proposed changes in the medicaid plan. States have a great deal of discretion in determining what services will be covered by medicaid and what the level of reimbursement will be. I do not think that it is too much to ask that the States give notice of any changes in the program. Such a notice does not interfere with the discretion we have given the States. What it does do, is assure that all parties, providers and beneficiaries, will have the opportunity at the State level to be heard. I intend to introduce legislation to require this notice

period, and I encourage my colleagues to join me.●

## ADDRESS BY SECRETARY PIERCE, AT MUNICIPAL ASSOCIATION OF SOUTH CAROLINA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY) is recognized for 20 minutes.

Mr. McKINNEY. Mr. Speaker, I want to share with you today the recent remarks of Secretary of Housing and Urban Development, Samuel R. Pierce, Jr., regarding the administration's commitment to a budget which reduces the Federal Government's activities to absolute priorities and requirements while at the same time assisting those least able to meet their basic necessities of life.

I have long worked on the Housing Subcommittee to do more with less money in the areas of housing and community development, and am impressed by Secretary Pierce's achievements along those lines in 8 short months. I also applaud the Secretary's formal recognition of the incredible leveraging effect of UDAG, and urge you to read his report on the administration's management initiatives in leading HUD in an eagerly awaited new direction.

REMARKS BY SAMUEL R. PIERCE, JR.

(Delivered at the 41st Annual Meeting of the Municipal Association of South Carolina, Hilton Head, S.C., August 29, 1981)

Thank you for that kind introduction, Senator Thurmond. And thank you, too, for adding your invitation to the one I received from the Municipal Association of South Carolina. The State is indeed fortunate to be represented by you as its distinguished senior Senator. In and out of Washington, I count on you as a valued friend.

It is a great personal pleasure to be here in Hilton Head the Palmetto State's beautiful, world-renowned resort area. The many kindnesses you have shown me here, I assure you, will draw me back again.

I also want to assure you that I attach considerable significance, to this meeting. The work of your Association, through its efforts to strengthen State and local relations, is of fundamental importance to President Reagan's New Federalism. The advising, information-sharing, planning, State legislative, and other lobbying functions, which characterize your Association, figure prominently in making government more responsive to the needs and rights of citizens. In so doing, it makes the system more efficient and less costly.

I want to share with you my perspective of the policy and purpose of the Reagan Administration in correcting our country's weak economy. We have been brought into this sad state of economic disrepair by undisciplined Federal spending, misguided fiscal practices, and stifling tax policies. What we in this Administration are pursuing is no less than a fundamental change in the way the government of America carries out its responsibilities. We are committed to a budget which reduces our activities to absolute priorities and requirements, a budget that will, at the same time, assist where possible those least able to meet their basic necessities of life. We are committed to a system of government that will be founded in economic stability, and that will recognize economic stability as a key ingredient to national security. We are committed to a system in which the appropriate level of government is called upon to do not just what it can do, but what it properly should do.

We do not believe that government should try to be all things to all people. This country has been led down that path before, and the result was not a happy one. To continue the reckless spending practices of the past would be irresponsible. The government spent more money in 1979 and 1980 than ever before, and look what it got us. Just last week, the Census reported that American families saw their "real" income fall more than 5 percent in 1980. That sharp drop in "real" median family income was the biggest decline in that category since the government started compiling such statistics in 1947. With all that spending, the number of Americans below the Federal "poverty level" grew from 11.7 percent in 1979 to 13 percent of the population last year. There can be no doubt that we must improve the health of our economy, and that we must change its downward direction. President Reagan has begun to effect that change. In just a little more than half a year, his Administration has taken the steps necessary to face head-on the host of economic problems that have been eroding the productivity and the confidence of our country.

There are the beginnings of some encouraging signs. With bipartisan support, the Congress has passed the President's entire Economic Recovery Program. I believe we have reached a critical stage, perhaps a turning point, in our country's history. We are today embarked on a carefully constructed course to return America to fiscal integrity.

The four points of President Reagan's plan which sets that course are, first, to reduce the rate of growth of Federal spending. This is not a cut in current spending levels, but a cut in the proposed increases. The spending increases of recent years made this budgetary restraint absolutely imperative.

The second point is a tax cut across-the-board for everyone who pays taxes. Just last month the Congress and President Reagan gave the American people an important victory, with a 25 percent tax cut over 33 months.

The third point is the prudent elimination of excessive regulation. Regulations add an estimated $100 billion to the price of things we buy. Unnecessary regulations must be eliminated. Others must be streamlined.

The fourth point is development of a sound monetary policy which is consistent with the economic recovery program and which is geared to stabilize the money supply and revitalize the economy.

I and all of my colleagues in the Cabinet have great confidence in this program. We expect to see it effectively implemented and applied to combat our Nation's economic ills. If we continue to receive bipartisan support and the willing help of the American people, we'll carry out the President's program. As this happens, I'm convinced that we'll begin to see a substantial drop in both inflation and interest rates. I'm not talking about an immediate turn-around. It's taken us since the New Deal to get into this sorry economic condition, so we'll need at least some time to get out. In the meantime, while we're following budgetary and fiscal practices that will help us to escape from prohibitive inflation and interest rates, we're working intensely to do more with less money.

At HUD this means working to get more housing and development assistance at the least cost to the taxpayer. My first months at the Department were devoted almost exclusively to a total budgetary and management efficiency review of how my agency administers the public's money. I'm not willing to recommend continuing or discontinuing programs until I have a pretty fair grasp of what they deliver, who benefits from them, how effective they are, and at what cost. So, initially, I devoted myself to an exhaustive analysis of the Department's functioning. As we all know, the sacrament of baptism varies by religion. Let me assure you, my baptism at HUD was total immersion.

As a result of this intensive review, I made some decisions and recommended to the Congress the direction in which I propose to lead HUD. We will be moving towards more efficient, less costly, and less cumbersome delivery of housing and development assistance to the persons and places most seriously in need of such assistance. We will be moving in this direction with a more rational distribution of responsibility and decision-making. To me, this means increased control at the levels of government closer to the people. That is what the President's "New Federalism" is all about . . . enhanced local and State authority, reinforced with a constructive partnership approach to the delivery of services and problem-solving among the Federal, State and local governments.

I know we need to build better communication between State and local officials and my Department. I've met with and I've been listening to officials such as you all over the country. I'm going to continue listening and gathering all the information and insights from you I can. To further that effort, I reorganized the Department to include a Deputy Under Secretary for Intergovernmental Relations. Dr. June Koch heads that office, and I urge you to work with Dr. Koch and her staff to make certain that we at HUD are addressing your needs and concerns.

In my review of the Department's operation, meetings with local officials were most useful in helping me to determine the relative merits of some programs. For example, I heard virtually unanimous support for Urban Development Action Grants. It was generally well known that private sector funds were leveraged at an average 6-to-1 ratio compared to UDAG funds expended. I wasn't surprised by the level of support for the program, but I was favorably impressed by the substantive data: jobs saved, jobs created and construction jobs involved, for instance. This prompted me to take a more careful look at the UDAG program. Consultation with local leaders, developers and others convinced me that the program was worth continuing, at least for the short term. With the knowledge gained from that consultation and with solid support from the advocates of UDAG, I was successful in urging its retention. I was pleased to help save UDAG for 1982, and I decided to make a study of the program to have a real base of knowledge in determining how effective these grants have been. That report should be ready shortly and will help plan the future of action grants for 1983 and beyond.

I know you're familiar with this program. Many of you have made extensive use of it to strengthen the economy of your communities. The city of York used a $525,000 UDAG award to leverage well over $12 million in private investment. It also brought in excess of 50 new permanent jobs when the grant award helped Edgewater Steel to locate a plant in York, which should reach 85 jobs when the plant becomes fully operational.

With a $980,000 award, Lake City attracted nearly $4 million in private investment by Yarn Industries. That has meant over 80 new permanent jobs to Lake City, which will grow to an estimated 150 jobs created when this industry is fully operational.

And, in Greeneville, a $5.5 million UDAG award will leverage an estimated $24 million in private funds. The Greeneville Commons project will see construction of a parking garage, office building and hotel/convention center which, under current estimates, will translate into 450 new permanent jobs.

In Charleston a recent $1.3 million grant will help the city to build a parking facility, which will enable rehabilitation of the historic Lodge Ally site. This rehab will include condominiums, a small hotel, and rental space for a restaurant and shops. This UDAG award will leverage over $6.7 million in private investment.

Action Grants demonstrate the important role which the private sector must play for the New Federalism to be most effective. To gain greater business and industrial involvement in urban revitalization, we're also exploring Enterprise Zones. HUD has the lead role in an interdepartmental task force that is reviewing the concept, which is of great interest to the Reagan Administration. I expect we'll arrive at some key decisions on Enterprise Zones in the very near future. I believe there should be some incentives from the State and local level, to complement Federal tax and regulatory relief, if we are to encourage business to start new operations in distressed areas. Some States already have moved ahead to offer tax relief incentives for investment in Enterprise Zones.

In addition to exploring opportunities offered by the Enterprise Zone concept, we have another initiative underway that I want to mention. At my request, President Reagan created a Commission to help solve our country's housing problems. The President's Housing Commission is reviewing all existing Federal housing policies and programs and will suggest various options to the President and me. These options will give us guidance on how to deliver decent federally-subsidized housing at less cost. They also will strengthen the ability of the private sector to increase home ownership opportunities and to provide adequate shelter for all Americans.

As I lead HUD in a new direction, some of my priorities address more responsible conduct of our management functions. For instance, in the past, debt collection by HUD has been less than vigorous. Those days are over. If a borrower becomes delinquent on a loan, we'll sue for non-payment, if necessary. When people incur a debt to HUD, I expect them to repay it. The money we've been entrusted with comes from you and your neighbors. As taxpayers, you have a right to expect a responsible accounting for that money, and I intend to see that you get it. We're also cutting back on regulatory burdens. Our objectives are to lessen Federal control of private housing and development activities, as well as the related activities of State and local governments. We're placing strict standards on the development of new regulations, and a "sunset" review of all existing ones.

The actions we've taken on Community Development Block Grants demonstrate our commitment to deregulation. We've eliminated the burdensome targeting requirement. We've eliminated the unnecessary and duplicative displacement strategies, and we've withdrawn the detailed and altogether unnecessary program application requirements. In place of these requirements, communities need submit only a simple statement outlining their community development ojectives and the projected use of the funds. We're finding that we can streamline our operation and simplify the way you do business with HUD. I urge a similar course on State and local governments. Let me tell you why.

HUD was involved in a recent demonstration program which showed that significant housing cost reductions could be achieved by streamlining and up-dating local regulations. Carried out with no Federal funds, the demonstration tested whether single family housing costs could be reduced by using local government regulations as the only variable. The demonstration was concerned only with the effect of zoning ordinances, subdivision regulations and building codes of housing. Local governments permitted minor deviations from their existing regulations without enacting new ordinances. They permitted innovations proposed by the builders, and they expedited processing and review so that construction could start as rapidly as possible. The housing cost reductions realized in this test ranged from $13,000 to $32,500. That's tremendously encouraging. Think of all the families who could find affordable housing with that kind of reduction in housing costs. It just reinforces my conviction that we can reduce the cost of doing business and delivering services at the local level as well as at the Federal level.

The positive results of this demonstration to reduce housing costs bring home an elemental point. The answers to our Nation's problems—whether those problems are economic, housing, urban, rural, whatever—the answers to them are as readily found at the local and State levels, and through the private sector, as they are by the Federal Government. That's one of the driving forces behind President Reagan's New Federalism. We're calling for a sharing of initiative and innovation, as well as a sharing of administration and governance.

We need you support. With your encouragement and insights, we can get our country back on the right economic track.

I'm excited by the opportunity to help make our government and country work better and to regain its leadership role. I am confident that this Administration is embarked on the proper course to achieve those goals.

Thank you.

## PEACE AND JUSTICE IN NORTHERN IRELAND

(Mr. GILMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. GILMAN. Mr. Speaker, Americans have come to realize the importance and critical nature of the situation in Northern Ireland. The recent deaths by hunger strike, the continuing violence in the North of Ireland, and the perpetuation of a volatile situation which has led to the deaths and injuries of thousands call attention to the urgent need for a solution to this tragedy in Ireland.

In my congressional district, the Political Education Committee (PEC) of the Ancient Order of Hibernians has undertaken a major effort of public consciousness raising in order to unify Irish-Americans in securing practical solutions to these monumental problems. One of the areas in which the PEC has been most effective is the area of judicial injustice in Northern Ireland.

I would like to submit for the CONGRESSIONAL RECORD an article which has come to my attention via the AOH Political Education Committee, written by Prof. David Lowry of Pace University. The broad overview which he presents is pertinent to our efforts to find a solution to the Irish problem.

I trust that this enclosure will prove informative to my colleagues and to all Americans who are interested in peace and justice in Northern Ireland:

THE ENGLISH SYSTEM OF JUDICIAL INJUSTICE IN "NORTHERN IRELAND"

(By Prof. David R. Lowry, Pace University School of Law, White Plains, N.Y.)

INTRODUCTION

It has not required the example of English malfeasance or misfeasance in Ireland in the twentieth century, nor even the tragedy of the past decade to convince the student of Irish history, much less the reflective man or woman of Irish blood, of the inherent evil of the English presence in Ireland. For over eight centuries England's imperial purpose in Ireland has been not only the political, economic, religious, and racial subjugation of the Irish but also the genocide of Gaelic culture (indeed England's purpose has been the destruction of all Celtic cultures, i.e., Irish, Scottish, Manx, Welsh, and Cornish, wherever they are found). Nor is England's malefaction without a purpose, for early on did the Anglo-Saxon and Norman imperialists recognize that the unique degree of spirituality and almost mystical devotion to the ideals of individual liberty, tradition and nature among the Celts make them inherently unsuited for passive submission to the materialistic priorities of English rule, or to the English idea of their "place" in the greater scheme of things. The English attitude toward other non-English cultures and races is similar.

The form of England's Celtic/Irish policy has changed over the years, but the substance of cultural genocide remains undiminished even today. To those who understand this it is obvious that, even if every piece of repressive legislation in those six of divided Ulster's nine counties known as "Northern Ireland" were repealed tomorrow, and all prisoners of conscience released from the political prisons and concentration camps, England's continued presence in Ireland could not be tolerated. Yet there are many, both Irish and non-Irish, for whom this is not intuitively obvious. It is for the enlightenment of these, or at least of those among them who are of good will, that we

must examine England's record in contemporary Ireland—not by traditional Irish standards—but according to the criteria and evidence of English and international usages and standards.

Professor David Lowry has lived in "Northern Ireland" and has his Law degree from Queens University, Belfast (1969). He is currently Professor of Law at the Pace University Schoool of Law, White Plains, New York and is a consultant to the Irish National Caucus and to the Political Education Committee of the AOH. His essay, which follows, is a masterful analysis and indictment of the English system of judicial injustice in "Northern Ireland" based not upon Irish or Irish Republican sources, but rather based entirely upon English (including official British Government) and international (e.g., European Court of Human Rights) sources. It must be read by all seeking to understand the nature of the tragic conflict that exists in Ireland today.

A strange wall of silence surrounds the plight of the 400 Irish Republican prisoners, in H-Block, Long Kesh, Northern Ireland. The American media, with a few notable exceptions, has been unable or unwilling to investigate the harrowing tales of suffering of H-Block inmates since the British authorities imposed a "blackout" on all news of H-Block in 1977. This media silence is all the more curious in an era of intensified interest in human rights throughout North America. But it is hardly surprising that Irish-Americans are largely ignorant of the H-Block issue given the lack of understanding of the struggle for human rights in Northern Ireland evident in the American media.

CIVIL RIGHTS

To understand the current violations of human rights in Ireland it is necessary to sketch briefly the political and legal background since 1969. The civil rights movement in 1969 demanded, *inter alia*, an end to religious discrimination against Catholics in housing and employment as well as the abolition of the notorious Special Powers Act of 1922. Catholics have been openly and systematically excluded from participation in virtually all but the lowest occupations in both the public and the private sector. Housing was allocated on the old gerrymandered patronage system. Any outbreak of unrest or dissent by Catholics had always been quickly and ruthlessly suppressed under the Special Powers Act which gave the authorities, *inter alia*, power to hold suspects incommunicado and indefinitely without lawful arrest, charge or trial. Thus, in 1969, the systematized discrimination against Catholics (assumed nationalists) and entrenched Protestants (assumed united empire loyalists) patronage and privilege was enforced by the much feared Royal Ulster Constabulary (RUC), an almost totally Protestant para-military police force, which had a proved capability of operating oppressively with almost unfettered discretion conferred by the Special Powers Act.

The year 1969 was a watershed for northern Ireland. Hitherto opposition to discrimination had occurred (at least once in every decade since 1920) in the form of Irish Republican Army (IRA) guerrilla campaigns focused largely in the rural border areas. In 1969 middle-class urban Catholics and liberal protestants took to the streets in protest against discrimination. A rather leftist-liberal Labor government in London was nonplussed by the protests and the traditional and practiced violence with which the RUC sought to stifle the peaceful protests of otherwise law-abiding citizens.

The Northern Irish Prime Minister was summoned to London and ordered to institute the most elementary reforms to alleviate the glaring abuses of power. However, every time a gesture was made in the direction of the Catholic community pressure from Protestant extremists would intensify to counterbalance the London pressure. A messianic Protestant preacher, the Reverend Ian K. Paisley, instigated and capitalized upon this "Protestant-backlash."

Sadly for the north's Catholics and nationalists a Conservative ("Tory") government was returned to power in London in 1970 and foolishly committed itself to a stance of "law and order first; reform later." After 50 years of intense and complete repression this was hardly likely to assuage the fears of the Catholic minority. One month after the election the Conservatives allowed the British Army and the RUC to "curfew," quite illegally, the Catholic Falls Road ghetto in Belfast for 36 hours while pouring gas and troops into the ghetto.

At this juncture the IRA did not exist as a credible military force or a major political factor in Northern Ireland and this is now conceded by all observers. But now that the British Army had turned from its original "peace-keeping" role to one of aggression the resulting escalation of violence was inevitable. Early in 1971, some eight months after the British Army had taken the offensive, the first British soldier was killed. The IRA had (in January 1970) split asunder between marxists ("Officials") and nationalists ("Provisionals"). While weapons were few there was no shortage of recruits. This time many recruits had tried the peaceful route towards reforms. They had protested and been beaten. They had petitioned London and, ultimately, London had turned its troops on them. But in 1971 the IRA was able to draw from a huge reservoir of young, well-educated urbanized youth who were determined not to be pressured into emigration (to Britain and unable, under the new law, to come to the United States) which had always been the desired goal of the authorities so as to keep the Catholics in a numerical and hence electoral minority.

INTERNMENT

As violence escalated the Northern government inevitably reached for its one trusted weapon in repressing dissent—Internment. In August of 1971 several hundred "suspects" were "lifted." The next three months saw 1400 detained and 900 released after interrogation and various periods of internment. Internment as used in Northern Ireland means that any person can be taken into custody although no evidence of suspicion of any crime is required. Such a person could be held incommunicado and detained in prison indefinitely. As the detainee is never charged with any offense, access to court, due process and civil rights are thereby denied.

Internment was rather like adding a lighted match to gasoline. According to the London Sunday Times the internment option was chosen because the authorities did not want to interfere with the commercial life of Nothern Ireland. Other alternatives such as curfews and block searches were thus summarily rejected. While such a disregard for human freedom and individual liberty is appalling, especially when property rights take precedence, it is interesting to note that this message was not lost on the "Provisional" IRA who, henceforth, set about bombing "economic targets," so-called, with renewed zeal. A zeal which has not yet diminished.

Internment solidified Catholic resistance. It also brought forward support for the IRA from urban areas. More disturbing, however, were the stories of torture, inhuman and degrading treatment which inflamed the Catholic community. Many internees were quickly released because the police had no idea who were members of the IRA and so they "lifted" people somewhat indiscriminately. The stories told by those released were almost incredible. Incessant beatings, attacks by police dogs, forced to run barefoot over broken bottles, hooded and dropped from helicopters and, most chilling of all, systematic use of "white noise" in carefully controlled conditions. Sensory deprivation, formerly the monopoly of the KGB, the Chinese and the North Koreans, had arrived in Ireland. 1971 saw the first documented, proven and, indeed, admitted use of systematic inhuman and degrading treatment. It continues in various forms to this day and there is, as yet, no sign of it abating.

MURDER

Demonstrators peacefully protesting internment were murdered by British Paratroopers in Derry ("Bloody Sunday") in January of 1972. After that event it became clear to all that all avenues of peaceful protest had been closed. Discrimination continued. Indeed Catholics were driven out of "mixed areas" with retaliation in some cases by the IRA. The result was the largest population movement in Europe since World War II as Catholics crowded into the ghettos for protection. While Protestant paramilitaries were moving the population about it is significant that few Catholics relied on the discredited RUC and the British Army for protection. The Special Powers Act and the use of internment and torture totally alienated the regular law enforcement agencies from the Catholic population. At this point very many Catholics turned to the IRA for protection, albeit often with some misgivings.

COUNTERINSURGENCY

Total police alienation from the community made intelligence gathering even more difficult for the British and the RUC. Consequently, from 1972 to today the authorities adopted a "counter-insurgency" policy. This strategy seeks to break the connection between the population and the guerrilla. Its proponent, General Sir Frank Kitson, in his book "Low Intensity Operations," describes fully how it operates. Suffice it to say that torture, inhuman and degrading treatment are integral components of such a strategy. As well as suspected terrorists, totally innocent people must be arrested and made to talk to verify data. It's all very sophisticated and detailed. For example, in 1975 the British were able to boast that nearly 40% of the population had been fed into its computer. No nugget of information is too small; even the color of wallpaper is recorded. The key to understanding this strategy is to understand that the "target population," that is the Catholic ghettos, are alienated and will not willingly inform on a neighbor—especially when such a neighbor would become a potential torture victim.

FAILURE OF BRITISH REFORM

Matters would have proceeded merrily along but for a few factors beyond British control. Firstly, international outrage at internment and torture pressured Britain to

change, at least cosmetically, its repressive laws. Secondly, regardless of placebo reforms the IRA just kept bombing on and on. Thirdly, extremist Protestants showed, through a General Strike in 1974, that they were able and willing to frustrate any compromise which would have guaranteed Catholics a share of power or which, more importantly, tended to diminish entrenched Protestant privilege. The British, fearful of fighting on two fronts, wholly capitulated to the extremist Protestant para-military forces. This capitulation showed to all Protestants and Catholics that men like the UDA or Paisley, as de facto leader of the Protestant extremists, could exercise a negative veto on any reform or peace initiative.

Thus Northern Ireland is at an impasse as the British have foolishly deprived the Protestant majority of any incentive to negotiate an accommodation with moderate Catholics. Moderate Catholics who for years have had nobody to talk to, now have nothing to talk about as Protestant privilege and domination has been guaranteed by the British gift of the negative veto. If, however, the British gave a solemn undertaking to withdraw from Northern Ireland in say 5 years the Protestants would have an incentive to negotiate and, more importantly, some things to negotiate about.

ENGLAND'S ARMY CANNOT WIN

Meanwhile the status quo in the Catholic ghettos remains intolerable. To the British it is the "containment" phase of counter-insurgency whereas to the inhabitants it is dragnet arrests, wrecked homes, tortured confessions and show trials, without due process and long prison terms at the end of it. It is not surprising that a secret British Army intelligence estimate of the IRA (leaked in May of 1979) noted that the IRA can sustain the current level of action through 1983. The report, compiled by the Chief of British Army intelligence for London, notes that the British Army cannot win.

What strengthens the resolve of the IRA and the ghetto community is the ongoing cause celebre of the deprivation of human rights to the inmates of H-Block in Long Kesh. If ever war-weariness shows its face, H-Block immediately counters it. The H-Block tragedy is probably the single most vindictive and barbaric British miscalculation during 11 grizzly years of violence on all sides. The H-Block story reveals in microcosm most that is wrong with British policy in northern Ireland.

HUMAN RIGHTS VIOLATIONS

After the debacle of internment in 1972 the British suffered stiffened resistance in Ireland and intense pressure from abroad. The government of the Irish Republic initiated suit against the British in the European Court of Human Rights. British lawyers did all that they could to delay the case and finally admitted inhuman and degrading treatment of internees. The Court nevertheless continued the hearing after the admission of guilt and found the British guilty in 1978. But delaying tactics had worked to some extent as international opinion and pressure had drifted elsewhere.

COVERUP

Similarly, the British, responding to pressure, established a plethora of judicial inquiries into torture and interrogation techniques. The Report of Sir Edmund Compton was so maladroit in stipulating that (a) sensory deprivation was used to ward off the cold and (b) that suspects couldn't be tortured unless the torturer derived pleasure from inflicting torture, that another Commission of Inquiry had to be impaneled to cover up the cover-up. Lord Parkers' hastily convened inquiry had such narrowly circumscribed terms of reference that some wondered whether it could, in fact, perfect the cover-up. However, Lord Gardiner dissented, filing a minority report in which he noted, inter alia, that the RUC torturers had been specially trained by the British six months prior to internment and that the techniques in question had been developed in Aden, Cyprus, Malaya, Kenya and Palestine by the British. But as he pointed out such torturing was an assault (at least) under British law. Nobody has yet been brought to trial in this regard.

Amnesty International has twice investigated (1972 and 1978) and found evidence of ill treatment. The second report of Amnesty prompted the British to establish yet another inquiry under Judge Bennett. It reported in March of 1979, and although its terms of reference were so narrow that it was boycotted by all impartial civil liberties groups, Bennett too found ill-treatment. Amnesty International had called for a full-scale public inquiry but the British evidently thought that a narrow secret inquiry into a few allegations would diffuse the issue. They were wrong.

TORTURE DOCUMENTED

Immediately prior to Bennett's publication Dr. Irwin, a Police Surgeon, revealed that 150 suspects whom he had recently examined had various injuries sustained in police custody during interrogation and that the injuries were of a nature that they could not possibly have been self-inflicted. Other surgeons then spoke out. Lawyers had, since 1976, noticed a dramatic increase in injuries to their clients when, that is, lawyers were eventually allowed to consult their clients, which is always after interrogation by the RUC.

There can be no doubt that suspects are tortured or treated in an inhuman or degrading manner—even carefully tailored British inquiries admit this. But what is not so readily apparent is the use and significance of these methods and how they relate to the plight of the inmates of H-Block.

After the international public pressure over internment the British responded by modifying the law. The dreaded Special Powers Act was replaced by the Emergency Provisions Act (EPA) and the Prevention of Terrorism Act (PTA). These statutes presaged a new and more subtle approach. Internees under the Special Powers Act were political prisoners. As such they had traditionally been allowed to wear their own clothes not prison uniform, not forced to do prison work and have certain other privileges concomitant with political prisoner status. They lived in wire compounds or "cages" electing their own leader or spokesman and enjoyed relatively free association with other prisoners in their cage. Lord Gardiner's Report in 1975 recommended that this system, which had only been granted in 1972 after a hunger strike, be abolished. As a result special H-Blocks were built. All political prisoners incarcerated for offences which occurred after March 1, 1976 were, henceforth, consigned to H-Blocks. The status of the other inmates remains unaltered.

Under the old legislation the RUC didn't need to gather evidence. Mere suspicion was enough to detain a person indefinitely. Although this system had worked for 50 years it, in the 1970's incurred considerable international opprobrium. Under the new EPA, enacted after yet another judicial inquiry headed by Lord Diplock, there would be an arrest, a charge and a trial. However, if the RUC could not arrest the right people under the Special Powers Act with mere suspicion and unfettered powers, how on earth could the new system (which demanded a trial) possibly work?

NEW INTERNMENT

The EPA created a "new internment" in substance while giving the accused a "trial" in form only. New vague and broad offences were created such as "being concerned with terrorism," which could, conceivably, include within its ambit any thinking human being in northern Ireland. Similarly, the EPA retains the police power to search without a warrant anywhere and take anything as evidence. The new statutes do, however, remove the right to silence and it is now an offense to "withhold evidence"—the exact opposite of the Fifth Amendment protection. Careful scrutiny of these powers of arrest and search and seizure, while having the appearance or form of law, in substance retain all of the old Special Powers Act police powers while adding the "withholding of evidence" offense. However, the EPA and PTA add a public relations gloss by using the imprimatur of law whereas the Special Powers Act was clumsy and passed at a time (1922) of limited international pressure and scrutiny.

When arrested the suspect has no actual rights for up to seven days. Under the EPA and PTA a suspect can be held without charge, incommunicado for up to seven days. During this time the suspect will be interrogated by the specially trained and long experienced tortures of the RUC. Some interrogators are the same people who should according to Lord Gardiner, a British judge, have been prosecuted for assault. The Association for Legal Justice has literally hundreds of sworn statements from victims of RUC interrogation. Many, many more do not complain fearing retribution and harassment from the RUC for both themselves and members of their family.

If the inhuman and degrading interrogation is withstood by the suspect often he or she will be threatened with a "withholding information" charge. Frequently, the RUC, after prolonged softening-up, will simply threaten to "verbal" a suspect. "Verballing" means that an RUC officer will appear in Court alleging that the suspect told him (or verballed him) that he committed the offense. "Verballed" confessions, even from the discredited RUC are enough to convict in northern Ireland. Very many people crack within seven days especially when they believe that they may be framed with a verbal, regardless of their innocence. Fr. Faul and Fr. Murray, Catholic Prison Chaplains have, over the years, cataloged hundreds of cases of suspects pushed beyond endurance into signing confessions or being "verballed." But in Court a confession is good solid evidence and thus unwanted members of society can be sent to H Block with an appearance of law. Again form over substance.

After a suspect is charged under the EPA or PTA he will be remanded in custody for up to two years to await trial. Quite often suspects have been released from custody immediately before trial after spending eighteen months in prison with no real evidence against them. This "internment by remand" is an abuse of legal process but has the appearance of law and does not, prima facie, appear to be internment.

GUILTY UNTIL PROVEN INNOCENT

When a suspect is eventually brought to trial he can, of course, claim that his "confession" was coerced by RUC torture. But in order to eliminate the "confession" the accused must show, firstly that he was, in fact, tortured and secondly, that torture was intended to induce the confession. It is almost impossible for an accused to shift this reverse onus of proof.

Moreover, how can an accused possibly show the state of mind of his torturer? This remarkable provision of the EPA, which has no analogy in any common law or democratic system of justice, is the key component of the new internment system. It is this that ensures that coerced confessions are accepted by the courts while preserving the appearance of a trial. But at a price, for even the appearance of due process of law is jettisoned.

The trial judge sits alone as the EPA abolished the jury system. Northern Irish judges, most of whom are Protestant and present or former members of the Orange Order, almost invariably accept coerced confessions produced after seven days incommunicado in the hands of the RUC. In fact the British Bennett Report in March of 1979 noted that over 93 percent of all cases before these special non-jury courts (known as Diplock courts after their creator) end in conviction. An unprecedented conviction rate. Moreover, Bennett did reveal that over 80 percent of all such convictions are based solely on the evidence of confession. In 80 percent of these cases no other evidence of any sort is adduced.

On conviction for EPA and PTA offences sentences are extremely heavy. After all the judges must protect society from self-confessed criminals. Sentences are then served in the H Blocks of Long Kesh prison. A profile of the average inmate of Long Kesh shows that he is under 20 years of age with no prior convictions and not a hardened criminal or recidivist.

H Block is the end of a conveyer belt—the terminus of the new internment system of law. A system that is in form often unexceptional but which is, in substance, an atrocious and unmitigated mockery of justice.

POLITICAL PRISONERS

When the victims of this system arrive in H Block they meet conditions of indescribable squalor. The prisoners having observed the conveyer belt at close quarters firmly believe that they are political prisoners. They claim that they have not been tried by due process of law and as such they claim to be treated as political prisoners. The British have denied this request for to do so would be to admit that they have merely commenced a more subtle "new internment" process. Such an admission would surely provoke international indignation as did the "old internment."

As a direct consequence of the British refusal to grant political prisoner status the inmates have refused to wear prison uniform for to do so would be symbolically admitting that they are common criminals.

The British response is that they are indeed common criminals, but common criminals do not ride the EPA conveyer belt to H Block. Yet another impasse was reached and a news blackout was imposed by the British on H Block.

Prisoners who refuse prison uniform are denied all privileges. Allegations of beatings by guards have grown considerably but cannot be substantiated as the British have denied access to impartial observers. Only last November Amnesty International were denied access to H Block. However, one man was allowed in some two years ago. Cardinal O'Fiaich on a pastoral visit as Archbishop of Armagh issued a statement after his visit which in pertinent part stated that:

"One would hardly allow an animal to remain in such conditions, let alone a human being. The nearest to it I have seen is the spectacle of hundreds of homeless people living in sewerpipes in the slums of Calcutta. The stench and the filth in some of the cells . . . was almost unbearable. In two of them I was unable to speak for fear of vomiting."

The prisoners' cells are without beds, chair or table. They sleep on mattresses on the floor and in some cases I noticed that these were quite wet. They have no covering except a towel or blanket, no books, newspapers or reading material except the Bible (even religious magazines have been banned since my last visit); no handicrafts, no exercise or recreation. They are locked in their cells for almost the whole of every day. . . .

Some prisoners have now been in these conditions for over 3½ years and many are now deeply concerned regarding the physical and mental health of the inmates.

PERFIDIOUS ALBION

In the middle of the H Block impasse the British government still found time to sign in 1977 the new Red Cross Protocols to the Geneva Convention. These Protocols would, inter alia, mandate that guerrillas be treated as Prisoners of War. Naturally the British have not extended prisoner of war status to the inmates of H Block but the fact that the Protocols were signed is further evidence of the British sensitivity to international opinion and pressure. Furthermore, some of the H Block inmates may actually be guerrillas or terrorists but we will never know for sure as they have been denied due process of law and mere conviction by coerced confession in a Diplock Court is not convincing evidence of anything in particular.

There are many modern definitions of human rights and some would show that Britain is violating anything up to 16 basic tenets of fundamental freedom and liberty with H Block and the EPA conveyor belt. But legalistic interpretations and quibbling are diversions from the very basic appreciation of the fact that all definitions of human rights acknowledge the transcending importance of the dignity of man. I submit that the British and the RUC inhuman and degrading treatment of Irishmen under the EPA and in H Block is a gross affront to any known concept of human dignity.

AMERICAN HELP NEEDED

Perhaps the efforts of the new U.S. based lobby, the Irish National Caucus with the Political Education Committee of the Ancient Order of Hibernians, will not only raise the consciousness of Irish-Americans but all who value human rights. Is it too much to suggest that American public opinion and political pressure be mobilized to engender a respect within the British for Irishmen? Is it too much to expect American Catholics to ask American political leaders to try to intervene to break the impasse in Northern Ireland? If America cannot talk with and criticize its old friend and ally, Britain, then there is little hope for the advancement of human rights in Northern Ireland.●

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

Mr. SAWYER (at the request of Mr. MICHEL), for today, on account of attending the dedication of the Gerald R. Ford Presidential Museum.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. WALKER) to revise and extend his remarks and include extraneous material:)

Mr. MCGRATH, for 30 minutes, today.

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and include extraneous material:)

Mr. HOYER, for 15 minutes, today.

Mr. NELSON, for 5 minutes, today.

Mr. BONER of Tennessee, for 10 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. REUSS, for 10 minutes, today.

Mr. LAFALCE, for 20 minutes, today.

Mr. ROEMER, for 20 minutes, today.

Mr. DASCHLE, for 5 minutes, today.

Mr. FORD of Tennessee, for 5 minutes, today.

Mr. DYMALLY, for 30 minutes, September 21, 1981.

(The following Member (at the request of Mr. MCKINNEY) to revise and extend his remarks and include extraneous material:)

Mr. MCKINNEY, for 20 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SOLOMON, immediately prior to the vote on the Beard amendment in the Committee of the Whole today.

Mr. GILMAN, and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,560.

(The following Members (at the request of Mr. WALKER) and to include extraneous matter:)

Mr. WALKER in two instances.

Mr. LAGOMARSINO in two instances.

Mr. BLILEY.

Mr. BROOMFIELD.

Mr. SHUMWAY in two instances.

Mr. DERWINSKI in two instances.

Mr. KEMP.

Mr. DICKINSON in two instances.

Mr. EVANS of Iowa.

Mr. NAPIER.

Mr. PARRIS.

Mr. SYNAR.

Mr. WYLIE.

Mr. HORTON.
Mr. DANIEL B. CRANE in two instances.
Mr. ASHBROOK in two instances.
Mr. SMITH of New Jersey.
Mr. EDWARDS of Oklahoma.
(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)
Mr. SOLARZ in three instances.
Mr. FORD of Michigan.
Mr. BINGHAM in 10 instances.
Mr. STARK.
Mr. LONG of Maryland.
Mr. FROST in five instances.
Mr. HEFNER.
Mr. SIMON in five instances.
Mr. HEFTEL.
Mr. ROSENTHAL.
Mr. D'AMOURS.
Mr. VENTO in three instances.
Mr. HANCE.
Mr. PANETTA.
Mr. ECKART.
Mr. LONG of Louisiana.
Mr. PEYSER.
Mr. IRELAND.
Mr. MCDONALD in five instances.
Mr. FLORIO.
Mr. VOLKMER.
Mr. ERTEL.
Mr. PEASE.
Ms. MIKULSKI.
Mr. HUBBARD.
Mr. FASCELL in two instances.
Mr. DASCHLE.
Mr. DOWNEY.
Mr. HAWKINS.
Mr. WILLIAMS of Ohio.
Mr. GRAMM.
Mr. FAUNTROY.

## SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 105. Joint resolution to designate October 1981 as "National P.T.A. Membership Month"; to the Committee on Post Office and Civil Service.

## ADJOURNMENT

Mr. DASCHLE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 11 minutes p.m.), the House adjourned until tomorrow, Friday, September 18, 1981, at 10 a.m.

## EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees, and delegations traveling under an authorization from the Speaker, concerning the foreign currencies and U.S. dollars utilized by them during the second quarter of calendar year 1981 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON ARMED SERVICES, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1, AND JUNE 30, 1981

| Name of member or employee | Date | | Country | Per diem [1] | | Transportation | | Other purposes | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Arrival | Departure | | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] |
| DELEGATION TO PARIS AIR SHOW AND NORTH ATLANTIC ASSEMBLY, MAY 21-JUNE 10, 1981 | | | | | | | | | | | |
| Local delegation expenses | 5/31 | 6/1 | Hungary | | | | 1,291.62 | | 1,383.03 | | 2,674.65 |
| Committee total | | | | | | | 1,291.62 | | 1,383.03 | | 2,674.65 |

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.

MELVIN PRICE, Chairman.
August 24, 1981.

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON ENERGY AND COMMERCE, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND JUNE 30, 1981

| Name of member or employee | Date | | Country | Per diem [1] | | Transportation | | Other purposes | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Arrival | Departure | | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] |
| Finnegan, David | 6/1 | 6/3 | Canada | | 225.00 | | 228.93 | | | | 453.93 |
| Howard, Robert | 6/1 | 6/3 | do | | 225.00 | | 228.93 | | | | 453.93 |
| Shwayder, Patti | 6/1 | 6/3 | do | | 225.00 | | 228.93 | | | | 453.93 |
| Ritter, Don | 4/16 | 4/19 | Pakistan | | 228.00 | | 2,148.00 | | | | 2,376.00 |
| Dingell, John D. | 4/8 | 4/13 | France | | 588.00 | | 2,371.50 | | | | 2,959.50 |
| | 4/14 | 4/18 | Austria | | 416.00 | | | | | | 416.00 |
| Collins, Cardiss | 4/8 | 4/13 | France | | 588.00 | | 2,371.50 | | | | 2,959,50 |
| | 4/14 | 4/18 | Austria | | 520.00 | | | | | | 520.00 |
| Moorehead, Carlos | 4/8 | 4/13 | France | | 588.00 | | 2,371.50 | | | | 2,959.50 |
| | 4/14 | 4/18 | Austria | | 520.00 | | | | | | 520.00 |
| Shelby, Richard | 4/8 | 4/13 | France | | 588.00 | | 2,371.50 | | | | 2,959.50 |
| | 4/14 | 4/18 | Austria | | 520.00 | | | | | | 520.00 |

TRENT LOTT, Member.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2190. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance of the laundry and dry cleaning activity at Fort Indiantown Gap, Pa., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2191. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Tunisia (Transmittal No. 81-41), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2192. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to the United Arab Emirates (Transmittal No. 81-85), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2193. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-77, "To expand investment opportunities of businesses operating in the District of Columbia; to promote economic development; and for other purposes," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2194. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to Tunisia (Transmittal No. 81-41), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2195. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to the United Arab Emirates (Transmittal No. 81-85), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2196. A letter from the Acting Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during August 1981, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

2197. A letter from the Acting Comptroller General of the United States, transmitting the audit of the accounts of the Senate Building Beauty Shop for the year ended February 28, 1981, pursuant to section 451 of the Legislative Reorganization Act of 1970 (AFMD-81-79, August 6, 1981); to the Committee on Government Operations.

2198. A letter from the Acting Comptroller General of the United States, transmitting the annual report on progress in improving program and budget information for congressional use, pursuant to section 202(e) of the Legislative Reorganization Act of 1970 (PAD-81-88, September 1, 1981); to the Committee on Government Operations.

2199. A letter from the Acting Secretary of the Interior, transmitting notice of the proposed refund of $572,796.20 in excess oil royalties to Shell Oil Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953, as amended; to the Committee on Interior and Insular Affairs.

2200. A letter from the Chairman, U.S. Metric Board, transmitting a report on the effects of metric change on workers' tools and training, pursuant to section 6(9) of Public Law 94-168; to the Committee on Science and Technology.

2201. A letter from the Acting Comptroller General of the United States, transmitting a report on the use of exemplary education programs for disadvantaged children (HRD-81-65, September 15, 1981); jointly, to the Committees on Government Operations and Education and Labor.

2202. A letter from the Acting Comptroller General of the United States, transmitting a report on major income security and social services issues (HRD-81-104, August 13, 1981); jointly, to the Committees on Government Operations, Education and Labor, Energy and Commerce, Veterans' Affairs, and Ways and Means.

2203. A letter from the Acting Comptroller General of the United States, transmitting the audit of the accounts of the Majority Printing Clerk, U.S. House of Representatives, for the year ended August 31, 1980, pursuant to section 451 of the Legislative Reorganization Act of 1970 (AFMD-81-75, August 24, 1981); jointly, to the Committees on Government Operations and House Administration.

2204. A letter from the Acting Comptroller General of the United States, transmit-

ting the audit of the accounts of the Minority Printing Clerk, U.S. House of Representatives, for the year ended September 30, 1980, pursuant to section 451 of the Legislative Reorganization Act of 1970 (AFMD-81-80, August 24, 1981); jointly, to the Committees on Government Operations and House Administration.

2205. A letter from the Acting Comptroller General of the United States, transmitting a report on taxation of life insurance companies (PAD-81-1, September 17, 1981); jointly, to the Committees on Government Operations and Ways and Means.

2206. A letter from the Secretary of Energy, transmitting a report on low-level radioactive waste disposal, pursuant to section 4(b) of Public Law 96-573; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mrs. CHISHOLM: Committee on Rules. House Resolution 222. Resolution providing for the consideration of H.R. 3112, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional ten years, to extend certain other provisions for an additional seven years, and for other purposes (Rept. No. 97-229). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 223. Resolution providing for the consideration of H.R. 4, a bill to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying certain United States intelligence officers, agents, informants, and sources (Rept. No. 97-230). Referred to the House Calendar.

Mr. BONIOR: Committee on Rules. House Resolution 224. Resolution providing for the consideration of H.R. 3210, a bill to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes (Rept. No. 97-231). Referred to the House Calendar.

Mr. DERRICK: Committee on Rules. House Resolution 225. Resolution providing for the consideration of H.R. 3377, a bill authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes (Rept. No. 97-232). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H. Con. Res. 179. Concurrent resolution making apportionment of funds for the National System of Interstate and Defense Highways for the fiscal year 1983; (Rept. No. 97-233). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4284. A bill to name the lock authorized as a replacement for Vermilion Lock, Louisiana, as "Leland Bowman Lock"; (Rept. No. 97-234). Referred to the House Calendar.

Mr. DIXON: Committee on Appropriations. H.R. 4522. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes; (Rept. No. 97-235). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANNUNZIO (for himself, Mr. FARY, Mr. FINDLEY, and Mr. YOUNG of Missouri):

H.R. 4506. A bill to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam"; to the Committee on Public Works and Transportation.

By Mr. DOWNEY:

H.R. 4507. A bill to delay the application of Revenue Ruling 81-216 until January 1, 1983; to the Committee on Ways and Means.

By Mr. EMERSON:

H.R. 4508. A bill to modify the flood control project for the Lower Mississippi River to authorize construction of the St. Johns Bayou and New Madrid Floodway, Mo., project; to the Committee on Public Works and Transportation.

By Mr. GRAMM (for himself, Mr. BROWN of Ohio, Mr. SHELBY, Mr. DANNEMEYER, Mr. RITTER, Mr. BENEDICT, Mr. BLILEY, Mr. LENT, Mr. COLLINS of Texas, Mr. SAM B. HALL, JR., Mr. LOTT, Mr. STUMP, Mrs. HOLT, Mr. MONTGOMERY, Mr. MARTIN of North Carolina, Mr. DAN DANIEL, Mr. MOORE, Mr. WATKINS, Mr. PAUL, Mrs. BOUQUARD, Mr. FORSYTHE, Mr. STENHOLM, Mr. BAILEY of Pennsylvania, Mr. WILSON, Mr. LEWIS, Mr. BEDELL, Mr. WINN, Mr. MCDONALD, Mr. BADHAM, and Mr. GRISHAM):

H.R. 4509. A bill to reform regulatory procedures relating to safe drinking water requirements, and for other purposes; to the Committee on Energy and Commerce.

By Mr. EVANS of Iowa (for himself, Mr. NAPIER, Mr. ROBERTS of Kansas, Mr. STANGELAND, Mr. SKEEN, Mr. EMERSON, Mr. GUNDERSON, Mr. TAUKE, Mr. ROBERTS of South Dakota, and Mr. LEACH of Iowa):

H.R. 4510. A bill to amend the Export-Import Bank Act of 1945 to provide for the extension of credit for agricultural commodities; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FRANK:

H.R. 4511. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income a certain portion of governmental pensions based on services not covered under the social security system; to the Committee on Ways and Means.

H.R. 4512. A bill to amend the Communications Act of 1934 to provide that persons shall be eligible to be licensed as broadcasting station operators under such act regardless of whether they are citizens or nationals of the United States; to the Committee on Energy and Commerce.

By Mr. HUGHES (for himself, Mr. SAWYER, Mr. KASTENMEIER, Mr. CONYERS, and Mr. FISH):

H.R. 4513. A bill to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated; to the Committee on the Judiciary.

By Mr. RODINO (by request):

H.R. 4514. A bill to amend the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mr. ST GERMAIN (for himself, Mr. GONZALEZ, and Mr. STANTON of Ohio):

H.R. 4515. A bill to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SCHUMER:

H.R. 4516. A bill to amend the Internal Revenue Code of 1954 to provide that taxable unemployment compensation will be treated as wages for purposes of the limitation on the deduction for individual retirement savings; to the Committee on Ways and Means.

H.R. 4517. A bill to amend the Internal Revenue Code of 1954 to increase the income level applicable to joint returns at which unemployment compensation becomes taxable; to the Committee on Ways and Means.

By Mr. SHUMWAY:

H.R. 4518. A bill to exempt certain matters relating to the Central Intelligence Agency from the disclosure requirements of title 5, United States Code; jointly, to the Committees on Government Operations and the Permanent Select Committee on Intelligence.

By Mr. SNYDER (for himself, Mr. TRIBLE, and Mrs. BOGGS):

H.R. 4519. A bill to promote orderly and efficient ocean transportation of dry bulk commodities in the foreign commerce of the United States and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries and Rules.

By Mr. WEAVER:

H.R. 4520. A bill to repeal Federal provisions of law establishing agricultural programs concerning the marketing of and price support for tobacco; to prohibit compacts among States for regulating tobacco production and commerce; to amend the Tobacco Inspection Act and the United States Warehouse Act to provide for the assessment of certain fees to cover the costs of inspection, licensing, and other activities carried out under those Acts; and to amend the Internal Revenue Code of 1954 to increase the tax on cigars and cigarettes; jointly, to the Committees on Agriculture and Ways and Means.

By Mr. DIXON:

H.R. 4522. A bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenue of said District for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

By Mr. BINGHAM (for himself and Mr. DERWINSKI):

H.J. Res. 331. Joint resolution designating the fourth Sunday in October as National Mother-in-Law Day; to the Committee on Post Office and Civil Service.

By Mr. PANETTA (for himself and Mr. CONABLE):

H.J. Res. 332. Joint resolution to designate the week beginning October 4, 1981, as "National Home Health Care Week"; to the Committee on Post Office and Civil Service.

By Mr. GRAY:

H. Con. Res. 183. Concurrent resolution expressing the sense of the Congress that the national rugby team of South Africa

should not play in the United States; to the Committee on Foreign Affairs.

By Mr. DASCHLE:

H. Con. Res. 184. Concurrent resolution opposing any delay in scheduled cost-of-living adjustments for social security and veterans' pension recipients without a corresponding and equal deferral of or delay in the effective date of the windfall profit tax provisions and individual income tax reduction provisions for taxpayers with an annual adjusted gross income of $50,000 or more contained in the Economic Recovery Tax Act of 1981; jointly, to the Committees on Ways and Means and Veterans' Affairs.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MARRIOTT:

H.R. 4521. A bill to extend the lease terms of Federal oil and gas leases, W 66245, W 66246, W 66247, and W 62250; to the Committee on Interior and Insular Affairs.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 27: Mr. ADDABBO, Mr. FARY, Mr. HAMILTON, Mr. HOPKINS, Mr. NAPIER, Mr. SILJANDER, and Mr. TAUZIN.

H.R. 767: Mr. FLORIO, Mr. OBERSTAR, and Mr. YOUNG of Alaska.

H.R. 768: Mr. CHENEY, Mr. CHAPPIE, Mr. STATON of West Virginia, Mr. DONNELLY, Ms. OAKAR, and Mr. ATKINSON.

H.R. 1290: Mr. RITTER.

H.R. 1937: Mr. MCKINNEY, Mrs. BYRON, Mr. COURTER, Mr. FOWLER, Mr. BROYHILL, Mr. YOUNG of Missouri, Mrs. HECKLER, Mr. FORSYTHE, Mr. GREEN, and Mr. BADHAM.

H.R. 2052: Mr. JEFFORDS.

H.R. 2445: Mr. HANSEN of Utah.

H.R. 2488: Ms. FIEDLER and Mr. MCEWEN.

H.R. 3083: Mr. HANSEN of Utah.

H. Res. 219: Mr. KASTENMEIER, Mr. HANSEN of Utah, Mr. MCHUGH, and Mr. FRANK.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3603

By Mr. PETRI:

—Page 222, after line 25, add the following new title (and conform the table of contents accordingly):

TITLE XVII—REPEAL OF PROGRAMS CONCERNING PRICE SUPPORT FOR AND THE MARKETING OF TOBACCO

SEC. 1701. (a) Section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) is amended—

(1) in subsection (a) by striking out "tobacco (except as otherwise provided herein), corn," and inserting in lieu thereof "corn"; and

(2) in subsection (d)(3) by striking out ", except tobacco," and all that follows the first semicolon.

(b) Sections 101(c) and 106 of the Agricultural Act of 1949 (7 U.S.C. 1441(c) and 1445) are repealed.

(c) Section 408(c) of the Agricultural Act of 1949 (7 U.S.C. 1428(c)) is amended by striking out "tobacco,".

SEC. 1702. (a) Section 301(b) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1301(b)) is amended—

(1) by striking out "tobacco," in paragraph (6)(A);

(2) by striking out the following in paragraph (7):

"Tobacco (flue-cured), July 1–June 30;

"Tobacco (other than flue-cured), October 1–September 30;";

(3) by striking out "and tobacco" in paragraph (11)(B); and

(4) by striking out "tobacco," in paragraph (12).

(b) Section 303 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1303) is amended by striking out "rice, or tobacco," and inserting in lieu thereof "or rice,".

(c) Section 361 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1361) is amended by striking out "tobacco,".

(d) The first sentence of subsection (a) and the first sentence of subsection (b) of section 371 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1371) are amended by striking out "peanuts, or tobacco" in each sentence and inserting in lieu thereof "or peanuts".

(e) Section 373 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1373) is amended—

(1) by striking out "peanuts, or tobacco, and" in subsection (a) and inserting in lieu thereof "or peanuts, and";

(2) by striking out "peanuts, or tobacco from" in subsection (a) and inserting in lieu thereof "or peanuts from";

(3) by striking out "all persons engaged in the business of redrying, prizing, or steming tobacco for producers," in subsection (a);

(4) by striking out "$500;" and all that follows in the last sentence of subsection (a) and inserting in lieu thereof "$500."; and

(5) by striking out "peanuts, or tobacco" in subsection (b) and inserting in lieu thereof "or peanuts".

(f) Section 375(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1375(a)) is amended by striking out "peanuts, or tobacco" and inserting in lieu thereof "or peanuts".

(g) The following provisions of the Agricultural Adjustment Act of 1938 are repealed:

(1) section 301(b)(3)(C);

(2) section 301(b)(10)(B);

(3) section 301(b)(14)(B);

(4) section 301(b)(15);

(5) section 301(b)(16)(B);

(6) section 311 through 314 and 316 through 320; and

(7) section 378(f).

(h) Section 2 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1282) is amended by striking out "tobacco,".

SEC. 1703. The following provisions of law are repealed:

(1) the Act entitled "An Act relating to burley tobacco farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended", approved July 12, 1952 (7 U.S.C. 1315);

(2) section 703 of the Food and Agriculture Act of 1965 (7 U.S.C. 1316); and

(3) section 4 of the Act entitled "An Act to amend the Agricultural Adjustment Act of 1938, as amended, to provide for acreage-poundage marketing quotas for tobacco, to

amend the tobacco price support provisions of the Agricultural Act of 1949, as amended, and for other purposes", approved April 16, 1965 (7 U.S.C. 1314c note).

SEC. 1704. The first sentence of section 402 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1732) is amended by striking out "and for the purposes of title II of this Act," and inserting in lieu thereof "or".

SEC. 1705. Section 5 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c) is amended by adding the following undesignated paragraph at the end thereof:

"Notwithstanding any other provision of law, the Corporation may not exercise any of the powers specified in this section or in any other provision of this Act with respect to tobacco.".

SEC. 1706. Section 8c of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 608c) is amended—

(1) by striking out "tobacco" in subsection (2)(A);

(2) by inserting "tobacco," after "(except honey," in subsection (2)(B); and

(3) by adding the following new sentence at the end of subsection (2): "Notwithstanding any other provision of law, no order concerning tobacco may be issued or enforced under this Act.".

SEC. 1707. The amendments made by this title shall apply to the 1982 and subsequent crops of tobacco.

# SENATE—*Thursday, September 17, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

## PRAYER

The Reverend William J. Viel, Jr., pastor, Forestville Baptist Church, Forestville, Md., offered the following prayer:

Would you pray with me, please.

Our Father, we come before the throne of grace today, in the name of Jesus, and so may it be that as the heart panteth after the water brooks, so panteth my soul after Thee, O God. God, may that be true of each gathered in this time of prayer—our thirst for Thee a great thirst.

We know without Thee we can do nothing. So, guide these Senators in today's obligations and through a deep faith in Almighty God may they say, "I can do all things through Christ, who gives me strength." Grant them Godly wisdom that they might see clearly what Your plan is for our country and its people.

These Senators need Your power which comes through prayer—they have great problems to solve, issues to decide and they need to do Thy will.

Give these chosen officials a heart burdened for the world and a challenge to see that this land is free to experience a great faith in God.

Grant these servants inner peace for untroubled hearts today. This we ask in Jesus' name. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

## THE JOURNAL

Mr. HELMS. Good morning, Mr. President and thank you for recognizing me.

I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF BUSINESS

Mr. HELMS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. HELMS. Is the acting majority leader correct in his understanding that Senator BAKER was accorded 10 minutes of time?

The PRESIDENT pro tempore. The Senator is correct.

## ORDER TRANSFERRING SENATOR BAKER'S TIME TO SENATOR THURMOND

Mr. HELMS. Mr. President, I ask unanimous consent that that time be transferred to the distinguished occupant of the chair, Mr. THURMOND.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MURKOWSKI). The clerk will please call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## S. 1630—THE CRIMINAL CODE REFORM ACT OF 1981

Mr. THURMOND. Mr. President, I am introducing today a bill that hopefully will culminate in a successful conclusion to our efforts to revise and reform our Federal criminal laws.

First, I wish to express my appreciation to members of the Committee on the Judiciary—Senators BIDEN, HATCH, DENTON, DECONCINI, DOLE, EAST, KENNEDY, LAXALT, SIMPSON, and SPECTER for joining me. This is a joint bipartisan endeavor to modernize and systematize a hodgepodge of criminal statutes enacted in a random fashion over the almost 200-year history of this Nation.

I am particularly pleased to have Senator BIDEN, as the ranking minority member of the committee, and Senator KENNEDY, as a longtime leader in criminal law reform, join with me in this historic task.

I also welcome and appreciate the assistance, support, and encouragement of the administration and Attorney General Smith as we proceed.

Mr. President, those familiar with the road we reembark upon today with this legislation may be reminded of the persistence of Moses and the patience of Job. The task of Criminal Code reform has a long history. In 1966, the Congress created the National Commission on Reform of Federal Criminal Laws to study the need for a major legislative overhaul of the Federal substantive criminal laws. The Commission submitted in 1971 a final report to the Congress constituting its recommendations—in the form of a draft code—as a working basis for a new Federal Criminal Code.

During the next 7 years, extensive hearings and debate occurred in the Senate Committee on the Judiciary on various bills and issues. The hearings alone now stand at almost 12,000 pages of testimony, comments, and information.

While there has always been general agreement as to the need for a new code, a number of controversial issues slowed progress until, through a process of compromise, there emerged a broadly supported bipartisan Criminal Code bill (S. 1437) that passed the Senate on January 30, 1978, by a vote of 72 to 15; however, the House failed to act on a bill reported by the House Judiciary Criminal Justice Subcommittee.

A similar bill with improvements (S. 1722) was introduced in the 96th Congress, with administration and bipartisan support; and, after committee hearings and consideration, was reported to the Senate on January 17, 1980, by a vote of 14 to 1. The House Committee on the Judiciary reported a bill of similar scope on September 25, 1980. Primarily due to the election year rush of events, neither the Senate nor the House took up their respective bills for consideration on the floor.

Mr. President, it might be helpful for me to share with my colleagues a few points about this monumental bill.

First, as I have noted, the committee has had this legislation before it for a decade. The bill has been improved upon in a slow, but evolutionary process. Over the years, each and every provision of this measure has been subjected to intense scrutiny by law professors, prosecutors, defense attorneys, the American Civil Liberties Union, business groups, and every other special interest group that believes it may be affected by enactment of this legislation. The committee has heard from hundreds of witnesses and hours of time, by both staff and Senators, have been devoted to the bill. This is not a hastily drawn or ill-conceived piece of legislation.

Second, this bill, as were its predecessors S. 1437 and S. 1722, is a careful balance between liberal and conservative points of view. I have made it clear throughout consideration of this measure that there are certain changes that I believe would improve the bill from my perspective. I know Senators BIDEN and KENNEDY feel there may be provisions in the bill that could be improved from their perspectives.

Most of the other cosponsors have similar views. However, there is only one way to achieve enactment of this kind of reform measure: That is to set certain differences aside in a sense of bipartisanship and common purpose. In my opinion, this bill achieves that end.

Finally, no amount of tinkering will ever produce a perfect code of criminal laws that will please all persons at all times. We do not have the luxury of reaching nice, safe compromises, such as splitting the difference on the amount of an item in an appropriations bill.

In considering the criminal code reform bill, Members of Congress are tak-

ing definite stands on the issues. Certain conduct is to be punished as criminal in nature, while other conduct is not. Those are difficult lines to draw. But one important point is that not many new lines are being drawn in this measure. A substantial portion of this bill, perhaps 80 to 90 percent, is simply a consolidation and organizational rewrite of present law.

Mr. President, for the most part, current Federal law is being retained intact. A few provisions of this bill are new to Federal law and have been the focus of considerable debate and controversy.

There are new terms and new expressions—actually a consolidation of terms and expressions—but, if analyzed closely, this bill is primarily a restatement of current Federal law. The bill is written in a new, simple, compact format, designed to be easily understood by both the legal and lay communities.

Moreover, whenever an issue has become too controversial to be resolved, it has generally been dropped from the bill.

For example, changes in current law to reinstate the death penalty is viewed to be too controversial an issue to include in the code reform legislation.

Thus, by mutual agreement it has been dropped from the bill and is being considered separately. This has been done with a number of issues thought to be too controversial to bring up in the context of the overall reform bill.

This has worked successfully in the past, and I trust it will allow us to reach final agreement on this legislation this Congress.

Mr. President, rather than spend an extended amount of time today discussing the more important reasons for this bill and its major provisions, I have prepared an information paper designed to systematically introduce interested persons to the long history of this effort, to the reasons for continued persistence toward achieving enactment of this landmark legislation, and to the basic provisions of the bill. I ask unanimous consent that this material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE CRIMINAL CODE REFORM ACT OF 1981
(S. 1630)

I. Introduction:

The American criminal justice system is seriously in need of reform. Of the distressingly high number of crimes that plague our nation, only two to five percent result in the offender's being convicted and sentenced for his criminal conduct. It would be prohibitively costly, both from a monetary standpoint and from the standpoint of fostering an oppressive level of law enforcement, to attempt to investigate and prosecute anything close to all criminal offenses that are committed. Any solution to our crime problem, therefore, must place a heavy reliance upon the deterrance of criminal activity. But to deter, the criminal laws and the criminal justice process must be, and must be publicly perceived to be, sensible, certain, effective, and impartial. We do not have the reality or the perception of these qualities when the laws themselves are confusing and complex, when important legal consequences turn on accidents in legislative drafting, and when similarly situated defendants committing like offenses receive widely disparate sentences.

The simple fact is that the laws themselves must be reformed before any major improvements can be made in the effectiveness of the criminal justice system.

A significant effort is now underway to reform the Federal criminal laws—laws that should be rational and clear in themselves, that should sensibly supplement State criminal laws, and that should provide a model for State consideration. The effort is the product of fifteen years' work, beginning with the creation of the National Commission on Reform of the Federal Criminal Laws in 1966. It is now in its final stage. It has been strongly supported by every Administration—Republican and Democratic—throughout the period of its development, and has received the endorsement of the legal and the law enforcement communities.

The product of that effort is S. 1630—a proposed Federal Criminal Code. The proposed new Code is monumental. It is monumental not only in size (S. 1630 contains over 450 pages, with well over 13,000 printed pages of supporting legislative history), but, more significantly, in its potential effect. It brings an unprecedented degree of clarity and certainty to the Federal criminal law that, among other advantages, should result in judicial economies that will permit the processing of a greater number of offenders, and it contains hundreds of specific improvements in the current penal and procedural statutes. A criminal law effort of this scope is unprecedented in the nation's history, and it offers a dramatic opportunity to increase the effectiveness of the nation's response to crime.

II. Deficiencies in the Current Federal Criminal Laws:

It is generally agreed by those familiar with the existing Federal criminal laws that they are seriously in need of revision. Certainly today the Nation does not have a Federal criminal code in the true sense of the term, but has instead a jumble of piecemeal legislative efforts that have been enacted sporadically over the last two hundred years. While many of the current statutes are useful in meeting contemporary needs, many others are not. Some are merely quaint remnants of other eras (such as the offenses of committing piracy for a foreign prince, detaining a government carrier pigeon, and seducing a female passenger on a steamship). Others are outmoded in more serious respects, some being unenforceable either because of inadequate drafting or court construction (for example, the statute prohibiting convicted felons from possessing firearms has been construed by the courts to require proof that the firearms had been moving in interstate commerce—a restriction the Congress had not intended). Even those statutes that have utility are in many respects overlapping and inconsistent (for example, there exist today dozens of theft offenses, several of which may apply to a single criminal act, each defining theft in a different fashion and often prescribing different penalties). Moreover, there are serious gaps in the coverage of the Federal criminal laws (for example, while there is a Federal statute covering bank robbery, there exists today no statute directed to extortion of monies from a bank). Even finding the law is a problem. Some areas of law in which there appear to be gaps, such as aircraft hijacking and espionage involving atomic weapons, actually are covered in obscure parts of the regulatory provisions of the Federal statutes (conversely, some essentially regulatory provisions, such as the prohibition against using the likeness of "Smokey Bear," appear in the midst of penal statutes covering such serious crimes as murder, kidnapping, and rape.) Other criminal law provisions are hard to find simply because they do not exist in statutory form; several areas of the law, such as the principles governing the criminal liability of corporations, have been left entirely to development by judges through case-by-case decisions—a process that has made standardized, consistent application almost impossible. In addition, even where the penal law does appear in statutory form, widely differing terms are used to describe a defendant's intent or other state of mind that must be found to coexist with his criminal action (79 different and undefined terms, such as "maliciously," "improperly," and "feloniously," are used in the principal penal title alone). Finally, the periods of imprisonment and fine levels authorized for current offenses bear little relationship to each other and a questionable connection with what would appear to be a fair penalty under all the circumstances; in fact, the whole sentencing process, which today may result in widely disparate sentences for essentially similar conduct, is seriously in need of reform.

As suggested by this brief overview, the current Federal criminal law is not only characterized by innumerable specific deficiencies, but as a whole it is haphazard, complex, and permeated with major impediments to general effectiveness and fairness. In the processing of criminal cases, a considerable amount of the time of judges, prosecutors, and defense counsel is wasted in resolving arguments designed to clarify or exploit the statutory confusion—a waste that our overburdened criminal justice system can ill afford. Moreover, even when individual cases are successfully prosecuted, the haphazard sentencing process commonly robs the effort of whatever deterrent effect it may be capable of producing, and appellate decisions providing useful statutory interpretations are lost as precedents in interpreting the numerous similar statutes based on slightly different jurisdictional considerations.

If the Federal criminal laws are ever to be more effective, they must be simplified and modernized.

III. The Background of the Effort to Reform the Federal Criminal Code:

In recognition of the difficulties with the current Federal criminal laws, Congress in 1966 established the National Commission on Reform of Federal Criminal Laws. The Commission worked for three and one-half years, and in January of 1971 submitted to the President and the Congress a Final Report which it termed a "work-basis" for a new Federal criminal code. The draft produced by the Commission was patterned upon the Model Penal Code, the basis of most State law reform efforts, with necessary modifications to adapt it to the more limited focus of Federal law enforcement responsibilities. It formed a sound basis for the subsequent work in developing a new code.

During the following 11-year period, several versions of a new Federal criminal code were introduced both in the Senate and in the House of Representatives. Exhaustive hearings were held by the Judiciary Committees, thousands of pages of testimony were taken, and views—spanning the ideological spectrum and addressing virtually every facet of criminal law and procedure—were presented by practicing lawyers; law professors; government officials, including Federal and State Attorneys General, judges, prosecutors, investigators, prison officials, probation officials, and pretrial service agency representatives; criminologists, penologists, and sociologists; psychiatrists and psychologists; and representatives of bar associations, defense organizations, business associations, unions, civil liberties groups, vic-

tim organizations, and church groups; among many others.

In the 93rd and 94th Congresses, while there was general agreement as to the need for a new code, none of the bills introduced was able to command the widespread support necessary for enactment. In fact, the principal bill introduced in the 94th Congress, S. 1, proved to be particularly divisive because of several provisions which became highly controversial. Supporters of criminal law reform became concerned that the controversy attending S. 1 might seriously jeopardize the codification effort as a whole.

Early in the 95th Congress, an agreement was reached among several interested members of the Senate and House Judiciary Committees and senior officials of the Department of Justice that the importance of a new Federal criminal code warranted a serious attempt to develop a commonly acceptable version. A resolution was made, first, to seek to draft a new bill that would avoid seriously controversial points, reform the law where all parties could agree upon such reform, and compromise on the current substance of the law in areas where change could not be agreed upon, and second, to proceed to commit the resources necessary for the bill's careful processing and enactment. It was understood that particular criminal code proposals that might result in protracted disputes should be put aside until passage of the bill, and then be introduced separately and given the individual Congressional attention they deserve. This agreement formed the basis for all subsequent codification efforts.

Later in the 95th Congress, a compromise proposal for a new Federal criminal code was introduced in the Senate by Senators McClellan and Kennedy (later joined by Senators Hubert Humphrey, Thurmond, and Hatch as co-sponsors) as S. 1437, and introduced in the House of Representatives by Congressman Rodino as H.R. 6869. It received immediate acclaim. Attorney General Bell announced that it had his strong personal support and the support of the Administration. Lead editorials in the Washington Post, the New York Times, the Boston Globe, and U.S. News and World Report, among others, called for its passage, using such terms as "[an] indisputably monumental achievement"; "legislation of great stature and importance—truly of landmark quality"; "ready to become the most remarkable achievement of this Congress"; "a product of masterly legislative compromise"; "wholly laudable legislation"; "politically realistic"; "an unprecedented opportunity"; "truly laudable reforms"; and "long overdue." In January of 1978 the Senate passed S. 1437 by a vote of 72 to 15. The 95th Congress ended, however, without similar action on a code bill in the House.

In the 96th Congress, in the Senate, an improved criminal code bill was introduced by Senators Kennedy, Thurmond, Hatch, DeConcini, and Simpson as S. 1722, and the Senate Judiciary Committee favorably reported the bill by a vote of 14 to 1. In the House of Representatives, the Subcommittee on Criminal Justice under the leadership of Congressman Drinan, held numerous hearings on criminal law codification and engaged in many protracted drafting sessions. As a product of those sessions, Congressmen Drinan, Kindness, and Sawyer introduced a proposed Federal criminal code as H.R. 6233. Thereafter, a revised version, designated H.R. 6915, was sponsored by Congressmen Drinan, Hall, Kindness, Sawyer, and Lungren. The latter bill, with the aid of Congressmen Rodino and McClory, was favorably reported by the House Judiciary Committee. Both the Senate and the House bills were tentatively slated for floor action in the post-election session of the 96th Congress, but the session expired before they could be brought up for passage.

In the current Congress, with the Judiciary Committees able to build upon the extensive work completed in the past Congresses, it appears for the first time that both Houses are in a position to process a criminal code sufficiently early to assure enactment. The Senate bill, S. 1630, introduced by Senator Thurmond on September 17, 1981, with broad bipartisan support is cosponsored by Senators Biden, Hatch, Kennedy, Denton, DeConcini, Dole, East, Laxalt, Simpson, and Specter. Attorney General Smith has announced that the new Administration is "actively and enthusiastically supporting passage", and has stated that the bill "represents the most significant series of law enforcement improvements ever considered by the Congress." Reform of the Federal criminal laws at last appears to be within reach.

IV. An Outline of the Provisions of S. 1630:

A. In General:

The Code contained in S. 1630 provides for the first time an integrated compendium of virtually all Federal statutes and rules concerning crimes, the criminal justice process, and related matters. Its most important attribute is that it sets forth the law in a far more comprehensive, orderly, and simple fashion than exists today. It corrects many major problems in the existing law, and literally hundreds of minor problems. It incorporates important areas of judge-developed law into associated statutory provisions, providing for the first time a single, basic source of Federal criminal law. The only major areas of criminal law not directly incorporated within the new Code are the judicially developed laws concerning generally applicable defenses to criminal conduct and the numerous regulatory statutes that carry low levels of criminal penalties.

The Code is divided into five parts.

Part I contains general provisions of the criminal law which govern the interpretation and application of the other portions of the Code. It sets forth the general principles of criminal law, the definitions of terms commonly used throughout the Code, the circumstances under which the Federal Government may investigate and prosecute, the nature of the intent or other mental states that must accompany conduct before that conduct will be considered criminal, the circumstances under which one individual or organization will be held responsible for the acts of another, and the conditions under which criminal conduct may be subject to a valid defense or may not be subject to prosecution.

Part II contains the penal offenses (except for misdemeanors consisting simply of violating the various Federal regulatory laws). All the serious Federal offenses are set forth for the first time in a single title of the United States Code, and are grouped in an orderly, rational arrangement. The offenses are described in as clear and simple a fashion as the appropriate precedents will permit, using, whenever possible, the common terms defined in Part I. The jurisdictional provisions which permit the Federal Government to prosecute for an offense (for example, the use of the mails in the course of the offense, the effect of the offense on interstate commerce, the status of the victim as a public official) are no longer buried in the description of the criminal conduct but are set out in a separate subsection of each offense for purposes of clarity, for purposes of consolidation, and for purposes of facilitating future changes in the law. As a result of this jurisdictional drafting approach, numerous provisions of current law are dramatically consolidated to eliminate redundancy and inconsistency; for example, 466 offenses relating to four subject areas—theft, forgery and counterfeiting, false statements, and property destruction—are reduced to 13 offenses. The potential penalty carried by each offense is also set forth in a separate subsection, using a simple categorization technique to refer to the applicable sentencing provisions.

Part III introduces a totally new and comprehensive sentencing system that is based upon a coherent philosophy and that relies upon uniform guidelines for sentencing similarly situated offenders. It sets forth the sentences that may be imposed for criminal offenses, and prescribes the manner in which an appropriate sentence is to be selected. Through the guideline sentencing system and the introduction of appellate review of sentences, far greater certainty and uniformity will be possible. The process of sentencing to imprisonment is made more forthright—the terms imposed will frequently be shorter (except for the most serious offenses) than those imposed today, but, importantly, they will not be subject to being reduced by early release on parole. In addition, more effective sentencing will be possible for white-collar offenders, and the recovery of losses by victims will be facilitated.

Part IV contains the various administrative and procedural provisions affecting the criminal justice system. They range from identifying the Federal agency with responsibility for investigating particular Federal offenses, to prescribing revised standards and procedures for release and detention pending judicial proceedings, to establishing the rules for court appointment of attorneys for indigent defendants, and to directing the procedures for handling offenders who are mentally ill.

Part V contains provisions of law by which, through the civil justice process, the government will be able to enjoin the continuance of certain kinds of criminal conduct and citizens will be able to obtain redress against offenders for damage or injury caused by specified crimes. It also contains a program for the compensation of victims of violent Federal offenses—a program that is funded from collected fines.

B. Specific Provisions:

The following is a more particularized description, on a chapter-by-chapter basis, of significant provisions of the Code, with emphasis on those that differ from the related provisions in current law.

PART I—GENERAL PROVISIONS AND PRINCIPLES

This part of the Code, comprised of Chapters 1 through 5, contains generally-applicable concepts which control the operation of the remainder of the Code.

*Chapter 1.—General provisions.*

This chapter sets forth the general purposes and principles of the Code that are intended to govern its interpretation and application. It also sets forth a "dictionary" of over 100 terms that are used throughout the Code (such as "agent," "bodily injury," "dangerous weapon," "government agency," "organization," "property," and "value"). Today such terms may carry different meaning when used in different contexts, thereby causing uncertainty and confusion.

*Chapter 2.—Jurisdiction.*

This chapter introduces the Code's innovative system for prescribing the circumstances under which the Federal Government may prosecute for the commission of Federal offenses (many of which also constitute State or local offenses). The system is of fundamental importance to the rest of the Code, and provides the basis for the simplified drafting of offenses. In view of its importance, the following discussion will describe the system in some detail.

Under most existing Federal criminal statutes, the statement of the legal basis for Federal criminal jurisdiction is commingled with the description of the criminal misconduct. In fact, in existing statutes the jurisdictional factor is often cast as the prominent factor, making the underlying criminal misconduct appear as a matter of secondary

importance. For example, what would be cast in a State statute as "robbery" is cast in one of the equivalent Federal statutes as "obstruct[ing] or delay[ing], commerce . . . by robbery"; what would be cast in a State statute as "kidnapping" was cast until 1972 in the equivalent Federal statute as "transport[ing] in interstate or foreign commerce, any person who has been . . . kidnapped." The historical reason for such an approach to the drafting of Federal offenses is, of course, to assure the appropriate limitation of the reach of Federal power to that granted the Federal Government by the Constitution. But in the course of limiting the reach of Federal jurisdiction, the current approach presents several disadvantages.

First, it leads to the formulation of offenses which, by design or by interpretation, unnecessarily require proof that the defendant knew or intended that his conduct would violate a Federal interest (for example, that the mails would be used by an accomplice in the commission of a major fraud). Second, it encourages considerable redundancy in that each time Congress applies a criminal offense in a new situation (for example, covering assault on an "official guest of the United States") an entire new statute setting forth the underlying misconduct is required (instead of simply adding, for example, to a general assault statute a new jurisdictional base permitting prosecution if the victim is an "official guest of the United States").

Third, in the course of writing such redundant definitions of the same misconduct, troublesome variations occur when they are interpreted and applied by the courts (for example, an assault occurring upon a Federal officer may be interpreted differently from an assault occurring upon a citizen in a national park).

Fourth, it permits the unnecessary multiplication of the potential criminal charges (for example, theft of a government check from the mails on a military base today may be prosecuted as three offenses—theft of government property, theft from the mails, and theft in a geographic area under Federal jurisdiction).

Fifth, it frustrates extradition of American criminals who have fled to other nations since most applicable extradition treaties describe offenses in terms of the underlying misconduct rather than a jurisdictional factor (for example, "interstate travel with intent to . . ."), and several foreign nations have refused to extradite criminals when the peculiar American definition of such offenses comes to their attention. Several other difficulties also exist with the current approach.

The Code takes a far simpler approach to Federal jurisdiction, but an approach that just as effectively permits the restraint of Federal jurisdiction to its appropriate boundaries. It defines each offense in terms of the underlying misconduct (for example, the conduct constituting kidnapping) just as a State criminal code does, but in a separate subsection of each offense it lists the particular circumstances under which the Federal Government may exercise jurisdiction to investigate and prosecute for the criminal conduct (for example, the transportation of a kidnapping victim across a State line). The basis for Federal jurisdiction is not a part of the offense that is required in all cases to be proved to a jury (but in each case it will still have to be proved to a judge, or to a jury at the defendant's option, beyond a reasonable doubt). This approach to Federal jurisdiction cures the problems stemming from the present system. It permits far clearer definitions of offenses and much simpler instructions to juries, and it allows consolidation of numerous existing offenses into a single offense with several jurisdictional bases (for example, the Code's single theft offense is possible because in a separate subsection there is a listing of several specified circumstances that would each permit the Federal Government to prosecute for the theft). Throughout the Code, the jurisdictional bases have been carefully tailored to avoid any unnecessary expansion of the reach of existing Federal jurisdiction.

The Code also contains provisions permitting the Federal Government to prosecute for certain violent offenses that are committed in the course of other specified Federal crimes. For example, if the Federal Government conducts a prosecution for an extortion offense, the Code will also permit it to prosecute for an assault or a murder committed in the course of the extortion. Under current law, the coverage of such associated offenses is irregular and inconsistent, and is attempted only through a clumsy method of raising the penalty for the underlying offense. The Code approach is more workable and more equitable, and is carefully restricted to avoid reaching offenses that appropriately should be left solely for State prosecution.

Significantly, in order to avoid potential problems in instances in which either Federal or State authorities may investigate and prosecute a particular offense, the Code includes for the first time in Federal law a provision encouraging Federal officials to use restraint in the exercise of their concurrent jurisdiction. Current statutory law purports to require Federal prosecution of all concurrent jurisdictional cases. The Code includes a checklist of factors for Federal officials to consider in such circumstances, as well as a provision requiring that the Attorney General consult periodically with State and local representatives, provide direction to Federal officials on the subject, and report annually to the Congress on the extent of prosecutions in concurrent jurisdiction cases. In addition, the Code specifically provides for the sharing of Federal investigative information with State and local investigators who have concurrent jurisdiction over the offenses involved.

The chapter also sets forth principles governing the prosecution of offenses committed outside the United States that seriously affect national interests or that are committed by or against United States citizens. In doing so, it fills several gaps in current law (for example, it covers crimes of violence committed against United States nationals on the premises of a United States embassy or consulate, permits a criminal trial of a former serviceman for a murder he committed overseas prior to being discharged, and allows a Federal prosecution for an offense involving an American that occurs outside the geographic jurisdiction of any nation—such an offense in Anarctica or on the Moon).

*Chapter 3.—Culpable states of mind*

This chapter sets forth the intent and other mental states that are used throughout the Code in defining a defendant's state of mind at the time he engaged in the criminal conduct. The chapter reduces the bewildering array of 79 different terms now appearing in the Federal penal laws ("corruptly," "feloniously," "improperly," "willfully," "wantonly," etc.) to four defined terms ("intentionally," "knowingly," "recklessly," and "negligently") like most modern State criminal codes. This simplification permits far greater clarity and precision in drafting statutes, while still permitting, through the appending of the terms to different aspects of criminal conduct, all necessary flexibility in describing offenses. Moreover, it will increase the efficiency of the system since, for example, a case precedent interpreting the term "intentional" in the context of one penal section will be applicable in the future not only to that section but to other sections using the same term.

*Chapter 4.—Complicity*

This chapter specifies circumstances under which an individual or an organization may be criminally liable for the acts of another individual or organization. It codifies much of the current judicially-developed law of aiding and abetting and of corporate liability, and clarifies the law concerning those who facilitate crimes committed by others.

One section puts in statutory form the current case law under which a conspirator may be criminally liable for incidental crimes committed by his co-conspirators in the course of working to effect the purpose of their conspiracy, as long as he could have foreseen that such incidental crimes might be committed. (Under this section, for example, if two persons conspire to rob a bank and one steals a car for use in their escape, both conspirators could be held liable for the theft of the automobile even though it was not a specific part of the conspiratorial agreement.)

The section on corporate liability is important in that it greatly clarifies the reach of the existing law holding a corporation liable for the acts of its agent that are committed within his authority and with intent to benefit the corporation.

*Chapter 5.—Bars and defenses to prosecution*

The portion of this chapter dealing with bars to prosecution sets forth a uniform system of time limits within which criminal prosecutions must begin. Rather than the varying time limits that exist today (for example, six years for income tax offenses, three years for election fraud offenses), a uniform five-year period is established (except for the offenses of murder, treason, sabotage, or espionage, which are not subject to a time limit). An extended period for the prosecution of concealable offenses is provided for the first time, permitting a prosecution for fraud or official corruption to be initiated after the five-year period in order to reduce the likelihood of success of a "cover-up."

A second bar to prosecution provided in this chapter is immaturity. Generally speaking, its effect is to lower from eighteen to seventeen the age of responsibility as an adult for criminal behavior of all kinds, and to permit prosecution as adults of offenders who are less than seventeen for an offense of narcotics trafficking or a felony involving violence.

The generally applicable defenses to criminal conduct (such as the defense of self-protection and the defense of entrapment by an investigator) are not defined in the Code, but, to avoid potential controversy, are left to continued development by the courts on a case-by-case basis. Defenses applicable only to specific offenses are set forth with the descriptions of those offenses.

PART II—OFFENSES

This part of the Code, consisting of Chapters 10 through 18, sets forth descriptions of the criminal offenses themselves.

*Chapter 10.—Offenses of general applicability*

This chapter defines the general offenses of attempt, conspiracy, and solicitation.

The general attempt section makes it an offense to attempt to commit any Federal crime, except for a small group of specified offenses. Today, Federal criminal statutes commonly specify that it is not only an offense to commit the described crime, but also to attempt to commit the crime even though the attempt proves unsuccessful. The inclusion of such a provision in current criminal statutes, however, is irregular, and thus many statutes reach only successfully concluded criminal conduct. The new attempt section in the Code unifies the law concerning attempts. It also adds a new defense to a charge of attempting to commit

a crime—if a defendant can show that he voluntarily abandoned his attempt to commit a crime and thereby actually stopped it from being committed, he will have a complete defense to prosecution (a "renunciation defense"). The theory underlying the new renunciation defense is that the public interest in reducing crime is better served by inducing persons to abandon their criminal conduct than by holding out no such inducement and relying solely on the deterrent effect of criminal prosecutions.

The conspiracy offense, which makes it a Federal crime for two or more persons to agree to commit a Federal offense, and then to take steps actually to commit the agreed upon offense, carries forward the provisions of current law. As in the attempt section, however, a new defense of renunciation is added in order to encourage the abandonment of criminal enterprises—a voluntary, complete, and effective avoidance of the planned offense will provide a charged defendant with a defense to a prosecution for the criminal conspiracy.

The solicitation offense provides that if a person tries to induce another person to engage in conduct constituting a Federal crime (other than one appearing on a limited list of exempted offenses) under circumstances making it clear that he actually intends to have the other person commit the crime, the solicitation itself is an offense even if the crime solicited is not ultimately committed. This offense is new to Federal law, except as it appears in a few offenses such as soliciting perjury in a Federal proceeding, but modern State criminal codes commonly penalize such solicitation. The rationale is that the solicitor has taken steps to set a crime in motion—a form of attempted offense. Again, a defense of renunciation is provided.

*Chapter 11.—Offenses involving national defense*

Three series of offenses—relating to treason, sabotage, and espionage—are set out in this chapter.

The treason series generally codifies current law, using the Constitution's language in defining the offense of treason. A new section appears at the end of the series, however, which penalizes the use of weapons by para-military groups that intend to take over a function of Federal or State government by force. Such an offense was recommended by the National Commission.

The Smith Act, which penalized membership in communist organizations and incitement of the overthrow of government, is repealed in its entirety. Serious revolutionary activity can still, of course, be prosecuted as treason.

The sabotage series of offenses generally codifies the current statutes, filling some gaps in the process, except that the statute dealing with the spreading of false military information in wartime with intent to aid the enemy is repealed as unnecessary.

The offenses relating to espionage and the revealing of classified information have not been revised. Because of past controversy surrounding this area, the existing statutes are moved, unchanged, to a title of the United States Code dealing with national defense matters, with the proposed new criminal code simply cross-referencing to those provisions.

*Chapter 12.—Offenses involving international affairs*

This chapter codifies various offenses pertaining to foreign relations and a series of offenses involving immigration, naturalization, and passports. The offenses in this chapter are basically drawn from current statutory provisions, except for one new provision making it an offense to conspire within the United States to assassinate or kidnap a foreign official in his own country.

The Logan Act, prohibiting private communication with a foreign government with intent to influence its actions in a dispute with the United States, is repealed.

*Chapter 13.—Offenses involving government processes*

This chapter covers various offenses that constitute obstructions of legitimate government functions—including obstruction of justice, contempt of court, perjury and false statements, and bribery and official corruption. For the most part, the offenses in this chapter reflect current law, but certain reforms are introduced.

Current law contains an offense pertaining to conspiracy to defraud the Federal Government, but contains no offense of actually engaging in such a fraud. The first section in this chapter sets forth a specific offense of defrauding the government in a way that obstructs a governmental operation, leaving coverage of conspiracy to the general conspiracy section.

The intentional obstruction of a government function by physical intereference is included in the Code as a misdemeanor-level offense, following the recommendation of the National Commission and the lead of modern State codes. Today, Federal coverage of such conduct is haphazard.

The offenses involving obstruction of justice are defined more precisely than those in current law, and contain several improvements. For the first time, specific provisions are incorporated in the Federal law which cover the intimidation or harassment of victims and other potential witnesses. Also, the penalty for the offense of bail jumping is keyed to the gravity of the underlying charges on which the defendant had failed to appear, in order to reduce a defendant's incentive to flee. In addition, provisions are added to reach "cover-ups" more effectively.

The contempt-of-court offenses are defined more clearly than those in current law. Moreover, the general contempt-of-court statute, which today carries a penalty without an upper limit on the imprisonment and fine levels that may be imposed, is limited to a thirty-day penalty for misbehavior in court and a six-month penalty for other misconduct covered by the general contempt provision. Certain defenses are added to provide protection to a defendant who genuinely finds it impossible to comply with a court order or who attempts to appeal an illegal court order prior to disobeying it but is unsuccessful in obtaining the review within a reasonable time.

The perjury series of offenses contains several changes. Like most modern State codes, and like one recent Federal statute, the Code abolishes the old rule requiring that two witnesses be able to testify to the perjury. Also a defense is added so that if a defendant recants and tells the truth before his original lie is discovered or is acted upon, he will not be subject to prosecution; in this situation, too, it was concluded that the public interest is better served by inducing truthful testimony than by being able to prosecute for false testimony. A new offense, false swearing, is added as a lesser form of perjury to cover situations where a witness's lying is not really material to the subject matter of the proceeding.

A single offense, covering situations in which false statements are made to the government outside of sworn testimony in a courtroom, is substituted for over 150 such statutes appearing in current law. In the course of the consolidation, a limitation is placed upon the existing reach of the law in that a false statement to a government official, when made orally, constitutes an offense only if (1) there is corroborating evidence that the defendant made the statement charged, (2) the official is known by the speaker to be a law enforcement officer, and (3) the statement is volunteered or is made after the speaker has been warned that making such a false statement is an offense. A new defense of retraction, similar to that provided for the perjury offense, is made available for the false statement offense.

A new offense is added to the law—failing, with intent to defraud, to keep a record required as a condition of administering or receiving a Federal grant, contract, subsidy, or loan. The provision will improve the ability to reach offenders who fraudulently convert Federal funds.

The bribery and corruption series of offenses is clarified in order to make the provisions more effective than they are today. The coverage of bribery of State officials is augmented to reach bribes made to further unlaw enterprises involving drug trafficking, loansharking, extortion, and gambling. A new offense is added to reach a Federal government official who speculates for profit on the basis of information coming to him only in his official capacity.

*Chapter 14.—Offenses involving taxation*

This chapter codifies several offenses from current law involving internal revenue and customs.

The internal revenue offenses codify the provisions of existing law except that, as the Code is structured, a defendant's intention under statement of income with intent to evade taxes may be prosecuted even though no net tax deficiency results. The penalties for the internal revenue offenses are made dependent upon the amount of taxes sought to be evaded, so that an attempt to evade $200,000 in taxes, for example, will carry a higher penalty than an attempt to evade $100 in taxes; this brings the revenue fraud laws generally into accord with the theft laws.

In the offenses pertaining to smuggling, a penalty distinction is introduced into the law so that a professional trader in smuggled goods will be subject to a more severe sanction than an individual who possesses a smuggled object for his own use.

*Chapter 15.—Offenses involving individual rights*

This chapter covers offenses involving civil rights, political rights, and privacy.

The basic civil rights statutes, which were enacted over 100 years ago (and which speak, archaically, in terms of "persons [who] go in disguise on the highway . . . with intent to prevent or hinder . . . free exercise or enjoyment of any right or privilege [which is Federally] . . . secured"), are modernized and clarified. They are recast so as not to require the existence of a conspiracy, but to permit prosecution of a person who acts alone in intentionally violating another person's rights. In addition, the coverage of the statutes is extended to protect aliens as well as citizens. Moreover, the provisions are clarified to assure that it need not be proved that a defendant specifically intended that it be a Federally protected right, as opposed to a State-protected right, that he infringes—a clarification that should permit far simpler jury instructions and a higher success rate in civil rights prosecutions.

The more recent civil rights statutes—those enacted in 1968—are recast to prohibit the use of force in discrimination not only on the basis of race, color, religion, or national origin, but also on the basis of sex in violation of a person's right not to be subject to such discrimination.

The Code for the first time in Federal law provides a specific series of statutes covering election frauds. Previously, frauds perpetrated in connection with a Federal election

could be prosecuted only under the general civil rights conspiracy statute—a less than satisfactory vehicle for insuring clarity and permitting successful prosecutions. Included among the election offenses is one covering the obstruction of a Federal political campaign by "dirty tricks" that constitute State crimes—thereby permitting either Federal or State prosecution.

In the course of codifying the current offenses of eavesdropping and wiretapping, there is added an offense covering the possession of an eavesdropping device with the intent that it be used unlawfully.

A general offense is provided to penalize a Federal official's disclosure, in violation of a duty imposed upon him by a statute, of private information that a citizen has been required to furnish to the government in seeking to obtain a Federal benefit or in response to a specific requirement of law, such as tax information or census information. This offense does not create any new crime, but standardizes the coverage and penalties for similar conduct prohibited specifically by other statutes.

*Chapter 16.—Offenses involving the person*

This chapter contains all of the offenses which involve an individual's physical being—including offenses involving homicide, assault, kidnapping and hijacking, and sexual contact. A complete range of such provisions is set forth to reach all forms of violent offenses that appropriately fall within the Federal jurisdiction. Gaps are filled in the assault, terrorizing, and kidnapping areas, and a comprehensive series of forcible sex offenses is provided for the first time. This comprehensive approach permits the adoption of appropriate grading distinctions, and reduces the necessity for reliance on the differing coverages of the various State laws.

Most of the offenses appearing in this chapter may be prosecuted by the Federal Government not only if they are directed against Federal officials or take place in national parks or other areas within the Federal geographic jurisdiction, but also if they occur in the course of other specified crimes that are subject to Federal prosecution. For example, if a maiming occurs in the course of intimidating a witness due to testify at a Federal trial, the government may prosecute not only for the intimidation of the witness, but also for the maiming that occurred in the course of the intimidation, instead of having to leave the latter offense for State prosecution. This permits a single trial of the defendant in those cases in which such a consolidated approach appears appropriate, while still relying on State prosecution for the majority of violent offenses committed in the course of Federal crimes in cases in which that approach appears preferable. This system will help to assure that Federal sentences can adequately reflect the seriousness of the underlying conduct.

The offense of rape, as well as the other sexual offenses in the same series of sections, is defined in a fashion making the gender of the perpetrator or victim irrelevant (thereby covering, for example, homosexual rapes in Federal prisons, which cannot be reached under the current statutes). Another change introduced by this series concerns the offense of "statutory rape" in which a defendant has taken advantage of a youth's indiscretion; the offense applies only if the defendant is at least three years older than the other participant, thereby avoiding the criminalization of consensual sexual conduct between persons in the same age group. Also, in any prosecution under this series of offenses, the old requirement of special corroboration of the victim's testimony is eliminated from the law.

*Chapter 17.—Offenses involving property*

This chapter incorporates and consolidates the various property offenses appearing throughout the existing laws. It contains offenses involving arson and other property destruction; burglary and other criminal intrusion; robbery, extortion, and blackmail; theft and fraud; counterfeiting and forgery; commercial bribery; and various monetary offenses. In this chapter, more than in any other, a dramatic consolidation and reduction of unnecessarily repetitious offenses is made possible by the drafting technique of separating the jurisdictional element from the definition of the substantive offense.

In the property destruction series of offenses, over 80 current statutes relating to arson and other property destruction are consolidated into three simple sections. In addition, jurisdiction is broadened to provide coverage of property destruction in the course of witness intimidation and civil rights offenses, and property destruction at energy production facilities.

The series of offenses covering burglary and other criminal intrusions clarifies current law, adds general coverage of Federally owned buildings, and eliminates a variety of redundancies.

The robbery, extortion, and blackmail offenses introduce much clearer distinctions among those offenses than exist in current law. The robbery statute extends Federal jurisdiction to cover the robbery of drugs from a pharmacy. The blackmail provision contains a special defense to assure that the section is not construed to cover a threat to undertake legitimate legal action unless a legal wrong is remedied; for example, a consumer's threat to begin a legal action unless defective merchandise is repaired or replaced would clearly not be a violation of the statute.

The theft section in the Code replaces over 130 theft and fraud statutes appearing in current law, and is followed by post-theft provisions that will facilitate prosecutions of professional "fences" who traffic in stolen property. For the first time, the penalty for the offense is made to vary with the kind and value of the property stolen; large-scale thefts and frauds carry penalties significantly higher than those in current law, while thefts of items of little value are reduced to a misdemeanor level in order that appropriate prosecution may be brought before a magistrate rather than a Federal judge. In addition, the penalty for a youth's temporarily taking a motor vehicle without authority and then abandoning it ("joy riding") is reduced from the current five-year maximum to a maximum of six months' confinement. Although theft jurisdiction in the Code for the most part carries forward current law, new coverage has been added to reach theft and fraud in programs funded by the Federal Government—thereby obviating the current difficulty in prosecuting after Federal title to the money has passed. Also, a significant new provision is added to the fraud offense—a provision covering pyramid sales schemes. In conjunction with the provisions in Part V of the Code, which contains a new statutory remedy to enjoin further frauds, this provision will help to protect the public from fraudulent schemes that often are difficult to reach under current law. Another addition to the fraud series provides Federal authority to prosecute large-scale frauds designed to obtain insurance money through arson. Another appears in the bankruptcy fraud section; the current law provisions reaching schemes to defraud creditors in bankruptcy situations are extended to reach similar fraudulent activity involving insolvent insurance companies. Still another applies felony-level penalties to fraudulent, large-scale trafficking in pirated videotapes and sound recordings.

A series of five forgery and counterfeiting offenses replaces almost 90 such offenses in current law. In the course of the consolidation, the Federal law is extended to reach the forgery or counterfeiting of corporate securities and of notes and bonds issued by State and local governments. These latter offenses, which are not now covered by Federal law, recently have become the focus of organized criminal activity.

The application of various commercial bribery provisions in current law is clarified, and is expanded to reach bribery affecting Federally-funded programs. Labor bribery statutes are extended to encompass bribery involving union membership procedures and work placement as well as involving improper expenditures of union assets.

*Chapter 18.—Offenses involving public order, safety, health, and welfare*

This chapter sets forth several series of offenses involving organized crime; drugs; explosives and firearms; riots; gambling; pornography and prostitution; and miscellaneous public health provisions.

The organized crime provisions include a simplified recodification of the 1970 racketeering statute, making several additions in the process. A new offense—aimed directly at organized crime leadership—covers individuals who actually manage a racketeering syndicate. Taking over a business enterprise by means of racketeering activities is specified as a separate offense, as is using profits from racketeering activities to acquire a legitimate business. The existing Federal loansharking laws have been broadened to penalize grossly usurious credit transactions in which it is understood, even if it is not made explicit, that the lender may resort to violence in collecting the debt.

The drug offenses are primarily a codification of the 1970 Federal statutes. Some significant changes, however, have been made. The penalty for trafficking in wholesale quantities of heroin or PCP (10,000 times the average individual dose) is raised, as is the penalty for trafficking in large amounts of marihuana. Several of the provisions of current law providing for a doubling of the penalty for repeat offenders are eliminated as unnecessary, but the one applying to heroin traffickers is not only retained but is made more effective. A person who imports or sells heroin or other opiates for profit, moreover, is subject to a mandatory minimum penalty that does not currently exist; a judge will be required to impose at least two years' imprisonment, unless the defendant was less than 17, was of impaired mental capacity, was under unusual and substantial duress, or was only a minor accomplice in an offense committed primarily by another person.

The explosives and firearms offenses generally carry forward the current law provisions without substantive change. The Code does not include changes in the law pertaining to handguns, in order to avoid controversy and promote general compromise on the Code's coverage. The offense of using a firearm in the course of committing another Federal crime, however, is made subject to an effective mandatory minimum penalty of two years' imprisonment, subject to the same exceptions as the mandatory penalty for trafficking in heroin.

The riot offenses of existing law are substantially narrowed by the Code, both in terms of the definition of the substantive offenses and in terms of the Federal ability to prosecute. Adequate Federal coverage, however, is maintained. An incitement to

riot may not be prosecuted unless a riot actually occurs. A riot is defined to require at least ten participants, instead of three participants as in current law.

The gambling offense consolidates a variety of provisions from current law. Both it and the prostitution offense seek to reach the operators of rings involving such activity but leave the lesser offenses in this area to prosecution under State or local laws; prostitution itself is not made a Federal offense. Moreover, the gambling and prostitution offenses set forth in the Code are not applicable in areas where such activity is lawful under all applicable State and local laws.

The obscenity offense focuses on (1) disseminating obscene material to a minor or to an adult who is given no opportunity to avoid exposure to the material, and (2) commercially disseminating obscene material for purposes of profit, but maintains other aspects of existing coverage. The section defines obscene material to accord with recent Supreme Court decisions concerning obscenity, and generally limits the Federal authority to prosecute to situations in which the offender employs the mails or facilities of interstate commerce.

The public health offenses consolidate existing Federal offenses pertaining to adulterated foods and environmental pollution. In addition, the penalties for the environmental pollution offenses in current law are keyed more closely to the potential harm involved.

The provision of current law that permits the Federal Government to prosecute for uncodified offenses such as traffic violations and disorderly conduct under State and local law, when such offenses are committed in a national park or other area within Federal geographic jurisdiction, is continued by the Code. Because the new Code will, for the first time, specifically define all serious forms of offenses, the penalty for assimilated crimes is limited to a one year maximum, rather than whatever higher penalty is permitted by the applicable State or local law. There will be less occasion for the use of this general provision than has existed in the past.

PART III—SENTENCES

This part of the Code, consisting of Chapters 20 through 23, contains the sentencing scheme not only for the Code offenses but also for the hundreds of minor regulatory offenses that will still exist in other portions of the Federal laws.

The sentencing provisions of the Code are significantly different from those in current law. To begin with, the four generally recognized purposes of sentencing—deterrence, protection of the public, assurance of just punishment, and rehabilitation—are specifically set forth for the first time. Currently, some judges emphasize one or another of the appropriate purposes to the exclusion of the remainder. Legislative recognition of the purposes for which sentences may be imposed is the first step toward bringing systematization and rationality to the process.

Another major difference is that each criminal offense listed in Part II of the Code is described as a certain grade of offense for sentencing purposes, thereby providing a shorthand method of referring to penalties and other considerations that are applied to the offense by the Part III provisions. This facilitates the establishment of a penalty structure assuring consistent penalties for conduct of a similar nature or degree of seriousness.

Several specific changes are introduced into the law for the purpose of making penalties more likely to serve the purpose for which they are imposed. In addition to the penalties traditionally applicable, a court is empowered to order that a convicted defendant in a fraud case give notice of the conviction to the victims of the offense (who, in cases involving large-scale frauds, may not all be known to anyone other than the defendant) in order to facilitate private actions for recovery of losses. A court is also empowered to order a defendant found guilty of an offense causing bodily injury, or property damage or loss, to make direct restitution to the victim of the offense, even if a term of imprisonment is also imposed. In addition, provisions are added to require forfeiture of the proceeds acquired by defendants through organized crime.

The probation provisions mark a significant departure from past practice and philosophy—no "free pass" will be given to any convicted defendant. Probation is converted into a form of sentence in itself—rather than a suspension of a sentence—in which, in every felony case, some form and degree of restitution to the victim, work for the community, or fine will be required as a mandatory condition upon which the probation is predicated. In addition, the probation provisions for the first time specify a variety of conditions that can be imposed upon the announcement of a sentence to probation, in order to assure that courts will give appropriate attention to the possibility of predicating the defendant's release upon his compliance with further conditions appropriate to the case. Such suggested conditions include an individual's refraining from engaging in a specific business which led to his commission of the offense; undergoing medical or psychiatric treatment; living in a halfway house, community treatment facility, or other environment offering some degree of direct supervision; residing in another city where he is less apt to be influenced by his former criminal associates; etc.

The maximum fines permitted by the Code are substantially higher than those in current law, with a convicted organization subject to a $1,000,000 fine for a serious offense and a convicted individual subject to a fine of up to $250,000. Provision is made for installment payments when warranted. Under this approach, fines are less likely to be considered by white-collar offenders simply as a minor, potential cost of doing business. The high fine levels in the Code, however, are specifically conditioned upon a defendant's ability to pay (as well as the gravity of the offense and other considerations), thereby assuring that an individual or an organization with few assets and little earning capacity will not be fined an appropriately high amount.

The terms of imprisonment permitted by the Code are generally somewhat reduced from those in current law, with the major changes applying to those existing statutes that carry penalties substantially higher or substantially lower than similar statutes in the criminal law.

More significantly, though, the new Code makes a fundamental change in the effect of sentences to imprisonment. It introduces a determinate system, abolishing early release on parole and providing for the first time that the sentence announced by the sentencing judge will be the sentence actually served by the defendant (except for a potential ten percent credit for "good time"). Such sentences will usually be shorter, on the average, than those imposed under the current sentencing-paroling process; they will no longer need to involve artificially lengthy terms that are intended to be shortened later by parole authorities. Although early release on parole is abolished, in a case in which the judge believes that a defendant should be supervised for a period after the expiration of his term of imprisonment, he may order a period of post-release supervision. Provisions are added to the law to make it clear that penalties for individual offenses cannot be strung together so as to create a total sentence that is unreasonably long, but the maximum term of imprisonment for multiple offenses is made long enough to permit the penalty to reflect the seriousness of persistent criminal conduct. The net result of these changes should be far greater honesty, public credibility, and effectiveness in sentences to imprisonment.

The complicated, special sentencing provisions of current law that are designed for particularly dangerous offenders, youth offenders, and narcotic offenders, are replaced by provisions for taking these factors into account in the course of considering all other relevant factors.

As a result of the compromise pursuant to which the Code was drafted, the death penalty is not included as an available sentence for Federal offenses. (However, the single, constitutionally supportable death penalty provision in existing Federal law—the penalty for aircraft hijacking in which a murder occurs—is retained in its present place in the United States Code.)

Although the provisions noted above are important, they are overshadowed by the structural and procedural changes in the sentencing process. These provisions are designed to achieve a rationality, uniformity, and fairness that simply have not existed before. The Code creates a Sentencing Commission within the judicial branch of the Federal Government, which is directed to establish sentencing guidelines to govern the imposition of sentences for all Federal offenses. In drafting the guidelines, the Commission is directed to take into consideration factors relating to the purposes of sentencing, the characteristics of offenders, and the aggravating and mitigating circumstances under which specific offenses may be committed. For each Federal offense, the guidelines will be expected to specify a variety of appropriate sentencing ranges—encompassing imprisonment, fines, and probation—depending upon the particular history and characteristics of the defendant in the case and the particular circumstances under which the offense is committed. The judge will be required to sentence a defendant within the range specified in the guideline covering the specific situation in the case before him, although, if he considers the guideline range inappropriate because of factors not adequately taken into consideration by the Sentencing Commission, he is free to sentence the defendant above or below the guideline range as long as he explains his reasons for doing so. If an offender is sentenced above the range specified in the guidelines he may obtain a review of his sentence by the Federal court of appeals for the circuit; if he is sentenced below the range specified in the guidelines, the government, with the concurrence of the Attorney General or Solicitor General, may obtain a review of the sentence on behalf of the public. In addition, in a case in which a defendant is sentenced to a term of imprisonment that exceeds five years, he may, after service of five years of the term, petition the sentencing court to adjust his sentence because of extraordinary circumstances. The system is designed to promote general uniformity and fairness while retaining necessary flexibility.

PART IV—ADMINISTRATION AND PROCEDURE

The chapters appearing in this part of the Code numbered 30 through 38 consolidate, clarify, and codify existing procedural provisions of the federal law. The codification is accomplished without, for the most part, making substantial change in the existing law. Of the changes that are made, the most significant are the following.

The Code modifies certain of the existing provisions permitting Federal law enforcement officers to secure a court order to au-

thorize investigative wiretapping in specified situations. The statute permitting wiretapping in emergency situations without a prior court order (which today is vaguely worded as applicable to offenses involving "national security" or "organized crime") is limited specifically to offenses involving treason, sabotage, or espionage, and to offenses involving racketeering or the risk of death. In addition, specific provision is made for court authorization of surreptitious entries necessary to install wiretaps.

In a related area, the Code provides for the first time a comprehensive and integrated series of provisions requiring court orders for the investigative use of devices to identify a telephone number that is called.

The statutes permitting the extradition to foreign nations of criminals who have fled to the United States are materially modernized and simplified.

The maximum fees permitted for government-compensated defense counsel, and for others providing defense services to defendants who cannot afford to pay for them, are increased by 50 percent to offset the imbalance caused by inflation.

The bail provisions of current law are significantly changed. For the first time, they will permit a judge to take into account the defendant's dangerousness. Specifically, they will allow a judge, in determining whether and on what conditions to release a defendant prior to his trial, to consider the danger the defendant would pose to others in the community. Money bail is precluded, but the court may require, as a condition of release, that designated property belonging to the defendant be forfeited upon his failure to appear. The available conditions are expanded and clarified, and a defendant who violates his release conditions may more readily be held accountable. In addition, after a defendant is convicted, the practice of permitting the defendant to remain free pending the long appellate process is changed by the Code; post-conviction release, instead of being the rule, is made available only if the defendant can show a substantial prospect that his conviction will be overturned on appeal and that he will not flee or pose a danger to the community.

Provisions are added to the juvenile delinquency laws that require a preliminary screening of juvenile cases by a probation officer to identify those in which an informal form of probation might be preferable to the usual court processes. If a juvenile selected for such informal probation complies with the specified conditions for a period of six months, the case against him will be dismissed; if he does not comply, the original proceedings may be resumed.

An entirely revised series of provisions dealing with mentally incompetent offenders is included in order to overcome the inadequacies of the current law. Included among them is a provision that permits the civil commitment of an individual acquitted by reason of insanity. Although the Code indicates that in such situations State civil commitment proceedings are preferred, Federal commitment proceedings are provided to insure that a genuinely dangerous individual will not be released prematurely. (Under current law, except in the District of Columbia, if a Federal defendant is found to be insane and it is determined that he is so insane that his release would threaten the lives of other persons, there are no means by which he can be hospitalized until he can regain his mental balance. While the State in which the offense will frequently be willing to initiate its own civil commitment proceedings, this is not always the case, especally in situations where the offense is committed by a nonresident of the State in which the trial takes place.)

A technicality in the law that prevents the government from appealing the erroneous dismissal of a case, or the erroneous granting of a new trial, is removed.

The provisions of law concerning the means of collecting fines that have been imposed on convicted defendants are materially changed from those of current law. Under the current statutes, it has often proved to be exceedingly difficult to collect fines that have been imposed upon corporations or individual defendants. The Code incorporates a series of provisions allowing recourse to the Internal Revenue Service statutes that permit the placing of a lien upon a defendant's property if he has attempted to circumvent the judge's order to pay as directed.

PART V—ANCILLARY CIVIL PROCEEDINGS

The two chapters contained in this part—Chapters 40 and 41—incorporate provisions of a non-criminal nature that should help to make the enforcement and execution of the criminal laws more effective.

The first chapter provides authority to the Attorney General to institute legal procedures to cause a forfeiture to the government of a defendant's property that he used in, or obtained from, a criminal offense. This provision would cover, for example, an object smuggled into the United States, an electronic device possessed for illegal eavesdropping, a set of engraving plates employed to make counterfeit currency, and a sawed-off shotgun used in a robbery. The chapter also contains provisions permitting the Attorney General to obtain court orders prohibiting individuals or organizations from engaging in specified racketeering activities, restraining intimidation of witnesses or victims, and enjoining fraudulent schemes. The final sections in the chapter preclude the imposition of Federal employment restrictions or other civil disabilities upon a defendant, if they are based solely on his conviction, unless they are reasonable in light of the offense.

The second chapter contains provisions under which individuals may attempt to seek redress for crimes committed against them by racketeering offenders or eavesdroppers—provisions continued from current law. The chapter adds a system to compensate the victims of violent Federal crimes. Funding under the system will be from collected fines—a source of revenue that will be many times the amount necessary for the purpose of compensating Federal victims and that will assure that the compensation is clearly perceived as being provided by convicted defendants as a class.

Mr. THURMOND. Mr. President, I yield the floor.

Mr. BIDEN. Mr. President, as a cosponsor of the Criminal Code Reform Act of 1981, I wish to express my enthusiastic support of this effort to reorganize and streamline the administration of Federal criminal justice. This is one of the most important pieces of legislation before us this Congress. It brings order and reason to a confusing, and in some instances illogical, mass of criminal laws enacted over the past 200 years. It follows the example of those States, including Delaware, which have modernized their criminal laws in recent years.

The bill we are introducing today is the product of many years work. Perhaps more than any other single piece of legislation, this bill in its various forms has been the subject of extensive hearings, debate, and analysis. An earlier version passed the Senate in 1978 and the Judiciary Committee approved a bill last Congress by a vote of 14 to 1.

This bill is similar to the bill approved by the Judiciary Committee last Congress, with a few notable changes. Some of those changes are the result of compromises reached among the sponsors of the bill in order to reduce the controversy which slowed and eventually stalled passage of bills in previous Congresses. Some changes improve the bill by bringing certain provisions closer to current statutes or case law.

There are however, a number of provisions in the bill which I am certain will prove controversial. Those provisions which will cause the greatest concern are changes from the bill as approved by the Judiciary Committee last Congress. For example:

First, elimination of a defense to the crimes of contempt and disobeying a judicial order that the action of the court "was constitutionally invalid and constituted a prior restraint on the collection or dissemination of the news which was invalid under the first amendment to the Constitution";

Second, adoption of a broad new offense of criminal solicitation in place of a solicitation offense limited to specific offenses;

Third, broadening of the offense of obstructing a government function by physical interference to include acts involving any public servant; and

Fourth, substantially narrowing the offense of unlawful discrimination when the discrimination is based upon a person's sex.

I assure all of my colleagues as well as concerned individuals and groups that these provisions as well as other provisions—such as creation of a government right to appeal sentences, cutting back on due process procedures for revocation of probation and changes in the present scope of Federal jurisdiction over extortionate acts by labor unions—will be the subject of careful analysis and thorough debate by the Judiciary Committee.

I want to take this opportunity to commend my colleagues on the House Judiciary Committee for their efforts to achieve passage of a comprehensive criminal code bill. I look forward to working closely with Chairman RODINO and the members of the committee in this Congress. It is my hope that we can continue the cooperative effort which began last Congress toward resolving any differences in the House and Senate bills and achieving our mutual goal of enactment of a comprehensive criminal cost recodification bill.

Finally, I want to emphasize what the Criminal Code is not. The bill is not a solution to crime. The incidence of crime, particularly violent crime, caused by factors such as drug abuse, poverty, and unemployment will not be significantly affected by a bill which recodifies current law and improves sentencing procedures.

At the same time, the Criminal Code bill is not the proper vehicle for significant or controversial proposed changes in Federal law which have arisen apart from the Criminal Code reform effort. Proposals such as changes in the law relating to habeas corpus, the exclusionary rule, and the like must be the subject of separate hearings, analysis, and debate—the same responsible legislative process afforded any other legislative proposal.

Chairman THURMOND, you have my strong support in your effort to recodify Federal criminal law. As in previous Congresses, I offer you my strongest support in working toward enactment of improved Federal sentencing procedures. I am firmly committed to the goals of speedy conviction and punishment for offenders which is based upon the severity of the harm caused. As chairman of the Democratic Task Force on Crime, I have already taken steps toward that goal by introducing on behalf of the task force amendments to the Justice Department Authorization Bill (S. 951) and the National Security and Crime Control Act of 1981 (S. 1455). Those measures include Federal sentencing reform provisions which are nearly identical to those contained in the Criminal Code Reform Act.

Mr. HATCH. Mr. President, I am extremely pleased to be a cosponsor of the Criminal Code Reform Act, as I have been for the past two Congresses. I believe that the time is long overdue for such a comprehensive reform of our Federal criminal laws. The present legislation is the result of more than 8 years of discussions and negotiations between Senators of widely varying philosophies of criminal jurisprudence. It is the result of more than 13 years of rigorous analysis by many of the most informed participants in the criminal law process—academicians, the bar, business and industry, labor, public interest groups, and law enforcement agencies throughout the country.

BACKGROUND OF CODE

The Criminal Code Reform Act had its genesis in Congress decision during the 89th Congress to establish the National Commission on Reform of Federal Criminal Laws. The Commission was charged with making—

A full and complete study of the statutory and case law of the United States which constitutes the Federal system of criminal justice for the purpose of formulating and recommending to Congress legislation which would improve the Federal system of criminal justice.

In addition, it was empowered to:

Make recommendations for the revision and recodification of the criminal laws of the United States.

The Commission, popularly known as the Brown Commission—named after its chairman, former California Governor Edmund Brown—produced a working draft of a new Federal Criminal Code in 1970, 1 year before submitting its final report to Congress recommending comprehensive reforms of the Criminal Code. Much of the product of the Commission drew upon the longstanding efforts of the American Law Institute in developing its Model Penal Code provisions.

In making its recommendations, the Brown Commission observed that the code had undergone only three revisions since the first Federal criminal statute had been approved in 1790. In 1866, the Congress authorized the appointment of a Commission to consolidate in convenient, workable form the entire body of Federal statutory law.

This effort culminated in the Revised Statutes of 1877 which organized this law, including its penal provisions, in a far more rational and accessible manner. A subsequent reform effort in 1909, limited to Federal criminal statutes, sought to perfect the form of these laws in addition to reorganizing them along more useful lines. Finally in 1948, following a period of significant development of the Nation's penal law, a third code reform effort culminated in the consolidation of these laws in title 18 of the United States Code, entitled "Crimes and Criminal Procedure". These provisions remain largely in effect today.

Legislation incorporating the recommendations of the Brown Commission was first introduced during the 93d Congress by Senators John McClellan and Roman Hruska and by Representative Edward Hutchinson. Comprehensive code reform initiatives have been introduced in every subsequent Congress, generally with modest technical and substantive changes. During the 95th Congress, the full U.S. Senate approved one of these measures, S. 1437, a bill successful in eliminating some of the provisions contained in its predecessor, S. 1 during the 94th Congress, that had been most responsible for earlier divisions and controversies with respect to the code reform effort. Despite overwhelming approval in this body, efforts faltered during the 95th Congress in the House of Representatives.

During the 96th Congress, the Senate Committee on the Judiciary approved a new code reform, S. 1722, while the House Committee on the Judiciary, for the first time, approved similar legislation, H.R. 6900. The Congress ended, however, before either legislation could be considered on the floor of Congress. Given the commitment of leadership in the Judiciary Committees in the House and Senate this Congress, the prospects for serious revision of our Nation's criminal laws appear to be extremely bright.

NEED FOR CODE REFORM

Why the compelling need for a comprehensive Criminal Code reform? There are a number of answers to this:

First, the present body of Federal criminal law is beset by entirely too many provisions of clearly archaic or obsolescent character. These include such statutes as those prohibiting piracy under the commission of a foreign prince, writing checks for less than $1, and interfering with the flight of Government carrier pigeons. Many statutes along these lines—which do little to enhance public respect for the law—have been eliminated, thereby reducing the sheer volume and bulk of the Federal criminal law.

Second, there are entirely too many gaps in the present statutory law, instances in which Congress has effectively deferred to the judiciary in the development of the law. As one who has been extremely concerned about an activist judiciary, one which has come increasingly to make law as well as interpret it, I believe that the code reform makes an important contribution in this area. Many areas of white collar crime, for example, have been left to the courts in this manner, such as the issue of corporate liability for the actions of its agents.

There are also inarguable gaps in the law in areas in which there is little room for judicial involvement. There are no Federal bank extortion laws, while the arsenal of antiracketeering laws, in my view, is grossly inadequate. The code reform would attempt to fill these gaps in areas in which there is the greatest consensus that they exist.

Third, it is often difficult to locate and identify present law. While most of the Nation's criminal laws are concentrated in title 18, there are criminal laws scattered throughout the entire United States Code. There is simply not the notice provided by such an arrangement of penal laws that a fair criminal code must provide. In so serious a matter, it is essential that the law—the entirety of the law—be easily and readily accessible to those who must know its provisions. The proposed code reform would consolidate all Federal felonies in a single place.

Fourth, partially as a result of this disorganization, the code is frequently inconsistent and inequitable. The penalty, for example, for making false statements to a Federal agency may vary from a mere infraction to a 5-year term of imprisonment, depending upon which of various Federal statutes is relied upon for prosecution. To this extent, the criminal laws are arbitrary and subject to the sort of potential abuse that a nation of laws cannot tolerate. The proposed code reform would eliminate most of these anomalies by creating a more rational and uniform system of criminal penalties.

Fifth, apart from the surface inconsistencies in the statutes, there are also deeper, even more disturbing inconsistencies that are reflected in the criminal sentencing process. The past several decades have witnessed a movement toward increasing individualization of criminal sentencing, with great discretion provided the courts and parole authorities. While not an entirely objectionable trend, it has nevertheless had the effect of insuring that relatively equally situated persons, having committed relatively equal crimes, may often be subject to widely disparate terms of imprisonment or nonimprisonment.

This has had, and can continue to have, no effect other than to engender increased resentment among those who believe that they have been treated inequitably. A major reform in the Criminal Code reform is the establishment of a program of determinate sentencing to be administered through judicial sentencing guidelines.

Sixth, the present body of Federal criminal law is beset by excessive numbers of duplicative and overlapping provisions. These not only make for an unaesthetic criminal code, but afford far too much opportunity for arbitrariness on the part of the Government. There are, for example, approximately 70 separate theft statutes, 50 false statement statutes, and 70 arson statutes.

These statutes carry differing penalties; they define essentially similar

wrongdoing in dissimilar terms; and they contain conflicting and confusing jurisdictional bases. There is no need for this statutory array. The proposed code reform would consolidate these statutes into no more than a small handful of separate offenses.

Seventh, one of the primary reasons for the proliferation of essentially similar offenses is that the current law generally defines the substantive criminal offense in terms of its jurisdictional base. The question of Federal jurisdiction is a definitional element of each offense. As a result, the law becomes more complex and prosecutions under that law become more complex. The proposed code reform would separate the jurisdictional elements from the substantive elements of an offense. There are potential benefits for the accused from this reform to the extent that he will no longer be subject to multiple counts or prosecutions springing from what is essentially a single transaction.

Under current law, for example, the robbery of a Federal credit union located on Federal property would violate three distinct provisions of the criminal law, each of which differ slightly in terms of the description of the offense, the nexus of Federal jurisdiction, and the penalties. The action would violate discrete Federal statutes relating to robbery of a Federal credit union, robbery of a Federal financial institution, and robbery upon Federal property. Under the code reform, the robbery would represent a single offense, with three potential bases for the assertion of Federal jurisdiction.

Eighth, another of the aspects which contributes substantially to the present complexity and confusion of the code is its treatment of culpable states of mind. The Brown Commission identified at least 78 different terms in the present law which are used to describe the mental elements comprising an offense. These range from "knowingly" and "willful," to "knowingly and willfully", "improperly," "feloniously," and "maliciously." Further, most of these terms have been interpreted by the courts in widely varying and often contradictory manners.

The code reform would reduce this incomprehensible assortment of terms to simply four—"intentional," "knowing," "reckless," and "negligent." Each of these would be defined in a coherent and consistent manner. For the first time, a discernible, consistent pattern would be reflected in the state of mind, or mens rea, required for a Federal criminal offense.

Ninth, the present organization of title 18 is a haphazard one, based more upon alphabetical imperatives than upon any sounder, more rational element. Like laws, in my opinion, ought to be classified together, and unalike laws ought to be separated by sections, chapters, titles, subtitles, and other basic forms of demarcation. The code reform would achieve this.

Mr. President, I believe that the present code reform measure, by remedying these difficulties to a substantial extent, can work to enhance popular respect for the criminal law. By rationalizing the criminal laws of the Nation and by eliminating present instances of duplication, overlap, and inconsistency, the code represents a step toward reasserting ours as a "nation of laws, not of men." It will make the law more coherent and accessible for the average citizen, minimize the amount of contradictory and wasteful criminal prosecutions, and reaffirm the important role of the legislative branch in the formulation of the criminal law.

The code consolidates a large body of law that has developed haphazardly and chaotically over nearly two centuries, not in the slowly developing and evolving manner of the common law, but through patchwork statutory enactments. The code is not a panacea—by itself, the code can have only limited effect in reducing the intolerably high levels of crime, particularly violent crime, in this country.

It can, however, make a substantial contribution toward insuring a much more conducive atmosphere within which the criminal justice process can operate. Dean Pound recognized four primary factors that influenced the quality of justice—personnel, administration, procedure, and substantive law. The Criminal Code is aimed largely, although not exclusively, at the final element.

PROVISIONS OF THE CODE

The Criminal Code Reform Act is part recodification and part revision. By far, the greatest part is the former. I would estimate that at least 90 percent of the code is intended to perpetuate present substantive law. To this extent, the code is not an ideological measure; it is not a conservative code and it is not a liberal code. It is primarily a neutral, technical revision of a body of law that has fallen into disarray as a result of both the rapid proliferation of new criminal laws and congressional carelessness. In attempting to impose a measure of uniformity upon the criminal laws of the Nation—uniformity with respect to culpability, penalties, and elements of offenses—it has occasionally been necessary to effect slight changes in a number of areas of the present law. The long-term benefits of uniformity far outweigh, in my mind, the occasional disruptions that I anticipate may result during the transition process.

That part of the code reform intended to represent change in present substantive law has been handled with great caution and circumspection from the outset of the code process. Most of the changes in substantive law reflect a clear consensus that the law was in need of such modification. While there are concededly remaining areas of dispute and controversy, most such difficulties have been culled from the code over the course of the years. In the great preponderance of instances in which there was substantial or irresoluble controversy, the code has sought to maintain the status quo as faithfully as possible.

No one, including myself, is in unanimous agreement with the provisions of the code. It is simply too large an undertaking to reasonably expect this. There are a number of provisions that I would just as soon not see in the code, or that are not included that I would like to see there—abolition of the exclusionary rule, for example. I would hope that my colleagues would bear these realities in mind when they consider this measure.

There are few pieces of legislation that are more expansive in their scope and more far reaching in their subject matter than the Criminal Code reform. And there are few pieces of legislation that deal with more emotional and more volatile issues than does the Criminal Code reform. While the code may not be a perfect one from the perspective of any individual Senator, I would hope that it would be recognized by each of them as a substantial contribution toward improving our criminal justice system.

Let me summarize the provisions of the code very briefly. I would recommend to my colleagues that they review the outstanding report that accompanied S. 1722 during the 96th Congress (Report No. 96–553) in order to be able to familiarize themselves with the specific provisions of this measure.

The code is divided into five parts. Part I, perhaps the most important one in many respects, contains a number of general provisions that relate to the interpretation and application of the remainder of the code. Part I contains provisions that would, first, articulate the purposes of the criminal law generally and of the code specifically; second, define more than 100 terms that are used throughout the code, in order to insure consistency and uniformity of definition; third, establish general rules of Federal jurisdiction. Section 205 is particularly important insofar as it represents the first statutory effort to outline the basis of and limits to the exercise of Federal jurisdiction held concurrently with the States; fourth, consolidate the various scienter standards throughout the present law into four well-defined terms, and establish rules for determining their applicability; and fifth, establish general rules of complicity liabiilty.

Part II contains the entire body of Federal penal law, apart from those involving violations of various Federal regulatory offenses. Each of the nine chapters in this part groups similar classes of offenses together, such as offenses involving international affairs, offenses involving government processes, offenses involving individual rights, and offenses relating to injury to persons.

In addition, it contains a number of offenses of general applicability, such as crimes of attempt, conspiracy, and solicitation. With respect to the sections included in each chapter—each of them referring to a separate criminal offense—the Code contains a clear and succinct definition of the offense, any defenses that might be applicable in addition to common law defenses, the jurisdictional predicates for the assertion of Federal jurisdiction; and the grading of the offense for purposes of determining maximum penalties.

Part III of the Code would introduce the major substantive change proposed—an entirely new system of criminal sentencing. In short, a new Sentencing Com-

mission would be established that would set forth sentencing guidelines for particular offenses, subject, of course, to the maximum penalties imposed by the code in each individual offense.

An individual, found guilty of a criminal offense, would then be required to be sentenced by the sentencing court to a penalty, such as a term of imprisonment, within the boundaries of the guidelines, unless it made an affirmative decision in writing to the effect that the defendant ought to be sentenced to a greater or a lesser sentence.

If the court's decision was to sentence the defendant to a greater sentence than the guideline, it would be subject to appeal by the defendant; it the court decided to sentence the defendant to a lesser sentence than the guideline, it would be subject to appeal by the government.

Any sentence to a term of imprisonment under these provisions would be determinate in the sense that the Code would phase out the concept of parole and gradually abolish the Parole Commission. An individual sentenced to 5 years' imprisonment would be required to serve the entire sentence—less good time—except under the most exceptional circumstances. Thus, it would be the sentencing court, not the parole officers, who would determine how much time, in fact, an offender would serve in prison as a result of his sentence.

There would be no more gamesmanship in which courts attempting to anticipate the decisions of the parole officers, sentenced individuals to far longer sentences than actually deserved in the expectation that the Parole Commission would shorten them to a more appropriate length. The honesty and integrity of the criminal justice process would benefit enormously, as a result.

Part IV of the code contains the various administrative and procedural provisions affecting the criminal justice system. Part V contains certain civil provisions closely related to the criminal justice system, such as those relating to civil sanctions upon racketeering activities.

CONCLUSION

There are few bills that have been misconstrued as badly as the proposed code reform. I am continually impressed by how much of the criticism of the measure has been generated from individuals and organizations who either wish that the present law was something other than what it is and are dissatisfied with a code that fundamentally reflects that law; or are simply unaware of what the present law is because of its present confused organization and are dissatisfied with the state of this law when it is drawn to their attention. I am sympathetic to the need to make further reforms in our criminal laws, but believe strongly that the code is not a vehicle to achieve any but the most widely supported changes.

Professor Louis B. Schwartz, the Director of the National Commission on Reform of Federal Criminal Laws, has noted:

Reform of the Federal criminal law is a project of awesome scope and complexity entailing not merely legal considerations, but also sensitivity to history, politics, social, psychology, penology, and the religious, economic, and ethnic tensions within this Nation.

This Criminal Code reform, if approved, will not only reflect the development of criminal jurisprudence in this country, but it will influence greatly the course of its future development. To that extent, it will influence the entire structure and fabric of our society. Thus, it is critical that this effort be a broadly based consensus effort, not one dependent upon the achievement of any transient political majority. The present bill represents such an accomplishment in my opinion.

Mr. KENNEDY. Mr. President, over 15 years ago a decision was made by the Congress to study the feasibility and desirability of reforming and modernizing our Federal criminal laws. More than a decade has passed since the Congress first considered comprehensive legislation to recodify the existing Federal Criminal Code. Today I once again join my colleagues in introducing legislation which is designed to bring an end to this ongoing debate over the reform of the Federal criminal law.

Mr. President, this bill constitutes the most important attempt in the history of our Nation to reorganize and streamline the administration of Federal criminal justice. The bill stands as the cornerstone of the Federal Government's commitment to the serious problem of crime in America. It follows in the wake of various State code codifications. In the past 25 years, a majority of the States have either reformed their criminal laws or are in the process of doing so. The Federal Government has a similar responsibility to act.

The bill introduced today is not a hastily conceived idea. Both the Senate and House have labored for years in an effort to secure a modern, just, effective Criminal Code. Special praise should be directed to Senators THURMOND, BIDEN, HATCH, DECONCINI, and LAXALT, as well as the House Judiciary Committee, Chairman RODINO and former Congressman Robert Drinan, Congressman THOMAS KINDNESS and the other members of the House Subcommittee who developed a Criminal Code reform bill in the 96th Congress.

The bill introduced today is the culmination of this ongoing effort by the Senate and the House. This bill has bipartisan support. n sponsoring this legislation, Mr. President, I am once again reminded of the dedicated and energetic leadership of the late Senator McClelland and former Senator Hruska in the entire codification effort. This bill—like all the previous Senate bills—builds on their work as members of the National Commission on Reform of Criminal Laws, chaired by the former distinguished Governor of California, Edmund G. Brown. The Brown Commission concluded, after close to 5 years of hearings and research, that a completely new comprehensive codification of the Federal criminal law was necessary. Piecemeal change was ruled out as inconsistent with the goal of genuine reform. The bill introduced today—like previous Senate reform bills—reflects the conclusion that a true reform effort requires a thorough and complete rewrite of all major Federal criminal laws. It is a comprehensive bill, a recognition that piecemeal reform is neither possible nor wise.

Why do we need a new Criminal Code? Judges, academicians, law enforcement personnel, and civil liberatarians alike have all agreed on the need for development of a comprehensive, logically organized, and internally consistent Federal criminal law. The 3,000 criminal laws on the books today have no standardized definitions or logical consistency. Offenses are scattered throughout all 50 titles of the United States Code. There are some 80 separate theft offenses and 70 counterfeiting and forgery offenses all with their own conflicting language and definitions. The interpretation and application of such multiple statutes inevitably results in inconsistencies, loopholes, and hypertechnicalities.

In addition, there are almost 80 different culpability terms used to describe the state of mind required for various offenses. These terms range from "wantonly" and "lasciviously" to "maliciously" and "corruptly." Such terminology helps breed uncertainty and disparity in interpretation and application of the law.

The current code is archaic. Many existing provisions should have been repealed years ago. It is still a crime to "impair military effectiveness by a false statement" even though this provision was historically used to harass war protestors and has not been invoked since World War I. In a lighter vein, it remains a Federal crime to detain a Government carrier pigeon. Such provisions are embarrassing to the very idea of an enlightened and respected Federal Criminal Code.

Nor is the current problem limited to the flaws and confusion of existing law. The omissions are also significant. The Federal criminal law currently lacks effective criminal provisions aimed at contemporary problems—such as organized crime.

Most importantly, existing Federal criminal sentencing procedures are in desperate need of reform. Every day Federal judges mete out an unjustifiably wide range of sentences to offenders convicted of similar crimes. One offender may receive a sentence or probation, while another—convicted of the very same crime and possessing a comparable criminal history—may be sentenced to a lengthy term of imprisonment. Even two such offenders who are sentenced to similar terms of imprisonment may become subject to widely differing prison release dates; one may be paroled after serving only a small portion of his sentence while the other may be denied parole indefinitely.

This glaring disparities, whether they occur at the time of the initial sentencing or at the parole stage, can be traced directly to the unfetered discretion the law confers on those judges and correctional authorities responsible for imposing and implementing the sentence. This sweeping discretion flows from the lack of any meaningful statutory guidelines or review procedures to which courts and parole boards might look for guidance. For example, a bank robber may receive

a judicially mandated sentence ranging from probation to a 25-year prison term, but it is the U.S. Parole Commission, not the court, that typically decides the point at which the convicted offender should be released.

Nor is sentencing disparity and uncertainty the only problem. Sentencing maximums are inconsistent and irrational. If one robs a federally insured bank today, a 25-year term of imprisonment is possible; but if one robs a post office, the maximum term is only 10 years. If one commits a minor mail fraud of $200 by sending three letters through the mail, 15 years can be imposed, but if a major $25,000 mail fraud is committed by sending only one letter through the mail, the maximum penalty is just 5 years.

And only occasionally, as if by accident, are the criminal fines imposed today related to the amount of actual injury inflicted or gain realized by the offender.

In plain terms, the present penalty structure of the Federal criminal law must be completely revised.

Mr. President, the Criminal Code bill introduced today is designed to deal with these and many other injustices found in current law. The bills completely reorganize the code in a logical and consistent manner. The numerous statutes relating to such crimes as arson and property destruction are consolidated. The new theft sections in the bills replace over 70 inconsistent theft and fraud statutes, with the penalty for the offense varying depending on the nature and value of the property stolen. Similarly, new forgery and counterfeiting offenses replace the numerous conflicting offenses found in current law, while 50 statutes involving perjury and false statements have similarly been consolidated.

In addition, each offense in the bill is described as a certain grade of felony, misdemeanor or infraction, as is common under most modern State codes. This provides a shorthand method of referring to the penalties and other sanctions or consequences that apply to the offense.

In place of the 80 current culpable mental states—all undefined—the bill defines just four: intentional, knowing, reckless, and negligent. This simplification will permit far greater clarity and uniformity.

The offenses are drafted simply, uniformly, and precisely. Verbose and technical language—such as that which appears in the current mail fraud statute—has been avoided. Instead, a conscious effort has been made to speak in common English.

The bill overhauls the entire sentencing process. It articulates, for the first time, the philosophical purposes to be served by a sentence—deterrence, incapacitation, punishment, and, to a more limited extent, rehabilitation—and sets out the factors that a court should consider in exercising its sentencing discretion. The bill would create a Sentencing Commission to develop a system of guidelines and policy statements designed to reduce sentencing disparity and uncertainty, and provide more rational and determinate sentencing practices. It phases out the existing parole system. Judges would be instructed to sentence defendants to terms that represent their best judgment, in light of the applicable guidelines, as to how long the offenders should actually spend in prison. The bill would, therefore, eliminate the current judicial practice of imposing inordinately long sentences designed to insure that the defendants remain incarcerated for at least one-third of their sentences, until they are paroled. Under the bill introduced today, the sentence imposed will be the sentence served—subject to limited time off for good behavior.

This legislation also proposes a comprehensive reform of the unsatisfactory two-century-old system of money bail. Under the two-key parts of this proposal, money bail will be completely eliminated, and persons accused of crime will be detained in prison prior to trial only if they are a danger to the community or likely to flee before their trial.

Our current system of bail is inadequate from the perspective of both the community and the criminal defendant. As written, the bail laws require a judge to release a defendant in noncapital cases prior to trial under those minimal conditions reasonably required to assure his presence at trial. Danger to the community and the protection of society are not factors to be considered under current law in the decision to grant bail.

Over the past 15 years, since the enactment of the Bail Reform Act of 1966, there has been rising public concern that our bail laws are not working. With increasing frequency, persons on bail are being arrested and charged with serious felonies—especially burglary, robbery, larceny, and drug offenses. In Washington, D.C., alone, the re-arrest rate has been a startling 22 percent, and the average rate of re-arrest hovers around 16 percent. The public is outraged that these violent repeat offenders, with lengthy records of serious street crime, are put back onto the street to rob and mug again.

Under our present system of bail, it is common knowledge that judges use money bail to detain defendants whom they believe will threaten the community even when there is no indication the defendant will flee. Indeed the major reason today for the pretrial detention of defendants is the inability to post bond. A judge knows that the higher the bond, the less likely the defendant will be released from jail prior to trial. Studies show that approximately 65 percent of the persons with bonds of $10,000 or more were jailed for the entire pretrial period. Thus, in practice, we have a system of preventive detention today, but it operates only against the poor.

In the legislation introduced today, we seek to establish a bail system which candidly and openly acknowledges the need to consider safety to the community, and which eliminated the present discrimination against the indigent defendant. Defendants who pose no danger to the community or risk of flight will not be unfairly sent to jail because they cannot afford to pay the cost of bail. No longer will wealthy drug traffickers be able to meet the money bail requirements, and then flee the jurisdiction. Instead this legislation will permit a judge, in determining whether to release a defendant, to consider both the likelihood of flight and of danger to the community without having to use any subterfuges to reach the legitimate objectives of detaining such persons before trial.

As one who has long been committed to preserving the civil liberties of all our citizens, I firmly believe that this provision strikes a fair balance between the rights of the accused under the Constitution and the rights of the public to be safe in their homes and neighborhoods. It meets the basic goals of law enforcement without infringing unnecessarily on civil liberties. Permitting a judge to consider danger to the community in determining pretrial release does not violate the constitutional presumption of innocence or the constitutional prohibition against excessive bail. The District of Columbia Court of Appeals, in United States against Edwards, recently upheld the constitutionality of the D.C. Preventive Detention Statute. As the court stated:

> Significantly, pre-trial detention is closely circumscribed so as not to go beyond the need to protect the safety of the community pending the detainee's trial.

In sum, Mr. President, I believe that this Criminal Code had the potential to become a historic landmark in the war on crime, and in our ongoing effort to fulfill the great goal of equal justice under law. It is up to the Congress—working in close conjunction with the Department of Justice, the American Civil Liberties Union, and interested public interest groups—to make criminal code reform a reality. I will continue to work closely with my colleagues in the Senate and the House in an effort to improve the bill and insure it promotes law enforcement without damaging the civil liberties of the American people.

Mr. President, we must make violent crime a top national priority this year. Crime is not a partisan issue but one that concerns the entire Nation. I urge my colleagues on both sides of the aisle to work together to enact this important part of a responsible Federal anticrime program.

Mr. DECONCINI. Mr. President, it is a privilege to join the distinguished chairman of the Committee on the Judiciary, and the majority of my colleagues on the committee, in cosponsoring and speaking on behalf of S. 1630, the Criminal Code Reform Act of 1981. Chairman THURMOND this year and Senator KENNEDY last year have performed yeoman services in preparing this mammoth piece of legislation and placing it before the Senate. I also believe that the staff of Senator THURMOND, especially Paul Summitt, who has spent many years working on the subject, should be commended for the excellent assistance they have provided to me and other members

of the committee in anticipation of the introduction of today's bill.

There is no question that crime and the Government's failure to deter it is of immediate and great concern to the American people. One of the prime reasons for the Government's failure to deter crime is our archaic criminal justice system and outmoded criminal law statutes. Today, again, we are presented in S. 1630 with a major piece of legislation to simplify and to modernize our Federal criminal laws to give the Government the effective tools it needs to protect society.

The Criminal Code Reform Act of 1981 is the culmination of 16 years of exhaustive study. Congress has held hearings on earlier versions of this act for 11 years. Thousands of pages of testimony from ...ing all possible perspectives has been taken and assimilated. Support for recodification of our criminal laws has come from Democrats and Republicans, conservatives and liberals, and everyone interested in a workable criminal law system. We have, I hope, at last reached the final step in this 16-year-old reform process with the introduction of S. 1630.

The 97th Congress has the opportunity to provide our citizens with a sensible, workable, and modern Criminal Code. I urge passage of S. 1630 at the earliest opportunity and pledge my continued effort to that end.

## RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I thank the Chair.

## URGENCY OF RATIFYING THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, the adage that time dulls all memory carries an ominous significance when applied to the Genocide Convention. In the succeeding years since disclosure of the holocaust atrocities, we have seen a growing willingness to let the holocaust's horrible significance fade from memory. Worse, we have seen efforts in recent years to distort its magnitude and even to deny that the holocaust did, indeed, occur.

Thirty-six years have now passed since the monstrous proportions of Nazi genocide came to light. For 32 years, the treaty which would condemn genocide as an international crime has stood before the Senate. Let us consider how our responsibility to ratify this treaty has changed over the years.

While these three decades have soothed the harsh memories of the holocaust, they have also made ratification of the Genocide Convention more imperative. A generation of Americans has grown up free from having witnessed genocidal horror, but no more protected from its repetition. In fact, we have seen the reappearance of bloodbaths and massacres approaching genocidal proportions in Cambodia, Nigeria, Rwanda, Uganda—and the list goes on.

My intention is not to dwell needlessly on the horrors of the past. My intention is that we should do our utmost to see that they do not occur again.

Mankind has sadly demonstrated that it has a continuing tendency to commit inhuman atrocities. This Senate has a responsibility to demonstrate a continuing commitment to condemn and punish the most atrocious crime of all—genocide.

Mr. President, the urgency of ratifying the Genocide Convention has become more pressing during the 32 years that this treaty has been before the Senate. The world has not grown saner or more humane, only less aware of how horrible genocide really is and somehow less aware of how common genocidal action is in spite of the fact that, as I say, we have had genocide in Cambodia, in African countries, and elsewhere.

Eighty-five other nations, including every other major country in the world, have ratified the Genocide Convention. I repeat, as I have repeated over and over again, every President since the Genocide Treaty came before the U.S. Senate—which was pushed by the United States to its success in the United Nations—every President, Republican and Democratic, has approved and supported the Genocide Convention.

Of course, at his confirmation hearing, Secretary Haig supported the Genocide Convention and called it an embarrassment to our foreign policy that the Senate has failed to ratify the Genocide Convention.

Action only awaits the determination of this body. I am hopeful that Senators will recognize the time has come for us to act on a treaty which is of the greatest importance to human decency and to the right of the United States to continue to be a leader in fighting for human rights.

So, Mr. President, we must announce to the international community that we have not forgotten the terror of genocide, that we stand prepared to prevent and punish it in the future.

For that reason, I urge the swift adoption of the Genocide Convention.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WALLOP). Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

## EULOGIES FOR ROY WILKINS

Mr. KENNEDY. Mr. President, last week the Nation heard many moving testimonials to the legacy of Roy Wilkins, whose patient, persistent prodding of the national conscience led us far on the road toward equal justice under law for all Americans.

One of the most compelling portraits of this extraordinary human being was provided by his close associate in the fight for human dignity, Arnold Aronson, with whom Roy Wilkins founded the Leadership Conference on Civil Rights over 30 years ago.

I ask unanimous consent that Mr. Aronson's eulogy for Roy Wilkins be printed in the RECORD at the conclusion of my remarks, so that my colleagues and the public may share his reminder of the truly great loss we have suffered with Roy's passing.

There being no objection, the eulogy ordered to be printed in the RECORD, as follows:

ARNOLD ARONSON'S* EULOGY FOR ROY WILKINS

Minnie, Roger, other members of the family, fellow friends and admirers of Roy Wilkins. Dear Minnie, you have honored me greatly by inviting me to speak on this occasion and I am profoundly grateful.

For almost 40 years now, I have been privileged to call Roy Wilkins my friend. I have worked with him, traveled, eaten and roomed with him. I have seen him relaxed and under intense pressure, before audiences numbering in the thousands and in small intimate gatherings. And as I stand here now, hundreds of images drawn from those shared experiences crowd my memory, blocking out, at least for the moment, the deep sense of loss that I share with all of you, and that I know I shall feel even more keenly in the days ahead. And so, at this time, I should like not so much to mourn his death as to celebrate his life with a few small personal reminiscences.

I remember a meeting with a hotel manager after we had been refused a room. It was an undramatic meeting in the usual sense of that term. There was no pounding on the table, no threats, not even raised voices. But when Roy finished speaking about human dignity and the meaning of democracy, the hotel manager, a native southerner, said, "Mr. Wilkins, I hope you succeed in getting a law passed that will make us all do what is right." No release about this incident was ever issued. Roy was never one to reach for headlines. But, I can tell you that hotel became the first in our Nation's capitol to open its doors on a completely non-discriminatory basis.

I remember Roy's first appearance on Meet the Press a quarter of a century ago. I was with him in the studio that day. Commonplace today, no black (Negro in those days) had ever before been invited to appear on a network interview program. Larry Spivack, the producer, approached the show with trepidation, fearful of irate reactions from bigoted viewers and timid sponsors. He need not have worried.

There was not a single such call. Instead, the switchboard was flooded with messages of appreciation and praise. I don't recall what Roy said on the program. It really doesn't matter. For he was not just a civil rights advocate. Then, as on so many other occasions, he was the personification—the living embodiment—of that human dignity

*Arnold Aronson and Roy Wilkins founded the Leadership Conference on Civil Rights, the principle lobbying organization for the 1957 Civil Rights Act; 1964 Civil Rights Act; 1965 Voting Rights Act; and the 1968 Fair Housing Act. The LCCR was founded in 1950 with Wilkins as Chairman. Aronson still serves as its Secretary.

that to him was the birthright of every man and woman.

And I recall the surprised look on his face when, after that broadcast, people would stop him on the street eager to shake his hand and to tell him how moved they had been by his performance. He seemed unaware that he was a national figure with the ability to inspire and motivate people by the sheer force of his words and personality.

I remember the Chairman at the 1960 Democratic Convention vainly trying to silence the spontaneous outburst of applause that followed Roy's movingly eloquent testimony of how segregation blights the mind and warps the heart—of the oppressor no less that of the victim. Roy's was always the quiet voice of reason. What is remarkable in this age of hype and hoopla is that, that voice was heard in an ever widening circle. And not only heard, but taken to heart and acted upon.

I still have the image of Roy trying to shovel his way out of a snowstorm that had brought all traffic to a halt in order to keep a speaking engagement. No matter that the audience was a small group of high school students. He had said he would be there and he would not go back on his word.

Roy received countless awards for his many achievements. More honorary degrees than perhaps any other American and none of those awards were in evidence either in his office or at home. Roy knew who he was and what he was; where he had come from and where he was going. Secure in his own self esteem, he had no need to surround himself with plaques and scrolls to impress others—or himself.

Most of all, I remember Roy's love for Min, a love that she returned in overflowing measure. Married for 52 years, Roy and Minnie were sweethearts even longer than that. The Talmud says that "Husband and Wife are like one fish" and all of Roy's public triumphs were also the private victories of Min, his strength and his support.

I remember, too, the many occasions when Roy knowingly and willingly subjected himself to personal attack and vilification because he insisted on speaking out for what he believed. When he urged passage of the 1957 Civil Rights Act, there were some, to their everlasting shame, who went so far as to accuse him of treason, of selling out to Senator Eastland. No one, not even the indefatigable Clarence Mitchell, had worked harder than Roy to prevent the bill from being whittled down. No one was more disappointed at the elimination of some of its vital features. But Roy knew that passage of that bill, the first civil rights bill in 82 years, would represent a breakthrough that might pave the way for subsequent and more far reaching measures. He knew that despite its limitations, the bill, for the first time, explicitly recognized the responsibility of the federal government for the protection of Constitutional guarantees. And so he took his stand and the vilification. The historic civil rights bill that followed in the 60's bear testimony to his wisdom, foresight and courage.

Long before those who attacked Roy for not being sufficiently militant were born, he was putting his life on the line to investigate the conditions of migrant workers in Mississippi, organizing demonstrations and marching on the picket lines. Those who attacked him for not being sufficiently aggressive, mistook his gentleness for weakness and his patience for acquiescence. They could not have been more wrong.

If the attacks pained him—and I'm sure they did—they did not deter him from his chosen course. Roy did not bend with the changing winds of fad and fashion; he was a man for all seasons. He believed that social change—significant change—does not come about spontaneously or overnight, but only through hard persistent work over time. And he acted on this belief throughout his life.

Roy has variously been described during the past few days as a great NAACP leader, a great black leader and a great civil rights leader. He was all of these. But he was much more. His vision was never bounded by any organization or group.

He believed that the struggle for equality is indivisable, that it cannot be won by any one group acting by or for itself alone, but only through a broad-based coalition of all who believe in human rights and human dignity. And so he helped create the Leadership Conference on Civil Rights, and for 25 years served as its Chairman.

Roy was secure and proud as a black and as an American. He said it best, himself, with his usual, quiet eloquence. "This is our land. And this is our nation. We are Americans, too." What he wanted for Black Americans was what he wanted for all Americans—nothing more and not a whit less—a free, plural, integrated, democratic society in which discrimination and bigotry shall be no more and in which all persons, regardless of birth, shall have an equal chance to live, to work, to play and to become whatever their talents and aspirations combine to make them. Despite frustrations and heartaches, Roy never lost faith that this vision of America could and would be achieved through peaceful, democratic means and within the American political system.

Roy Wilkins was an American son.

He was Minnesota, Kansas City, Mississippi, and New York.

His strengths were those of our nation.

And it is precisely because Roy was so thoroughly an American son that he was the fitting leader of the civil rights movement—our second American revolution.

Even when he saw the law trampled and misused by officials sworn to uphold it, Roy insisted in courtrooms and legislative halls across this land that under our Constitution we are a nation of laws, not of men.

Even when the nightriders and vigilantes struck, Roy insisted with his quiet force and determination that the noblest portion of the American spirit would in the end prevail.

In his life and work, Roy mirrored the fundamental moral strength of all those Blacks in the civil rights movement who refused to turn their backs on American democracy—no matter what the provocation. Roy Wilkins was an American son and his triumphs were a national victory.

When I think of Roy, I think of these words of Longfellow for they might have been written expressly for him.

"Were a star quenched on high
For ages would its light
Still travelling downward from the sky
Shine on our mortal sight.

"So when a great man dies
For years beyond our ken
The light behind him lies
Upon the paths of men."

We will walk in Roy Wilkins' light as long as freedom blesses our land.

Thanks for passing through, Roy. America and all of us are enriched for your having spent time with us. You are a model for your race—the human race.

## THE HIGH INTEREST RATES

Mr. BOREN. Mr. President, I have two items which I wish to address today in my continuing series of speeches on the devastating effects of high interest rates.

First of all, I want to enthusiastically cosponsor Senate Resolution 211, introduced yesterday by my good friend, the distinguished Senator from Texas, Senator BENTSEN.

For those who have not done so, I urge you to read the statement in yesterday's RECORD entered by Senator BENTSEN upon introduction of the resolution. It contains the kinds of statistics which I have been citing for the past several months regarding the effect of soaring interest rates on homebuilding, real estate sales, the automobile industry, farmers, small businesses, and other segments of our economy.

The resolution itself addresses the major cause of high interest rates in the United States today. That is the clamorous demand for credit in a marketplace whose dollar ability is limited by the tight money policies of this administration and the Federal Reserve Board.

Specifically, the resolution calls on the Board of Governors of the Federal Reserve System to undertake an aggressive campaign to encourage banks to stop providing loans or lines of credit for unproductive and speculative purposes, and to insure that consumers, thrift institutions, and the various productive segments of our economy have access to the cheapest credit possible. The resolution is aimed at the increasing number of corporate mergers which have been taking place in the past few years. For example, over 30 major businesses have been involved in mergers which have taken over $50 billion out of the available credit in this country.

Business Week magazine, in speaking of the Dupont purchase of Conoco, said:

Not a single new job will be created, not a single new barrel of oil will be discovered.

As Senator BENTSEN points out in his statement of yesterday, that merger alone took $4 billion in bank credits for an $8.8 billion purchase.

With these mergers taking huge amounts of available credit out of the marketplace, one is even more astounded by an article which appeared on the front page of today's Washington Post, in which the Chairman of the Federal Reserve, Paul Volcker, was quoted as saying that Federal deficits, including those of off-budget agencies, are absorbing one-half of the country's savings."

If you put together the credit lost by unproductive mergers with the one-half loss of savings in the country needed to pay for deficits on and off budget, what is there left for a young couple in Oklahoma to use to buy a house—or an automobile—or for a small businessman to expand his operation—or for a small farmer to borrow to plant his crop? It is easy to see the effect on interest rates.

And while on the subject of Mr. Volcker, I cannot let the opportunity pass to decry again the short-sighted, uncompassionate view Mr. Volcker, Treasury Secretary Regan, and others in the administration are taking on the immediate effect of high interest rates.

The thrust of Chairman Volcker's comments yesterday before the Senate Budget Committee was that the only effective way to bring interest rates down was to either cut more Federal spending, or raise taxes in order to eliminate the deficits in the Federal budget, thereby making more room in the credit marketplace.

While I have no quarrel with this view in the long run, I say again that it does absolutely nothing to solve the short-term problems that are driving individual and business bankruptcies to an all-time high.

By the administration's own reckoning, eliminating the Federal deficit cannot take place until 1984, and there is considerable doubt that it can be done even then. I believe that it must be done, but what happens to the citizens of this country in the meantime? The apparent answer of some in the administration is that they do not know, and they apparently do not care.

I fail to understand or comprehend why this administration cannot understand that the problem of interest rates is twofold—long term and short term. The eyes of the financial wizards in the administration are so fixed on the long-term goals that they cannot see that the economy is dying at their feet.

That, Mr. President, is both a monumental tragedy and the Achilles heel of the President's economic recovery plan.

I am reminded of that great ship, the *Titanic*, whose eyes were so set on reaching far distant New York in a record time. She never made it. She hit an iceberg right in front of her.

I ask unanimous consent to have the article in the Washington Post printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TIGHT MONEY TO CONTINUE, FED CHIEF VOLCKER SAYS

(By John M. Berry)

Federal Reserve Chairman Paul A. Volcker told Congress yesterday the Fed intends to stick with its tight-money policy to fight inflation, and warned that the only way to get interest rates down was to cut spending further or increase taxes.

Interest rates have stayed at near-record levels, Volcker said, because financial markets "are reacting to the harsh reality of continuing inflationary momentum and heavy current and prospective financing demands" arising from large federal budget deficits.

Volcker, in testimony to the Senate Budget Committee, said that "in voting tax reductions by large majorities, the Congress accepted the challenge of cutting the spending suit to fit the revenue cloth." The prospective revenue cloth is so shrunken, he declared, that "in terms of actions yet to be taken by [1984] you are talking, in round numbers, about $100 billion."

"Amid encouraging signs of progress on inflation, with your strong efforts toward expenditure control with firm monetary restraint in place, the markets seem to be expressing doubts," he continued. "But after all, Americans have not seen for many years a successful fight on inflation or balanced budgets or so massive a tax reduction. A lot of bets on the future are still being hedged against the possibility that you, and we, will not carry through."

President Reagan and his aides are putting together a package of spending cuts for fiscal 1982 of about $15 billion in an effort to hold the budget deficit at $42.5 billion. Cuts no larger than that more likely would produce a deficit of $60 billion or more, according to many analysts including those of the Congressional Budget Office.

CBO director Alice Rivlin presented numbers to the committee Tuesday generally agreeing that cuts of about $100 billion would be needed to balance the budget in 1984 even if the economy performs well in the meantime.

Volcker said the size of the federal budget deficit is more critical than in the past because total government borrowing needs, including those of off-budget agencies, are absorbing about half the country's savings other than that used to replace worn-out capital goods.

"The effect of a deficit on the economy and capital markets can only be judged in the context of a particular economic situation," Volcker said. "There may be relatively little risk of 'crowding out' in a period of high actual or potential savings, falling investment demands, adequate homebuilding relative to demands and low interest rates. But that surely is not the circumstances of today, in which we have a clash in the market among competing demands."

Volcker also rejected credit controls, which have been suggested recently by some congressional leaders as a way to reduce interest rates. Trying to ration scarce credit and savings by controls would prove "ultimately unenforceable [and] efforts by borrowers to protect themselves and consequent market disruptions would likely only make the situation worse," he said.

Short-term interest rates have fallen recently from their highs, but long-term rates have moved down only slightly. Several members of the committee expressed concern about the impact high rates are having on constituents. However, none called for the Fed to move to an easier policy stance.

Sen. William L. Armstrong (R-Colo.) said the situation involves "a human tragedy of immense proportions" with families doubling up in housing, children not able to go to college and even "families breaking up." Nevertheless, Armstrong advised Volcker, "Stick to your guns."

Several committee Democrats blamed the Reagan administration for the high rates. Sen. Gary Hart (D-Colo.) accused the administration of "promising the people they can have everything," including large tax cuts, higher defense spending, lower inflation and low interest rates even though neither Reagan nor Congress is "even close" to identifying the unspecified cuts needed to reduce budget deficits in future years.

Hart urged that the personal income tax cuts in last month's bill be postponed so the budget could be balanced within 24 months.

Asked by committee chairman Sen. Pete V. Domenici (R-N.M.) why interest rates have come down so little even though inflation has fallen "substantially," Volcker replied, "I would not use the adjective 'substantially.'"

"I would say we have moved the inflation rate down, oh, 1 to 2 percent," the Fed chairman said. Additional, substainable improvement in inflation will not come until wage rates begin rising less rapidly, he said. "At the very least, it is far, far too early to claim victory . . . Evidence of sustained decline is yet to come."

## JEFFREY WOODRUFF HUNT

Mr. MOYNIHAN. Mr. President, I rise to welcome Jeffrey Woodruff Hunt into the world.

Jeffrey is living proof that only good can result from close cooperation between the electronic and print media.

I congratulate Judy Woodruff of NBC and Al Hunt of the Wall Street Journal on the creation of America's first infant media mogul.

## THE NEED TO LIFT THE EXECUTIVE PAY CAP

Mr. STEVENS. Mr. President, for the past few days I have been appealing to the Congress to lift the executive pay cap which has existed to some degree since 1977. During a period of time when the law, except for our appropriations limitations, would have called for increases of over 33 percent we have only allowed these executives 5.5 percent. The reason cited for such caps has often been one of cost control. The significant point to note, however, is that there is little or no net cost attached to such an increase when all things are considered.

The cost attached to completely lifting the pay compression has been estimated at $270 million. As is often the case, however, all or most of the costs of such increases to capped executives could be absorbed by each individual agency. For example, in 1980 a pay increase to the general Federal employees of 5.5 percent was budgeted. Yet a 9.1-percent increase was finally adopted. The agency budgets absorbed the difference. Similarly, agency budgets would absorb the increase for executives this year. The cost to each agency would be relatively small.

In fact, the General Accounting Office claims we can save money by lifting the cap because in most instances costly retirements result from a continuation of the cap. The Office of Personnel Management estimated that as high as 67 percent of those at the pay cap retire within 1 year of retirement eligibility. Providing earned retirement benefits forms the largest single cost. The General Accounting Office illustrated this impact. Assuming a capped executive retires and his position is filled, the total salary and pension costs for the next 3-year period would be $243,166. If we raised the cap entirely for that individual including allowing him the projected increases of 4.8, 7, and 7 percent for the next 3 years, total outlays would be $175,593. Therefore, we save $67,573 for each such instance in which we can delay an executive's retirement. In fact, these savings pay for the increase of one or more executives who would not have retired.

If we aggregate the costs associated with those retiring, the figures show that lifting the cap can save money overall. Let me illustrate this saving potential by using some general data from both OPM and GAO. Approximately 6,000 execu-

tives are or will be eligible to retire by the end of 1981. If 67 percent of these executives do retire as the recent trend suggests, the cost for their retirement benefits will be over $120 million.

Additionally, it will cost between $80 and $200 million to replace these people either by moving people lower in the organization up or by moving people into the organization from outside Federal Government. The cost of retirement benefits and the salaries of the replacements for those who will leave range from $200–$320 million. The cost of lifting the cap is $270 million. Hence, in quantifiable terms, there is no cost by raising the cap.

This does not take into account the costs of recruiting replacements for executives who leave. The Department of the Navy quoted a price tag of $80,000 alone to recruit for four SES positions. The loss of productivity attached to the startup period of an inexperienced or new person must be costed as an intangible.

Finally, we can delay the cost of paying off retiring or resigning individuals for any accumulated, but unused annual leave to their credit. The net result of this analysis is, again, that the lifting of the pay limitation does not have to cost the Government any additional money. In fact, in many instances, it can potentially save money.

Finally, let us not forget the most basic intangible cost to the Government; that is, the loss itself of experienced, competent individuals such as these recent losses at the Tennessee Valley Authority:

The Director of the Division of Nuclear Power who took a job in the private sector at double his salary;

An assistant director of Nuclear Power who took a job in the private sector;

The second ranking executive in the electric power program;

An assistant director of powerplant operations; and

The two leaders of TVA's coal purchasing operation (TVA is the Nation's largest coal purchaser).

Mr. President, allow me to quote from a letter to me from the Chairman of the Board of the Tennessee Valley Authority regarding his loss of people,

TVA operates the nation's largest electric system and one of its largest engineering and construction firms. On a more direct basis than federal agencies generally, TVA must compete for executive talent with private industry in fields that suffer from a shortage of skilled personnel. TVA has never been a "revolving door" agency; and its losses in top executives are losses without replacements, especially with today's frozen salary levels. This situation could not come at a worse time. The electric utility industry generally is beset by rapidly increasing power rates, construction costs, demands for new capital, and the added complexities and requirements of nuclear power generation. These are extremely difficult problems to solve in the best of circumstances, and TVA is being prevented from acquiring and retaining the executive talent required to deal with them. The consumers of TVA power will ultimately bear the consequences.

Mr. President, TVA is not unique among Federal agencies in this regard. We must do something soon before it is too late.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

## AGRICULTURE AND FOOD ACT OF 1981

The PRESIDING OFFICER. The clerk will state the pending business.

The bill clerk read as follows:

A bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The Senator from Indiana.

UP AMENDMENT NO. 362

(Purpose: To delete the sugar title from the farm bill)

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Indiana (Mr. QUAYLE), for himself, Mr. TSONGAS, Mr. LUGAR, Mr. PERCY, Mr. ROTH, Mr. D'AMATO, Mr. HEINZ, and Mr. PELL, proposes an unprinted amendment numbered 362:

Beginning on p. 213, line 19, strike out all down through p. 215, line 24, and redesignate the remaining titles and sections of the bill, any cross references thereto, and the table of contents accordingly.

Mr. QUAYLE. Mr. President, this amendment strikes title IX of the farm bill, which is the section that deals with the reinstitution of the sugar subsidy. This subsidy has not been a part of the farm bill for a couple of years. I and a number of others think should it not be a part of the farm bill this year. I cosponsor this amendment with the distinguished Senator from Massachusetts, Senator TSONGAS. Other cosponsors of our amendment are Senator LUGAR, Senator PERCY, Senator ROTH, Senator D'AMATO, Senator HEINZ, and Senator PELL.

Mr. President, I suppose we could summarize the debate on this issue by saying that it is a small test—just a small test—of the degree of purity one desires to take in the advocacy of the free enterprise system.

We have heard a lot of discussion about the free enterprise system, not only in these Chambers but as we talked to our constituents back home. As a matter of fact, last November, many ran under this banner and advocated less Government. Our amendment to cut out a subsidy for 22 sugar processors shows that when it comes to less Government we mean less Government.

Mr. President, in my opening remarks on the farm bill, I argued that the principle we should follow in our discussions is to return agriculture to the market-oriented economy. Unfortunately, the sugar title of the bill now before us represents an unnecessary and totally unwarranted step backward toward more Government involvement in the farm economy.

The sugar title introduces a new program of mandatory price supports which is highly inflationary and damaging to our attempt to control the budget.

I might point out, Mr. President, at this point, that the original administration proposal in the farm bill did not include a sugar section. Now, everyone has a right to change his mind. But I would just like to point out for the record that, initially, the response from the administration was not to include the sugar bill as a part of the farm legislation.

Mr. President, in the past month two developments have added urgency to the need to avoid this costly new program. First, the world price of sugar has gone down and, second, the projected budget deficit has gone higher. These two events should be linked in our minds, because, if the proposed sugar program were implemented when world sugar prices are so low, it would add a new and totally unnecessary burden to the budget.

I would like to take a moment to show how the two events I have mentioned will interact to bloat the already oversized Federal deficit.

And I might just point out that in testimony before the Senate Budget Committee, of which I happen to be a member, the Chairman of the Federal Reserve, Paul Volcker, spoke of the confidence factor which appears to be lacking on the part of Wall Street, business, and industry around this country. Chairman Volcker spoke of a convincing factor; implying that the people in the money markets are not yet convinced that the Congress will seriously attempt to balance the budget by 1984. Because of this lack of confidence, or let us use the words "a convincing factor," which I do not really understand, it appears to me they are not even giving us a chance. But they clearly are not convinced now. Are we going to do something about the budget? Are we serious about eliminating programs that are not necessary? Are we serious about getting the Government off the backs of business and industry like we have been talking about and letting free market economics work?

In 1977, the last mandatory sugar program was instituted. The program was not renewed in 1979. The 1977 crop was placed under loan at 13.5 cents per pound and the 1978 crop at 14.7 cents. The processors who receive the loans have an incentive to sell their product and redeem the loan only when market prices exceed the support price. When world prices are low, the President has the au-

thority to impose duties and fees to raise prices enough to cover interest, transportation, and marketing costs. For the 1977 and 1978 crops, prices remained low even with the added duties and fees and over 660,000 tons of sugar were forfeited to the Commodity Credit Corporation.

The proposal now before us is for 18 cents per pound support price. If we add about 2 cents for interest and 2½ cents for transportation and marketing, we have a market clearing price of 22½ cents per pound. If prices go below this level, processors will have no incentive to sell their sugar. Instead, they will default on their loans and the Commodity Credit Corporation will again be stuck with huge quantities of perishable sugar. Under the proposed program, processors have an added incentive to forfeit because they do not have to pay interest on loans when they forfeit.

With world sugar prices now hovering around 11 cents per pound, the President would have to impose import quotas, duties and fees to keep prices high enough to prevent massive forfeitures. But the real problem is that the President does not have the authority to impose duties and fees large enough to raise prices above market clearing levels.

Let me remind my colleagues how the price support system works for sugar. Under section 201(b) of the Trade Expansion Act of 1962, the maximum duty that the President can impose is set at 2.8 cents per pound. Section 22 of the Agricultural Adjustment Act of 1933 sets the maximum import fee at 50 percent of the ad valorem price of sugar and limits quotas to 50 percent of the quantity during a representative period determined by the President.

What all this means to the proposed sugar program is simple. With a world price in the 11-cent range, the maximum import fee is 5.5 cents and the maximum duty is 2.8 cents per pound. These add to a total of 19.3 cents per pound, about 2 cents below the minimum market clearing price necessary to avoid forfeiture. Although it is hard to predict how much sugar would be forfeited, the numbers add up quickly. The budget outlay for a forfeiture of only 500,000 tons would approach $200 million. But the figure could be much higher since an average of about 2 million tons per year was placed under loan between 1977 and 1980.

Even a figure of $200 million is unacceptable when it goes to protect a small number of privileged producers and processors. But it is even more unacceptable when it comes at a time when we are facing another huge budget deficit. There is no national interest or national security in protecting the privileged producers and processors, but there is a national interest in reducing the budget and getting inflation and interest rates under control.

What is more, placing 2 million tons of sugar under loan requires the Treasury to borrow money from the public and thus help to keep interest rates at their damaging rates of 18 to 20 percent.

Mr. President, a recent article in the Wall Street Journal predicted bumper crops of sugar in Europe and South America. This almost certainly means that sugar prices will remain at their current low levels. In turn, this means that we can count on huge losses to the Treasury if the proposed loan and price support program is adopted.

We cannot ignore the realities of the present economic situation. We cannot legislate another program which will be a drain on the budget, which will push up interest rates and will add to the fires of inflation.

With a world market price of 11 cents or 12 cents per pound, the inflationary impacts of the proposed sugar program are indeed sobering. Each increase of 1 cent per pound in the price of sugar adds over $300 million to the consumer sweetener bill in the United States. Given current prices, the total impact next year alone from the proposed program would be $2.5 billion. Food prices have been one area of restraint during the past year, and an increase of this magnitude would reverse this favorable trend. The American people should not have to bear such an inflationary burden, especially at a time when our new economic program is beginning to reverse the decade-old trend toward higher and higher prices.

I would like to comment on another aspect of the proposed sugar program. As in the past, loans will be given not to sugar growers, but to the 22 processors who refine all domestically grown sugar. In past years, loans have been given at below market interest rates.

Processors have then invested loans in high yield money market funds for further profits. If the processor defaults on the loan, he does not have to pay interest. Not a bad deal. A lot of taxpayers and consumers would like to have that kind of a deal. This is an additional incentive for the processor to forfeit his loan and leave the high priced sugar on the hands of the CCC. Thus the sugar program actually encourages forfeiture. This is surely unacceptable as Government policy and sound economics. In times of inflation and budget deficits, it is totally contradictory.

There is one final aspect of the proposed program that I would like to consider. With world sugar prices at relatively low levels, the program will require the imposition of the maximum permissible duties, fees, and quotas to keep sugar prices somewhere near market clearing levels. Such protection of domestic producers could spark a cycle of reactive countermeasures by our international trading partners. Last year, the 10 leading sugar exporting nations bought over $19 billion in U.S. goods. My former colleague in the House of Representatives, David Stockman, who is now Director of OMB, recognized the danger of such protection for only 13,000 sugar farmers. In 1978, he rose in opposition to a similar sugar support bill then being debated in the House. He argued:

> I think the really central issue here is the fact that this bill is really a blatant, unadulterated, reckless venture into protectionism on behalf of a minor agricultural crop which accounts for about one percent of our cropland and two percent of the gross value of our farm production in this country. Yet, I think for U.S. agriculture as a whole, the undeniable bottom line is that we will not have long-range prosperity unless we substantially expand our export market and unless the United States exerts forceful and unrelenting leadership to dismantle the absolutely mad tangle of protectionist agricultural policies which exist around the world today.

Mr. President, in conclusion, we would indeed be reckless to legislate a new round of inflation and budget deficits when we are trying to reverse the tide of decades of wasteful Government spending and regulation. The American taxpayer will not abide more inflation, more Government regulation, higher interest rates, and bigger deficits to subsidize a few inefficient producers. I therefore urge all of my colleagues to support our amendment and to vote in favor of a return to a market-oriented economy and to a Government of fiscal responsibility.

I yield to the cosponsor of this amendment, the distinguished Senator from Massachusetts.

Mr. TSONGAS. Mr. President, the last words spoken by my colleague and cosponsor, Senator QUAYLE, concerned fiscal responsibility. That is an issue we have heard a great deal of in the last year or so. There probably is not a more interesting test of fiscal responsibility and "let the market prevail and take Government off our backs" than the farm bill. What we are dealing with here today is the question of whether, when push comes to shove, Members of the Senate are prepared to honor the words that we have all been uttering for many months.

I join with Senator QUAYLE in introducing an amendment to delete title IX of the bill, which mandates price supports for sugar. I believe that, given America's current economic problems, we must look at this particular program realistically.

After all the talk about cutting Government waste, it is time to apply fiscal restraint to the farm bill. The obvious question is, Why should the American people watch and know that the sugar lobby is the exception to the cuts that are being made every place else?

UNCLE SAM AS SUGAR DADDY

Uncle Sam is a kind of sugar daddy to this industry. Perhaps it could be accepted in normal times, but these are not normal times. It seems to me that the time has come to address the issue much more critically.

If this title remains in the bill, we will raise the support level for domestically grown sugar to not less than 18 cents per pound—increasing it one-half cent per year. This will feed inflation and adversely affect international trade. It is ironic that the Agriculture Committee advocates a costly new subsidy program

in the wage of the most drastic Federal budget cuts in history.

According to today's news, we have just begun. The committee has felt compelled to cut funds for school lunches while fattening up the sugar producers. Explain that around the country.

The world price for sugar is now averaging 14 cents per pound. Early in September it was less than 12 cents per pound. In order to maintain the loan level proposed by the farm bill, the market price would have to be at least 22 cents per pound. This figure includes the base price of 18 cents per pound plus the cost of storage, marketing, and interest.

Put another way, if the producer-processor could not get 22 cents per pound, what does he do? He gives it to you and me.

A 1-cent increase in the cost of sugar will add over $300 million a year to consumer sweetener costs. If this program is implemented this year, consumers will pay an additional $3 billion for sugar sweeteners.

We are aware that the price of sugar has gone through high and low cycles. It went through high cycles recently and most recently now going down to the 12- to 14-cent range.

But a nonrecourse loan program will not protect consumers during high price periods. Producers cannot control prices. There was a clear indication of this fact when sugar prices went from 40 cents per pound to 20 cents a pound between November of last year and May of this year.

Past experiences lead us to conclude that sugar producers are hardly consumer oriented. In 1980 when prices were high, the same sugar producers who are supporting this program thwarted efforts to give consumers relief. They successfully blocked passage of a bill by Representative VANIK that would have reduced the duty on imported sugar by a mere one-half cent per pound. The same individuals were responsible for delaying the U.S. ratification of the International Sugar Agreement. The ISA is the one vehicle that does provide some hope for protecting the consumer.

There are those who argue that this program is needed because the sugar market is so volatile. That is really an interesting argument to be made in this era when "let the free market prevail" is the current theology. I wonder what would happen if I got up on the floor and said, "My fishermen, my lobstermen, have a very volatile market. Will you help them as well?"

Would the same people come rushing forward and argue that that should be the case? I am not going to hold my breath.

I would remind them that the Secretary of Agriculture retains permanent discretionary authority under section 301 of the Agriculture Act of 1949 as amended to provide a loan program should the need arise.

So, even if this amendment passes, there is still a safety net in the sugar industry. Even that, in my opinion, violates the rhetoric of the last year or so. The safety net could be as high as 90 percent of parity. The authority has been used in the past and we have no reason to believe that it will not be used in the future.

We have heard the argument that this program will not cost the Government anything. This argument is mind boggling. It is based on the assumption that no loans will be forfeited. But who is to say that is going to be the case? Of course, if they are forfeited long after this debate, few people will go back and check. If a loan is already in place, who is going to be worried at this point? Loans have been forfeited in the past, which tells us it certainly can happen again. In 1977, over 200,000 tons of sugar were forfeited. In 1978, over 450,000 tons were forfeited. It is true that no sugar was forfeited in 1979, but prices were exceptionally high.

We have all acknowledged that the sugar market is too volatile to predict accurately what will happen. I suggest that my colleagues note the comments made by Senator QUAYLE on the production estimates and the export surplus that he quoted from the Wall Street Journal.

Who can say that we will always have the good fortune that we had in 1979? If only 100,000 tons of 1982 sugar is forfeited, it will cost over $39 million plus interest.

Even if we could be sure that the loans would be repaid, the Government would be forced to borrow an estimated $1 billion to finance the program. Considering the problems we are facing with exorbitantly high interest rates, I do not believe that we can afford to put this added pressure on the economy. Wall Street's cold reaction to the administration's economic package points to the problem of additional Federal borrowing. This sugar title will make a bad situation worse.

To the extent that we can preclude a billion dollar Federal intervention into the money markets, we are all better off.

The sugar industry plays a minor role in the overall structure of American agriculture. Less than 1 percent of the Nation's crop acreage is planted with sugar producing crops. Sugar farmers could easily switch crops. Better yet, they would increase their efficiency. Washington should not be in the business of subsidizing inefficiency.

SUGAR AND TRADE

Mr. President, our sugar policy raises the question of balance of trade with sugar producing nations. Senator QUAYLE referred to the $19 billion surplus we have with sugar exporting countries. Right now, we enjoy a trading surplus. The 2-year delay by the United States in implementing the International Sugar Agreement hurt its overall effectiveness. To ignore the good faith agreements of the ISA could strain relationships with our trading partners.

We are not, as some would suggest, "at the mercy" of sugar producing nations. Our imports are down and our production of corn sweeteners is expanding rapidly. Sugar is difficult and costly to store, and so it is not likely that these nations would try to take an OPEC stance.

SUGAR AND CONSUMERS

Over the years, sugar producers have often sought high price supports for sugar and have thwarted the Government's attempt to protect consumers. In recent months, as a result of high prices, sugar processors and producers have enjoyed near-record profits. They contend that without the loan program, they will face severe economic hardships. Actually, only 22 processors who refine all the sugar beets and sugarcane grown in our Nation will benefit from this program. The below market interest rates provided by the CCC go directly to processors. Are we to believe that these corporations will not use their nonrecourse loans for other purposes? These loans below market rates are hardly a protection for a struggling industry.

Mr. President, if anyone is struggling in this Nation, the American consumer is. Title IX of the omnibus farm bill is inconsistent with the objects of the administration and 97th Congress. This proposed increase in Federal spending—which will hurt the consumer and fuel inflation—cannot be justified. Therefore, I hope my colleagues will consider the needs of the average American and will join in support of this amendment.

I suggest that that sector of our society which has been the most affected in recent years is the consumer. I hope that concern for the consumer is not dead in this body.

Mr. President, I ask unanimous consent that editorials on this issue from the Boston Globe and the Boston Herald American be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Aug. 22, 1981]

GET THE SUGAR OUT

When Congress reconvenes after Labor Day, one of its first orders of business will be a farm bill that has even more icing than usual. It can improve the bill by eliminating one of the more flagrant farm giveaways, the sugar loan program.

The bill provides a loan system for domestic sugar producers of 19.6 cents a pound. Administrative and interest costs raise the wholesale cost to about 25 cents a pound. Domestic interests are protected by tariffs and fees applied to imported sugar, which has recently been selling below 19 cents in world markets.

Defenders of the sugar program claim a need for stability in planting programs if farmers are to be in the business when world prices surge, as they sometimes have in the past. They say the 16,000 affected farmers won't grow sugar at all unless they are reasonably sure of recapturing their costs. It is estimated by the U.S. Department of Agriculture that the sugar subsidy will add $5 billion to consumer costs over the next four years.

The subsidy was reasonable enough when essentially all sugar used in this country

came from either cane or beet growers, domestic or foreign. The fact is that sugar users now have important additional sources of sugar from corn, quite adequate for commercial users like bakers and soft drink bottlers. There are even indications that corn-based sugars may be convertible to granulated sugar for table use if new technologies are perfected. Corn is available in essentially unlimited quantities in this country and its price has been far more stable than sugar prices, providing consumers with assured supplies and promising reasonable promise of level prices.

In years when world supplies of sugar are plentiful and prices low, American consumers should have the option of benefiting, as they could not under the provisions of the sugar portion of the farm bill. In such years, diversion of corn from sugar production would have minimal impact on corn prices, from the farmers' point of view, since sugar would at most constitute a minor factor in corn markets.

A bill to drop the sugar title from the omnibus farm legislation has been filed jointly by Sen. Paul Tsongas (D-Mass.) and Sen. Dan Quayle (R-Ind.). If Congress really cares about consumers, it will endorse their proposal.

---

[From the Boston Herald American, June 15, 1981]

NUTS TO SUGAR LOBBY

Peanuts. Sugar. What do they have in common other than being the start of a good candy bar?

They are both the beneficiaries of an outmoded system of government price supports that are a double-barreled assault on most of us—first as taxpayers and secondly as consumers.

Under the peanut allotment system drawn up in 1938, farmers must either own or rent from an owner the right to grow peanuts on a particular lot of land. The federal allotment system specifies a maximum acreage and also prohibits the growing of peanuts in 16 states.

In an article in Friday's Forum page U.S. Sen. Paul E. Tsongas estimated that the system has cost taxpayers an average of $60 million a year for each of the last five years and about $1 billion during the past four decades.

And that doesn't even take into account the price consumers of peanut butter and other peanut products have had to pay over the years.

The sugar support program works differently but the end result is the same—as taxpayers and consumers, we are taking it on the chin again.

A bill currently before the Senate Agriculture Committee would raise the support level for domestically grown sugar from 16 cents to 19.6 cents a pound. About 40 percent of the sugar refined and consumed in this country is domestically grown.

To finance the sugar support program at the proposed higher level, the government would have to borrow an additional $1 billion, further aggravating the nation's inflation, both by the borrowing itself and by inflating the price of sugar, which is used in some 90 percent of all processed foods.

Opponents of the sugar bill—and they include such local industries as Revere Sugar, which depend on imported products for its refineries—say the proposal could add as much as $1.8 billion a year to consumer costs.

The chief beneficiaries of the sugar bill are a group of some 30 sugar processors, some of them multi-national corporations. The chief beneficiaries of the peanut allotment system are some 59,000 owners of the federal allotments, most of whom don't even farm the land themselves.

The Reagan administration has proposed abolishing the peanut allotment system and has opposed the increase in sugar supports. However, the Senate Agriculture Committee, headed by Sen. Jesse Helms (R) North Carolina, has apparently turned a deaf ear to this bit of cost-cutting.

The job of bringing some measure of equity to the budget-cutting process now belongs to the full Senate and House. If food stamp recipients are to be cut back, if school lunch programs are to be cut back, if the fuel assistance program is to be cut back, then surely it's time those who have been eating so well for so long give up a little too.

Mr. TSONGAS. Since those newspapers might be considered somehow inappropriate and somehow not conserative enough to be listened to, let me read from another newspaper, the Wall Street Journal, which is not noted for being a left wing organization. I quote from an editorial of June 15 of this year.

One of the biggest tests for Reagan budget cutters is coming from the farm lobbies, who have had some success in persuading House and Senate agriculture committees to restore benevolences the Reaganites want to take away. Their most remarkable and most implausible victories are on the peanut, sugar and dairy fronts.

The spinoffs could go beyond mere budget busting if this sort of thing gets out of control. For example, American taxpayers could find themselves owning ever-larger mountains of surplus dairy products. And they could end up paying dearly for sugar that Latin American and Caribbean nations would be more than happy to supply cheaper and with great benefits to our frayed North-South relationships.

The editorial goes on to other commodities. Then—

A different problem afflicts sugar. U.S. producers of both beet and cane sugar are confronted not only with producers abroad but also with sugar substitutes. For example, fructose made from corn is coming into wide use as a commercial sweetner. But rather than compete—

There is a word we have heard a great deal of lately, "compete"—

or switch to other crops, the sugar people want additional government protection. Poor little Caribbean countries wonder why the big colossus to the North preaches free enterprise and then denies them a potentially important market. U.S. sugar producers might ask themselves how long it will be, if they get their supports, before the government is eyebrow-deep in both sugar and butter.

The editorial concludes as follows:

The farm lobbies seem to think that they should be exceptions to the Reagan attempts to cut the federal budget and restore market competition generally. From the standpoint of political credibility, it would be a good idea for the Reaganites to push hard to try to prove to them that they are not.

The final point to be made, Mr. President, goes to the larger philosophical and conceptual situation in which we find ourselves today. Imagine you are a Democrat running for office in 1982, and you have a large number of constituencies that have been hurt by the budget cuts. The argument is used by the administration that the cuts have been even.

All you have to do is go up to all those senior citizens, all those students who cannot get loans, all those poor people who have been affected by the cuts, and point to the sugar lobby, the tobacco lobby, and all the other special interests like oil that have been protected.

It is an enormously valuable political tool, because the only way any nation is willing to absorb sacrifice is if there is a perception of sacrifice being absorbed evenly.

Let one special interest escape and the whole house of cards falls for lack of credibility. There is no example in this Nation's history of our society being prepared to absorb sacrifice unevenly.

Mr. President, if I were in the White House, I would desperately want the budget cutting process, the free-market rhetoric, to be understood but, most of all, to be perceived as fair. The administration did not have the sugar provisions in the bill for very obvious economic and political reasons. We all understand why they are in there now.

Mr. President, we are going to go through some very rough times, and there are going to be some people who are going to be hurt. It is in the interest of the stability of this Nation that the perception be real that the hurt is even, it is equitable, and that we do not have a system where protection is a function of special interests, of political contributions, of economic advantage. Once you have that, you have chaos and you have people in this country who will believe that the system is basically rotten and they have no stake in continuing it. That is where social unrest comes from, and that is where violence comes from.

In many ways the farm bill and these amendments have been helpful because they have proven beyond doubt that the commitment to free enterprise is selective. They have demonstrated that everyone is committed to free enterprise in somebody else's special interest area, but when it comes to ones' own particular interest, all the rhetoric, all the ideology goes down the drain, and what we have is sheer protectionism.

Mr. President, the American people are not stupid. They will understand this for exactly what it is. The impact of what we are doing and what this administration is trying to do will be corrosive in the long term and will cause damage that goes far beyond the wasted tax dollars and inflated consumer costs.

Mr. President, I will conclude by saying that those Members who represent sugar processors, and so forth, have an obligation to them. I can understand why they get up and argue for this title. They believe it is their duty to represent their constituencies, and an element of survival is involved. But they are not a majority of the Senate.

A majority of the Senate is committed to the marketplace, free enterprise, less Government intervention, decreasing the Federal budget, and decreasing the amount of money we have to go into the money markets to borrow.

It is in the interests of those who represent consumers, those who are com-

mitted to the theoretical approaches of this administration, and those who are interested in fiscal responsibility to endorse the amendment that Senator QUAYLE and I have presented.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that my name be added as a cosponsor of the Tsongas-Quayle amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, I should like to begin by addressing in general the farm bill, before I turn my attention to this amendment.

The Senate has heard a great many florid arguments, as it has heard in years past, about why farmers and the agricultural sector should be protected from the marketplace; but, fortunately, that argument is not as convincing as it used to be to a large number of Senators, and we are making some progress on exposing the agricultural sector more and more to the marketplace.

This is in the best interests of consumers, as Senator TSONGAS has pointed out. But, in the long run, it is also in the best interests of farmers, processors, and others in the agricultural community.

This Senator had few occasions to commend our last President, but one occasion on which the Senator from New Hampshire commended the former President was on the occasion of his deregulating oil prices.

Look at what has happened when we have allowed the marketplace to work in the energy sector. Our imports have fallen from over 50 percent to something like 27 or 28 percent. New forms of energy have been encouraged, alternative forms have been encouraged; and while we are far from being out of danger and out of the woods, we are in much better condition in the energy area than we were a few short years ago.

Why? One principal reason is that we have deregulated the production of petroleum. We have exposed the exploration for petroleum, the production of petroleum, and the marketing of petroleum to the marketplace, and the effects have been for anyone to observe.

Why, Mr. President, should the agricultural sector be excluded from competition and from the forces of the marketplace? There is no good reason, no convincing reason. Yet, some special interests and some lobbying groups would have us believe otherwise.

We have a whole host of schemes and scams in various agriculture programs to protect the various elements within that sector. The argument that the agriculture sector has been unique in its exposure to inflation and to high interest rates is one which is absurd on its face.

For example, would not the automobile dealers, who have to finance their inventory at very high costs in interest, like to have a program such as that of the sugar processors, who have a program under which they can finance their inventory through Government loans at considerably less than they would have to pay in the ordinary financial marketplace? Would not the automobile dealers like to have that? If sugar processors are entitled to such Government assistance, why are not automobile dealers allowed to have loan programs through the Government?

If they were unable to sell those automobiles, would they not like to be able to default on those loans and turn the automobiles over to the Government, to dispose of whatever way it could, or to store at great cost? Of course they would.

There is no logical reason why the automobile dealers should not have such a program, if the processors and farmers involved in sugar have such an advantage.

What about homebuilders? There is another element in our economy which has been badly hit by current conditions. Homebuilders are hurting. Would not homebuilders like to have deficiency payments?

If the demand for housing fell or the supply of housing rose and homebuilders could not make a sufficient margin on the homes, would not they like to have deficiency payments? Of course they would. Logically, they should have them, if those who grow grain and other commodities are entitled to such a program.

It is about time we exposed the agriculture community to the forces of the marketplace.

I will support every amendment to this bill that will accomplish that purpose.

I turn my attention now to the pending amendment with regard to the sugar loan program.

Mr. President, irrespective of the innocuous disguise this program may have, it is called a loan program, and that is how it operates. It is, in fact, a price support mechanism. In order to avoid getting stuck with huge quantities of sugar which have to be stored at considerable cost and cannot be sold easily, except at a penalty, the Government does all it reasonably can to keep up the price of domestic sugar, and it does so through adjustments to import duties. Because the United States imports about half of its sugar needs, the price of imported sugar sets the domestic price as well. Without the Government-maintained higher price of imports, domestic prices would not be as high in most times.

The Senator from Massachusetts has read a few editorials. I wish to add to that list.

The New York Times of July 2, 1981, had the following to say in part:

> Even the most zealous supporters of welfare for farmers should feel queasy about the cost of this program. Sugar is a relatively unimportant crop, representing just one percent of the acreage and revenues of the farm sector. And few sugar farmers are poor. In fact, most sugar is produced by multimillion dollar corporations.

A few days later, the Chicago Times called the sugar provision—

> An inflationary assault on the consumers' pocketbook which Congress should vote down even without White House encouragement.

The editorial went on to say that:

> Sugar producers think the Government should preserve their right to make money in good times and guarantee them a reasonable income in bad.

Mr. President, let us take a few minutes to review the factors that prompted such editorial ire.

First, there is the potential cost associated with a generous loan rate. Maximum duties and fees allowed by law might not be adequate to maintain sugar prices above the loan rate plus the "cushion." Therefore, high loan rates are very risky. The taxpayer demands that we do not take this risk of Government having to assume the burden in case of default, both the burden of storage and, until the commodity is sold, the risk of losing the money that was loaned to the processor.

Second, when the world's sugar supply is plentiful, the domestic price of sugar is supported through the imposition of import duties and fees.

In effect, the Federal Government artificially raises the price of sugar for all consumers. Of course, that is not just the price of sugar on the shelf of the grocery store. It is the price of every product in which sugar is used as a sweetener. For each 1-cent increase in the price of sugar, $300 million in additional consumer sweetener costs results.

It should be stressed that the loan rate is not the market price sugar must attain in order to prevent forfeiture of sugar stocks to the Commodity Credit Corporation. The market price objective is substantially higher.

Whatever the actual market price objective in a given year, the Government will take whatever action is necessary to keep sugar prices at this level in order to avoid forfeiture of sugar. In this case, it is the consumer who is left holding the bag.

At this point, the usual argument is that high loan rates are necessary to protect the domestic sugar industry. Oddly enough, the president of the U.S. Cane Sugar Refiners' Association, representing 11 refineries in 9 States, respectfully urged the committee not to include sugar provisions in the general farm bill. In testimony before the Senate Agriculture Committee, he stressed that:

> The loan programs, which have worked effectively for many of the other crops are simply not suited to the sugar crops because of the different nature of the industry and the dominance of production by large corporations.

Mr. President, one of the problems with a high sugar loan rate is that it results in high domestic sugar prices. These high prices are causing sugar users to turn increasingly to other sweeteners, most notably high fructose corn syrup. The corn sweeteners, which accounted for only 16 percent of our Nation's sweetener needs in 1970, accounted for 33 percent in 1980, and are expected to account for 48 percent as early as 1985. This development prompted the president of the U.S. Cane Sugar Refiners' Association to stress that:

> The sugar industry must be given a chance to compete in the sweetener market without being hampered by government policies that have the effect, however unintended, of pricing us out of business.

In short, although some segments of the sugar industry are supporting S. 884

as reported from the Agriculture Committee, this legislation may well be detrimental to sugar producers in the long run.

Mr. President, I support the amendment pending, and I commend the Senators from Massachusetts and Indiana for proposing it.

I have in mind another amendment, which I shall propose. I hope it will not be necessary. I hope this amendment will carry. It is frankly better than mine.

I urge my colleagues to support it.

I thank the Chair.

Mr. ANDREWS. Mr. President, I appreciate the opportunity to address the Senate on this issue of sugar price supports.

I shall depart from the norm to a certain extent and try to point out that this is a unique program. Quite frankly, it is not a farm price support program. It is totally different. I think we would be more correct calling it an antidumping act because that is exactly what it is.

Characteristically in agricultural commodity programs we attempt to maintain a certain level of production in this Nation and assure an adequate return to farm families for their commodities that are produced in surplus. This benefits the American consumer because if we have a surplus here at home there is an adequate supply of good and nutritional food and fiber.

But in the case of the sugar, that is not the case. We only produce 50 percent of the sugar that we use in the United States. The American consumer, I might add, buys sugar for less than sugar consumers anywhere else in the world.

Mr. President, we have heard a lot the past few months about a world price for sugar. That is a bunch of blarney. There is no "world" price for sugar. The price that has been referred to as the world price for sugar is the dump price of distressed sugar that has no home. It is sugar produced by a Latin American country or a central American country which generally contracts its entire crop to a European Economic Community nation at a price now in the neighborhood of 26 to 27 cents. In the case of Cuba, they produce for Russia and receive in the neighborhood of 33 or 34 cents a pound. If a sugar-producing nation should overproduce 5 or 10 percent—because it is getting 26 or 27 cents or even 30 cents for 90 percent of its sugar—it can afford to dump the excess at what then becomes the so-called world price.

That is why last year the so-called world price of sugar was 45 cents. These countries produced just about enough to fulfill their contracts, and they had to buy back from their contracts.

The price today is 14 cents. The cost of production in the United States is not that much higher than the cost of production in other places, but other countries have overproduced and are getting an equitable price—50 percent higher than we have recommended in the bill for American producers—for 90 percent or so of their crops. They can, therefore, dump the remainder that they had not been sure they were going to produce for almost anything that the market will bring.

I think that that does not make any kind of a case for a so-called world price for sugar.

We hear talk about the consumers being ripped off, and the increases going to a privileged few processors. Let me share with my colleagues in the Senate and those in the press gallery and those in the public that every sugar contract I know of in this country directs that any increase in price flows through to the grower-farmer. If this bill goes into effect and increases the price of sugar that increase in price goes back to the farmer. It is not retained by the processor who may in fact be a corporation. In my State we outlawed corporations from owning farmland and farming. We have an anticorporation farm law. Many other States have the same thing.

This does not accrue then to corporations. It flows through to farmers. They would be paid in the neighborhood of 18 cents or 50 percent of parity, half of what is fair.

Let me also speak to the case that was made that this would result in forfeitures that would end up costing the Government all kinds of money. Let us be honest. I cannot tell what this particular program will cost. But an identical program put into effect 3 years ago for a 2-year period called the de la Garza amendment for my former colleague in the House of Representatives from the great State of Texas was in effect 2 years and the Government made a profit from it.

We had a Sugar Act in effect for some 30 years and the Government consistently made a profit from the operation of the Sugar Act and the American consumer consistently got sugar for about 25 percent less than the consumers in other Western nations.

Mr. President, I think that we have to take a look at the fact that there are a number of unique things that have come about in sugar pricing since we last debated the issue of a sugar bill in the House of Representatives and in the Senate.

I happened to chair hearings on a sugar price support program earlier this year in the Agriculture Committee, and I remember hearing not only producers, processors, and farm organizations, but, yes, representatives of the candymakers, the confectioners, because they feel that the American consumer and their processing does not benefit from this rollercoaster—45 cents 1 month, 12 cents 10 months later—type pricing for sugar.

I point out that when the price of sugar went up to 45 cents a pound 4 or 5 years ago the price of a can of pop went up because they said the additional cost of sugar is there.

For some strange reason the price of a can of diet pop went up also even though there is no sugar in the diet pop. When the price of sugar came down to one-third what it went up to, did the price of a can of pop come down? No.

One can buy Baby Ruth candy bars in a half dozen shapes and sizes because they want to keep the price uniform. When the price of sugar goes up they decrease the size of the candy bar and they increase the size of that candy bar when the price of sugar goes down. That is why the Curtiss Candy Co., which makes Baby Ruth candy bars are in favor of this particular amendment because it represents a fair price for sugar and makes sure that they have an adequate supply here at home.

Let me address one other thing when we are talking about inflation. I voted for the budget cuts. I voted for the tax cuts. I am concerned about high interest rates. I am concerned about deficit financing, but the biggest problem with inflation today in America is the imbalance of payments that comes about because of the energy imports we have to import today from the OPEC countries. The $80 billion a year of purchases of OPEC oil are killing our economy.

If we pass a bill for farm price supports and forget to include sugar, we are going to see even more sugar plants shut down around this conutry. In the last few years we have seen five or six of the most modern sugar plants in the world shut down in the United States because they simply could not afford to continue to produce at these yo-yo prices.

That means we have to buy more from overseas. If we buy more from overseas, we spend those hundreds of millions of dollars for sugar that could just as well be produced here at home, we do not have it available to pay for the oil we have to import until we increase the production of energy here at home. That adds to the impact of inflation through increasing the imbalance of payments.

Mr. President, I think the Senate would be well-advised to recognize that these are unique times in our country, that this is not an act or a provision for a corporate few. It is a provision to allow domestic production of a commodity, a food commodity, that is needed.

It is a price that will enable production of sugar to continue in this country and will protect the consumers, the candy manufacturers, the pop manufacturers from the vagaries of a market that is here today and gone tomorrow. It addresses the fact that no nation's economy can survive for long if it allows its producers to be subject to the will of the dumpers of commodities that are temporarily in surplus, that tomorrow are in short supply.

We need to maintain a domestic supply of sugar. I have no problem if some of that supply moves into the corn.

That is a domestically produced product, and that is good, too.

But I urge my colleagues to vote for this provision in order to insure a fair break to keep the producers producing. But even more important, because we are all consumers, to assure the consumers of this country of ours a quantity of sugar at a fair price year after year.

It is a fair bill, it is an equitable compromise, and it deserves our support.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER (Mrs. HAWKINS). The Senator from Louisiana.

Mr. JOHNSTON. Madam President, it

has been said here on the floor that this support is for the big corporate interests.

Madam President, I want my colleagues to know that at least in my State and, I suspect, elsewhere, and my colleagues, I know, from Hawaii can speak for their State, I can tell you that in the State of Louisiana sugar is grown principally by small farmers. The average size sugar cane farm is 200 acres. That is not like, you know, the old depression 10-acre farm. It is impossible for anyone to make a living on a 10-acre farm now, but the average size is 200 acres.

It is true that the support goes to the mill. However, the mill, in turn—most of the mills, by the way, are cooperatives—the income stream goes from the mill to the farmers.

Now, just in case someone should get the idea that these mills are getting rich and ripping off the public, let me tell you that the number of mills is going down precipitately. In 1975 we had 36 sugar mills in the State of Louisiana. Right now we have 24 sugar mills in the State of Louisiana or just 6 years ago we had 50 percent more than we have right now.

Just last week a large sugar mill in Rapides Parish went under, went broke, went out of business.

What does it mean when a sugar mill goes out of business? It means that all the sugar farmers who formerly furnished sugar to the sugar mill also go out of production of sugar as well because unless you have a mill close by to which you can ship the sugar, sugar cane, you simply cannot sell it. Sugar cane is a very bulkly, a very heavy, commodity, and you cannot ship it from county to county or in our case from parish to parish. You must have a sugar mill in order to be able to grind your sugar, refine your sugar, and to which you can transport it.

So when I say in Rapides Parish a sugar mill goes under, it means that all of that production of sugar in Rapides Parish, the northern most production area for sugar in our State, all of that now is lost.

The thing about sugar, Madam President, is that it requires specialized equipment for the planting and, particularly, the harvesting of sugar.

There are two or three companies worldwide that make this expensive and specialized equipment, and when you are in the business and you own this expensive and specialized equipment, it is at some great expense and great cost that you acquire the equipment.

What happens when the sugar mill goes out of business? Well, you then have on your hands a great deal of specialized sugar equipment which cannot be used for anything else and which you cannot use for your crops. So what do you do? You try to trade it as secondhand equipment in the rest of the State, I guess, and keep in mind in the rest of the State we have gone down from 36 to 24 sugar mills, so you can imagine what kind of success you are going to have in getting rid of this secondhand equipment in an already depressed market.

You say, "Well, that is all right, let the free market work, and if there gets to be a demand for sugar, then Rapides Parish or these other areas will bo back into the sugar business."

Well, Madam President, it does not work that way. Once you have been burned, that is to say scorched, and you take your land out of the production of sugar, sell all this equipment, and keep in mind that we have been growing sugar in Louisiana for a couple of centuries, once you get out of business and sell that equipment you are not getting back in because there is always a market for soybeans or at least there always has been a market for soybeans, which does not take specialized equipment.

The risk is not nearly as great as it is with sugar. You do not have these huge up and down swings. You have a worldwide free market with soybeans, whereas you do not with sugar. Sugar is a subsidized market worldwide. I wish we had a free market in sugar.

(Mr. DURENBERGER assumed the chair.)

Mr. JOHNSTON. We would take that in a New York second, Mr. President. But the fact of the matter is that most of these big sugar-producing countries are subsidized. Brazil, for example, held up as the model of the great country that produces so much sugar, completely subsidizes its sugar industry.

Cuba grows its sugar for a closed market, for the Soviet Union. As a matter of fact, there is hardly a place in the world where the United States can really sell its sugar into a real free competitive market.

The question is, Is it important for us nationally to have some sugar-producing capacity? Well, I can tell my colleagues in my judgment it is very important. It is certainly important for the farmers growing the sugar cane and sugar beets, vitally important to them. But that really, I guess, at bottom is not a national interest as important as it is to us.

But it is a national interest that we have some industry in a sugar producing capacity.

We should have learned, Mr. President, from the events of 1973 and the action of OPEC in getting the stranglehold on this country in the importation of crude oil. At that time, we were importing only about 33⅓ percent, about one-third of our crude oil. Yet, we were strangled by our sources of supply.

Now, if we get completely and totally dependent on foreign producers of sugar, as, indeed, we could—and certainly we could in my own State of Louisiana if we do not get some kind of help here—I think it would place our country in a position to get absolutely strangled by manipulated, predatory pricing of sugar.

Mr. President, this is not a bonanza for sugar mills. It is a modest proposal that will save, in my State, the remaining two-thirds of the sugar mills we had in 1975. They are literally dropping like flies. As I said, a sugar mill went out of business last week, just last week, in Rapides Parish and with it all of the sugar farmers who are totally dependent on that bill.

If this bill, or something very similar, does not pass, I confidently predict, unless there is some sudden turn around in the market, that we will be back in here next year telling you not that we have 24 sugar mills but perhaps half that much.

Mr. President, I urge my colleagues to realize that sugar legislation helps, first of all, small farmers; that it is their link to survival and that production of sugar in this country is vitally important for our independence and for our economic health.

In a free market, our farmers can lick everyone else's farmers. But the world sugar market is anything but free.

To begin with, 80 percent of the 90 million tons of sugar used each year is consumed in the country where it is produced. Another 5 percent is grown to order—traded in closed markets, such as the Cuban-Communist block agreements.

Even the remaining 15 percent does not trade freely. Australia and Brazil subsidize their domestic industry heavily and do not permit imports. The EEC does not import from certain countries.

The United States buys one-fourth of the relatively small amount of sugar which reaches the open market. These purchases provide 45 percent of our sugar supply, and changes in supply or demand are immediately reflected in the price of this imported sugar.

Just as the slightest miscalculation in the angle of descent of a space capsule can cause it to veer dangerously, a relatively minor change in the supply/demand prospect for sugar can cause prices to fluctuate wildly.

In times of world surplus, cheap foreign sugar finds its way to U.S. markets—all other countries control imports—driving prices below the level at which domestic sugar can be profitably produced. The U.S. price for sugar dropped from a high of 60 cents per pound in 1974 to less than 10 cents a pound in late 1977.

What does this do to the American sugar growers and producers on whom we depend for 55 percent of our sugar supplies?

Sugar is a major U.S. agricultural product. About 800,000 acres of sugarcane and about 1.2 million acres of sugar beets are planted annually, generating about $3 billion in farm receipts. Sugar production ranks 10th in acreage and 7th in value among farm crops. Nearly 100,000 Americans depend on the domestic sugar industry for their livelihood.

Nor is it only the large conglomerates which are producing sugar. In Louisiana, sugarcane is largely grown on family farms in 18 rural parishes; for these farmers, it is the crop of choice, and the best, most productive use of their land.

Sugar production in the United States has been on the decline since 1975–76. Cane sugar production has fallen each year since 1975, and is expected to do so again this year. This attrition is reflected in the economy of Louisiana.

In 1973, Louisiana sugarcane farms numbered 1,290.

In 1980, there were 853, a drop of 50 percent. I am sure that my friends from sugar beet producing States could cite similar statistics. Between 1975 and 1980, 12 sugar mills closed in Louisiana.

A sugar mill represents a huge capital investment in plant and equipment, most of which cannot be used to process any other crop.

The loss of a sugar mill has a multiple adverse effect on the economy of a region: It can mean the end of sugar growing in the area served by the plant; and it means that workers lose their jobs in small towns and rural areas where alternative employment opportunities may not be available.

As these domestic producers go out of business, the United States is increasingly at the mercy of the unstable world market. A shortage can cause prices to rise dramatically as they did in 1974 and again in 1980, when world output fell to 84.6 metric tons from 91 million metric tons in 1979. Dollars spent to purchase domestic sugar remain at home; dollars spent abroad increase the U.S. balance-of-payments deficit.

The legislation proposed by the Committee on Agriculture, Nutrition, and Forestry which I urge the Senate to adopt requires the Secretary of Agriculture to support domestically grown sugar beets and sugarcane through March 31, 1982, through purchases or other operations at a level approximating a raw sugar price of 19.6 cents per pound. Effective October 1, 1982, the Secretary is required to support the price of domestic sugar beets and sugarcane through nonrecourse loans at not less than 19.6 cents per pound for raw cane sugar.

The President is encouraged to use his authority to impose duties, fees or quotas on imports in order to prevent excess buildup of stocks if the market price for sugar should fall below the price objective and loan level specified under the program. These fees and tariffs will provide a net gain to the Treasury.

There will be no budget exposure during the 1982–1985 fiscal years since loans made during a fiscal year will be repaid during that fiscal year. The sugar program will not require set-asides, since it is a deficit-produced crop, nor will it entail direct payments—returns to farmers will come from the market.

In short, the program is not a subsidy. It is a stabilizer.

It insures that the domestic sugar industry can survive, free of the threat of foreign dumping.

It encourages sugar growers and processors to invest in farm and plant technology to increase productivity. Assured of survival, the industry can plan for its future. An aging or obsolescent plant can be modernized, but a defunct industry does not readily come back to life.

It protects the American consumer from the rollercoaster effect on food prices of the volatile sugar market. Sugar is used in most bakery products and canned goods, as well as soft drinks, and large increases in sugar prices quickly show up in marketbasket costs.

It furthers the objectives of the International Sugar Agreement in which the United States became a full participant last year. The ISA prescribes international stock-building policies to dampen down world production and market swings. The sugar program described in title IX puts in place a domestic policy which will stabilize our own markets, thus complementing ISA efforts.

Establishment of the ISA amounts to an international admission that the world sugar market is not a free market. Sentencing our farmers and producers to operating unaided in that arena is like sending the hometown football team to play the Dallas Cowboys.

With title IX, we give them a fighting chance.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. INOUYE. Mr. President, before proceeding, I commend my colleagues from North Dakota and Louisiana for their brilliant demonstration of their knowledge of the sugar industry. My only regret is that most of our colleagues are not here to listen in on this debate.

Mr. President, I rise in support of the sugar provision now in the farm bill. Like my colleagues, I am greatly disturbed that many of the misconceptions and inaccuracies which have characterized this debate on the sugar program in recent weeks continue to persist. It is my hope that these misconceptions will be dispelled here today.

It is important that the facts regarding the sugar program be fully and accurately understood, because the facts clearly demonstrate the need for and soundness of the sugar program reported by the Agriculture Committee. I would like to take this opportunity to address briefly some of the more major concerns surrounding the sugar program which have been expressed, and at the same time explain my reasons for supporting the program.

Perhaps the most serious concern expressed has been over the potential budgetary and economic impact of the sugar program. It has been frantically argued that the sugar provision as currently written will fuel Government's deficit spending and also impose tremendous costs on the sugar consumer.

The facts are, Mr. President, that if the sugar program is properly and sensibly administered as intended, the program will cost the Government nothing, and, just as importantly, will not be costly to the sugar consumer.

Based on its own economic projections for sugar over the next 5 years, the Department of Agriculture concedes that the program even with a 19.6-cent-per-pound loan rate would not involve any cost to the Government.

Loans under the program would mature with interest during the same fiscal year as they were made and should thus not result in any budget outlays unless forfeitures occur. Forfeitures should not occur if the Government acts rationally.

At this juncture, I think it is important to recognize that the sugar program could well result in significant revenues to the Government. As pointed out by my colleague from North Dakota, during the original sugar act of the 1930's, which went on for 35 years, each year, consistently, the Government earned.

There was no outlay on the part of the Government. It was the most stable commodity program in the United States and it is too bad that it was repealed.

The loan program which was in effect during 1977 and 1978 resulted in a net gain to the Government on forfeitures of $67 million.

The potential impact of the program on the sugar consumer has also been exaggerated. Although the sugar consumer may be required to pay a higher price for sugar under the program at a time when the world price of sugar is depressed, the moderating and stabilizing effect of the sugar program will actually benefit rather than cost the sugar consumer over the intermediate term.

The sugar price support system had a major beneficial impact on consumer prices last year.

Excess sugar from the 1977 and 1978 crops had been stored by the Government for producers, and when world market prices increased from 9.7 to 42 cents per pound because of a drop in production in late 1970 and 1980, the Government put about a half million tons of sugar into the market. This action prevented the 1980 price from increasing more than it did.

Another major concern which has been expressed frequently is that the sugar program serves to protect and subsidize a narrow segment of producers and processors, which fosters inefficiency. It is urged that pure free market economics must be allowed to operate, no matter at what expense.

Again, Mr. President, I believe the facts put the lie to this notion. While the domestic sugar industry needs support, it is not because the industry is inefficient. The domestic sugar industry is as efficient as any in the world. The trouble it finds itself in is due largely to the fact that it has had to compete in a world market which under any definition cannot be classified as free.

Of the annual world sugar consumption of 90 million metric tons, about 80 percent is consumed in the country where it is grown. Two-thirds of the remaining 20 percent is subject to substantial trade restrictions.

About one-fourth of this residual market sugar is sold in the United States, and we depend on that market for 45 percent of our supply. The result is exaggerated swings in price following even small changes in supply or demand.

The so-called world price of sugar, to which the domestic price is tied, is subject to tremendous downward pressure by the dumping on the world market by the European Economic Community of its highly subsidized sugar. The forecast is that in the coming year the EEC will have available greatly increased volumes of sugar to dump on the market.

I think, at this juncture, we should recall when Mr. Castro of Cuba and the Soviet Union decided to manipulate this market in 1 year and by just playing around with their tonnage were able to raise the world market price three times. If that is what the world market

price is, I think we should learn about it at this juncture.

The United States is a member of the International Sugar Organization, and the International Sugar Agreement provides for a modest effort to stabilize world sugar prices by requiring members to withhold up to 15 percent of their normal sugar export quota in periods of depressed prices. The EEC is not a member of the International Sugar Organization or a signatory of the International Sugar Agreement. As a leading exporter on the world market, exporting almost as much as the United States produces domestically, the EEC has severely impaired any effectiveness that the International Sugar Agreement might have had.

Let me make it clear that the sugar production of the EEC is not at a lower cost than the sugar production of the United States. The production cost of the EEC runs almost 6 cents per pound over the world average. Our domestic industry is not seeking protection from the prices of a truly free market, but assistance against a subsidized dump market.

As my colleague from North Dakota put it so clearly, this is not a support program, this is an antidumping program. The world market price floor implied by an 18-cent-per-pound loan rate is well below the anticipated costs of production for sugar in fiscal year 1982 and for the life of this bill.

Thus, the sugar program will not provide incentive for increased production even for those domestic producers and processors who are more efficient than average. It will merely keep efficient producers in business in periods of low prices on the world market. The program certainly provides no incentive for increased production to inefficient producers.

Because of the extreme instability of the world sugar market, and the price uncertainty this creates, U.S. sugar producers and processors have not had the incentive to invest in new, more efficient sugar production technology.

The continued absence of a sensible sugar program will mean increasingly escalating production costs due to a lack of investment in production and processing technology, and the slow demise of the sugar industry.

The negative consequences of this occurrence will be borne by the sugar consumer, not only those who directly consume sugar but by those who use sugar as a factor in production. Consumers will become completely reliant on another world market over which we have little, if any, control.

My colleague from Louisiana very clearly discussed this point.

Mr. President, I would like to close by attempting to convey to our colleagues the importance of the sugar industry to our Nation, and the broad impact our failure to approve an acceptable sugar program would have. It is important to realize that this is not a small industry confined to a limited section of our country. Sugar beets or sugarcane are produced in 17 States, spanning almost every geographic region of our country.

In each of these States, sugar is an important economic and agricultural factor. Our domestic sugar industry employs over 100,000 persons and contributes over $10 billion annually to the gross national product of the United States.

The critical potential consequences of our failure to enact a sugar program can be illustrated by a situation I know best, that of my State of Hawaii. About three-fourths of all the cropland in Hawaii is in sugar.

There is no feasible alternative to sugar which would provide the jobs that the local sugar industry does. A demise of the local sugar industry would mean immediate unemployment rates in excess of 35 percent on some of our neighbor islands. The resulting costs to Government would vastly exceed any estimates of short-term consumer benefit the lack of a sugar program could ever be expected to provide.

Mr. President, we are at a critical juncture. The United States is the only sugar-producing country in the world without an effective Government support program.

I firmly believe that we can no longer reasonably expect our domestic sugar producers to compete in a world market against prices which are manipulated according to government policies of foreign sugar-producing nations.

The average cost of production for sugar in the United States is approximately 24 cents per pound, exclusive of land costs. No American sugar producers can even break even at today's sugar prices which are well below 18 cents per pound.

Thus, even a 19.6-cent-per-pound loan support provision is not asking very much.

I think the facts clearly indicate that the sugar program is in the best interests of both sugar consumers and producers, and I would strongly urge our colleagues to support the sugar program.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mrs. HAWKINS. Mr. President, I rise in opposition to the amendment offered by Senators QUAYLE and TSONGAS, which could have a devastating impact on our domestic sugar industry. As you have heard from my colleagues on the committee, after many hours of caucusing last week, the committee agreed to a package which we feel, despite cutting expenditures to the bone, is fair and equitable to both consumers and producers alike. The reductions agreed to by the committee are further evidence of the committee's support for the President's goal of balancing the budget; however, we feel that every commodity in the bill has taken as much of a reduction as producers could possibly withstand.

Such is the case with sugar. As you know, the Senate Agriculture Committee included in S. 884, a nonrecourse loan program for sugar, to help moderate the wild sugar price fluctuations which adversely affect producers and consumers alike. The original committee version called for a 19.6-cent loan program to processors which would provide a floor for the domestic sugar producers while insuring a stable supply of sugar to consumers. With grave reservations as to the severity of the reductions, however, the committee agreed to lower the loan rate for sugar from the original 19.6-cent loan level to a much lower level of 18 cents in 1982 with increases of one-half cent for each of the remaining years of the bill. With the cost of agricultural production increasing an average of 14 percent each year, the one-half cent will help offset these dramatic increases in production costs.

It should be pointed out that the loan program established in the bill is not an entirely new program for sugar. The loan established in S. 884 is very similar to the loan program in effect for 1977 and 1978, a program which actually earned $67 million for the Treasury while stabilizing the price of sugar for consumers. The loan level established for sugar in the farm bill is very much in line with the levels for other commodities and, in fact, the loan level for sugar is a lower percentage of the cost of production than for most of the other commodities. In addition, the program is very simple: It requires no set-asides, no direct payments from the Government, it would not accumulate a burdensome surplus, nor would it impose any marketing costs on the Government.

Further, because the loans would be required to be repaid in the same fiscal year as in which they were made, the entire program would not cost the Federal Government one red cent. Imagine that—a Government program that not only is free of cost, but, in fact, may bring millions of dollars in revenue to the Treasury.

Let me explain my last statement. Sugar is the only commodity in the farm bill which the United States is forced to import. In fact, the United States must import close to one-half of our domestic needs. Like many other strategically important goods, the United States has traditionally applied tariffs and duties on imported sugar to prevent the dumping of foreign sugar at the expense of the domestic producer. For every cent of duties and fees currently imposed on this imported sugar, approximately $90 million in revenue is collected by the Treasury. Therefore, passage of the modest sugar loan provision, properly administered, with fees and tariffs, will help maintain a viable domestic industry while helping the American taxpayer.

The committee's sugar provision has widespread support from both producers and users. Many of America's industrial sugar users recognize the importance of maintaining a strong domestic sugar industry. Coca-Cola, the National Confectioners Association, and numerous other sugar users support the committee's sugar provision because they recognize that a stable supply of sugar is well worth a small increase in the price which may result. And, in the long run, it is to the advantage of all users that we insure a viable domestic sugar industry so that we are not at the mercy of foreign sugar producers. Unfortunately, an organization of Latin American and Car-

ibbean producers called GEPLACEA, which supplies 75 percent of America's sugar imports, has the potential to become a sugar cartel much like OPEC, the oil cartel. The fear of this sugar cartel is real: Former Secretary Bergland once stated that the price of sugar in the United States is not established domestically, and if a sugar cartel decided to withhold sugar from the United States, consumers would suffer. And, if they decided to swamp the country with sugar, domestic producers would be driven from the industry and over the long run, consumers would then be totally dependent on the outcome of the marketing practices of foreign suppliers.

The question becomes: Do we want to take action to protect sugar producers and consumers today, or allow the United States to be forced to pay whatever price foreign producers dictate to us?

Let me continue. The need for a domestic sugar program to minimize the peaks and valleys in sugar prices has never been more evident. Domestic sugar production has steadily decreased since the demise of the Sugar Act in 1974. Since 1974, a full 25 percent of the sugar processing industry has been forced out of business because of these great price fluctuations. History has shown that once these processors are forced out of business, sugar production in the area is eliminated and never returns. This decline of the domestic sugar industry jeopardizes employment for nearly 100,000 taxpaying Americans who depend on the domestic sugar industry for their livelihood. And in many rural areas, there is no other means of employment, so when the sugar processing plant goes out of business, many of these workers are forced into unemployment lines and their families on to the food stamp and welfare rolls at additional cost to the Government. And, of course, the closing of these plants has a ripple effect throughout the region. Each dollar of sugar income lost must be multiplied through its impact on those who service and supply the industry.

In addition, declining domestic sugar production and resulting huge imports of sugar from abroad have created a balance-of-trade deficit for the United States. For example, last year, the balance-of-trade deficit from sugar imports approximated $2 billion. Mr. President, had the Nation's entire sugar requirements come from abroad, the balance-of-trade deficit could have approached $5 billion. Further, USDA reports that had there been no U.S. sugar industry during the most recent worldwide shortage, the world price of sugar would have increased several hundred percent. This is because only a small minority of sugar traded in the world market is available for purchase by American importers due to long-term contracts which tie up vast quantities of sugar, and therefore, there is relatively little sugar freely traded in the world sugar market. Consequently, a small increase in the price of the sugar that is available to U.S. importers causes great price increases to American consumers.

As you know, Mr. President, sugar is one of the most volatile commodities traded on the world market today. In the past year alone, the price of sugar has fluctuated from over 60 cents a year ago to 11 cents today. When one talks about increased sugar costs for consumers, ask yourself this: Has the price of sugar products decreased to one-fifth of their former costs in the past year? Strange, that sugar products have increased in price despite the great decrease in sugar prices. Sugar users often use the increase in sugar prices to justify their increases in price passed on to consumers. However, they do not decrease their prices as the price of sugar declines. I say to the Senators, ask yourselves this: Since increased sugar prices are passed on to consumers and decreases are not passed on to consumers, is it not in the best interest of consumers to take action to bring stability to sugar prices?

Recognizing this need, several years ago, the United States signed the international sugar agreement, an agreement by sugar-producing countries with the goal of stabilizing the price and production of sugar in world markets. Unfortunately, this agreement has not been successful as witnessed by the wild fluctuations which have occurred since its inception.

However, other sugar-importing countries have recognized the need for a program and have taken action to stabilize prices for their producers and consumers. In fact, the United States is the only importer of sugar which does not have a program in effect. In behalf of producers and consumers alike, I support the sugar loan program established in the committee farm bill. With the loan program established in the committee bill, the detrimental effects of the world fluctuations in sugar prices will be minimized to the advantage of both producers and consumers. By helping to insure a strong domestic sugar industry, we will prevent Americans from becoming entirely at the mercy of foreign producers and a foreign sugar cartel.

I thank the Chair.

Mr. LONG. Mr. President, I congratulate the distinguished Senator from Florida for a very eloquent speech on the need of this program in sugar.

I congratulate my colleague (Mr. JOHNSTON) for the fine statement he made. I also congratulate the Senator from Hawaii and the Senator from North Dakota for the fine statements they made on this subject.

Mr. President, we ought to proceed on the basis that a farmer is a farmer. I know in Louisiana, most sugar producers produce nothing but sugar. I am sure that is true in Florida and in other areas. They pay their taxes, they work hard and they support this Government. They do what they can to help sustain this Government and make their sacrifices in good times and bad.

Mr. President, when we undertake to benefit from a so-called world market price, which, as the Senator from North Dakota has said, is a dump price—that is the price sugar people get when they do not have a contract for a market—it means we put our farmers out of business.

We are not doing that, Mr. President, with regard to those who produce other commodities—corn, wheat, cotton—and we should not do it to those who are sugar producers, just because they happen to be smaller in number than those who produce other commodities.

Mr. President, our experience has been that when this Nation, or the world, for that matter, had the benefit of disastrously low sugar prices in 1 year, it had to pay ridiculously high prices in subsequent years. A very low price in sugar brings a very high price in its wake. The reason for that is simple: When a price is very low, as it is now, people who suffer that disaster go out of business, so there is much less sugar available for the following year. So, in the wake of ridiculously low prices come these higher prices, not a few cents but more near to a dollar, which we can expect because there is not a reduced supply of the commodity.

What we are asking in this bill, and I support the committee amendment, is a great deal less than the producers asked. They are hoping they will get a price that is about 80 percent of production costs. What we have here is what amounts to about 70 percent of their costs. If we go any lower than that, Mr. President, we are going to put a lot of farmers out of business.

I can recall a few years ago, when I met with the sugar farmers of Louisiana in a similar situation. I was chairman of the Committee on Finance at that time. The Finance Committee then had jurisdiction of the Sugar Act. I really had a bad day of it, because those people were suffering—especially the small farmer. The smaller the farmer, the more critical their conditions were and the more difficult it was for them to understand that, as one from a sugar-producing State, this Senator was doing the best he could to help them with their problem. When the fight for the sugar bill was over that year—it passed the Senate, but failed in the House—the man who had presented me to that audience on that occasion said, "Well, Senator, you won't have near as many farmers to quarrel with next time, because a lot of those farmers are going to be gone." And so it was, Mr. President.

I notice that in 1974, in the cane area, we had 4,300 sugarcane farmers. Those who are advocating the kind of amendment we are discussing now were successful in putting many of those people out of business, because we have 3,060 now. This is a loss of 29 percent of those who were in that business.

If these people are all put out of producing sugarcane, most of them will, somehow, stay in farming. As the Senator from Louisiana, my colleague, BENNETT JOHNSTON, stated, in the main, they will move over to soy and produce soybeans—under a price support program, where the Government will support the price to try to help farmers stay in business in good times and bad. They will not have anything like the labor that they would have if they were producing sugarcane. It is my impression that it takes about five times as much labor to produce an acre of sugarcane as it does

an acre of soybeans. Most of those workers are low-income workers. The majority of them are black. They have limited skills, they have nowhere to go. They will be on welfare, they will be drawing food stamps, they will be costing the taxpayers money.

I say with confidence, Mr. President, it will cost the taxpayers a great deal more money to put these poor souls out of their jobs, put them on the welfare, put their families on the welfare, make distressed welfare wretches out of these people, than it would to continue their opportunity to work to make an honorable living the way everybody prefers to do in this great land of ours.

These people, no less than other Americans, deserve the consideration of their Government.

Why should we be importing sugar at dumped market prices, costing Americans their jobs by the tens of thousands?

All we ask in this provision is that we have the same sympathetic consideration for farmers and farm laborers in the area of sugar production that we would seek to provide in the area of corn, wheat, cotton, and the other crops covered by this bill.

I hope very much that the amendment will not be agreed to, because I believe it would be very much against the national interest.

Mr. MATSUNAGA. Mr. President, I rise to strongly oppose the Tsongas-Quayle amendment.

The proponents of the amendment raise a number of points:

First, that the proposed sugar legislation reported by the committee is strictly for the special interest groups and sugar lobbyists.

Second, that the taxpayer will be forced to pay for the cost of the sugar program.

Third, that consumers will pay higher prices for sugar and will be at the mercy of sugar interests.

Fourth, that the sugar program is a sugar storage program of domestically produced surplus sugar; and

Fifth, that we should let the free market operate in the sugar industry.

Let us examine each of these arguments and look at the facts of the case.

First, that the proposed sugar legislation is for special interest groups and sugar lobbyists: There are special interest groups, yes, but the special interest groups consist of family farmers, field workers, sugar refinery employees, and other laborers whose very livelihood depend on the continuance of a domestic sugar industry—1,000 of them.

Even in Hawaii, whose general image abroad is that every bit of sugar is produced by big corporations, 500 independent family farmers are involved in sugar production. An additional 8,500 laborers are directly employed in the industry itself, and about 21,000 more work in related services and industries which could not exist without the sugar industry. Because Hawaii produces 20 percent of the domestic sugar produced in the United States, Hawaii would lose as many as 30,000 jobs if the Congress should allow the sugar industry to go bankrupt, and unemployment rate in Hawaii would double, to 15 percent.

It can be clearly seen why laborers and labor unions, too, support the sugar provisions of the pending farm bill.

Proponents of the Tsongas-Quayle amendment argue that the sugar program is designed to keep inefficient sugar producers in business at taxpayers' expense and at the expense of poorly paid sugar workers. The truth of the matter is, Mr. President, that in Hawaii, the minimum wage of the lowliest sugar worker in the field is $5.60 an hour, including fringe benefits. That certainly is not a starvation wage, and I am sure I do not need to remind my colleagues that the federally established minimum wage is $3.20, which is far below the minimum wage paid the sugar worker in Hawaii. For this reason and others, labor is for the pending sugar legislation.

As to the point which the proponents of the amendment make, that the taxpayers will be forced to pay for the sugar program, let us look at the history of the sugar program.

During the 40 years from 1934 to 1974 when the Jones-Costigan Act was in effect, the sugar industry paid into the Federal Treasury $600 million over and above the cost of the sugar program to the Federal Government. Sugar is the only agricultural commodity which has been paying taxes in the processing of the product. That should be clearly understood.

Even during the short period of the de la Garza amendment, which went into effect in 1977, the sugar industry paid into the Federal Treasury more than $6 million over and above the cost of the program. What is the taxpayer having to pay? I ask the proponents where they gather their facts to show that the taxpayer will be paying for the sugar program. History shows that the taxpayer has in fact profited from the sugar program and saved from paying additional taxes which would otherwise have had to be paid.

As to the argument that consumers will be required to pay a higher price for sugar, should the sugar legislation be passed: An example was given here that consumers will be paying a higher price for sugar, just as they now do for oil, unless we force sugar into the free market. Well, here again, the facts show that consumers have benefited greatly by the Sugar Act. Let us just look into the experience of the past.

During the period from 1934 to 1974, when the Sugar Act of 1934 was in effect, the price of sugar was stabilized to a range between 9 cents and 15 cents a pound, except in only two isolated years of the 40-year period. Only in 2 years, because of the extreme shortage of sugar produced in foreign lands, the price of sugar was in excess of 20 cents or thereabout. But when the Sugar Act of 1934, as amended, was repealed in 1974, the price of sugar skyrocketed to 67 cents a pound; and prior to the enactment of the Jones-Costigan Act in 1934, the price of sugar used to range from 2 cents a pound to $1 a pound. Because of the absence of stabilizing legislation, the consumer, from month to month, and sometimes even from week to week, did not know what he or she was going to pay for sugar.

The Jones-Costigan Act lent stability to the price of sugar, so that not only industry and family farmers, but also labor organizations could plan for the future. Knowing that the price of sugar would be stable from year to year, and they could bargain and negotiate with that comforting thought in mind.

"But the sugar program is a surplus sugar storage program," the advocates of the Tsongas-Quayle amendment argue.

The point that needs to be remembered is that unlike other agricultural commodities which are covered under the farm bill, sugar is an import commodity, not an export commodity. Domestically we produce only 50 to 55 percent of what is consumed in the United States. We have no surplus of domestically produced sugar. The only reason we have a surplus from time to time is that there is an uncontrolled so-called "world market sugar," which is really a dump market, foreign-produced surplus sugar.

Opponents of the sugar program talk about the need for an "open market" and leaving it to the operations of the "free market." Where sugar is concerned, there is no free market. Eighty-five percent of all sugar produced in the world is controlled by some internal or international law. The 15 percent which is not controlled is what causes the trouble, and that is what we are trying in the farm bill to protect our home industry against.

The cost of producing sugar in the United States, as has been pointed out, runs about 24 cents a pound.

Although sugar sells for as much as 27 and 36 cents a pound abroad, when foreign producers ship that surplus sugar to the United States, they sell it for less than their cost of production—right now that price is between 14 and 15 cents a pound. If that is not "dumping," what is it?

It is only because of this "dump sugar" which is freely permitted into the United States, that we need to protect our domestic industry.

Some comparison was made between sugar and the oil industry by the opposition. Mr. President, Senators will recall that in 1974 there was an embargo imposed upon exports of Middle East oil to the United States, after the so-called OPEC nations were formed into a cartel. At that time we were importing only 8 percent of our oil consumed, and yet the entire Nation was in panic. We had to line up our cars for blocks to get to the gas stations. That was when there was an embargo of only 8 percent of our oil consumed in the United States. Of course, consumption of oil has since gone up considerably.

But just imagine what would happen if the foreign producers of sugar would organize into a cartel and impose an embargo on exports of sugar to the United States. Forty-five percent of our total

sugar needs would be embargoed. Just imagine the long lines of customers at the grocery stores and at the supermarkets, just to buy a pound of sugar. Then just imagine what would happen to the price of sugar, if we look at what happened to the price of oil, which used to sell at $2.40 a barrel in 1972. After the Cartel was organized, the OPEC nations raised the price of oil to $38 per barrel on contract, and $48 on the spot market. On the Island of Molokai in Hawaii, the price of that same barrel of oil which was only $2.40 in 1972 is now $44.50.

Mr. President, I ask my colleagues just to imagine what would happen if foreign producers of sugar organized themselves into a cartel and withheld 45 percent of the sugar consumed in the United States. The price of a pound of sugar will not be 15 cents as it is today, or 24 cents which is the cost of producing domestic sugar. It would be, I venture to say, $2 a pound or even more. Besides oil, I am sure my colleagues will recall that the price of coffee shot up exorbitantly because of the lack of production in the United States of that habitual commodity of Americans.

We should remember that we are bent upon creating jobs, of bringing our economy back to its feet. We have spent hours, days, weeks, and months in programs designed to do this.

Now, by one stroke of the pen, proponents of the Tsongas-Quayle amendment want to eliminate 100,000 jobs. Definitely from the facts that have been raised here today, we can conclude, first, that the sugar program proposed in the farm bill will not cost the taxpayer anything. In fact, the taxpayer will benefit, will profit by the sugar program as history has shown.

Second, that the consumer will be protected.

Third, that the sugar program will insure a stable price not only for management to be able to plan for the future but for labor as well—all for a stable and viable domestic sugar industry.

We must remember, above all, that we are dealing here with an import commodity, not an export commodity, which is not produced in surplus in the United States.

Mr. President, I wish to commend the distinguished Senator from North Dakota (Mr. ANDREWS), the Senators from Louisiana (Mr. LONG and Mr. JOHNSTON), and my senior Senator from Hawaii (Mr. INOUYE) for the points they have raised against the Tsongas-Quayle amendment. I join them in urging my colleagues to defeat that amendment and to support the sugar program as proposed in the pending farm bill.

Mr. HELMS and Mr. TSONGAS addressed the Chair.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I will be delighted to defer to my friend from Massachusetts if he wishes to speak now.

The Senator from Massachusetts indicates he does not wish to speak now so I shall take this opportunity to have the RECORD show a few of the considerations by the Agriculture Committee when it adopted the sugar program.

First of all, of course, the majority of the committee perceived a need to assure stability for both growers and consumers.

As has been indicated here by a number of speakers this morning, sugar is a commodity which has felt the boom and bust of market conditions. When I say "market conditions" I am talking about the international market. This extreme volatility and price fluctuation in the so-called "free world" sugar market demonstrates to the satisfaction of the committee the need for this particular section of the bill.

The question has been asked why the committee adopted a sugar program at a time when we are seeking less, not more, Government. And that is a valid question. It is one that I had to ponder as one Senator.

This Senator believes, as has been indicated by the proponents of the amendment, that the marketplace rather than the Government is clearly a more desirable and more efficient allocator of resources.

But the fact is that there is not, and I repeat for the point of emphasis, there is not a free market in sugar.

Most of the world's sugar is traded in tightly controlled Government and private contracts.

As a matter of fact, my recollection is that less than 25 percent of all the sugar produced in this world is freely traded.

Yet from the small amount that is traded the United States must import as much as 30 percent of those free stocks.

That leaves the United States particularly vulnerable to price fluctuations.

As I recall from the testimony and other information assembled by and for the committee, something like 22 million tons out of a total world production of 90 million tons of sugar are allowed to float freely in international trade. Since the United States imports between 25 and 30 percent of sugar available in the free world market, obviously the American people are the likely victims of the wild price swings that characterize all of these markets.

In spite of the disruptive effect that dependence on this highly restrictive market breeds for producers, processors and consumers alike, the United States is the only sugar-producing country in the world without an effective Government program that attempts to provide protection from the extremes of the market gyrations.

Growers make the point that a mandatory price support program is needed to provide the incentive and assurance they need to make the investments to sustain or increase domestic sugar production. The majority of the committee agreed.

Let me digress for just a moment, Mr. President, and say there have been some unusual voices in this Chamber the last 2 or 3 days extolling the virtues of the free enterprise system, the same voices that have been voting to shovel out money through the years from the Federal Treasury.

Not all who have extolled the virtues of the free enterprise system fall in that category. But I found it amusing to hear the comments from those who have supported greater and greater entitlement programs come now and say: "Oh, we must economize."

The only fair conclusion I can reach, Mr. President, is that it is all right to shovel out the money in billions of dollars for people who are not productive, but the minute a carefully honed farm bill comes forth where some element of protection is to be offered to the producers, the producers of the food and fiber we all need, that is when the economy drive begins. It does not even stop there. They are against programs that do not cost the taxpayers a penny.

I would simply say, Mr. President, I will lay my record in terms of economy in Government beside that of any of my somewhat more liberal critics who have taken such delight in attacking this farm bill, which is the product of careful consideration and lengthy consideration.

I say again, as I have said on a number of occasions since this bill became the pending business this week, that at the outset of the consideration of the bill and its markup there was, frankly, an inclination on the part of the committee members each trying to protect his or her particular commodity to propose spending which the chairman of the committee, the Senator from North Carolina, would not accept.

I recall sitting there day after day and reminding the Members that we can march up this hill of spending, but we eventually would have to march down it, which we did. We did not march down that hill once, we marched down that hill twice, as is evidenced by the package of modifications which this Senator and the able Senator from Kentucky (Mr. HUDDLESTON) submitted on the day this bill was called up.

So I am going to have to defend my committee with all the vigor I possess in terms of being faithful to the need to control Federal spending.

The fact of the matter is that the Committee on Agriculture, Nutrition, and Forestry carefully crafted this bill. In the case of peanuts, for example, yesterday we, at my suggestion, reduced the cost of that program to zero.

In terms of this section, the committee bill provides that loan activity must occur within a fiscal year. The committee further encourages the Secretary of Agriculture to use the tools at his disposal to guard against Government costs from acquisition of sugar.

Here is the point, Mr. President: Regardless of all the headlines that some may wish to seek, the Congressional Budget Office, whose figures all of us use, assures the Senate that this program will result in zero cost to the taxpayers. So let us be done with the rhetoric. Let us look at the arithmetic and proceed. This section, the sugar section, will result in zero Government costs not just next year but for each of the 4 years during the life of the bill.

A few minutes ago I alluded to the exceptional volatility of sugar prices, and, incidentally, we do not grow any cane or beets. This is not a North Carolina commodity. Between January 1980

and October 1980 the rumor of the Soviet Union's huge purchases of sugar pushed the price of sugar from 19 cents to a 5-year record high of 45 cents.

By this spring the price began to settle back down by, as I recall, something like 30 cents below that. I believe that is correct.

The more recent sugar market developments show how critical a safety net for these producers, not people receiving billions upon billions of dollars that cannot possibly be recoverable in entitlements, but these producers, as the Senator from Louisiana was talking about farmers who tilled the soil. The recent price trend for sugar can be summarized in one word: down.

The USDA reported the estimated domestic raw sugar spot price for each of the last 12 months. The information shows the price fell dramatically from somewhat over 41 cents per pound in October 1980, to 17 cents in August.

Mr. President, I ask unanimous consent that a table showing the estimated raw sugar spot prices be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ESTIMATED RAW SUGAR SPOT PRICES

[U.S. cents per pound]

| Month | World | | Domestic: Contract No. 12 [3] |
|---|---|---|---|
| | Contract No. 11 [1] | International Sugar Agreement [2] | |
| 1980 | | | |
| September | 35.12 | 34.89 | 36.03 |
| October | 41.09 | 40.53 | 41.69 |
| November | 37.94 | 37.81 | 39.28 |
| December | 28.98 | 28.79 | 30.29 |
| 1981 | | | |
| January | 28.04 | 27.78 | 29.61 |
| February | 24.27 | 24.09 | 26.07 |
| March | 21.77 | 21.81 | 23.81 |
| April | 17.90 | 17.83 | 19.91 |
| May | 15.08 | 15.06 | 17.43 |
| June | 16.35 | 16.38 | 18.95 |
| July | 16.32 | 16.34 | 19.09 |
| August | 14.76 | 14.76 | 17.42 |

With production costs rapidly inflating, this dramatic drop in prices will hit sugar producers hard. The resulting adverse impact will be felt throughout the rural economy.

A sugar program, however, will provide a safety net which encourages needed stability in an unstable economy.

Mr. President, the committee was simply proposing to try to guard against the consequences of "boom and bust" prices in a thin and highly restricted world market. Other Senators have addressed themselves to the nature of that market, as have I.

The cost of this program will be virtually zero. Unless Senators wish to say that this particular group of producers, not recipients, are entitled, this particular group of recipients should have the benefit of no concern by this Senate, then this section of this bill is worthy of support of the Senate.

Mr. President, I yield the floor.

Mr. TSONGAS addressed the Chair.

Mr. HELMS. Mr. President, the Senator from California had sent a note over to me that he wished to be recognized, but he will seek recognition in his own right.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I have already spoken once. Does the Senator from California wish to proceed at this point?

Mr. HAYAKAWA. I beg the Senator's pardon?

Mr. TSONGAS. I have spoken once already. I would be happy to yield to the Senator if he wishes to proceed at this point.

Mr. HAYAKAWA. I would be very grateful.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. I thank the Senator from Massachusetts.

Mr. President, there has been much discussion, of course, about the price supports for sugar. And the more discussion I hear, the more I am convinced of the need for a strong sugar program.

Some of my honored colleagues disagree. They believe that the Government should not interfere with the free market. But the fact is that the sugar market is not now free, and never will be. They believe that a sugar program will cost the consumers an arm and a leg. But I am convinced that, in the long run, such a program will save the consumer money. Let me offer my reasons for that.

Mr. President, you know that no one defends the concept of a free market more than I do. But as much as we would like it to be, the world sugar market is not free. About 80 percent of the world's sugar is consumed in the country where it is produced. An additional 5 percent is traded through special marketing agreements such as the Cuban-Communist Block Agreement. Of the remaining 15 percent of the world sugar production, there are substantial trade restrictions on about two-thirds. The result is exaggerated swings in price when small changes in supply occur. Fortunately, today we have a domestic sugar industry to serve as a buffer to these price fluctuations. But our sugar industry is not large enough. The United States currently depends on this all too unpredictable world market for about 45 percent of its sugar supply.

Whether we will have a domestic sugar industry at all tomorrow, is a question which we must deal with today. Our domestic producers cannot compete with imports. Foreign producers have both much lower production costs and for the most part, subsidies from their government. Other countries need foreign capital, and are willing to support their sugar producers to insure sales on the world market. As a result, our domestic industry has been slowly dying. About 25 percent of American sugar producing facilities have closed down in the past 7 years. In fact, a plant near Salinas, Calif., just closed down this summer, leaving 500 workers unemployed, and causing area growers to switch countless acres from sugar production to other products.

Mr. President, we cannot let our sugar industry die. For many uses of the product, there is no substitute. Without a domestic sugar industry, we would be at the mercy of foreign producers. Price fluctuations would be much greater than they are today, and of great significance. The American consumer would be forced to buy sugar at prices much higher than those of today. If the Senate votes to kill this industry, there would be no turning back. Once our sugar industry dies out, it will be very difficult—and very costly—to rebuild. But what is most frightening about the possibility of losing our sugar industry is not the direct effect on prices. When one considers that only a handful of countries trade on the open market, the prospect of a cartel such as OPEC is not farfetched.

The alternative, however, is not all unreasonable. A price support program may cost the consumer something in the short run, but there is no question that it will save the consumer much more in the long run. Because a sugar program would include nonrecourse loans, there would be no direct expense to the Treasury. And the level of price support will not encourage over-production, as the originally proposed 19.5 cents is little over 80 percent of the USDA estimated average cost of production. All a loan rate will do, then, is to allow the American sugar industry to survive.

Sugar is unlike any other commodity covered in this farm bill. Like oil, it is an import commodity. The question here is not of short-term consumer expenditures. The question here is whether or not we want to become completely dependent on foreign nations for our sugar supply. The only way to assure that we do not is to include a good sugar program in the 1981 farm bill.

I strongly urge my colleagues to defeat the Tsongas-Quayle amendment, to defeat the Humphrey amendment, and support the sugar program as outlined in S. 884.

I thank the distinguished Senator from Massachusetts for yielding to me while, at the same time, I argued against his position. I am very grateful.

Mr. TSONGAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, let me correct some of the impressions of our amendment that have been given.

One, the argument that has been made is that this will not cost anything. Well, I think a logical person would have to ask himself or herself, if it does not cost anything, if no one is going to use it, what are we doing?

Obviously, it will be used and if it is going to be used because it is an advantage, then that advantage gets financed by the Government. In specific terms, if you have no forfeiture, the Govern-

ment pays the cost of the differential interest rates. That is obvious.

Second, if the price of sugar is where it is today or near where it is today, any farmer would have to forfeit by definition. It would have to go up to 22 cents if 18 cents is the base price, and as we have suggested, today's price is between 12 and 14 cents. In other words, there would have to be a remarkable increase in the price of sugar if it is "not going to cost anything." You cannot have it both ways. I would suggest in reality, one cannot.

The second argument that was raised in rebuttal is that somehow sugar is not a free trade environment, unlike other farm commodities.

That simply is not the case.

I have in my hand a memorandum prepared for the U.S. Cane Sugar Refiners Association by Schnittker Associates. I ask unanimous consent that the memorandum be printed in the RECORD.

There being no objection, the memorandm was ordered to be printed in the RECORD, as follows:

MEMORANDUM FOR U.S. CANE SUGAR REFINERS ASSOCIATION

REVIEW OF EPI SUGAR PROGRAM ANALYSIS

You asked that we review a report published in June by Economic Perspectives, Inc. The report was titled "An Analysis of the Sugar Program Proposal in Senate Bill S. 884." Much of the report is descriptive or historical material on the U.S. sweetener market, the International Sugar Agreement, the USDA Draft Impact Analysis, and S. 884. When the authors proceed beyond description, however, they stumble and fall. We think their analysis has 5 major defects:

1. It understates the importance and viability of the world market.

2. It demonstrates a lack of understanding of how a U.S. program would affect the world market.

3. It seriously underestimates the exposure of the U.S. government to budget outlays under S. 884.

4. The assessment of the impact on consumers is simply wrong.

5. The analysis in this report is inconsistent with EPI's August 1981 analysis of the European Community's Sugar program.

The World Market.—EPI's analysis relies in part on resurrection of that tired old hobgoblin—the volatile, unfree, thinly-traded, unstable, world sugar market. In fact, the similarities among the world markets for sugar and other agricultural commodities are more striking than the differences. For example, 1980–81 crop year statistics from F.O. Licht and USDA indicate that total world exports of sugar as a percent of world production are greater than those of wheat or coarse grains (corn, barley, etc.):

*World trade as a percent of world production*

| | *Percent* |
|---|---|
| Wheat | 22 |
| Coarse grain | 16 |
| Soybeans | 31 |
| Cotton | 35 |
| Sugar | 32 |

World sugar exports in 1980–81 were 28 mmt (million metric tons). Of that amount, trade within the European Community represented 1 mmt, Cuban exports to Comecon countries were 4.5 mmt, and trade under various other special arrangements may have been as much as 4.5 mmt. That left a free market of 18 mmt, more than 20 percent of world production and 65 percent of world trade.

One should not forget that much of world trade in wheat and coarse grains also occurs under special arrangements. World exports of those commodities in 1980–81 were about 215 mmt. The USSR, China, and Mexico alone have trade agreements with exporting countries covering 40 mmt per year or nearly 20 percent of world trade.

Finally, the true definition of "world market" should include any sugar, wheat, etc., that is priced in relation to the world price. This leads to our second point.

Effect of U.S. Program on World Market.—After incorrectly arguing that the world market is chronically unstable because of its small size and residual nature, the EPI analysts proceed to argue that a U.S. program that would further reduce the size of world market would actually "be consistent with efforts to stabilize world prices". Not only is this incorrect, it also flies in the face of established U.S. trade policy for sugar and other commodities.

U.S. posture in most commodity trade negotiations has been to favor widening of international markets. In fact, the principal (i.e., first) objective of the International Sugar Agreement is "to raise the level of international trade in sugar", a point conveniently ignored in EPI's discussion of the ISA.

U.S. policy makers, from the State Department and USDA to the CFTC, have consistently recognized that a large freely traded market with many participants is more likely to be "stable" than a market distorted by preferential trading arrangements, domestic subsidies to consumption and production, and export subsidies. When a sugar producing country holds down domestic prices during a period of high world prices, that subsidy to consumption is destabilizing; supplies have been diverted from the world market and world sugar prices have been increased. Similarly, when a sugar importing country such as the U.S. maintains domestic prices above the world market in order to stimulate home production, imports fall and the size of the world market is reduced. These are destabilizing actions that depress world prices.

EPI's curious conclusion that the domestic program proposed in S. 884 will help stabilize world prices seems to arise from their creative definition of "stability." Early on they make the point that the effects of "price swings in the world market . . . (are) a relatively new development" for U.S. producers. This is true as far as it goes. Since the 1930's U.S. sugar producers have rarely been forced to adjust to declining world prices, but they have always benefited from prices above domestic support levels. The Senate Committee's bill is little different from its predecessors in this regard: producers will be protected from low prices and will reap substantial gains if world prices rise above the domestic support price. In short, "stability" means a floor but no ceiling.

Forfeitures and the Budget.—Misconceptions about how the world market operates are of little moment, however, when stacked up against EPI's optimistic discussion of the likely budgetary impact of the Senate Committee's bill. The view that the Administration could "use import fees to avoid any incentive to forfeit sugar under loan" (p. 12) leads to the cheery conclusion that "no significant amount of forfeitures would be expected during any year of the FY 1982–FY 1986 period."

EPI analysts arrived at this conclusion by relying on USDA supply, demand and price forecasts that were farfetched when they were first published. USDA assumed that world production and consumption in 1981–82 would be in rough balance, and that the season average price in the world market would be over 26 cents per pound. EPI should have sensed that something was amiss since the ISO price had already fallen below 16 cents before their report was published.

This altogether too rosy view of world prices led EPI to the conclusion that loan forfeitures could be limited and budget exposure minimized. There is, however, no guarantee that the Administration will be able to keep the market price high enough to prevent both large forfeitures and large budget outlays. As shown below, the U.S. market price for raw sugar would have to be at least 23.56 cents per pound to prevent loan forfeiture under a program that mandates a 19.6 cent loan rate. Even loan rates of 18.0 cents or 16.5 cents could result in government ownership of sugar, unless crop failures reduce world population. Requiring that processors pay interest on forfeiture would, however, significantly improve the government's chances of avoiding budget outlays at loan levels of 16.5 or 18 cents.

*Market price for raw sugar required at alternative loan rates*

| | Cents per pound | | |
|---|---|---|---|
| Nat'l. average loan rate | 16.50 | 18.00 | 19.60 |
| Nat'l. average freight rate | 1.00 | 1.00 | 1.00 |
| Interest at 16.5 percent for 11 months | 2.50 | 2.72 | 2.96 |
| Required domestic spot price | 20.00 | 21.72 | 23.56 |

Any of these price objectives could be difficult to achieve continuously. The world spot price for raw sugar is now near 12 cents per pound. If values get as low as 10 cents per pound in the next year or two, the Administration would be unable to attain even a 20 cent price objective because Section 22 import fees cannot exceed 50 percent ad valorem. The calculation is as follows:

| | *Cents/Pound* |
|---|---|
| World price | 10.00 |
| Section 22 import fee | 5.00 |
| Maximum duty | 2.81 |
| Transportation, insurance, and handling (USDA estimate) | 1.77 |
| Total | 19.58 |

This would provide no margin of safety to ensure redemption of the loan.

Even with a higher world price, there could easily be periods when domestic prices were below the objective if the future import fee adjustment mechanism is modeled on that in the proclamation currently in effect. That mechanism allows U.S. prices to get as much as one cent above or below the objective before making a "within quarter adjustment." This approach was chosen because for practical purposes any attempt at greater fine-tuning of the domestic price would disrupt the market.

In light of these facts, it is quite possible that if world market prices were to decline another two cents from current levels in the next two years, and if interest rates remain high, a 16.5 cent loan program of the type we had in the past would probably result in forfeitures of sugar to the government. Quantities are difficult to predict, but it would be reasonable to expect them to be on the same order of magnitude as in the past—200,000–500,000 tons. The first year budget outlay, should 500,000 tons be forfeited, would be $165 million—hardly the insignificant amount forecast by EPI.

Consumer Costs.—What does the Senate Committee's bill mean for consumers? EPI points once again to price stability, arguing in essence that prices above world market levels will keep the CPI steady but ignoring completely the salutary impact on the CPI of lower sugar prices. This leads them to one last bizarre conclusion: higher domestic sugar prices will "have a beneficial impact on

consumer food and sweetener expenditures". Do those words mean beneficial for consumers, as implied, or for producers?

Having It Both Ways.—Finally, in a subsequent report on European Community sugar policy,[1] EPI takes a different analytical tack. More precisely, EPI tacks in both directions at the same time:

High internal sugar prices are bad in the EC but good in the U.S.;

High internal sugar prices are bad for EC consumers, but good for U.S. consumers;

EC support policies destabilize the world market while a U.S. program would stabilize it; and

EC export subsidies are bad but U.S. export subsidies are good.

One cannot have it both ways. The sugar price support program in S. 884 is qualitatively the same as the EC sugar price support program, except that the latter actually holds down internal sugar prices when the world market rises above the EC support level and the U.S. program would not.

Mr. TSONGAS. This memorandum refers to an analysis done by Economic Prospectus, Inc. It states in part:

The World Market.—EPI's analysis relies in part on resurrection of that tired old hobgoblin—the volatile, unfree, thinly-traded, unstable, world sugar market. In fact, the similarities among the world markets for sugar and other agricultural commodities are more striking than the differences. For example, 1980–81 crop year statistics from F. O. Licht and USDA indicate that total world exports of sugar as a percent of world production are greater than those of wheat or coarse grains (corn, barley, etc.):

*World trade as a percent of world production*

| | Percent |
|---|---|
| Wheat | 22 |
| Coarse grain | 16 |
| Soybeans | 31 |
| Cotton | 35 |
| Sugar | 52 |

This table is world trade as a percentage of world production, which is an indication of how free the trade is or is not.

I suggest that the remainder of the memorandum be reviewed by my colleagues to refute that particular argument. I will make one further point and then I will yield to my colleague from New York.

The argument finally has been used in rebuttal that the consumers, the users of sugar, and the workers support the bill as is and, by implication, they are opposed to the amendment. The impression given is that the amendment really hurts the consumer and those involved in the industry and that is why they are opposing our amendment.

All Members have in their offices a mailgram that was sent to each Member of the Senate in specific support of the Tsongas-Quayle amendment, as they refer to it, to remove the sugar title from the farm bill.

Let me read through the people who signed the mailgram to the offices.

The American Association of Retired Persons.

That is obviously a consumer group.

Bakery, Confectionary and Tobacco International Union, AFL–CIO, a labor group; Common Cause, Community Nutrition Institute, Congress Watch, Consumer Federation of America, Consumers for World Trade, Independent Bankers Association, International Longshoremen's Association, Local 1814; National Council of Senior Citizens, National Retired Teachers Association.

This is only a group of consumers and, indeed, I do not think you can find a consumer group on the other side.

What about the users? The sugar users group—and these are cosigners of the mailgram—includes American Bakers Association, Association for Dressings and Sauces, Biscuit and Cracker Manufacturers Association, Chocolate Manufacturers Association of the United States, Flavor and Extract Manufacturers Association, International Association of Ice Cream Manufacturers, Inter-National Bakery Suppliers Association, Milk Industry Foundation, National Association of Fruits, Flavors and Syrups, National Bakery Suppliers Association, National Food Processors Association, National Restaurant Association, National Single Service Food Association, Pickle Packers International, Processed Apples Institute, Retail Bakers of America, and Retail Confectioners Institute International.

That is more groups than I have ever heard of before and I think it is more than the Senate wants to listen to. But it makes the point that the people who use sugar are strong supporters of the amendment and have gone public in endorsement.

And finally, the Sugar Workers Council of North America and the United States Cane Sugar Refiners Association.

These people have signed on. They have signed on because it is in the best interest of the consumers and the users of sugar. I would suggest that the impression given that they are not supportive is simply contrary to the facts.

I yield to the Senator from New York.

Mr. D'AMATO. I thank my colleague from Massachusetts.

Mr. President, I support the amendment to delete the sugar title from the farm bill. I am pleased to add my name as a cosponsor. The amendment will climinate mandatory and costly price supports for domestically produced sugar. As it stands now, the sugar title creates a program of loan and price supports which will only serve to regulate agriculture and increase the Federal deficit. It seems inconsistent to me that we can create a costly new program when we can no longer provide what I consider necessary price support levels for our dairy farmers.

If one sector of the agricultural community is called upon to sacrifice in an effort to achieve a balanced budget, and I mean particularly the dairy industry, then so must the other groups that contribute to this Nation's farming abundance. I cannot stand by and accept a mandatory loan program which will support sugar prices at a level of 19.6 cents per pound. This program is inflationary.

Mr. ANDREWS. Will my colleague yield?

Mr. D'AMATO. Certainly.

Mr. ANDREWS. My colleague and good friend from New York, Mr. President, is bringing up an important point. I was a supporter of a better break for dairy farmers. I fought on this floor to try to get it and in committee to try to get it. So far this bill supports the price to dairy farmers, I might point out, Mr. President, at 70 percent of parity. The 18 cent figure that we are talking about in sugar to the small sugar growers is supported 50 percent of parity.

I think the record ought to be made clear that the level of support at 18 cents is far below the 70 percent level that we have for dairy farmers. I am sure that my colleague from New York would want to make that crystal clear.

Mr. D'AMATO. I certainly think that the record amply demonstrates that parity would have gone to 80 percent. It is interesting that the dairy farmers themselves earlier this year supported a rollback to 75 percent. Now we bring the rollback to 70 percent. We do away with any cost of living adjustment which heretofore had been added.

So I think when we talk about moving in the right direction there is an area where tremendous sacrifice has been called for from the dairy industry. If we are going to be consistent, I think we have to be consistent throughout.

This program is inflationary and will cost consumers an additional $5 billion through 1986. I was on the floor when my colleagues discussed the reasons why we should not adopt fair price supports for the dairy industry. They have a point. It seems only logical to me what was good enough for the dairy farmer is good enough for the sugar grower and the same arguments should apply.

Mr. President, the world price for sugar is around 14 cents per pound today. A loan program would force the administration to artificially maintain the market price at a higher level, almost 100 percent higher. Each 1-cent increase in the cost of sugar is estimated to add over $300 million a year to consumer costs. If implemented this year, the program would cost consumers an additional $3 billion for sweeteners.

If loan forfeitures were to occur under this program due to low market prices for sugar, costs to the Commodity Credit Corporation could quickly move into the millions of dollars. For the 1977–1980 period, when support levels were between 13.5 and 15 cents per pound, over 660 thousand tons of sugar were forfeited to the CCC.

Mr. President, I am deeply concerned that, by maintaining sugar prices at the level proposed in the farm bill, it may be necessary to impose higher duties and fees on imported sugar. In New York, and the rest of the Northeast, most of our sugar is imported, and increased duties will only lead to higher prices for an already over-burdened consumer.

In addition, such action could trigger a cycle of restrictive countermeasures by our trading partners. Any action to restrict our trade in agriculture commodities would be damaging to our attempts to improve the conditions of world trade.

It is necessary in these days of fiscal restraint that we end unneeded subsidies, especially those of the nature which we

[1] Impact of European Economic Community Sugar Subsidies on U.S. and World Sugar Markets, August 19, 1981.

have before us today. The proposed sugar subsidy would continue an outmoded and inflationary program which places a heavy burden on consumers and taxpayers. We simply can no longer afford to support a relatively prosperous industry composed of big businesses when we cannot maintain necessary price supports for small family-owned dairy farms.

Mr. President, I ask unanimous consent that a New York Times editorial of May 15, 1981, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TOO SWEET A DEAL FOR SUGAR GROWERS

This may be the year for fiscal austerity, but someone apparently forgot to tell the sugar lobby. Over the objections of the Reagan Administration, the House and Senate Agriculture Committees have adopted rich price-support programs for sugar growers. Either plan could cost the Government hundreds of millions of dollars annually over the next few years, and raise the price of sugar in the supermarket by several cents a pound.

Virtually every economist not paid to think otherwise believes incomes of sugar producers and most other American commodity producers should be determined by market forces. Changes in world output do cause prices to vary unpredictably. But the sugar industry is capable of handling the risk, making up for lean years in fat ones.

Sugar producers, though, have never fully appreciated the virtues of the free market. Their numbers are small, but thanks to aggressive lobbying, their political power is formidable. Cane growers from Louisiana, Florida and Hawaii and beet growers from the upper Midwest insist that the Government set minimum prices.

Sugar prices have been high recently. But now they are on the way back down, and the best guess is that the return to farmers will average 16 or 17 cents a pound in coming months. The sugar lobby and its friends in Congress want the Government to support the price at about 19.6 cents next year. This would be accomplished either by restricting imports with tariffs or by lending the cash to growers and holding their crops as security, hoping to sell it later above the support price. Inflation adjustments would push the guaranteed support price higher in following years.

Just how much the program would eventually cost the Government depends upon how much of the stored sugar can be sold in the future, and at what price. The initial outlays, though, are likely to run close to a billion dollars. And if the program succeeds in raising sugar prices by just 3 cents a pound next year, it will require an extra $200 million to feed the national sweet tooth.

Consumers and taxpayers have long been resigned to keeping this industry fat and happy. But the times are changing. When millions of Americans are being asked to tighten their belts in the name of budget reform, why must Congress continue to play sugar daddy to a select few?

Mr. MATSUNAGA. Will the Senator from New York yield?

Mr. D'AMATO. Certainly, Mr. President.

Mr. MATSUNAGA. Mr. President, the Senator from New York proposes that we should do for sugar what we have done for dairy farmers. That is what we are asking, and the committee is asking, that the Senate do. Sugar does not presently enjoy the status of other farm commodities. As reported by the committee, sugar would be included in the farm bill. That is what we are saying: What is good for the dairy industry should be good for the sugar industry. I hate to confuse the Senator from New York with the facts, but those are the irrefutable facts.

Mr. ANDREWS. Will my colleague yield?

Mr. D'AMATO. I am delighted to yield.

Mr. ANDREWS. Mr. President, I think that brings up a very interesting point. I come from a sugar-producing State and also a milk-producing State. We now have in this bill a decrease in dairy price supports, as the Senator so ably pointed out. The dairy farmers support was high and we tried to keep it at the higher level, but it is now at 70 percent of parity. The parity price for sugar, to give full parity, is around 40 cents. The 18 cents in this bill, as I pointed out, is less than 50 percent.

So if we were to follow the advice of the Senator from New York, Mr. President, and set the price support for sugar at the level of the lower price support for milk, instead of asking for 18 cents, we should be asking for 31 or 32 cents. Perhaps we should take a look at that. But we felt that 18 cents would be the bare minimum necessary to compete with the dumped sugar that is being put into our market.

Mr. D'AMATO. If I might, Mr. President, the fact still remains that, as a result of this support and if we move it to the 19.5 cent level, we shall be adding billions of dollars to what the consumers will be paying. That is contrasted to the dairy bill, which showed a reduction. The fact of the matter is that at that price support level, parity would have been 80 percent this year, with cost of living provisions for increases. We have eliminated the increases and the level has gone from 80 to 75 to 70 percent. We are not reducing the level of support here in the sugar bill. It started out at a lower level and was reduced further.

I could understand someone objecting to that, but it is at a lower level and it is continuing to stay at that level. If we are going to be fair and balanced, it should be that way throughout.

Mr. DOLE addressed the Chair.

Mr. TSONGAS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. I think the Senator from New York yielded to the Senator from Kansas and the Senator from Kansas did not recognize it.

Mr. DOLE. Mr. President, I am trying to speed up the debate. We shall never finish the farm bill if we do not speed it up.

I yield to the Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I thank the Senator. I want to make one point on this argument. I wondered why it was not used before. The reasons is very simple. One, this is an add-on, it is not a cut. It is a new program.

Second, under existing law, the Secretary can impose a program up to 90 percent of parity. It is discretionary. What this bill does is make it mandatory up to the 18 cents. That is the distinction. That is the reason it has not been brought up in debate before.

I thank the Senator from Kansas.

Mr. QUAYLE. Will the Senator yield 30 seconds to me?

Mr. DOLE. Yes, I yield.

Mr. QUAYLE. Mr. President, I do not want the record to reflect or the debate to show that there is some sort of corollary or trade-off between dairy and sugar. On dairy products, I believe, a very viable argument can be made that it is in the national interest to have milk. It is nutritional, it is a staple that we need, that we produce, that we must have. I still do not know why it is in the national interest to prop up an inefficient sugar processing industry in this country.

I do not think the two are compatible. I do not think the two go together. I want the record to show that.

I thank the Senator.

Mr. DOLE. Mr. President, I am in opposition to the amendment by the Senator from Indiana. I could certainly understand his concern with the sugar program accepted by the committee if the result added any cost to Government and risked the possibility of a Presidential veto.

As we know, however, the sugar provisions in S. 884 have been designed to avoid any budgetary exposure by requiring that loans be repaid within the same fiscal year in which they are made.

Let me add, Mr. President, that sugar is a major commodity which has, in recent years, been denied the stability which Government support programs provide to other key crops such as wheat, corn, cotton, and rice.

As a result, sugar prices have been subject to extreme variation, often to levels below one-half the cost of production. This vulnerability to supply and demand conditions would be eliminated by the loan level specified in S. 884.

Mr. President, I just want to say that if the Senator from Kansas had his way, there would have been no sugar provision in the farm bill. I did not have my way. I do not quarrel with those here seeking some approach on sugar legislation. We go through farm bills every so often—every 4 years recently.

They do raise questions. Different commodities raise different questions to different people from different parts of the country. If they are producing States, they have one point of view. If they do not produce the product, they can be totally objective.

I can be very objective about sugar because most of our beet sugar producers have gone broke. There are not enough there to make any difference. In fact, I am not certain if there are a dozen left.

I suggest what we are about here is trying to pass a farm bill. There has been a lot of discussion about a coalition. I am not sure there has ever been a coalition. But there are a lot of Senators from other than sugar States, whether wheat or corn or whatever States, who, I believe, want to pass a farm bill. There-

fore, I support the position of the sugar producers and oppose the amendment of the distinguished Senator from Indiana.

Let us face it, Mr. President, it is very difficult to pass farm legislation—maybe not as difficult on the Senate side as the House side, but it is very difficult because, for the liberals, that is one way to cast a conservative vote on a farm bill and go back home and tell consumers, "I voted against high prices for farmers." From producing States, of course, we want to be responsible, hopefully, but try to help the American farmer who finds himself producing at less than the cost of production in nearly every commodity.

Having supported the efforts to reduce the cost of the dairy program, Mr. President, I hope I can in good conscience stand up and still support those who want some sugar program in the bill. In fact, we can make money in this program with the imposition of fees and duties—I think $90 or $810 million, total.

A further advantage of establishing a sugar program would be to guarantee a major source of foreign exchange through duties and fees on imported sugar.

The United States is expected to import about 4.5 million tons of sugar next year, slightly down from the 5 million tons imported last year.

In order to defend domestic producers against subsidized sugar exported from the European Economic Community and other countries, the sugar program would require the administration to assess duties and fees which could total nearly 9 cents per pound when world prices fall to the current level of about 12 cents per pound.

The revenue generated through these actions would be approximately $90 million for each penny of duties and fees—a total of $810 million per year if world prices remain at the 12-cent level.

The Senator from Kansas, as some Senators know, led an effort to put a limit on sugar payments several years ago, much to the frustration of some of my colleagues from producing areas.

I believe we have an opportunity now, between now and when we finish the farm bill, to make it possible for some farmers who are on the verge of bankruptcy, whether they be sugar or wheat producers, to provide some protection.

There is not enough money in the world to bail out all of America's farmers unless we get a handle on the economy. This is why it is necessary that there be no budget exposure for the sugar program, and there is no budget exposure, as I understand the remarks of the chairman and others who have spoken. There is not enough money in the country to support the wheat farmers in the way some think they should be supported.

In all honesty, the Senator from Kansas would be willing, if necessary, to lower the target prices for wheat back to the point where the Senator from Kansas recommended they be last April, to $4 instead of $4.10. That will be discussed later, because I know some Senators do not want to reduce that target price.

Let us face it: The President indicated a couple of days ago that he was going to veto any legislation that came to him that was over his recommendation. I believe the President has been a man of his word up to now.

I used to hear Senator TALMADGE say on this floor, "Do you want a bill or do you want a veto?" I want a farm bill. Some may not want a farm bill. Some may want an issue. Some may want to come back and try to do better.

It seems to me that it has been rather clearly transmitted—and I heard it again this morning at the White House—that if you are going to keep the bill within the recommendations, the President will sign it. If not, he will not sign it. This sugar provision does not violate that direction from the White House. It is within the guidelines. There is no budget exposure. It is my view that it will help us get the farm bill passed.

A number of Senators have an interest in sugar legislation. This Senator has a minimal interest. However, I believe the best thing we can do for the American farmer, whether it is this provision or any other provision, or the American producer, whether it be sugar or wheat, in the entire economy, is to get a handle on the economy and lower the interest rates, including farm programs.

Those of us from farm States believe we reflect the views of the majority of farmers when we say that. The vote yesterday on peanuts was a good example, when we adopted the Mattingly amendment. Some did not support it.

In my opinion, Congress is recognizing that no one is exempt from budgetary scrutiny. We are being asked, if the press reports this morning are correct, to go back and look at medicare, medicaid, and a lot of other programs that affect the low-income Americans.

This Senator believes that most farmers are not upper income people. They are low to very low middle-income Americans. They want us to continue to put the pressure on so far as Federal spending is concerned, and that includes their own programs. If we are wrong, somebody else from our States will be saying something else in the next election. But if in fact we succeed in holding down the costs of all programs, including farm programs, then I believe we are going to see the interest rates fall, inflation decline further, and the economy will prosper.

I visited my State during the August recess and discussed matters with farmers and others. Their main concern was the economy. Yes, they are concerned about target prices. They want as high a target price as they can have. They are concerned about all other programs. But, in the final analysis, they are concerned about the economy. Their suggestion was that we come back and do what we are required to do to stop inflation and lower interest rates.

I am pleased to support the efforts of the chairman and Senator HUDDLESTON in this matter.

Rather than costing the Treasury, the committee's sugar program would be a significant source of foreign exchange. The sugar program included in the farm bill meets the crucial test that must be met by all commodities: It does not result in budget exposure and will not be opposed by the administration if approved in its current form.

Mr. TSONGAS. Mr. President, will the Senator yield for a question?

Mr. DOLE. I may not have an answer, but I yield.

Mr. TSONGAS. I have two points.

One, the Senator started out by saying that if he had his "druthers," it would not be in the bill. Is that a correct statement?

Mr. DOLE. That is correct; that is a candid statement.

Mr. TSONGAS. Second, the Senator made the comment that there is no budgetary exposure in this bill. What happens if you have a loan program and the price of sugar remains where it is now or below 22 cents and forfeitures take place? What happens at that point? Is that not budgetary exposure?

Mr. DOLE. There could be some. As I understand the way the program is designed, it requires all loans to be repaid in the same fiscal year in which they are made. That was done purposely, to avoid the budget exposure. If there is forfeiture, there could be some additional cost. I am not certain what the figure might be.

Mr. TSONGAS. Historically, there has been forfeiture of great amounts; and if there is forfeiture, there is exposure.

Mr. DOLE. But this is designed to avoid that program.

Mr. ANDREWS. Mr. President, will the Senator yield?

Mr. DOLE. I yield to the expert on sugar, the Senator from North Dakota.

Mr. ANDREWS. The Senator from Massachusetts is correct. Under the de la Garza Act, for 2 years there was forfeiture in sugar. However, since this is not strictly a farm program section—it is really an antidumping section—the Secretary of Agriculture, with his authority, invoked the right type of tariffs and price adjustments on incoming sugar; and I believe the Government made a profit of $90 million-plus on the working of the act in those 2 years.

So we have a unique situation, where there is no budget exposure, and where Mr. Stockman, in the Office of Management and Budget, sent a message, as the chairman of the committee, the Senator from North Carolina, pointed out, that there is no cost impact on the Federal Government of this paragraph that deals with sugar because, in effect, it is not a farm price support program—rather, it is an antidumping provision—and because we do not produce more than 50 percent of the sugar produced in this country.

Mr. TSONGAS. What the Senator is saying is that if you have massive forfeiture, the only way to overcome that in terms of exposure is to impose fees, et cetera, to be paid by the consumer.

Mr. ANDREWS. That is correct; and the consumer would benefit from a level price of 18 cents, rather than having to pay 45 cents, which she paid a year ago.

Mr. DOLE. Mr. President, I say in a general way, with reference to the consumers, that they certainly have a right to be concerned about farm prices. How-

ever, the last time I checked the percentage of disposable income that Americans spend for food, it is still the best food bargain in the world. Some farmers may be doing very well, some sugar producers may be doing very well, but I believe that, as a group, you will find that most farmers are not in that category.

We cannot write legislation to back up or to prop up every farm in America, and we should not try. But we do have an obligation to try to protect a domestic industry, whether it is sugar or some other commodity.

In the old days, we used to pass out quotas through the Agriculture Committee and the Senate Finance Committee, and that really was not the way to proceed on sugar. This program makes a great deal more sense than what we did in the past.

I hope we can adopt the sugar provision and wrap up this bill by 6 o'clock.

Mr. QUAYLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. HELMS. The President, will the Senator yield without losing his right to the floor?

Mr. QUAYLE. I yield.

Mr. HELMS. Mr. President, I wonder whether we can reach an accommodation as to a time certain to vote.

The able Senator from Montana has indicated that he would like 5 minutes. Senator HUDDLESTON would like 5 minutes, as would the Senator from Indiana. Does anybody else desire time?

Mr. President, with the understanding that each of the three aforementioned Senators will have 5 minutes, I ask unanimous consent that we proceed to a vote on this question at 1:15 p.m.

Mr. QUAYLE. Mr. President, reserving the right to object, Senator TSONGAS is not in the Chamber. He would probably like 5 minutes. Will the Senator extend it to no later than 1:20 p.m.?

Mr. MELCHER. Mr. President, reserving the right to object—and I shall object——

Mr. HELMS. I withdraw my request, Mr. President.

Mr. MELCHER. Because there have been too many misstatements made back and forth here about what is involved, I only wish to take 5 minutes, but it depends upon what the sponsors of this amendment are going to trot out here as fact which indeed is fiction as to whether or not we should cut off debate here.

Mr. HELMS. Mr. President, I withdraw the unanimous-consent request and we will just play it by ear.

The PRESIDING OFFICER. The request is withdrawn.

The Senator from Indiana has the floor.

Mr. QUAYLE. Mr. President, I wish to continue from where the distinguished Senator from Kansas debarked, and that is on the budget impact. It has been said that there is no budget impact, that perhaps we are not going to have any forfeitures.

I wish to read to Senators an item in the Wall Streeet Journal this morning headlined "Sugar Prices Plunge as Prospects Improve for European Beets." It says:

> Sugar prices continued to plunge as prospects for the European and Soviet sugar beet crops improve.
>
> October-delivery sugar fell 0.6 cent to 10.95 cents a pound, near life-of-contract lows. Analysts said they believe prices may drop more, as traders who follow price chart patterns continue to sell.

Mr. President, if we have a world market price of 10.95, 11, 12, or even 13 cents, even modern-day mathematics cannot add up to the conclusion that there is not going to be an incentive to forfeit the loans that the sugar processors receive. This holds true at the 18-cent level and the support price goes up to 18.5, 19, and 19.5 in the coming years.

But processors have at least another 2 to 3 or 4 cents additional cost for transportation and interest rates. So we know that to break even, they are going to talk about a 22- to 23-cents-a-pound market price.

There is no way that this cannot have a budgetary impact.

We also know that sugar is a perishable item, not something we are going to store for years and unload when the price goes back up. It is going to be disposed of within about a year.

According to most analysts there is no way that the world price of sugar is going to go up and, therefore, I submit to this body that there is going to be a budget impact.

There is no way mathematically that we can shore up sugar prices to 22 or 23 cents on the pound. We therefore are almost certain of a substantial budgetary impact.

Furthermore, we talk about the duties, tariffs, and quotas on imported sugar, but, even if the price is at 12 cents the President does not have enough authority to raise the price up to 22 or 23 cents. The law simply does not allow that.

I believe that the opponents of this amendment have argued the idea of dumping, and I believe that is a justified argument and one that must be discussed. We have talked about dumping not only in sugar; we have talked about dumping in steel.

Even the most intellectual free enterprise advocate in this country will say where there is a dumping, our country certainly has a right to retaliate. If we do have dumping, however, is the right way to retaliate just to pass a loan program and subsidize this industry?

I might point out that there is authority, even if this amendment to strike title IX, passes, that allows the Secretary of Agriculture to set up a loan system if he deems it necessary.

On April 1, 1981, when the distinguished Senator from Florida asked him, "Is there a sugar section in the farm bill?" the Secretary of Agriculture said, and I am quoting from the report:

> No, there is no sugar section in the farm bill.

And in his explanation, the Secretary said that we have some authority under old laws to set sugar loan levels, and we could do this if the need arose.

Mr. President, he has that authority. The Secretary of Agriculture has the authority to establish a sugar loan program if in fact he feels that the time and the situation has arrived.

We do not need to give him this authority. We do not need to prop up this small segment of our agricultural community.

I have heard many times and there has been a lot of debate in this Chamber indicating that our amendment is going to hurt the small farmer, that we are going to hurt the producer. The opponents of this amendment argue that this amendment will harm thousands and thousands of small producers.

Let us look at a couple of little facts.

In Hawaii 98 percent of the sugar is produced by about five multinational corporations. In Florida there are only 131 cane growers. These two States combined account for almost one-half the sugar grown in the United States. Thus I suggest it is not really small business that we are talking about here.

The sugar producers also state that this sugar program is needed to protect the industry from collapse.

I wish to just read a couple of the sugar processors' profit statements that have been reported, and I think we will find that in this last year they were up significantly.

In the sugar beet processing industry, the Amalgamated Sugar Co. earned over $17 million in fiscal 1980, up from $5 million in 1979. Among Florida cane sugar processors, the U.S. Sugar Corp. earned almost $32 million in fiscal 1980, up from $16 million in 1979. For Louisiana cane sugar, Sterling Sugar Co. earned $3.3 million, up from $1.3 million. As to the Hawaiian cane sugar, the I.U. International Corp. earned $144 million, up from $67 million.

That is not bad. That is a profit. I support making a profit.

I do not think we are going to see the demise of the sugar industry if this amendment is agreed to.

The argument has been made that there is a certain risk element, that we do not want some of these small farmers that we keep talking about to lose out and to go under. We heard one statement that perhaps the sugar growers will be reduced in numbers if this amendment is agreed to.

Mr. President, we have been debating for a long time on how far the Government is going to create a risk-free society. Are we in the business to create a risk-free society? Many of us have argued that the Government, while trying to create a risk-free society, is just creating more Government intrusion and inhibiting productivity.

How far do we have to go? Risk—that is what competition is all about. It is free enterprise. That is what a free enterprise system is all about. It is what the creation of wealth in the country is all about.

Mr. President, where are we? We are on the sugar amendment. Yesterday, unfortunately, the Senate rejected an amendment proposed by my colleague from Indiana to reform the peanut pro-

gram. My colleagues said no to peanut reform. I do not know what the outcome of my proposal is going to be. I hope it is favorable. We may be saying no to sugar.

If we say no to my proposal, we would continue to pay all too much attention to vested special interest groups.

As I said earlier, there is a concern in the country today on the ability of this Congress to be able to achieve a balanced budget by 1984. I say if we continue to say no to reforms of small minority parts of our agriculture community that demand special attention we will have a very difficult time in doing that.

There are those who have argued very eloquently and sincerely and are great advocates for certain commodities, but I only suggest that we have to look at this in perspective. We cannot have a special loan rate, a special interest for every single commodity. I suppose if we extend this argument for protecting sugar we might say we want a tomato target price support system, or a cauliflower cooperative program, or an asparagus allotment, or maybe an ominous program for succotash set aside.

That is what we are talking about. It is just expanding this farm bill beyond the limits that the budget can absorb, and I emphasize this, beyond the limits that the consumer can absorb. The sugar title was not part of the original farm bill, and I hasten to say and hope to point out that it should not be a part of this farm bill either.

Mr. ANDREWS and Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator from North Dakota is recognized.

Mr. ANDREWS. Mr. President, I appreciate the opportunity to point out that we are not talking about succotash, nor are we talking about green beans, nor are we talking about the Indiana mint. These are all very minor crops.

We are talking about sugar. Sugar is a crop that ranks 10th among the crops in the United States as far as acreage is concerned; ranks sixth or seventh among all farm crops in the United States as far as dollar return is concerned. It is a significant crop. In anybody's book it is a major crop, and it is a crop of which we only grow some 50 percent of our needs.

Mr. President, I am also intrigued with the introduction into the RECORD of the Wall Street Journal article pointing out there has been a good crop in the European Economic Community of sugar beets, and there has been. That is why we now have 14-cent sugar as the so-called world price.

But I think, to make the record clear, one should point out that also in the Wall Street Journal was a story that pointed out that because we have this good crop in Europe and because the European countries had contract obligations to buy from Latin American countries part of their sugar supply at 26 and 27 cents, that the European Economic Community was going to spend tens of millions of dollars to subsidize the export of sugar from their countries to go into this dump sugar market.

Why? Because, as the article also points out, in the European Economic Community the price of sugar is supported at 47 to 48 cents a pound. If they have an excess, they have to dump it. They have to get rid of it. Because of this, we have today a dump price of distressed sugar on the market.

But as a farmer myself, Mr. President, I resent very much someone saying that we are protecting the inefficient. Our farmers are the most efficient in the world. Whether they happen to be in the Midwest, whether they happen to be in the Far West, whether they happen to be in Florida or in Hawaii, they are the most efficient in the world, and our farmers can compete with any farmers anywhere else.

But, Mr. President, our farmers cannot compete with other governments, and that is what they have had to do in the case of sugar.

I think we have to recognize that this sugar market is not a free market. North Dakota sugar producers and Florida sugar producers and Texas sugar producers and Hawaiian and Montana and other sugar producers will compete any day for the same price European sugar producers are getting, and we will get along darned well.

I would also like to point out, Mr. President, when you talk about corporation profits—and I emphasized this early on—under the contracts the farmers raise sugar for, any increase in price, whether from a government price support or the actions of the market, flows through the corporation to the farmer. The corporation's net profits that show up on the balance sheet come from processing sugar, and those corporations, with their tender and loving concern for consumers and farmers alike, always somehow or other seem to find an adequate fee for processing each ton of sugar.

They do well whether the price of sugar is up or whether the price of sugar is down.

That is not what we are addressing in this debate. We are talking about the producer, the man on the land, the fellow out there who is working in the fields for the Hawaiian producer of cane sugar or the individual farmer who has a 100-acre beet contract with his local co-op. He is the one who will get the benefit of this price, and he is the one who deserves to be kept in business if we want the production here so that we do not have to depend on the vagaries of the comme ci-comme ca world market.

Yes, I think it can be pointed out that our farmers are effective, they are efficient, they can compete with other farmers, but not with other governments.

Yes, Mr. President, I am concerned about high corporate profits. But let me also say that I would submit that some of those corporate profits come from the processing of foreign sugar.

I hope the Senate will turn down this amendment and go with the package that came out of the Committee on Agriculture.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, there has never been any doubt in this body or in the other body of Congress that in order to pass a farm bill a coalition is necessary. The unraveling of the coalition, that started yesterday and the day before, will be brought to a test on this particular vote on this amendment.

We are now dealing with sugar. It is an important vote, not just for the interests of sugar beet growers in my State or any other State or cane growers in any of the 50 States; this vote is very important to see whether there is going to be a rebirth, a rekindling, a restructuring of that coalition that is necessary to pass a farm bill, and make no mistake about it.

It would be my judgment that we should turn down this amendment and turn it down by a substantial majority.

I suggest that the Senator from Indiana just a few moments ago made the case for the domestic sugar industry. He recited the earnings of some sugar processors. The Senator from North Dakota pointed out very cogently just now that perhaps part of those earnings were in the processing of foreign sugar. I do not know. But I think those very modest earnings for corporations demonstrate rather clearly that there is a domestic industry and that it is not making very much money.

But let us go to the producer. In Montana we have some sugar beet producers left. What is involved in this section of the bill is the very simple question of should they or should they not have an 18 cents per pound safety net feature that would go up half a cent a pound per year, a safety net price support.

How does that relate to the retail price of sugar? Well, it is 30, 31 cents now, I am advised, per pound, so 18 cents fits in rather nicely.

What about where we get sugar from? Well, roughly 50 percent of it is imported, and 50 percent of it is produced domestically, that is the way it is now.

We would like to hold to that. I think that is a very minimum level we ought to hold to, a 50–50 basis. If we go below that, who benefits? I do not think the consumers of this country benefit if we import more than 50 percent of our sugar. I think there is some solid basis, some historic basis, for at least holding on to 50 percent of our consumption of sugar being produced domestically.

Our producers do meet competition. So what is the difference in price? Well, foreign sugar from whatever country you want to name is produced with the benefit of foreign government subsidies if it is sold abroad.

You know it is a renewable resource. There are more beets, more cane sugar grown every year. What is the world price? It has been quoted here as being around 12 cents. I think somebody said it was 10.5 cents, and somebody said it may have been 11. But it does not make any difference what the world price of sugar is. Historically the world price of sugar is a dump price.

I recall the first time we faced a sugar act when I was in Congress in the House, I think the dump price, the world price, was about a nickel a pound. Somebody said it was 4 cents a pound. Who knows? At times it was 3.5 cents a pound. We are in a different era now, so I suppose 12 cents now represent what 5 cents did in 1970. In each country that produces either cane or beets for sugar there is a domestic price.

Mark my word—I do not care what country it is—there is a domestic price and then there is an export price if they are in the business of exporting sugar and it is subsidized by that particular country.

It is almost a laugh to talk about what the European Community can do with sugar beets. I can assure you that they cannot possibly meet the competition of sugar beet producers in the United States and they never pretend to. The European Economic Community agricultural program is designed to protect their domestic producers. They would scoff at an 18 cent price for support for sugar for sugar beet producers in Europe. They would scoff at that. There would be none produced; none whatsoever. They are subsidized and subsidized very heavily and any export out of the European Community is subsidized very heavily.

How long do we want this country to be besieged in this Senate by this claptrap of free trade existing in agricultural products? Free trade does not exist in sugar. I do not know when it ever did exist in sugar. It is laughable that that is presented as an argument: "Let us get back to free enterprise." Well, if you are going to import 50 percent of the sugar that we consume in this country, you are importing 50 percent of the sugar that is not produced under free enterprise, it is produced under a government subsidy. I defy any Member of this body to present a country that produces sugar for export that is a free trade basis. It does not exist in this world.

Sugar beet producers and cane producers in the United States do not raid the Treasury. And under this very minimal amount, this safety net feature of 18 cents, they are not going to be raiding the Treasury.

What is involved here is whether or not we want some producers in the United States spread across the country that are producing some sugar. Now, sugar is positioned. In Billings, Mont., the processors there have sugar in the warehouse. I think the Wall Street Journal quoted yesterday, or maybe in today's edition reporting on yesterday's price, of the New York price, about 15 to 15½ cents per pound. I would suggest to the Senate that 18-cent-a-pound sugar positioned in Bilings, Mont., is a very good price—a very good price. Are we to assume that transportation costs from some point at New Orleans or New York is going to deliver 15½-cent-per-pound sugar to the Twin Cities or to Billings, Mont., or to some inland point at a lesser price? I think not. So I believe that the 18-cents-a-pound figure is very much of a reasonable safety net feature.

Now we have a farm bill here. And this farm bill is meant to provide for continuation of domestic production of food items. This farm bill is not designed to somehow straighten out the question of what the dump price of sugar is throughout the world. This bill is designed to help stabilize American food production. Eighteen cents a pound is very reasonable. It is designed to keep some American agricultural production of sugar alive.

This does not do any more for sugar beet producers than it does for consumers in this country. It will assure some continuation to domestic producers which is good for American consumers.

I am not impressed at all with the recitation of groups that signed some mailgram that reached our office. We can gather them up by the bushel basketsful if you want to just simply say: "Well the price of sugar in the world is low. So, therefore, it is good for consumers not to worry about any domestic producers and, therefore, we will have a lower price for consumers."

Well, that is fiction. That is absolutely fiction. What is necessary in this country is to keep some balance of American producers for food items. And if we do that, then we will help American consumers. And that is what this amendment is about.

Mark my word, we either knock down this ill-advised amendment, and knock it down by a substantial majority, or we are going to have a continuation of the unraveling of the commodity groups, the coalition groups that form to pass a farm bill. And when that happens, we are not just hurting American agricultural producers, we are hurting American food consumers.

I am going to repeat one item. American producers meet the competition. American agricultural producers meet the competition throughout anywhere in this world. They are doing it now. If we want to increase imports and further hurt the balance of payments of this country by importing food products that are heavily subsidized by various governments who sell abroad, then we could vote for the amendment. That would be foolish. It would be detrimental for the best interests of this country. I hope the amendment is not only defeated, I hope it is defeated with a large majority.

Mr. QUAYLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. HUDDLESTON. I would just say, Mr. President, that I concur with virtually everything just said by the distinguished Senator from Montana who I think has brought a proper perspective to the whole question of our agricultural programs.

Mr. President, I support the sugar provisions of S. 884, which have been agreed to by a majority of the Committee on Agriculture, Nutrition, and Forestry.

We propose a program that will cost the Federal Government nothing and will provide some price stability for one of the most volatile commodity markets farmers must deal with.

The American consumer is sensitive to sugar prices because sugar is used in the preparation of many food products and beverages, as well as home use.

Most of us will remember the rapid escalation in the cost of sugar in 1974 and 1975, when sugar prices rose from 9.6 cents per pound to almost 65 cents per pound. And only last fall, the sugar price went to nearly 44 cents per pound.

Now you cannot blame the provisions of the modified version of S. 884 for those kinds of price escalations. And you cannot make the claim that the absence of these provisions will assure the consumer in this country that he is going to have low consistent prices in sugar because historically the record is different.

The provisions of S. 884 will not raise sugar prices to anywhere near those levels. The sugar crop loan rate established under the bill is 18 cents per pound in 1982 and increases one-half cent per pound each of the next 3 years.

Failure to enact the S. 884 sugar provisions could result in American consumers paying much higher prices for sugar. I base this projection on the history of extreme fluctuations of sugar prices in the world market—which is not a free market—and our declining processing capacity.

In the world sugar market, most—as much as 90 percent—of sugar is traded through special marketing agreements among countries. The open international sugar market, which U.S. importers use, is a residual market that buys and sells the small amount of sugar not covered by such agreements.

In the absence of a sugar program such as the one contained in S. 884, the open market that the United States uses will continue to suffer shocks such as those in 1974 and 1975.

Because, historically, 45 percent of U.S. sugar needs have been imported, small changes in world sugar production will continue to cause major changes in U.S. prices.

Domestic refiners and sugar using food industries cannot operate efficiently in the face of these price gyrations. In fact, the Congressional Research Service indicates that the U.S. sugar industry's processing capacity has fallen from 8.3 million tons in 1975 to 5.8 million tons in 1980.

The National Confectioners Association testified that the S. 884 program is reasonable and recognizes the interests of the consumer. The sugar users group, whose members are major users of sugar in the United States—they use over 60 percent of the sweeteners consumed in the United States—testified in support of a program to maintain a viable domestic sugar industry and refining capacity.

Mr. President, I submit that the sugar program proposed in S. 884, as modified, achieves the objectives of protecting sugar consumers from unreasonably high prices caused by world market instability.

as well as protecting sugar producers from unrealistically low prices.

The purpose of the sugar provisions in S. 884, of course, is to provide a stability, a certainty, provide some way of avoiding those great escalations, where, as it has already been pointed out here, sugar has gone to $1 a pound and above.

So for that reason, I support the provisions of S. 884 and urge the rejection of the amendment of the distinguished Senators from Indiana and Massachusetts and say again that what we have before us is the work of very diligent Members who have assessed the needs of our agricultural community and at the same time have been very aware of the budgetary restraints that we must operate under and the needs of the taxpayers of this country. I yield back my time.

Mr. HELMS. Mr. President, I do not want to cut off any Senator if any Senator has any further comment.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. I thank the Chair.

Mr. President, I have listened to the debate for the last half hour or so and I congratulate the several Senators who have stepped forward and supported the sugar portion of the compromise amendment which has come from the Agriculture Committee. I rise to support them and I am going to enthusiastically support the bill.

I thought the remarks made by our distinguished colleague from Montana were right on point.

Yes, it is true that there are those who would say, "Eliminate the domestic sugar program because we can buy it cheaper overseas."

We went that route several years ago on oil and we know that that came home to roost. Therefore, I think that the sugar portion of this bill is a good one.

There are one or two corrections, though, that I would like to make to the statements by the Senator from Montana, one being that a day or two ago the traditional coalition, the farm coalition, fell apart. It was sometime before the day before yesterday or the day before that that it fell apart.

The difficulty that we are having with the elimination of the traditional coalition is a direct product, a result, if you will, of what I think is a preprogramed position by the White House. I know it is not popular today to criticize the President of the United States in any way, shape, or form because the polls all tell us that the President is highly personally popular, and the advice that many of us have been given is, "Attack the administration, but not the President."

I lay the blame for the failure of the farm coalition right at the doorstep of 1600 Pennsylvania Avenue. The man who happens to reside there now is President Reagan. I have supported many of his programs, but I say that when it comes to agriculture this administration is taking the same shortsighted approach that those people who are sending wires around now to support this amendment are taking. They are taking the same shortsighted program, Mr. President, because they fail to recognize and realize that there is about only one thing left in which we excel in the United States of America and that is the production of food, due primarily to the genius of production, the hard work, abilities, and substantial investments that our family-size farm families in all walks of agriculture participate in these days.

Were it not for agriculture, can anyone in this body imagine what would happen to our balance of trade? Yet there are those who send wires to eliminate this reasonable sugar program, and there are people at the White House and at the Department of Agriculture who have seen fit, by design, to blow apart the coalition that has generally held together to come out with an acceptable farm bill.

I think it is sad indeed, Mr. President, but I think it is important that we place the blame where I think it properly belongs.

Mr. President, in closing just let me say that those on this floor know—not in the galleries, I suspect, but those on the floor know—that this Senator from Nebraska and some of my colleagues voted against the peanut program. Lest there be any misconception of the reason for that, my vote against the peanut program was not because I did not support the peanut program; I voted against the peanut program in an attempt to bring the peanut producers and those who support them back to their senses, to put back the coalition that I think is vitally necessary if we are going to have a workable farm program in the United States of America. But it was not to be.

I see all kinds of strange votes being cast on the floor of this body, basically because of the failure of the coalition, or the failure to understand the confusion that exploded the coalition, directed from the White House and the Department of Agriculture.

Some people wonder where we are going to get the money for these farm programs. The bill that was reported out of the Committee on Agriculture before the amendments were attached thereto, basically, I suspect, from pressure from the White House and the Department of Agriculture, would have cost maybe up to $1 billion more than the compromise version, which I think is not a good bill. Where could we have gotten that money?

I suspect that it was going to cost another $1 billion. Maybe some way, somehow, we could have whittled another $1 billion out of the defense budget, raising that whittling from $13 billion to $14 billion.

I am a member of the Armed Services Committee, as the Chair knows, and a strong supporter for a beefed up defense. But I suspect that if we could have saved $13 billion we could have saved another $1 billion and made it $14 billion, if that is where we want to get the money from.

What I am saying, Mr. President, is that I am fearful that if this sugar amendment is defeated, it will be the final nail in the coffin for the farm coalition. It will not make me happy. In the end, it will not be in the interests of the American people and our economy. I suppose it would be applauded at 1600 Pennsylvania Avenue.

Mr. President, I yield the floor.

Mr. SIMPSON. Mr. President, I wish to join with my colleagues who have spoken out against the Quayle-Tsongas amendment to eliminate the sugar program from the Agriculture and Food Act of 1981—the farm bill—since it would certainly doom our efforts to provide for a strong domestic sugar industry and to allow beet and cane farmers in this country to make a continuing contribution to our economy.

Sugar beet production is an important cash crop in my State of Wyoming and the employment it provides is a very significant factor in a number of counties, including my home county of Park County.

The need for a sugar program is best demonstrated by the extreme volatility of the free world sugar market. The U.S. imports between 25 to 30 percent of the sugar available in the free world market. Between January 1980 and October 1980 rumors of the Soviet Union's huge purchases of sugar pushed the price of a pound of sugar from 19 cents to a 5-year record high of 45 cents. By May of 1981, the price had settled back to 16 cents.

Yet, in spite of the disruptive effects that dependence on the world market breeds for producers, processors, and consumers alike, the United States is the only sugar-producing country in the world to be without an effective government price support program that attempts to provide some reasonable protection against the gross inadequacies of the free world market.

S. 884, the Senate farm bill, proposes to:

First, establish a loan program for the 1982 through 1985 crops of sugar at not less than 18.0 cents per pound, and

Second, provide that loans made in one fiscal year must mature in the same fiscal year.

Mr. President, I think it is important to note that the 19.6 cents per pound stated in the original S. 884 is slightly less than 46 percent of parity.

This is only about 80 percent of 1982 domestic production costs. If measured by parity, the support level would be 10½ cents less than the average price for raw sugar in 1980.

Sugar growers argue that a mandatory price support program is critically necessary to provide the incentives and assurances they need to make the necessary investments to sustain or increase domestic sugar production. At the present time, we must import about 40 percent of our domestic needs.

The proposal contained in S. 884 is important and it should be maintained and it will operate at no cost to the Treasury because of the requirement that all loans on sugar will be repaid—with interest—in the same fiscal year in which they are made.

The sugar program proposed for inclusion in the 1981 farm bill is simple,

inexpensive to administer, and requires minimum Government interference.

A loan program covering sugar crops would not be a departure from programs covering other commodities.

A loan program for sugar would not require set asides—it is a deficit-produced crop; it would not require direct payments—returns to farmers would come from the market; it would not require on-farm storage—sugar will be stored by cane or beet processors; it would not accumulate a burdensome surplus—as a deficit-produced crop, effective control on imports can be maintained; it would not impose marketing costs on Government—properly administered, a sugar loan program will be self-liquidating.

Sugar crops compete for land with other supported crops—total support for the 1980 corn crop for example equalled 51.6 percent of parity; sugar crops compete for Government research support—less than 1 percent of $1 billion spent on agricultural research was earmarked for sugar crops; and U.S. sugar crops face market competition from both U.S.-supported crops and from abroad—approximately 45 percent of the U.S. sucrose consumption is imported and corn sweeteners now account for nearly one-third of the sweetener market.

The U.S. sugar industry is seeking nothing more than a policy which recognizes that this country needs an effective domestic sugar producing capability in the same spirit as it needs other strategically important industries.

A nonrecourse loan program for sugar will assist in stabilizing prices for consumers while assuring adequate supplies.

Stable prices permit thousands of industrial users to properly plan ahead for their production of consumer goods.

A loan program for sugar will create a reserve which can serve to moderate price increases in a rising market, thereby effecting a savings for consumers.

So, Mr. President, I do urge my colleagues to support the current language in the farm bill before us and to vote against the amendment to remove these provisions from the measure.

Thank you.

● Mr. MITCHELL. Mr. President, I rise in support of the sugar program proposed by the Senate Agriculture Committee.

Among Senate Members, there is a consensus to decrease the Federal Government's role in agriculture. I share this belief. Accordingly, I believe that many of the anachronistic, post-depression farm programs must be brought up to date at this time.

But "free market agriculture" has been referred to by a number of Senators as if it were a panacea, capable of solving all the problems of today's farm economics.

I, for one, do not believe that free market agriculture represents a fair approach to all farm commodities and all farm industries.

The result of the farm bill that we are debating today should be a thoughtful and strong farm policy for the 1980's. It should be equitable, it should be reasoned, and it should be sensitive to the financial stress under which the American farm exists today.

To make such policy, we must first understand the direction of each of these farm industries—to know where they are coming from, and to foresee where they will stand over the next 4 years during the tenure of this legislation—and design the farm bill accordingly.

The argument for responsive legislation is particularly cogent in the case of the sugar program.

The United States is the only major importing country which is without a comprehensive sugar policy in place.

And, while it is clearly evident that the production of many other commodities will be viable and strong in the 1980's the future of the U.S. sugar industry is in question today.

Since 1974, our domestic sugar industry has witnessed a loss of 25 percent of it beet sugar processing facilities, declining from 56 to 42 plants. Similar closures of raw mills have occurred for the cane sugar industry. This marked decline is due to the inherent risks involved in sugar production.

Due to the fact that the United States must import up to 40 percent of its domestic requirement, we as a Nation are largely dependent upon the supply and price of imported sugar.

This dependence is especially difficult for the sugar farmer, who must plant his crop up to 18 months before it would be marketed. This requires a farmer to guess what the market price will be a year and a half in the future, in a world market that acts not unlike a roller-coaster.

Ultimately, should this sugar program be opposed by the Congress, numerous sugar farmers will decide to discontinue their efforts because the risks are simply too great.

The future decline of the sugar industry would have severe and adverse effects on our entire economy. Sugar ranks 10th in terms of farm acreage and will rank sixth or seventh in dollars to the farmer for the 1980–81 producing year.

Nearly 100,000 Americans are directly dependent on the domestic sugar industry for their livelihood. It is estimated that no alternative crop would produce equivalent food or fiber nor provide as many job opportunities as does sugar in the areas it is produced.

Today, the U.S. sugar industry is competing, not in a world free market, but against countries whose sugar industries are heavily subsidized. It is no surprise that the homeless surplus frequently heads straight toward the only free market available, the American free market.

But this process reeks havoc for the American sugar producer. Accordingly, any further decrease in U.S. sugar production would also lead to an even greater balance-of-payment deficit.

The balance-of-payment deficit accounted for by sugar imports was nearly $2 billion in 1980. Had the Nation's total sugar requirements come solely from imports in that year, the balance-of-payments deficit would have been at least $4.7 million.

We do not produce a large or safe majority of our domestic requirements of sugar. It is therefore imperative that we insure the well-being of the U.S. sugar industry for our economic health and security by stabilizing domestic production. The sugar loan program will do just that.

I urge the Senate to approve the sugar loan program proposed by the Senate Agriculture Committee.●

THE SUGAR PROGRAM

○ Mr. LEVIN. Mr. President, I want to voice my opposition to the Quayle-Tsongas amendment to strike the sugar program from the Agriculture Act. The sugar program was included in the act to maintain the U.S. sugar industry, to prevent increasing dependence on foreign imports, and to stabilize domestic sugar prices—at no cost to the Federal Government.

Under the terms of the proposed sugar program, a processor would be eligible for a loan from the Commodity Credit Corporation using his sugar as collateral if market prices fall below a set level—18 cents in 1982, 18.5 cents in 1983, 19 cents in 1984, and 19.5 cents in 1985.

If market prices rise above that level before the loan matures, processors would redeem the loan with interest. On the other hand, if market prices do not provide an economic incentive for the processor to redeem the loan, he may forfeit the sugar to the Government.

The Government then may hold the sugar until it can be sold above the loan rate—at a profit. However, because the CCC loan program is supported by import fees and duties on foreign sugar, it is unlikely that any sugar under loan would be forfeited.

The Federal Government would not spend any money on this program and the consumer would be protected from wild price swings because market prices would not drastically fluctuate as they have done when no program was in effect.

Stable prices also benefit the sugar industry. Sugar processors and growers alike are protected by stable prices. If a processor is forced to close his operation because of low prices, the grower is also forced to stop his operation because he is left without access to a processing plant.

A sugar program would prevent this problem. In Michigan, growers number approximately 2,000 and they produce an average of 388,143,462 pounds of sugar per year.

Net proceeds in 1979 yielded over $110 million to growers and processors, which meant $770 million to the State economy.

A large percentage of the proceeds are channeled back into the economy via agri-business; fuel, fertilizer, machinery, repairs, custom operations, insurance and land rent, labor, and local, State, and National taxes.●

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the

Senator from North Carolina to lay on the table the amendment of the Senator from Indiana (Mr. QUAYLE). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BUMPERS (when his name was called). Present.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG) and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from California (Mr. CRANSTON), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 61, nays 33, as follows:

[Rollcall Vote No. 260 Leg.]

|---|---|---|
| Armstrong | Cranston | Stennis |
| Bradley | Stafford | |

So the motion to lay on the table Mr. QUAYLE's amendment (UP No. 362) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, if we could have order in the Senate, I wish to make an assessment of the situation and to try to outline the course of the activities of the Senate for the remainder of the day and this evening.

The PRESIDING OFFICER. The Senate will be in order.

The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, I understand that there are a number of amendments yet to be dealt with on this bill. Notwithstanding we have spent a lot of time on it so far, and I believe we have made some good progress on some very controversial issues, there are other issues that must be dealt with and some of them are very controversial.

Mr. President, this bill has to be passed. It is not like some bills that can be dealt with in a continuing resolution very easily or may not be dealt with at all. This bill has to be dealt with and, as I announced on yesterday, it is the intention of the leadership to ask the Senate to remain in session late today. Thursday is the regular late day if there is to be a late day. Indeed, I expect this late day to be very late. I hope we can finish this bill tonight.

I will not now propound the unanimous-consent request but I shall describe a request I will put a little later in the afternoon, perhaps in the next 30 minutes or so.

At some point, when it is appropriate to do so, I shall ask the Senate to agree that we have final passage of this measure no later than 12 midnight tonight and that amendments to this bill be under a time limitation of 30 minutes equally divided.

Mr. President, I also hope that we can accommodate every reasonable amendment that Members wish to propose, but I expect that it will be very difficult to fit them all in if everyone offers them, so I hope that Senators will be frugal in their offerings and that the managers on both sides will consider carefully those amendments if they can accept or modify them to the position where they are acceptable.

I shall not now make that request, but a little later this afternoon I shall ask unanimous consent that we establish a time of no later than midnight tonight for final passage of this measure.

Mr. BUMPERS. Mr. President, will the Senator yield for a question?

Mr. BAKER. I yield.

Mr. BUMPERS. Is it the majority leader's intention to be in session tomorrow if we finish the bill by midnight tonight?

Mr. BAKER. Mr. President, I think if we finish by midnight tonight, which would mean it would be 12:30 or 1 a.m. when we finally conclude the activities of the Senate, we will not be in session tomorrow except perhaps to lay down the Department of the Interior appropriations bill and have opening statements. I would not expect tomorrow then to be necessarily a very busy day but perhaps a very short day.

Mr. President, that is the request I wish to put. I have discussed it now with a number of Senators, especially the distinguished minority leader, and after Members have an opportunity to think about that I shall propose that or some variation of that request.

Mr. FORD. Mr. President, will the majority leader yield for a question?

Mr. BAKER. I yield.

Mr. FORD. Mr. President, as the majority leader knows, it put some of us in quite a tight position. I am not sure that I can speak for my other colleagues, but where we had three rather controversial amendments so far, there will be others, and where they have had unlimited time to discuss and debate those amendments, then the majority leader is requiring those of us, who have a problem as others have had problems, if one wishes to use that, who are just as sincere and dedicated in protecting some of ours as the others have to agree to a time limit, and I would be very, very reluctant to give the majority leader a unanimous-consent agreement 30 minutes from now or an hour from now or at midnight tonight, very frankly, because I have a dedication to one particular amendment and I intend to do the best job I can with it along with my other colleagues.

So I think the majority leader is asking those of us who have not had an opportunity yet, to agree to a time limit, and apparently the one I am primarily interested in along with some others will not be considered until the end because it is not even in the farm bill. Therefore, we put ourselves somewhat in jeopardy. I just wish to advise the majority leader of at least this Senator's feeling at the moment.

Mr. BAKER. Mr. President, I thank the Senator from Kentucky.

I have no desire to limit the scope of his opportunity to debate, but the fact remains that we have to try to finish this bill.

I think the Senator from Kentucky knows I am on the same side of the issue that he is on, and I intend to help him any way I can, but notwithstanding that I very much hope that we will give serious consideration to the possibility of a unanimous-consent request that will establish a time certain for the passage of this measure no later than, say, midnight tonight.

Mr. President, I thank all Senators, and I now yield the floor.

Mr. RANDOLPH. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. RANDOLPH. I thank the majority leader for the opportunity to follow through with a question which responds to the language that if we finish tonight that Friday would not be a very busy day. Does that include rollcalls?

Mr. BAKER. Mr. President, I cannot say with certainty. I think if we get this agreement that it is unlikely we would have rollcalls on Friday.

By the way, the distinguished chairman of the Appropriations Committee just indicated to me he would not be ready on Friday to proceed to the Interior appropriation bill, so that still further reduces the likelihood there will be any significant business to be transacted on Friday if we can finish this bill tonight.

Mr. RANDOLPH. I thank the Chair.

---

## AUTHORIZATION FOR COMMITTEE ON THE JUDICIARY TO FILE REPORT ON NOMINATION OF JUDGE O'CONNOR UNTIL MIDNIGHT TONIGHT

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary may have until mid-

night tonight to file the report on the nomination of Sandra Day O'Connor to be an Associate Justice of the Supreme Court of the United States.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

## AGRICULTURE AND FOOD ACT OF 1981

The Senate continued with the consideration of S. 884.

The PRESIDING OFFICER. The Senator from Maine.

UP AMENDMENT NO. 363

(Purpose: To direct the Secretary of Agriculture to use the authority provided in section 1203 to implement a special standby export subsidy program for potatoes)

Mr. COHEN. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. COHEN) proposes an unprinted amendment numbered 363.

Mr. COHEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 241, between lines 13 and 14, insert the following:

"(e) The Congress finds that Canadian domestic production subsidies and European Economic Community subsidies are causing substantial displacement in the export sales of fresh and processed potatoes produced in the United States. The Secretary of Agriculture, therefore, is directed to exercise the authority provided in the foregoing provisions of this section to implement immediately a special standby export subsidy program for the purpose of neutralizing the effects of such subsidies programs instituted by Canada and the European Economic Community countries."

Mr. COHEN. Mr. President, I ask unanimous consent that Senator MITCHELL be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate is not in order. The Senate will be in order.

The Senator from Maine.

Mr. COHEN. Mr. President, I ask unanimous consent that Bob Umphrey of my staff be granted floor privileges during the consideration of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, the principal objective of this amendment is to remedy an inequitable situation which severely inhibits the ability of domestic potato producers to penetrate foreign markets with U.S. exports. Specifically, my amendment directs the Secretary of Agriculture to implement a program of export subsidies for domestically produced potatoes to offset the generous Government subsidies provided to Canadian and European Common Market producers.

While export markets exist in Latin America, Europe, the Middle East, and North Africa, an extensive array of foreign subsidies and programs prevent U.S. producers from competing in these markets. Many Canadian programs—both Federal and provincial—aggressively and directly assist Canadian producers in crop production and, indirectly, in export development. In addition, other Federal Canadian programs have been instrumental in developing eastern Canadian port facilities, with an improved transportation network, and modern cargo handling facilities. These projects have enabled the Canadian potato producers to successfully compete in foreign markets for potato seed and tablestock, as well as processed products. I ask unanimous consent that a draft list of Canadian programs, prepared by the State of Maine, be printed in the RECORD, along with a report from our agricultural attaché.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PROGRAMS FOR POTATO GROWERS IN N.B., P.E.I., AND THE STATE OF MAINE

INTRODUCTION

The intent of this report is to provide a summary of assistance programs available to potato growers as requested by the Marketing and Trade Committee appointed by the Main Commissioner and the Ministers of Agriculture from P.E.I. and N.B.

The programs are divided into two sections: Section I deals with programs of financial assistance. Section II covers the various programs of a technical support nature.

SECTION I—LOANS AND SUBSIDIES

NEW BRUNSWICK

N.B. Crop Insurance Program.
Farm Adjustment Act.
Interest Subsidies.
Agricultural Limestone Assistance.
Farm Development Program.
Farm Machinery Loans Act.
Family Farm Improvement Program.

PRINCE EDWARD ISLAND

New Farmer Program.
Family Farm Development Program.
Agricultural Limestone Incentive Policy.
P.E.I. Crop Insurance Program.
Potato Disinfection Service.
Cull Burial Program.
Seed Incentive Program.
P.E.I. Lending Authority.
Property Tax Credit.
Land Development Corporation.

MAINE

Agricultural Conservation Program.
Livestock Feed Diversion Program.
Farmers Home Administration Loans.
Agricultural Stabilization and Conservation Service Loans.
Tax Subsidies.

AGRICULTURE CANADA

Fruit and Vegetable Storage Construction Advance Payments for Crops.
Agricultural Stabilization Act.

Title: New Brunswick crop insurance program (potatoes).

Source: Federal-Provincial.

Description: The Crop Insurance Program is designed to stabilize the income of farmers by insurance against crop loss due to natural hazards over which they have no control.

Potato crops may be insured at either 70% or 80% of the established yield (usually a six year average). The premium rate on potato coverage is 9% of which the Federal Government pays 50%. The N.B. Department of Agriculture administers the program.

Eligibility: In order to qualify for coverage, growers must:

1. Plant certified or better seed.
2. Insure all potato acreage.
3. Complete planting by June 15th.
4. Complete harvest by October 15th for Netted Gems or October 10th for other varieties.
5. Follow recommended and acceptable cultural and crop protection practices.

Budget: N/A.

Utilization: In 1980, 10,532 acres of potatoes or approximately 20% of the total provincial potato acreage was insured. From 119 accounts, total coverage amounted to 46,-111,395. Preliminary figures for 1981 indicate a slight increase in these numbers. Total indemnities for 1980 amounted to $575,000, slightly in excess of the total premiums paid.

Comments: Special coverage is available to seed potato growers with slightly higher coverage and premium rates.

Title: Farm Adjustment Act.

Source: Provincial.

Description: The Farm Adjustment Board provides loans and leases land to full and part-time farmers at low interest and rental rates, to assist farmers in establishing and maintaining economic farm units.

The Board may grant loans on the following terms and conditions:

(a) The Board must be satisfied that farmers have the necessary abilities to establish themselves economically;

(b) The amount and term of the loan will be determined by the Board; and

(c) Interest shall be 5% per annum on loans approved prior to January 24, 1980 and the Provincial Lending Rate in effect on loans approved after January 24, 1980.

Eligibility: The Board may grant loans to full and part-time farmers if:

(a) The Board is satisfied that a loan will effectively establish the farmer on an economic farm unit; and

(b) The Board is satisfied that the applicant has the necessary ability, skill and knowledge to operate his holding in accordance with a mutually agreed management plan.

Budget: $11,000,000 in loans and advances budgeted for 1981–82.

Utilization: During the fiscal year 1980–81, the Board disbursed $12.8 million. Of this amount, $12.3 was in the form of secured loans and $.5 million was expended for the acquisition of land to be leased to farm operators.

Title: Interest subsidies.

Source: Provincial.

Description: The Government of New Brunswick, through the Farm Adjustment Board, contributes towards interest payments on loans obtained by New Brunswick farmers from the Farm Credit Corporation, the Veterans Land Act and to new applicants of F.A.B. loans.

Budget:

| | |
|---|---|
| F.C.C. Interest Subsidy | $1,307,100 |
| V.L.A. Interest Subsidy | 15,000 |
| F.A.B. Interest Subsidy | 991,400 |

Utilization: In 1980–81, $1.2 million was contributed toward F.C.C. interest payments and $10,842 went towards V.L.A. subsidies.

Title: Agricultural limestone assistance.

Source: Provincial.

Description: The objective of the Agricultural Limestone Program is to encourage the establishment of sound liming practices by providing a free soil analysis service and a contribution towards the cost of limestone transportation from the plant to the farm. Assistance rate schedules are established based on mode of transportation and distance haulded.

Eligibility: The program is available to all farmers engaged in commercial crop production. To qualify for assistance, purchasers are required to submit a soil sample for analysis.

Budget: $430,000 has been budgeted for 1981–82.

Utilization: In 1980–81, $346,000 was paid on approximately 49,000 tons of lime.

Comments: Although available to potato growers, this program would not be used extensively.

Title: Farm development program.

Source: Federal-Provincial.

Description. The Farm Development Program provides a farm management counselling service to assist farmers in planning and implementing activities which will improve the viability of the farm unit. The Program also provided a grant to assist in providing a portion of new capital requirements to a maximum of $25,000.

The program is funded through the Agricultural Sub Agreement.

Eligibility: All farmers, whether full-time or part-time who are establishing a viable operation or improving or expanding to a more viable operation are eligible for assistance.

Budget: Funds available for this program have been totally committed. $14.6 million was budgeted, $11.1 million has been expended. $20.0 million in grants has been approved.

Utilization: $1.7 million in grants has been paid to potato growers. Over the period of the Agreement, approximately 80 percent of total funding was for land clearing, buildings and machinery.

Title: Farm Machinery Loans Act.

Source: Provincial.

Description: The objective of this program is to assist N.B. farmers in obtaining credit for the purchase of farm machinery and equipment. The Department of Agriculture guarantees bank and credit union loans of from $1,500 to $30,000 at prime plus 1 percent for 75 percent of the purchase price of machinery and equipment.

Eligibility: All N.B. farmer-producers.

Budget: N/A.

Utilization: Under this Act, 64 loans were made in 1980–81 for a total of $221,851. To date, loans have been made involving $4.7 million.

Title: Family farm improvement program.

Source: Provincial.

Description: The purpose of this program is to assist farmers by providing some of the capital required to improve land and buildings. The program is designed to provide incentive programs that will result in the optimum development of individual farm enterprises. The maximum contribution under all sub-programs shall not exceed $10,000.

Eligibility: Small and part-time farmers that have met the census definition of a commercial farmer.

Projects eligible for assistance include: land improvement, erosion protection and stream pollution control.

Budget: $4,000 budgeted for 1981–82.

Utilization: Very little use is being made of this program. The majority of the farm development is being carried out under the Farm Development Program.

PRINCE EDWARD ISLAND

Title: New farmer program.

Funding: Federal/Provincial.

Description: Under this Program qualified residents who are establishing a farm for the first time are eligible to receive up to $25,000 as a forgiveable loan together with advice and assistance in making other financing arrangement and technical advice and training in preparing a general farm management plant.

Utilization: During 1976–81 approximately $880,000 was advanced under this Program to 51 farmers whose primary production was potatoes.

Title: Family farm development program.

Funding: Federal/Provincial.

Description: Under this Program qualified residents may receive up to $25,000 as performance grant assistance in establishing a farm or $15,000 for further developing an established farm. The program is aimed at providing an integrated package of financial assistance and the technical support necessary to assist farmers in improving their skills as producers and farm managers.

Utilization: During 1976–81 approximately $2,900,000 was advanced to 200 producers whose primary production was potatoes.

Title: Agricultural Limestone Incentive Policy.

Funding: Provincial.

Description: As a means of increasing the productivity of agricultural land, producers are encouraged to use soil acidity corrective limestone. Eligible producers may receive $11 per metrc tonne to a maximum of 180 tonnes per year.

Utilization: In 1980–81, $746,966 was advanced to 1818 producers. The program is primarily aimed at other crops but as those crops are frequently in the potato crop rotation plan, the program is considered to significantly benefit potato producers as well.

Title: P.E.I. Crop Insurance Program (Potatoes)

Funding: Federal/Provincial

Description: The Crop Insurance Program is designed to stabilize the income of farmers by insurance against crop loss due to natural hazards over which they have no control.

Potato crops may be insured at either 70 percent or 80 percent of the established yield (usually a six year average) at a selected value of $3.00, $3.50 or $4.00 in the case of 70 percent coverage or $2.50, $3.00 or $3.50 in the case of 80 percent coverage. For 70 percent coverage the average premium rate is 8.2 percent and for 80 percent coverage it is 10 percent. Assuming, for example an established yield of 200 cwt. and 80 percent coverage at the $3.00 rate, the premium would be

$$\frac{200}{100} \times 80 \times 3.00 \times \frac{10}{100} \text{ or } \$48.00$$

per acre, half of which is paid by the federal government, the P.E.I. Crop Insurance Agency administers the program.

Eligibility: In order to qualify for coverage, growers must—

1. Plant certified or better seed.
2. Insure all potato acreage.
3. Complete planting by June 15. (June 10 for Gems and Sebagoes)
4. Complete harvest by October 15.
5. Follow recommended and acceptable cultural and crop protection practices.

Budget: In 1980, about 28,000 acres of potatoes or half of the total provincial potato acreage was insured. From 247 accounts, total coverage amounted to $1.4 million and premiums paid totalled $651,000.

Comments: Special coverage is available to seed potato growers with slightly higher coverage and premium rates. A Bacterial Ring Rot Rider is also available and provides $30 per acre to defray costs of clean-up.

Title: Potato disinfection program.

Funding: Provincial.

Description: To aid in the control and eventual eradication of Bacterial Ring Rot, the Province, as a free service, will steam clean and disinfect potato storages, handling equipment and machinery following clean-up at the close of each shipping season.

Utilization: Under this program around 500 warehouses/storages, 20,000 trucks, 5–6,000 refer cars and 10,000 pieces of other equipment are disinfected each year at a cost of approximately $300,000.

Title: Cull burial program.

Funding: Provincial.

Description: To aid in the control of potato disease and for general environmental considerations the Province, as a free service to producers, will upon request provide bulldozers for burying cull potatoes from May 1 through July 15.

Utilization: This service is utilized by approximately 150 growers at a cost of about $150,000.

Title: Seed Incentive Program.

Funding: Provincial.

Description: As a means of encouraging producers whose crop has been infected with BRR to eradicate the disease on their farm, the Province assists in the cost of purchasing new seed. Under this program, eligible growers may receive $30 per acre providing proper clean-up and disinfection is effected and new seed of Foundation Class or better is purchased.

Utilization: This program has been used by practically all eligible producers but as the incidence of BRR has decreased, the use of the program has dropped to the extent that in 1979/80 only 13 growers applied for approximately $40,000.

Title: P.E.I. Lending Authority.

Funding: Provincial.

Description: The Lending Authority offers P.E.I. producers a complete credit package for working capital based on cost of production and the acquisition of land, buildings and equipment. Short-term loans are offered at prime rate and long-term loans are offered at the Authority's cost of borrowing.

Title: Property Tax Credit.

Description: Bona fide farmers are granted a real property tax deferral that amounts to approximately $200 per year on the average farm.

Title: Land Development Corporation.

Description: Producers wishing to acquire land by purchase or rental may look to the Corporation which temporarily acquires available land and holds it to facilitate producers in establishing or expanding farm operations.

STATE OF MAINE

Title: Agricultural conservation program.

Source: Federal-State.

Description: This Federal program, authorized in 1936 by the U.S. Soil Conservation and Domestic Allotment Act, provides farmers with government cost-sharing toward the cost of carrying out pollution abatement, soil, water, woodland and wildlife conservation practices on farmland. To be eligible, farmers must be cooperators with their local county Soil and Water Conservation District, and practices must meet specifications defined by the U.S. Soil Conservation Service. The maximum yearly amount available to individual farmers was $2,500 until 1979 when it was increased to $3,500. The Federal cost sharing rate ranges from 50 percent to 75 percent depending on the practice.

Funding: Since 1977, the annual federal appropriation for this program has been $190 million. The State of Maine has expended on the order of $2 to $3 million annually, with Aroostook County accounting for 25 percent to 30 percent of total state expenditures.

Utilization: In 1979 federal payments to farmers in Aroostook County totalled $854,150 of which approximately $830,570 was paid for practices applicable to potato farmers. In 1980 Aroostook County farmers received $807,194 with $789,880, applicable to potato growers. State wide expenditures to all farmers totalled $3,305,819 in 1979, and $2,022,230 in 1980. Table 1 provides a breakdown of practices utilized in Aroostook County. Administrative costs added another $161,185 in 1979 and $167,904 in 1980 to the cost of the Aroostook County ACP Program.

Title: Livestock feed-potato diversion program.

Source: Federal.

Description: This program allows the federal government to make payment to potato farmers for diverting potatoes to livestock feed or starch in surplus years to avoid depressing prices due to oversupply. In order to be eligible for the program, potatoes have to meet a specific grade requirement and then be processed for feeding to livestock to insure the potatoes will not enter normal trade channels. This program is authorized by Section 32 of the Agricultural Marketing Act of 1946.

Funding: Monies paid to growers for diversion of potatoes are derived from a fed-

eral pool created by import tariffs. The Food Safety and Quality Service of the USDA initiates a request for funds which is subject to approval by the Secretary of Agriculture. Responsibility for this program now resides with the Agricultural Marketing Service.

Utilization: The Potato Diversion Program has only been used twice in the last decade.

In 1979 over 140 Aroostook County farmers signed up for the program which diverted 1.45 million hundredweight of potatoes. Farmers were reimbursed at a rate of $2.20/cwt during the first 30 days and $1.70/cwt during the final 30 days for a total of $3,233,124 in payments. In 1980, the program was again approved to benefit 118 farmers who diverted .5 million hundredweight and were reimbursed $2.24/cwt for a total of $1,105,827.

Title: Farmers Home Administration Loans.

(1) Ownership Loans: These loans may be obtained for the purchase, enlargement, or development of farms, which will not exceed the size of a family-type unit. Such loans also may be used to refinance debts and to finance a small, non-farm enterprise, when it is necessary to supplement the farm income to provide the individual with a reasonable standard of living. The interest rate is determined annually, and a loan may be amortized over a period not to exceed 40 years. Loans may be made to eligible individuals, cooperatives, corporations and partnerships. Also, Farm Ownership loans may be made at lower interest rates to eligible limited-resource applicants. Such applicants are those with low incomes, who are operators of small farms. They are handicapped by such factors as limited education, low managerial skills, lack of adequate land and other captial items, low producing farms and economic conditions.

FUNDING LEVELS AND INTEREST RATES ARE SHOWN FOR FISCAL YEARS 1979–81 FOR AROOSTOOK COUNTY

| Fiscal year | Total | Regular loans: Amount | Regular loans: Rate, percent | Limited resource: Amount | Limited resource: Rate, percent |
|---|---|---|---|---|---|
| 1979 | $1,018,900 | $652,200 | 8½–9 | $366,700 | 3 |
| 1980 | 1,753,100 | 1,270,000 | 10–12 | 483,100 | 4–5 |
| 1981 [1] | 1,568,200 | 1,164,700 | 12¼–13½ | 403,500 | 5 |

[1] Through June 1981.

Title: Farmers Home Administration Loans.

(2) Operating Loans: Operating loans may be made to provide financing for the operation of farm enterprises, not exceeding the family-type unit. Loan funds may be used for annual operating expenses, purchasing livestock and equipment, refinancing debts, non-farm enterprises, home operations, etc. The interest rate is determined annually and loans may be written for a period not to exceed 7 years, with a 7-year renewal feature. Loans may be made at a lower interest rate to eligible, limited-resource applicants, as defined under Farm Ownership loans, above.

FUNDING LEVELS AND INTEREST RATES FOR FISCAL YEARS 1979–81 FOR AROOSTOOK COUNTY

| Fiscal year | Total | Regular loans: Amount | Regular loans: Rate, percent | Limited resource: Amount | Limited resource: Rate, percent |
|---|---|---|---|---|---|
| 1979 | $4,484,690 | $4,010,000 | 8½–9½ | $474,690 | 5 |
| 1980 | 4,602,370 | 4,028,720 | 10½–12½ | 573,650 | 6–7 |
| 1981 [1] | 4,792,890 | 3,737,460 | 13–14½ | 1,055,430 | 7 |

[1] To June 30, 1981.

(3) Emergency Loans: In the event that a natural disaster causes serious agricultural losses, the area affected may be designated for emergency loan benefits. The purpose of such financing is to assist eligible applicants, who have sustained losses, to continue normal farming operations and return to other sources of credit as soon as possible. Loans may be made for annual operating purposes, and to make a major adjustment in a farm operation. Loans may be written for periods not to exceed 40 years, depending on loan purpose and security.

FUNDING LEVELS AND INTEREST RATES FOR FISCAL YEARS 1979–81 FOR AROOSTOOK COUNTY

| Fiscal year | Total | Interest rates: Actual loss | Interest rates: Percent operating expense |
|---|---|---|---|
| 1979 | $18,800,720 | 5 | 7½–9½ |
| 1980 | 18,175,870 | 5 | 10½–14 |
| 1981 [1] | 18,222,730 | 5 | 12½–15 |

[1] To June 30, 1981.

(4) Economic Emergency Loans: This loan program was authorized in 1978 under Public Law 95–334. It expires in September, 1981. The objective of the Economic Emergency loan program is to make adequate, financial assistance available to bonafide farmers and ranchers who are primarily and directly engaged in agricultural production, so that they may continue their normal, farming or ranching operations during the economic emergency which has caused a lack of agricultural credit, due to national or area-wide economic stress, such as a general tightening of agricultural or an unfavorable relationship between production costs and prices received for agricultural commodities. It is the policy to consider making guaranteed Economic Emergency loans, and further, to fully participate with the applicants normal agricultural lender when making insured Economic Emergency loans. Loan funds may be used for either real estate or operating purposes, and written for a period, not to exceed 40 years, depending on the purpose of the loan. There is no restriction on the size of the farm operation, and loans may be made to individuals, cooperatives, corporations or partnerships. The principal balance outstanding at any time may not exceed $650,000.

FUNDING LEVELS AND INTEREST RATES ARE SHOWN FOR FISCAL YEARS 1979–81 FOR AROOSTOOK COUNTY

| Fiscal year | Tctal | Interest rates: Operating | Interest rates: Real estate |
|---|---|---|---|
| 1979 | $3,154,840 | 8½–9½ | 8½–9 |
| 1980 | 5,095,570 | 10½–14 | 10–14 |
| 1981 [1] | 4,614,400 | 13–14¾ | 12¼–13¼ |

[1] Through June 1981.

(5) Soil and Water Loans: These loans may be obtained by eligible applicants to develop or improve water, land and forest resources in accordance with approved conservation practices. This program was not utilized in Aroostook County in Fiscal Years 1979–81.

Utilization: Farmers Home Administration (FmHA) Loans.—Allocations to the State of Maine for these programs in Fiscal Years 1978 through 1980 approximated $45 to $50 million. Aroostook County's share of these monies from 1978 to the present has been $27–30 million annually. Most of this has been utilized by potato farmers.

Title: Agricultural Stabilization and Conservation Service (ASCS) Loan Programs:

Source: Federal.—

(1) Commodity loan program: This program was established to help foster the orderly marketing of certain agricultural crops. Oats constitute the only crop affected in Aroostook County. This affects potato growers who grow oats as a rotation crop. The loan program allows eligible producers to take out a loan and hold their commodity to sell when the market may be more favorable. The loans are made directly to a producer with the commodity put up as collateral. When the loan matures, no later than 9 months, the producer may either repay the loan plus interest or forfeit the commodity to the Commodity Credit Corporation. The loan thus represents a price support, guaranteeing farmers a minimum price.

Funding Levels/Interest Rates: In Fiscal Year 1979, Aroostook County farmers obtained Commodity Loans for nine percent interest. Rates rose to 13% in April 1980, and currently are 14½%. A variable interest rate is now in effect. Loans will be issued at the cost of money to the government. Currently the loans are being based on $1.36/bu. The market price projected for next spring is $1.80–$2.00/bu. In very few cases has it been to the farmers advantage to forfeit the crop to the government. On a national basis the average support price has generally been less than the average market price. Thus this program is considered a loan subsidy, not a direct subsidy.

(2) Farm storage facility and drying equipment loan program: This program offers loans to help farmers buy, build or remodel on-farm storage facilities and to obtain the drying and handling equipment they need. Need for eligible storage structures, which include conventional bins, multipurpose structures, upright silo-type structures and horizontal type bunker silos, is based on two years production, minus existing storage capacity. Operating equipment essential to the operation of the storage or drying unit may be included in the loan.

Funding levels/interest rates: In Fiscal Year 1979, the maximum loan was 85 percent of the cost of the structure and equipment. The remaining 15 percent of the cost was paid by the farmer before the loan is disbursed.

A loan amount or the outstanding loan balance with any farmer was limited to $50,000. Loan repayment terms allowed for a maximum of seven equal annual installments over a period of eight years. The rate for loans based on applications filed by close of business March 21, 1979, was 7 percent per annum. The rate for loans based on applications filed after March 21, 1979, was 10.5 percent per annum.

In Fiscal Year 1981, the program was altered slightly. The maximum loan has been reduced to 75 percent of the cost. Farmers can borrow up to $50,000 with 25 percent down and 14.5 percent interest. The loans will be subject to adjustment in the interest rate each October 1 and April 1. Repayment of the loan is made through annual installments over a five-year period.

In the Fiscal Year 1979, 8 farmers in Aroostook County received $118,744 in loans through this program. In Fiscal Year 1980, 28 farmers in the County had outstanding loans in the amount of $378,410.

Title: Tax Subsidies.

Income Deductions: Farmers are allowed to reduce gross taxable income by deducting all business expense including hired labor, repairs and maintenance, interest paid on loans and mortgages, rental expenses, feed, seed and fertilizer costs, machine hire, purchased supplies, gasoline, fuel and oil, storage and warehousing expenses, State sales and local property taxes, insurance costs, utilities, freight and trucking, conservation expenses, land clearing expenses, pension and profit-sharing plans, employee benefit programs, and depreciation on equipment and structures used in business which have a useful life in excess of one year.

Tax Credits: Tax credits are subtracted from tax liability and so directly reduce the farmers tax burden. There are two tax credits applicable to potato farmers: a fuel tax credit and investment credit.

Fuel tax credits allow farmers to claim as a tax credit the federal excise tax paid on

gasoline, diesel fuel, special motor fuels, and aviation fuels which are used on the farm for farming purposes (off road). This amounts to recovery of a federal tax already paid.

An investment credit of 10% of the cost of investments is allowed for business equipment or specialized single purpose storage or structures with a minimum useful life of 3 years. In addition, if a farmer invests in energy equipment for alternative energy generation from biomass, hydropower solar or wind, additional credits of 10% to 15% may be taken. This latter energy credit generally applies only to investments made between September 1978 and December 1982.

State Sales Tax: A 5-percent sales tax is assessed to all articles sold in Maine, unless specifically exempt.

Exemptions: Items for which sales tax is refunded or which are exempted from sales tax, and which pertain to potato farmers include: seed, feed, fertilizer, pesticides, insecticides, fungicides, defoliants and depreciable equipment used in agricultural production. This includes field machinery and machinery to transfer the crop to storage, as well as sorting and packaging equipment, but not equipment associated with storage of the product such as cooling and ventilation equipment. Vehicles used to handle the packaged product, such as forklifts or to transfer the product to market, as trucks, also are not exempt.

Property Taxes: Property tax is assessed and collected by municipalities in Maine. These revenues are used to support local services such as schools and road maintenance, and consequently tax rates and valuations are widely varied.

Property Tax Reductions: Two Maine laws exist which enable farmers to potentially reduce property tax liabilities. The Farm and Open Space Tax Law is intended to assure that farmland is taxed as farmland not as developable land. Landowners who classify land under this law are assessed a penalty if the land is thereafter developed. Since farmland in Aroostook County is not being assessed at a higher value due to developmental pressures, there is little incentive for its use in this area.

A second law, the Tree Growth Tax Law, limits the valuation of forest land to the annual stumpage value determined on a sustained yield basis. Like the Farm and Open Space Law, a penalty is assessed for conversion of land to other than forestry-related uses. Land enrolled under this law is generally valued below prevailing rates for undeveloped land, and consequently, it is widely used throughout the State. Participation by potato farmers in this program is undetermined.

FEDERAL

Title: Fruit & Vegetable Storage Construction Financial Assistance.

Source: Federal.

Description: Assistance for construction of new storage or renovation of existing storage which will extend the storage period and/or retain quality of storable produce at an improved level.

Eligibility: Producer groups of 3 or more primary producers are eligible for up to one third of the total cost of the project but not to exceed $500,000 for any single project.

Budget: The annual budget has ranged from $1–$3.5 million since the inception of the program in 1973.

Utilization: Utilization of the program has been 50 percent plus for apple storages, 30 percent for potato storages and the balance for carrot, onion, cabbage, horseradish, rutabagas and pears. Regional utilization has been 45 percent to British Columbia, 5 percent Alberta, 10 percent Manitoba, 20 percent Ontario, 15 percent in Quebec and 5 percent for New Brunswick, Nova Scotia and Prince Edward Island.

Comments: The program has not been readily accepted by potato producers in P.E.I. and N.B. who have been reluctant to form up into producer groups to become eligible.

Title: Advance Payments for Storage Crops.

Source: Federal.

Description: Agriculture Canada agrees to pay the interest on loans to producers who as an association undertake to market their produce in an orderly marketing scheme through specified purchases and to repay the principal amount of the loan as sales are made.

Eligibility: A group of producers formed up into a legal organization to represent a significant portion of production in an area.

Budget: Annual budget is $3,000,000 for all storable crops. Potato producers in P.E.I. and N.B. received $350,960 in 1980.

Utilization: 360 growers in P.E.I. and N.B. took advantage of the program in 1980.

Title: Agricultural Stabilization Act.

Source: Federal.

Description: Producers may make application to the Minister of Agriculture to request that their crop be "designated" for deficiency payments.

The Act provides for payments to producers to stabilize returns at a level of 90 percent of the previous five year average adjusted by any increase or decrease in the cost of production over the previous five year average cost. Regional programs are considered if specific conditions affected one area more than others.

Eligibility: Individual producers are eligible for assistance with maximum payments to apply according to criteria established by the Agricultural Stabilization Board.

Budget: The annual budget includes an estimate for total cost for products "named" in the Act as well as for "designated" products. Each program is approved separately by Treasury Board.

Utilization: Stabilization payments were made to producers in Eastern Canada on the 1979 crop but not for 1980.

Coments: The Agricultural Products Board has authority under comparison legislation to purchase product or otherwise to facilitate disposal of product if market conditions can be improved.

NEW BRUNSWICK

Title: Potato Industry Evaluation & Education.

Source: Provincial.

Description: This is a comprehensive program which is designed to develop, evaluate and communicate new and existing technologies for the potato industry in N.B. Activities carried out under this program include:

(1) Wicklow Resource Centre—Provides staff as resource people in the areas of potato production, entomology, pathology, soil management and storage management.

(2) Plot Work—Soil management and fertility testing.

(3) Production Records—Information is gathered and assembled on soil samples, fertility, climatology, yields, herbicides and pesticides. Information will subsequently provide a data base on which to make crop recommendations to growers.

(4) Pest Management—Provides information regarding insect population levels and advises growers on insecticide applications.

(5) Variety Screening and Multiplication—This program screens varieties and advanced seedlings with respect to their potential in foreign and domestic markets.

Eligibility: N.B. potato growers.

Budget: N/A.

Utilization: N/A.

Comments: This is not a comprehensive list of projects carried out under Potato Industry Evaluation and Education, but serves as a representative sample.

Title: Bon Accord Seed Potato Farm.

Source: Provincial.

Description: The Bon Accord Seed Potato Farm provides virus-free, high-quality, seed potatoes to the New Brunswick seed potato industry. Nineteen varieties are produced in three seed classes: Pre-Elite, Elite I and Elite II. The farm also serves a promotional function to the seed industry.

Eligibility: N/A.

Budget: N/A.

Utilization: Pre-Elite and Elite I stocks, not required at Bon Accord, and all of the Elite II stock were graded and sold to 91 eligible seed growers in 1980–81.

Title: Post harvest testing program.

Source: Provincial.

Description: This program provides a method of determining disease levels in New Brunswick seed potato lots. A field testing program is conducted in Florida in the fall and winter. The information is communicated to participating growers and is also used to form a data base of information on disease levels.

Eligibility: N/A.

Budget: N/A.

Utilization: N/A.

Title: Contracts program.

Source: Provincial.

Description: Funds are provided to the N.B. Potato Agency to conduct two programs.

(1) Mandatory disinfection service and storages and cull piles according to the provisions of the Potato Disease Eradication Act.

(2) To conduct a Potato Disease Survey and to certify areas which are free from ringrot.

Eligibility: N/A.

Budget: 1981–82, $80,000.

Utilization: N/A.

PRINCE EDWARD ISLAND

Title: Extension/Marketing.

Funding: Provincial.

Description: In addition to the specific programs outlined, a general advice service is available in areas of land management, pest and disease control, marketing, engineering, soil testing, climatology etc.

MAINE

Technical Assistance and Research Programs: These programs provide information which enable potato growers, wholesalers and retailers to improve production and to better compete in the marketplace. It should be noted that many of these programs benefit not only Maine potato growers but also potato growers in Canada and elsewhere in the U.S.

(1) U.S. Crop Reporting Service: An agency within the U.S. Department of Agriculture, the Crop Reporting Service reports production statistics on various agricultural crops including potatoes. This information is available to all potato farmers; utilization is high. Funds are appropriated on a national basis for the program as a whole; the contribution of Federal resources benefitting Maine potato farmers is estimated at approximately $35,000 to $40,000 annually.

(2) Federal-State Market News Service: This program, jointly funded by the State of Maine and the USDA, issues a daily potato bulletin which provides market price information, supply/demand indicators, and information on terminal and shipping point markets. The bulletin has a circulation of 700–900. The State of Maine contributes $18,500 annually to the Service. The Federal contribution is unknown.

(3) Federal-State Inspection Service: This program provides the potato industry with a voluntary grading service funded by fees paid by the users of the program. In 1980, this service was utilized by an estimated 20% of the growers, although in prior years, utilization has been on the order of 75–80%. As a result of recent legislation, the State of Maine will contribute approximately $100,000 to the program in 1981–82 and $120,000 in 1982–83 in order to reduce the cost to the users and obtain greater participation.

(4) U.S. Soil Conservation Service (SCS): The SCS is a federal agency within the USDA whose mandate is to provide technical assistance to farmers towards the reduction of soil loss and improvement of water-quality. This agency works through cooperative agreements with local Soil and Water Conservation Districts which are supported by State and local funds. About one-third of the State's potato farmers utilize this service. Federal funding supporting this activity is estimated at $250,000/year. State funds supporting the 3 Aroostook County Districts approximate $6,600/year. The Districts also raise money locally through sale of trees and shrubs and agricultural drainage tile.

(5) U.S. Agricultural Research Service: This agency, also within the USDA, conducts two research programs which benefit Maine potato farmers: (1) A plant breeding program conducted in Beltsville, Maryland budgeted at an estimated $110,000/year; and (2) A soil and water laboratory in Orono, Maine at which studies on soil borne pathogens related to potatoes is being conducted under a budget of approximately $60,000/year.

(6) University of Maine Research Station: The University of Maine conducts a variety of research programs related to the potato industry utilizing Federal and State funds approximately $175,000/year and industry funding of approximately $96,000/year.

(7) University of Maine Cooperative Extension Service: This service provides educational assistance to potato growers related to all aspects of production and marketing including farm management, pest management, engineering and financial technical assistance. The Service maintains 4–5 potato specialists to serve the industry. The cost of the Service, approximately $150,000 annually, is jointly shared by the Federal government (50%), State government (40%) and County government (10%).

(8) Maine Seed Potato Board: This Board was established by the Maine Legislature to produce seed potatoes for distribution and sale to Maine potato growers, and to guide work on improving the quality of Maine seed potatoes. Through 1980, it has been funded entirely through industry taxes. Recent legislation has approved a state contribution of $150,000 over the period 1981–83 to help fund capital improvements.

(9) Maine State Seed Potato Certification Program: A major activity of the Division of Plant Industry within the Maine Department of Agriculture is the certification of seed potatoes. A crew of 14 year-round seed inspectors, supplemented by 20 additional inspectors in the summer, is responsible for testing seed plots for State certification. Although this activity is funded through the collection of industry taxes, the State contributes approximately one man-year annually in administrative services towards this and other programs related to potatoes.

(10) U.S. Agricultural Marketing Service Research/Development Grants: Three Federal grants have been awarded to assist the Maine potato industry since 1977. These grants, totalling $107,000 provided funds to study transportation alternatives for marketing potatoes, to investigate and facilitate foreign export of potatoes, and to improve the sales and marketing structure of the industry.

FEDERAL

Title: Inspection Services.

Source: Federal.

Description: Agriculture Canada through Plant Quarantine Division of the Food Production and Inspection Branch, provides field storage and laboratory examination of seed potatoes. This service has been free but currently a Seed Potato Quality Program is being initiated which will include user-pay provisions on a shared cost system.

The Dairy, Fruit & Vegetable Division of the Food Production and Inspection Branch provides shipping point inspection on all shipments of table potatoes leaving P.E.I. and N.B. for domestic or export markets. An inspection fee is paid by the shipper.

Title: General.

Description: The Department of Industry, Trade and Commerce have a variety of programs available to potato exporters to assist in promotions. These programs are mainly directed toward trade missions either into Canada or to off-shore markets.

EXPORT MARKET PROMOTION

Export market promotion is available to Maritime potato growers through the efforts of the industry groups, the New Brunswick Potato Agency and the P.E.I. Potato Marketing Board and the federal and provincial departments of agriculture. Export market assistance is not quantifiable in value terms but includes promotions overseas, trade missions (Algeria, Yugoslavia, and Italy in 1980) and careful attention to quality and disease control and research. The federal government through Agriculture Canada has acknowledged its recognition of the importance of exports through the development of a seed potato quality program to ensure the upgrading of the phytosanitary status of Canadian seed potatoes (see CN0020, 1/24/80).

During the latter part of 1979 and throughout 1980 the provincial governments of P.E.I. and N.B. have worked closely with Agriculture Canada to develop a federal/provincial/industry program to enhance the portion of Maritime seed potatoes in international markets. The proposal, to be presented to industry for consideration some time in 1981, is expected to include a strengthened seed certification program, increased research, a form of market risk insurance, a special crop insurance provision for seed potatoes, storage assistance and increased emphasis on market development and promotion.

Mr. COHEN. U.S. exports of seed potatoes, for example, have suffered greatly in recent years because of unfair Canadian competition. In 1980, the United States exported only 232,444 hundredweight (cwt) of seed potatoes. In contrast, Canada exported nearly 3 million cwt in the same year, with major markets being Latin America and Europe. While Canada shipped Argentina and Venezuela over 1 million cwt combined, the U.S. shipments to these countries was zero. I ask unanimous consent to insert in the RECORD tables comparing United States and Canadian exports of seed potatoes in 1980.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

*U.S. exports seed potatoes*

[Calendar year 1980]

| Destination: | Cwt. |
|---|---|
| Canada | 157,580 |
| Libya | 37,937 |
| Mexico | 26,385 |
| Panama | 3,536 |
| Philippines | 2,765 |
| Dominican Republic | 2,200 |
| Thailand | 441 |
| Netherlands Antilles | 441 |
| Costa Rica | 415 |
| Sweden | 291 |
| Others (3 countries) | 453 |
| Total | 232,444 |

*Canadian exports seed potatoes*

[1979 crop]

| Destination: | Cwt. |
|---|---|
| Argentina | 687,306 |
| United States | 531,794 |
| Venezuela | 371,541 |
| Uruguay | 325,024 |
| Cuba | 248,326 |
| Italy | 188,163 |
| Greece | 95,900 |
| Spain | 67,196 |
| Algeria | 66,138 |
| Jamaica | 47,575 |
| Portugal | 40,895 |
| Dominican Republic | 32,386 |
| Bermuda | 2,800 |
| Puerto Rico | 2,712 |
| Costa Rica | 1,367 |
| Others (3 countries) | 2,161 |
| Total | 2,711,283 |

Mr. COHEN. Canada is the world's second largest seed potato exporter. Canadian trade in this area is rapidly growing, with a 600,000 cwt increase in 1979 exports over the 1978 level. Canadian seed potatoes, produced for export, are raised in the eastern Provinces of New Brunswick and Prince Edward Island. There are seven export companies involved in the Government-supported Canadian Seed Potato Export Agency, commonly known as Potatoes Canada. While this Government-supported agency does not actually sell potatoes for export, it is actively involved in sales development and promotion. The chief purpose of the agency, which has no U.S. counterpart, is market promotion with emphasis on increasing the use of Canadian seed potatoes abroad.

The Canadian Government also assists potato exporters by conducting seed potato trials in foreign countries. These trials have been completed in 36 different countries since 1975. These test plots for potato varieties have proven very instrumental in gaining approval of foreign import permits. This Government-sponsored activity places U.S. producers at a severe disadvantage. Potatoes Canada employs a full-time staff to travel throughout countries monitoring these trials and working with the host government in determining which varieties are most suitable to existing soil conditions.

Canada also has a national Seed Act,

which is important to the seed potato export market. Under the act, the Federal Government approves clone selections and varieties, conducts tuber inspections, supervises the production of all stages of elite seed classes, and conducts port inspections.

Canada's Minister of Agriculture recently announced that the Cabinet had approved the establishment of a Canadian Federal agricultural export corporation (Canagrex). This proposed corporation will have a budget of $12.3 million for its first 3 years of operation. The budget will include funds for grants, loans, and investment programs. Canagrex will be able to provide export financing in addition to engaging in direct selling and contracting with existing export companies and agencies.

Mr. President, it is clear that the Canadians continue to press forward in the development of export markets for seed and tablestock potatoes. Our domestic potato industry is experiencing the painful effects of this targeting strategy, since domestic prices have been undermined significantly in the past two marketing seasons. For the first time in history, the Canadians filled the potato seed quota at 1,140,000 hundredweight. This followed 3 years of below-cost-of-production prices to our domestic producers. This illustrates the aggressiveness and determination of our Canadian competitors. Clearly, we owe our domestic producers the same advantage in third country markets that the Canadians enjoy in competing in our domestic markets. Without Federal assistance our domestic potato producers will continue to be shut out of lucrative foreign markets.

The Netherlands is an equally aggressive competitor in both the fresh and processed potato markets, with estimated exports in seed alone approaching 10 million hundredweight. Dutch exporting companies work directly with Government agricultural agencies in establishing research and marketing personnel in foreign countries to develop seed potato trade in the larger importing areas. With facilities and personnel overseas actively working in the markets, the Dutch obviously have a competitive edge over U.S. exporters and have attained the No. 1 position in potato exports.

Our domestic potato industry is competing in an oversupply situation at a time when Canadian exports into U.S. markets have increased by 300 percent since 1976. While the previous administration was reluctant to involve itself in this worsening problem, I have been encouraged by the interest displayed by the present administration. However, to date, no remedies have been found to address what is referred to only as an "unfortunate problem" for domestic potato producers .

Mr. President, I have confidence in the ability of our domestic producers to compete, both in the domestic and in international markets. Domestic agricultural industries, however, cannot compete with foreign governments or government-supported agencies and instrumentalities in the development of export markets. Actions taken by foreign competitors in third country markets should be met on a case-by-case basis by actions of our own, which will insure the competitiveness of our domestic producers. My amendment will accomplish this objective.

I believe that in the long term, this program will be cost-effective in that our farmers will develop new markets while strengthening our balance of payments. Section 32 funds may be an appropriate means of funding these subsidies.

My amendment offers a long needed remedy to a problem that has become increasingly visible and serious in recent years. This problem can no longer be ignored, and I hope that my amendment will receive the support of the Senate.

I point out that this is simply one step in a series of amendments that I intend to offer during the course of this year and next year and the year after, if necessary; that from time to time our potato producers have come to administration after administration saying, "We are being destroyed by a situation in which the Canadians enjoy a 20 percent monetary exchange rate differential, in which they heavily subsidize their potato producers, in which they are able to enjoy the use of certain chemicals and sprays which are prohibited and banned in this country, and that they vigorously pursue the penetration of our markets."

I would submit that they have been labeling, for example, table stock as seed, and then selling it as table stock in the United States, all in an effort to undermine our domestic market.

Now, I do not blame the Canadian Government for undertaking to promote a vigorous domestic industry. I think they will continue to do so, if we remain indifferent or have a blind eye or turn a deaf ear to what is going on in that country.

I think it is time that this administration, and certainly this Congress, made a specific determination to reject the sort of policy that is being pursued by the Canadians and at least force them to sit down and start negotiating with the United States. Right now they have no opposition. The administration has shown no interest and we continue to see the erosion of the family farm in Maine and once very vigorous potato industry.

Mr. President, I hope that this amendment, which simply grants standby authority to the Secretary of Agriculture to implement a subsidy program if he determines that our market and our producers are being undercut by unfair competitive advantages, will have the support of my colleagues in the Senate.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, I rise in support of Senator COHEN's amendment which I am pleased to cosponsor. I congratulate Senator COHEN for this initiative to provide assistance for Maine and other domestic potato growers.

Section 1203 of this bill authorizes an export subsidy program, to be implemented when Government subsidies to foreign competitors of U.S. exporters are present. This amendment, if accepted, would direct the Secretary of Agriculture to use this authority to set up a special subsidy program for potato exports.

By adopting this amendment, Congress would only be acknowledging an already well-documented fact, which is the substantial subsidization of potato production by the Canadian Government. These subsidies are a major reason for the disruption in U.S. markets caused by a surge of Canadian potato imports.

Canadian potato imports have increased substantially for 3 consecutive years. Last year alone saw a 300-percent increase in imports. Canadian potatoes entering the country through Maine ports of entry are expected to equal 25 percent of the total volume of Maine table stock potatoes. This has had a devastating impact on the U.S. industry, which is already suffering from excess capacity.

Canada subsidizes its potato growers at both the Federal and provincial levels of Government. The Federal Government offers several general subsidies. The first is the agricultural stabilization program, which offers price supports for potato growers. Second, the Canadian Farm Credit Corporation offers farmers loans with interest rates 3 to 4 percent below the prime rate.

Third, their fresh fruit and vegetable storage construction assistance program offers financial assistance for up to one-third the cost of renovation or construction of storage facilities. Fourth, the Atlantic freight assistance program provides significant reductions in growers' transportation costs. Finally, as if more were needed, the Canadian Government recently approved a $3 million potato export promotion program.

Both Prince Edward Island and New Brunswick offer subsidies at the provincial level as well. These include various crop insurances schemes, special services, and selective incentives which potato growers qualify for.

Taken together, Canadian Government subsidies, the exchange rate and our own efforts to free trade have all had the end result of driving our producers toward bankruptcy while helping create a Canadian industry whose only goal is to produce potatoes for export to the U.S. market.

Mr. President, this amendment constitutes a small step that Congress can take to alleviate this situation. Passage of this amendment would acknowledge that Canadian subsidies are a problem, and would help improve the position of U.S. potato growers by stimulating their export sales.

Mr. President, I again congratulate Senator COHEN on his initiative. I urge all of my colleagues in the Senate to support this amendment.

Mr. COHEN. Mr. President, I ask unanimous consent that Senator DURENBERGER be added as a cosponsor. I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, I thank the distinguished Senator, my good friend from Maine, for offering this amendment. I would say that although, coming from Idaho, where we enjoy such a fine reputation in potato production which are of the highest quality pota-

toes, our growers probably have less problems than those of Maine. But we do support the efforts of the Senator. I compliment him for bringing this to the attention of this body. I think it should be accepted.

Mr. COHEN. I thank the Senator for his comments.

The PRESIDING OFFICER. Who yields time?

The Senator from North Carolina.

Mr. HELMS. Mr. President, we are not under a time agreement, are we?

The PRESIDING OFFICER. There is no time agreement.

Mr. HELMS. Mr. President, I must analyze the amendment that the Senator has offered. My knowledge of the issue is limited to the printed amendment he has at the desk. So to give me a few minutes to study that, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COHEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, I have been discussing this with the distinguished chairman of the committee. I have a modification which I send to the desk. I ask that my amendment be so modified.

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The amendment will be so modified.

The amendment (UP No. 363), as modified, read as follows:

On page 241, between lines 13 and 14, insert the following:

(e) The Congress finds that Canadian domestic production subsidies and European Economic Community subsidies are causing substantial displacement in the export sales of fresh and processed potatoes produced in the United States. The Secretary of Agriculture, therefore, is strongly urged to exercise the authority provided in the foregoing provisions of this section to implement a special standby export subsidy program for the purpose of neutralizing the effects of such subsidies programs instituted by Canada and the European Economic Community countries.

Mr. COHEN. Mr. President, the change which has been agreed upon would be to strike the words "directing the Secretary of Agriculture to exercise the authority" and substituting therefor the words "strongly urged."

The second change will be to strike the word "immediately."

It would then read "The Secretary of Agriculture, therefore, is strongly urged to exercise" and so forth, striking the word "immediately."

If that is acceptable to the chairman, I ask that the amendment, as modified, be agreed to.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, this amendment, as modified, is acceptable to this side, and I am informed that it is equally acceptable to the other side. I recommend its adoption.

The PRESIDING OFFICER. Without objection, the amendment, as modified, is agreed to.

The amendment (UP No. 363), as modified, was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. COHEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 364

(Purpose: To amend the Perishable Agricultural Commodities Act, 1930, to increase the ceilings on license fees and to increase the level of damages claimed which entitles a respondent in a reparation proceeding to have an oral hearing)

Mr. SYMMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. SYMMS) proposes an unprinted amendment numbered 364.

Mr. SYMMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 235, between lines 17 and 18, insert the following:

PERISHABLE AGRICULTURAL COMMODITIES

SEC. 1112. (a) Paragraphs (6) and (7) of section 1 of the Perishable Agriculutral Commodities Act, 1930 (7 U.S.C. 499a (6) and (7)), are amended by striking out "$200,000" and inserting in lieu thereof "$230,000".

(b) Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c (b)), is amended by striking out "$150", "$50", and "$1,000", and inserting in lieu thereof "$300," "$150," and "$3,000," respectively.

(c) Sections 6(c) and 6(d) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499f (c) and (d)), are amended by striking out "$3,000", wherever it appears, and inserting in lieu thereof "$15,000".

In the table of contents insert, in the appropriate place, the following:

"SEC. 1112. PERISHABLE AGRICULTURAL COMMODITIES.".

Mr. SYMMS. Mr. President, on July 31, I introduced S. 1557, to amend the Perishable Agricultural Commodities Act of 1930, or PACA, to increase ceilings on license fees and to increase the level of damages claimed which entitle a respondent to an opportunity for an oral hearing. Today, I am offering an amended version of S. 1557 to the farm bill which is currently before this body.

The PACA was first enacted as a cooperative measure between the fruit and vegetable industry, Congress and the USDA to bring stability to the fruit and vegetable marketplace. The act, closed the door to unscrupulous trading, and established a code of fair trading in the marketplace. That code prohibited unfair practices in trading, established licensing for merchants, dealers, and brokers in fruit and vegetables, and set up the framework for resolving disputes including disciplinary actions and enhanced recovery of damages.

All in all, the act has been a great success. In 1980 alone, $6 million was recovered by informal negotiations, complaints that would have otherwise been resolved in our beleaguered courts. In addition, counseling efforts involving contract responsibility reduced the number of complaints. The value of this recovery to industry is estimated at $71 million—fully 25 times the administrative costs of the program.

Nonetheless, the program, like so many programs, is in serious financial straits. Even though on January 1, 1981, the license fees were raised to the current ceilings, the costs of operating the program will exceed income in fiscal year 1981 by approximately $300,000. Most of the existing reserve funds would be used to make up that deficit. That deficit will expand in fiscal year 1982 to an estimated $800,000. Thus, without congressional action, the PACA program, so vital to the fruit and vegetable industry, will expire.

My amendment will increase the fee ceiling from the current $150 to $300, the branch fee from $50 to $150, not to exceed $3,000. The amendment would retain the current exemption of up to nine branches from the branch fees. It will also increase the damage floor that triggers mandatory oral hearings from $3,000 to $15,000. Finally, the amendment would increase the level of purchases of fruits and vegetables by retailers and of frozen food brokers' sales from $200,000 to $230,000 before they fall under the licensing provisions of the act.

Mr. President, my amendment has the support of the administration and has been carefully crafted with the assistance of industry and the Senate Agriculture Committee. The amendment will provide adequate funding for the program through fiscal year 1986. It is a necessary amendment which must be addressed immediately, although the act itself should be reviewed by Congress to address problems that are equally important, but which do not require the same level of urgency. I am pleased that Senator HELMS has assured this body that his committee intends to conduct hearings into those issues, and this Senator looks forward to participating in those discussions.

The distinguished chairman of the Senate Agriculture Committee has shown great leadership in agreeing to conduct hearings dealing with additional facets of PACA, and I would like to commend him for his efforts, and pledge my support for those hearings. We are simply talking about raising the license fee. It is a user fee which makes it a self-funding agency of the USDA.

Specifically, Mr. President, I feel that the committee should discuss the following concerns:

First, just what should constitute a misbranding violation under the act;

Second, the current situation with regard to the bonding of foreign claimants or the assignees of nonresidents under the act;

Third, the current structure of license fees with respect to retailers;

Fourth, duplicative PACA licensing by wholly owned subsidiary retail corporations; and

Fifth, the status of sellers during bankruptcy proceedings.

Although this list is by no means all inclusive, it represents concerns that have been expressed to me by those who are more closely affected by the Perishable Agricultural Commodities Act.

Mr. President, I thank the distinguished chairman of the Committee on Agriculture and the distinguished ranking minority member for their agreement to this proposal and to include it in this important farm bill.

Mr. HELMS. Mr. President, I need to discuss this amendment, which I personally favor, with the distinguished ranking member of the committee. He is not on the floor at the moment. If I may check with him, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, this Senator is certainly predisposed to accept this amendment.

The Perishable Agricultural Commodities Act, commonly referred to as PACA, establishes rules of fair play in the fruit and vegetable marketplace and provides aggrieved parties to contract disputes arising from transactions in such commodities a forum to resolve their disputes.

This legislation was originally enacted to suppress unfair and fraudulent practices that were particularly acute as a result of the nature of this industry. Due to the highly perishable nature of fruits and vegetables and the long distances between production areas and marketplaces, transactions involving thousands of dollars are frequently entered into by telephone between parties that never meet. If an unscrupulous dealer refuses to pay the agreed-upon price for commodities received, the producer often has no choice but to accept the reduced payment, since the commodities would likely spoil before an alternate purchaser can be found.

PACA not only provides a forum for the review of contract disputes but allows the department to exclude from the industry dealers and others that engage in unfair and fraudulent practices by denying or revoking the required license.

Under this program, all commission merchants, brokers, and dealers who buy, sell, or handle fresh or frozen fruits and vegetables in interstate or foreign commerce are required to be licensed. The licensing requirement also applies to retailers provided that they purchase more than $200,000 worth of fruits and vegetables annually.

By and large, PACA is favorably endorsed by most segments of the industry. In addition, this program is almost fully self-supporting since license fees paid by traders and dealers pay the costs of administration. A small amount of indirect costs for legal support is paid from appropriated funds.

Recently, the Department of Agriculture informed Congress that the current fee structure is no longer sufficient to generate adequate income to fund the program. If authority to raise the fees is not enacted, a program deficit of $700,000 is projected for fiscal year 1982.

To avoid a damaging curtailment of this program, an immediate fee increase is required. For this reason, I support adoption of the amendment of the Senator from Idaho. I am informed that the amendment is generally acceptable to most segments of this industry and satisfies the funding requirements for the program for several years.

I imagine that the Senator will support that.

Mr. SYMMS. Will the Senator from North Carolina yield?

Mr. HELMS. Certainly, Mr. President, I yield.

Mr. SYMMS. Mr. President, I ask unanimous consent that there be printed a letter from Deputy Secretary Richard Lyng which supports this part of the amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
*Washington, D.C., September 15, 1981.*

Hon. STEVEN D. SYMMS,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR SYMMS: The Department urges consideration of the enclosed amendment to the 1981 farm bill legislation to provide funding for the Perishable Agricultural Commodities Act program (PACA).

The proposed amendment will increase the license fee ceiling from the current $150 to $300, the branch fee from $50 to $150, and the total aggregate fee ceiling from $1,000 to $3,000. These changes will provide adequate funding for the PACA program through FY 1986. Additionally, the proposed amendment will increase from $3,000 to $15,000 the amount of claims before the Department is required to hold an oral hearing. Also, the value of purchases of fruits and vegetables by retailers and of sales negotiated by frozen food brokers before they become subject to licensing will be increased from the current $200,000 to $230,000. This will enable the Department to continue its services under the PACA program.

The Office of Management and Budget advises that it has no objection to the presentation of this proposed amendment.

Sincerely,

RICHARD E. LYNG,
*Deputy Secretary.*

Mr. HELMS. Mr. President, while this amendment satisfies the immediate funding problem for PACA, there are several other issues that have been raised by industry groups that merit further consideration. Accordingly, it is my intention that hearings on PACA will be held as soon as practicable to allow all issues that have been raised, including those involving the general fee structure, to be adequately reviewed.

For this side, Mr. President, I accept the amendment.

Mr. HUDDLESTON. Mr. President, we have examined the amendment on this side and we agree to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 364) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 542

(Purpose: To urge and request the Secretary of Agriculture to use existing authority to increase sales of United States agricultural commodities and the products thereof in foreign countries)

Mr. ARMSTRONG. Mr. President, I call up my amendment No. 542.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) proposes an amendment numbered 542.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 235, between lines 17 and 18, insert the following new section:

EXPANSION OF INTERNATIONAL MARKETS FOR UNITED STATES AGRICULTURAL COMMODITIES AND THE PRODUCTS THEREOF

SEC. 1112. (a) It is the sense of the Congress that, in order to further assist in the development, maintenance, and expansion of international markets for United States agricultural commodities and the products thereof, the Secretary of Agriculture should, and is hereby urged and requested to—

(1) use the intermediate credit program authorized under section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) to improve the capability of importing nations to purchase and use United States agricultural commodities and the products thereof on a long-term basis;

(2) ask the Congress, at the earliest practicable date, for funds for the agricultural export credit revolving fund in an amount sufficient to meet the demand for short-term credit authorized to be made available under section 4 of the Food for Peace Act of 1966;

(3) establish, insofar as practicable, the maximum number of United States Agricultural Trade Offices in other nations authorized by section 605A of the Act of August 28, 1954 (7 U.S.C. 1765a);

(4) use, to the maximum extent practicable, existing authority to ensure full utilization of the levy-free quota, established during the Tokyo round of the multilateral trade negotiations, for the export sale of United States high quality beef to the European Economic Community;

(5) expand, to the fullest extent possible, the market development activities of the Foreign Agricultural Service of the Department of Agriculture in developed, developing, market, and nonmarket foreign countries with particular emphasis on (A) continuation of the cooperator programs at the same funding level (adjusted for inflation)

provided to carry out the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) during fiscal year 1970; (B) a more active export market development program for value added farm products and processed foods; and (C) the implementation of a full scale program for forestry products, including commodity information, trade policy, and market development for such products;

(6) insure that the European Economic Community observes its commitments under the General Agreement on Tariffs and Trade (GATT) regarding the tariff-free binding on imports of soybeans and corn gluten feed;

(7) consult with the appropriate officials of the Government of Japan with the objective of increasing the export sales of citrus fruits and high quality beef to Japan; and

(8) use the authority under section 32 of the Act of August 24, 1935 (49 Stat. 774; 7 U.S.C. 612c) to establish a special standby export subsidy program for United States agricultural commodities and the products thereof, the export of which has been restricted by foreign government subsidies.

(b) It is further declared to be the sense of the Congress that any special standby export subsidy program established by the Secretary of Agriculture pursuant to subsection (a)(8) should (1) be consistent with United States international obligations, and (2) be designed to neutralize the effects of those foreign agricultural commodity subsidy programs which—

(A) the President has determined, pursuant to section 301 of the Trade Act of 1974 (19 U.S.C. 2411), are acts, policies, or practices described in section 301(a) of such Act that should be eliminated by appropriate action of the United States;

(B) have, as the result of the appropriate dispute settlement procedures, been found to be in violation of the General Agreement on Tariffs and Trade (GATT) or the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (relating to subsidies and countervailing measures), if applicable.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the Senator from Minnesota (Mr. BOSCHWITZ) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. Mr. President, it is my plan to speak very briefly in support of the amendment, which I believe will be received favorably by most or perhaps all Senators.

Mr. President, on October 21, 1978, the Agricultural Trade Act of 1978 was enacted to strengthen the economy of the United States through increased sales abroad of U.S. agricultural commodities. The act contains several major provisions which should, when fully implemented by USDA, assist our efforts to maintain and expand our agricultural export markets.

Agricultural exports are an important part of our economic and foreign policy, and are fundamental—they are absolutely bedrock—to the success of our farm policy. In fiscal year 1980, production of nearly 1 out of every 3 harvested acres in this country—about 110 million acres—was exported, and for many farmers, the ratio was even higher. Cotton, wheat, and rice farmers must look to foreign markets for nearly two-thirds of their sales, and exports account for nearly one-quarter of our annual corn production. Today, nearly $1 out of every $3 earned by the American farmer comes from export sales. The growth in U.S. agricultural exports has been impressive, but the need for increasing those exports has never been greater.

The most recent crop production estimates for 1981 by USDA show that wheat production is forecast at a record high of 2.75 billion bushels, an increase of nearly 20 percent over 1980. Corn production is forecast at 7.94 billion bushels, up 7 percent from last year's crop. If this corn forecast is realized, it will be the second largest corn crop in history, exceeded only by the 1978 and 1979 crops. Production of oats and barley is estimated to increase 15 percent and 33 percent, respectively, over last year's crop.

Mr. President, the 1981 bumper crops in wheat and the feed grains spell potential disaster for many farmers, because markets for these surpluses may not be available. Many observers of this bleak situation believe we have but three choices. First, we can increase direct deficiency payments to farmers, resulting in a stimulus to agricultural production and increasing Federal outlays. But the 1981 budget crunch necessitates a hard look at all Federal subsidy programs. To throw more Federal money at the immediate problem poses the dilemma that short-term aid to agriculture can result in long-term overproduction. Second, the Federal Government can step up its involvement in storage systems and increase direct storage payments. But past experience has proven conclusively that huge Government-owned surpluses cause more problems than they solve. Such huge surpluses can depress market prices for many years.

There is, however, a third option, which is the option to which my amendment is addressed today, and that is a more aggressive export policy.

Increased exports will not only assist in our balance of trade but also will help strengthen farm prices, which is so desperately needed by our farmers. Equally important, farmers will be able to receive more of their income from the marketplace rather than from the Federal Treasury.

At the end of this fiscal year, the United States will no doubt be faced with another large deficit in our balance of trade. If the United States is to continue importing huge quantities of crude oil, automobiles, and other manufactured goods, then we must also increase our exports to pay for these imports. In fiscal year 1980, agricultural exports of $40.5 billion paid for $17.3 billion in agricultural imports, leaving a net balance favorable of only $23.2 billion to be applied to imports of oil and manufactured products.

The Agricultural Act of 1978 contains several provisions which could assist in increasing exports in the long term, if fully implemented. One provision authorized the use of intermediate credit of 3 to 10 years to finance the export sale of breeding animals, including the cost of freight from the United States to designated points of entry overseas. Intermediate credit was also authorized to be marketing, processing, storage, or distribution of the imported commodities; to establish reserve stocks in importing countries; and to meet credit competition of other exporting countries. However, only limited funds were available for intermediate credit sales in fiscal year 1980, with no funds at all authorized for use in fiscal year 1981 and later years.

Another provision of the act which would have an impact on agriculture exports is the authority delegated to the Secretary of Agriculture to establish as many as 25 U.S. agricultural trade offices in other nations. Since the passage of the act, though, USDA has staffed and made operational only seven agricultural trade offices. Also, trade officers have been posted in three other countries, and one trade office was established under other authority. So only 11 offices have been established or are in the process of being established.

The Department of Agriculture should be commended for their efforts in the implementation of the authorities made available in the Agricultural Act of 1978, but I believe that much more can and should be done under existing statutory authority. Therefore, the amendment I propose contains a resolution expressing the sense of Congress to encourage the Secretary of Agriculture to fully implement the authorities contained in the act.

I ask unanimous consent that some additional information which explains the individual provisions of this resolution be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDITIONAL INFORMATION

INTERMEDIATE CREDIT

Congress called for enactment of the Intermediate Credit Program in 1978. It was briefly in operation; however, no funding was allocated in 1981. Intermediate credit provides a valuable link between the short-term credit guarantee program for sales with 1 to 3-year credit repayment terms and concessional sales for market development under P.L. 480, Title I, with repayment terms of 20 to 40 years. The need for intermediate credit terms providing three to ten year credit for breeding animals and foreign market development facilities is not met by the guarantee program. Particularly in developing countries where potential for increased livestock exports is greatest, and where facilities to handle agricultural imports are most needed. longer repayment terms become critical in managing these types of investments with slower rates of return.

One mechanism for providing intermediate credit while expanding our short-term credit options is an export credit revolving fund, as proposed by the Senate Agriculture Committee Farm Bill. It would be advantageous to revive the direct credit program in order to complete our mix of export credit marketing tools. USDA says there may be some instances where direct government-to-government credit is a better selling tool than private guaranteed credit. The original Senate proposal called for funding not to exceed $300 million in FY 82, $500 million in FY 85, and $700 million in FY 85.

AGRICULTURAL TRADE OFFICES

In the Agricultural Trade Act of 1978, Congress authorized the establishment of a minimum of six and a maximum of 25 Agricultural Trade Offices to be located in the major market areas with potential for expansion, i.e., OPEC countries, planned economies, and developing countries. The goal of the Trade Offices is to provide one-stop marketing service for U.S. exporters and foreign buyers.

At present, eight trade offices are fully operational and three trade officers are at posts in Nigeria, China and Tunisia with trade offices in development. In the fall of 1981, evaluation teams will begin a study of trade offices in Hamburg, London, Warsaw, Manama, Singapore, and Seoul to determine their effectiveness and the feasibility of creating additional trade offices.

EC IMPORTS OF HIGH-QUALITY BEEF

The European Community's Beef and Veal Management Committee allocates the U.S. a 10,000 MT quota of a 21,000 MT quota for high quality beef as agreed to in the Tokyo Round of the Multilateral Trade Negotiations. This was seen as a major breakthrough in U.S. efforts to gain access to the European market. However, U.S. exporters filled only 941 MT of the quota in 1980 and 1,215 MT to date in 1981. Obstacles to increased use of the quota center around pricing by U.S. producers and European wholesalers and complex licensing procedures for European importers. In June, 1981, Secretary Block won a commitment from EC ministers to keep the quota in place while these problems are addressed. Foreign Agricultural Service officials met with EC officials and U.S. industry representatives in July and August 1981. Further progress is expected with a strong, concerted effort.

MARKET DEVELOPMENT ACTIVITIES

(A) Cooperator Programs.—The dramatic expansion in agricultural exports in the past decade has put increasing pressure on the resources available for the market development cooperator program. Since 1970, the number of participants has doubled from 25 to 50 associations and a new component, the Export Incentive Program with 36 participants has been added. Funding has not kept pace with this growth. While authorization ceilings for the program have doubled from $13.1 million in 1970 to $26.6 million in 1981, inflation and currency fluctuations have kept the real purchasing power at $13.6 million—only $1.3 million above 1970 purchasing power. Instead of providing more service to agricultural exporters, FAS is providing less to an increased number of participants.

(B) Value-added Products.—With increasing emphasis on the relationship of exports to domestic employment, greater attention must be given to the importance of value-added products and processed food exports. The Foreign Agricultural Service has recently completed a draft study with recommendations for development of a program to target export market potential for these products.

(C) Forestry Products.—In 1979, the Foreign Agricultural Service began consultation with the National Forest Products Association (NFPA) in an effort to develop a cooperator program. Wood export in 1980 totalled almost $4.0 million nearly as much as the nation's coal exports. With aggressive marketing, NFPA projects a doubling of these exports in the next 20 years. FAS specialists and Agricultural Attaches are currently initiating plans to assist the wood industry in export marketing.

ZERO BINDING ON SOYBEANS AND CORN GLUTEN

During the Dillion Round of Trade Negotiations in 1961–62, the European Community (EC) agreed to a zero tariff binding on soybeans and soybean meal. Since then, U.S. exports of these products to the EC have grown to $3.6 billion annually. The EC Council of Ministers, concerned over the entrance of Spain into the EC in 1985, has again raised the possibility of a special tax on soybeans and soybean products. (Under the current system, Spanish olive oil will require heavy subsidization to compete with soybean oil.) As in the past, the U.S. strongly opposes such a tax as a violation of the agreement to the zero binding.

Similarly, the last five years have seen a large increase in U.S. exports of feed substitutes to the EC from 15 percent in 1975 to over 30 percent in 1980. Most of the $600–$700 million of such products is corn gluten feed. EC officials, fearing further increases in imports, are discussing schemes for raising duties on feed grain substitutes. These duties are bound at zero to six percent by the General Agreement on Trade and Tariff (GATT). Our competitiveness in the EC is based on more competitive pricing. Currently, corn gluten feed in the U.S. is priced roughly 25 percent above U.S. domestic corn prices, while still registering 20 percent below EC corn prices. Secretary Block and U.S. Trade Representative Brock have taken every opportunity to state U.S. opposition to such changes in EC policy, which would represent further protectionism.

The U.S. is presently involved in repealing the GATT decision allowing Spain to tax and restrict domestic use of soybean oil derived from imported soybeans. If the GATT decision is upheld, it will allow the EC to establish a secondary tax as described above. The U.S. will appeal the decision at the GATT council meeting in Fall 1981.

JAPANESE CITRUS AND BEEF IMPORTS

Although Japan has become our leading agricultural export market, quantitative restrictions on imports of certain agricultural products still severely limit our access to those markets. The apparent potential for a much larger market in Japan for U.S. citrus and beef has made the quantitative restrictions on these commodities particularly frustrating. In the Multilateral Trade Negotiations, a good beginning was made toward loosening the restraints. As a result of Japanese concessions during these talks, quotas on beef will increase annually from 16,800 tons in JFY 1978 to 30,800 tons in JFY 1983 and quotas on oranges will increase from 68,000 tons in JFY 1980 to 82,000 tons in JFY 1983. Quotas on orange and grapefruit juice will also gradually increase.

The process of loosening controls, however, has just begun. Agreement was reached with Japan to reinstitute talks on citrus and beef in JFY 1982. The U.S. objective during those talks will be to further expand the permissible levels of exports to Japan. During the U.S.-Japan Agricultural Consultations in December, Secretary Block's visit with Ambassador Okawara in March, Director General Matsuura's visit in May, Deputy Secretary Lyng's visit to Japan in July, and on numerous other occasions involving USTR, State and working level USDA and MAFF officials, the Japanese have been informed of our expectations concerning the planned talks.

EXPORT SUBSIDY UNDER SECTION 32

Section 32 of Public Law 320 and the CCC Charter Act provides for a separate fund to be established under the discretion of the Secretary of Agriculture to be used to divert surplus agricultural commodities from the domestic market. Specifically, the fund is "to encourage the exportation of agricultural commodities and products thereof by the payment of benefits in connection with the exportation thereof or of indemnities for losses incurred in connection with such exportation . . .' Other provisions include distribution of surplus to low-income groups and through donation programs. Thus, the law would give the Secretary broad authority to subsidize export sales, as long as no one commodity received more than 25 percent of the funds. Recent trade policy objectives and trade practices have been such that this authority is not in use. Section 32 is primarily used for donation of commodities to low-income groups and school lunch programs. However, escalating use of export subsidization by foreign competitors as noted above increases demand for this type of export marketing tool.

Mr. ARMSTRONG. Mr. President, this resolution can go a long way toward expanding foreign markets for American farmers. We must give the Secretary of Agriculture the tools he needs to pave the way for American farmers in free, competitive, and open overseas markets.

Therefore, I urge the adoption of this amendment.

The PRESIDING OFFICER. Who seeks recognition?

Mr. HELMS. Mr. President, I believe that the Senator's description of his amendment and its intent and its effect are accurate. It represents a comprehensive summary of what he proposes.

I am certainly inclined to support the amendment, because the Senator from North Carolina is also an advocate of the Secretary utilizing all his available authority to promote the sale of U.S. agricultural products in export markets for the betterment of the American farmers, not to mention the American people and the Government of this Nation.

So, inasmuch as this is an omnibus farm bill, and even though we have an announced purpose to keep this bill as free as possible from amendments, I say to my friend from Colorado that I have no objection to this amendment and will accept it on this side.

Mr. HUDDLESTON. We have no objection.

Mr. HELMS. I am advised by Mr. HUDDLESTON that there is no objection on the other side, and we will proceed to vote.

Mr. ARMSTRONG. I thank the distinguished chairman and the distinguished ranking minority member for their acceptance of this amendment. I thank the Senator from North Carolina especially for his kind remarks.

Mr. President, I ask unanimous consent that the names of the Senator from Minnesota (Mr. DURENBERGER) and the Senator from North Dakota (Mr. BURDICK) be added as cosponsors of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. Mr. President, I wonder whether we can withhold the vote on this amendment for a moment. The Senator from Minnesota (Mr. BOSCHWITZ) has asked to be heard on this matter. I should like to determine whether or not he wishes to come to the floor to speak.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. Mr. President, I report to the Senate that I am sorry that Mr. BOSCHWITZ has not been able to come to the Chamber, but we are prepared to go ahead. He is already reported as a cosponsor of the amendment.

As far as the Senator from Colorado is concerned we are ready to go to a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

The amendment (No. 542) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ARMSTRONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 365

(Purpose: To amend the Federal Meat Inspection Act to require that imported meat products meet the inspection and other standards that apply to domestically produced agricultural commodities)

Mr. MELCHER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) for himself, Mr. BENTSEN, Mr. HEFLIN, Mr. ANDREWS, and Mr. BURDICK proposes an unprinted amendment numbered 365.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 312, between lines 9 and 10, insert the following:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That Section 20 of the Federal Meat Inspection Act (7 U.S.C. 620) is amended by adding at the end thereof a new subsection (f) as follows:

"(f) Notwithstanding any other provision of law, all meat products imported into the United States shall be subject to the inspection, sanitary, quality, species verification and residue standards applied to products produced in the United States. Any such imported meat products that do not meet such standards shall not be permitted entry into the United States. Neither shall such products be imported which have been produced using agricultural chemicals, animal drugs or medicated feeds which are not currently approved for the same use in the United States. The Secretary of Agriculture shall enforce this provision through the imposition of random inspections for such residues and species verification. The provisions of this subsection shall not be deemed to permit the imposition of standards with respect to imported meat that are less stringent than standards imposed under the other subsections of this section. The Secretary may issue such regulations as are necessary to carry out the provisions of this subsection."

Mr. MELCHER. Mr. President, this amendment is a revised version of a bill I introduced that amends the Federal Meat Inspection Act to require that imported agricultural commodities meet the inspection and other standards that apply to food produced in the United States.

The Federal imported meat inspection program was originally established under authority contained in the Tariff Act of 1930, which prohibited the importation of meat into the United States that was not healthful, wholesome, and otherwise in compliance with regulations promulgated by the Secretary of Agriculture.

Initially, the Department approved a foreign country's meat inspection system on the basis of its inspection laws and regulations alone. Direct review of foreign plants was initiated in 1962 when USDA sent meat inspection representatives to visit exporting establishments. In 1966, the Department formalized the review program and established a permanent staff of foreign programs officers.

The following year, Congress amended the Meat Inspection Act of 1906 by enacting the Federal Meat Inspection Act. This law provides that no meat or meat products may be imported from any country that fails to comply with all requirements that apply to meat shipped in interstate commerce within the United States. In addition, the Federal Meat Inspection Act requires the Secretary of Agriculture to submit a report annually to Congress on the administration of the Department's foreign meat inspection program.

The Poultry Products Inspection Act was enacted in 1968. It has the same provisions of the Federal Meat Inspection Act but it does not require an annual report.

Since I introduced my bill, two firms in Australia have been accused of shipping horse meat and kangaroo meat into this country sold as beef. Some of this meat found its way into the stomachs of the customers of a well-known fast food chain.

I believe that this incident shows that partly because of interference from the State Department, and partly because of a lack of commitment of a number of administrations, the Department of Agriculture has not in the past, and is not presently, enforcing the same high standards of wholesome inspection and honesty in enforcement that U.S. law requires for domestic packing plants.

For years I have pointed out to the Department that this particularly is the case in plants located in Australia, Central and South America. I believe this also applies to the slapdash, hit or miss sampling by inspectors at our docks when they sample only a fraction of the meat imported here.

At stake here is consumer confidence in the products they buy.

I have warned Congress and the Department for years that the lack of thorough residue sampling of imported foods jeopardizes the health of American consumers, who unknowingly assume the food products they buy have met the standards we have established as healthy.

Last week, I asked Secretary Block to help me to improve the present food inspection laws, and I got no indication that he would support me in this effort.

Frankly, I cannot understand his reticence.

Maybe the first thing we ought to vote on here is how many Members of the Senate would like a kangaroo burger for dinner tonight. Unfortunately, I did not ask the Secretary that question, and I wish I had.

The Department may insist the present system is working just fine, but a Department of Agriculture task force report on the inspection of imported meat and poultry in 1979 indicated just the opposite. The report indicated that much needs to be done to insure that Americans are not eating tainted food.

A report by the National Academy of Sciences on food safety in March 1979 shows pretty conclusively that most other food exporting countries do not require the same safety standards as the United States, and too little is done by this country to see that food imported into America is safe.

If the present system works so well, why did thousands of pounds of Australian horsemeat find its way into our food system?

The Congress tried to deal with this problem in 1978 with a bill that I introduced, but the kangaroo meat fiasco indicates to me that more must be done.

Before promoting changes in any program, it is important that we identify and examine the premises upon which current operations are based. At its most general level, the present import inspection program is designed to carry out the mandates of the Federal Meat Inspection Act and the Poultry Products Inspection Act to assure the safety of imported meat and poultry products. In order to accomplish this goal, the program must provide means for dealing with the following factors:

Presence of biological residues; disease; excessive or improper use of food additives; gross contamination; microscopic contamination; and economic fraud.

These conditions can best be detected by inspection at slaughter and processing points.

Adequate inspection must be provided by inspection at slaughter and processing points in order to provide an acceptable level of protection to the U.S. public.

It is not feasible for USDA to conduct continuous inspection in foreign plants.

Foreign countries must use their own inspectors and procedures. Countries that desire to be recognized as eligible to export meat and poultry products to the United States must make a formal request through diplomatic channels. Normally, the request is transmitted by letter from the responsible ministry of the country to the U.S. Ambassador at the American Embassy. The request reaches the U.S. Department of Agriculture through the U.S. Department of State, as recognition is not granted to any country's inspection system without the concurrence of the State Department.

Before granting approval to a foreign country's inspection system, USDA evaluates that country's laws, regulations, and inspection staff. The Department also conducts onsite reviews of the system in operation. The entire recognition procedure normally requires 2 to 3 years. The recognition becomes official when the name of the country is added to the meat or poultry inspection regulations.

Presently, there are 46 countries recognized as eligible to export meat products from livestock and four countries recognized as eligible to export poultry products. Separate recognition of a country's equine inspection system is required and five countries have obtained such recognition.

Not all plants in a recognized foreign country are certified as eligible to export to the United States. In fact, eight recognized countries have not certified any of their plants. Some do not desire certifi-

cation; others cannot qualify because of faulty construction, inadequate facilities, poor sanitation, or failure to meet other minimum requirements. A foreign establishment that does seek export certification must obtain it from the senior meat inspection official of its government. This official certifies only those establishments that meet U.S. standards and must recertify these plants at the beginning of each calendar year.

The routine daily inspection of certified plants is conducted by inspectors licensed by the exporting countries. However, food safety and quality service reviewers make periodic visits to these plants to assure that products intended for export to the United States are prepared under adequate inspection controls and that building construction standards and sanitation practices are at least equal to those required in U.S. plants.

Seventeen foreign programs officers (FPO) are assigned to overseas foreign plant surveillance. Of these, 11 are stationed overseas; the others are stationed in Washington, D.C., and travel to their assigned countries. In addition, there are three area supervisors who are all stationed in Washington, D.C. All FPO positions are filled by veterinarians with experience in the domestic meat and poultry inspection program.

These foreign programs officers conduct an average of 2,800 plant inspections each year. They review special interest plants quarterly. All other certified plants are on an annual or semiannual review schedule with the exception of a group of certified but nonexporting Canadian plants. These establishments are inspected once every 2 years.

Foreign inspection officials accompany FPO's on their plant reviews. Review findings are also discussed with senior foreign meat inspection officials at the conclusion of each trip. In many instances, the U.S. Agricultural Attaché or other American Embassy representative is present at this final meeting. The food safety and quality service reviewer submits a taped report on review findings and related discussions to Washington headquarters. Documents relating to the reviews accompany the tape.

In situations where serious deficiencies are found during the review, the FPO may not take definitive action until the review findings have been evaluated by Washington headquarters officials. However, a reviewer is authorized to issue a product segregation order (letter of advisement) if it seems likely that the food safety and quality service administrator will remove the authority for a plant to export to the United States. In such a case, the FPO advises food safety and quality service of the action and requests foreign meat inspection officials to keep all products intended for export to the United States that are manufactured after the time of the review separate from those prepared before that date. In instances in which plant violations are so serious that its products present serious health hazards, all products are retained. Should the Administrator decide to remove the plant's certification on the basis of the plant report, the segregated product may not be exported.

Plant reviews have resulted in very few delistings during recent years. Of the 3,041 inspections conducted by food safety and quality service foreign programs officers in 1978, only 38 resulted in plants rejected for failure to meet U.S. standards. Less stringent measures are usually taken to correct deficiencies. Minor difficulties are frequently resolved on the spot, while other problems are corrected over a specified period of time.

Any foreign plant that is delisted due to a food safety and quality service review loses its eligibility to export as of the day of the review. The only exception is a "health hazard" plant, which may not export any products (including those prepared prior to the review). The senior meat inspection officials of the foreign country are responsible for assuring that the delisted plant brings itself back into compliance with U.S. requirements. When foreign officials are satisfied that appropriate corrective action has been taken and notify the food safety and quality service Washington headquarters of that fact, the plant's eligibility is reinstated.

But even food safety and quality service officials have been skeptical about whether these procedures are catching meat that ought not be shipped to this country.

There have been suggestions that the Department discontinue the practice of notifying foreign countries of the arrival dates of foreign inspection officials, so that the foreign plants never know when the U.S. inspectors will be arriving. Program officials are of the opinion that the best inspections are those conducted by personnel stationed overseas, yet the State Department limits the number of inspectors who can do so.

Imported meat must also undergo additional inspection when it arrives at U.S. ports.

A meat inspection certificate issued by the responsible official of the exporting country must accompany each shipment of meat offered for entry into the United States. The certificate identifies the origin, destination, shipping marks, and quantity of the product. It further certifies that the meat is derived from animals that received veterinary antemortem and postmortem inspection; that it is wholesome, not adulterated or misbranded; and that it is otherwise in compliance with U.S. requirements.

When meat arrives at U.S. points of entry, USDA's animal and plant health inspection service (APHIS) personnel examine the original certificates and ships' manifests to determine whether or not the meat is eligible for entry into the United States.

If the product originates in or travels through countries where animal diseases exotic to the United States are found, special requirements—such as cooking of product and sealing of cargo containers—must be met before the documents are transferred to food safety and quality service personnel. The food safety and quality service works closely with APHIS in refusing entry of unacceptable meat, establishing acceptable testing requirements for subsequent shipments from the plant of origin, and notifying the country of origin of the problem.

Prior to actual food safety and quality service point-of-entry inspection, the importer or broker prepares an "import inspection application and report." The completed form must be signed by a U.S. Customs official before presentation to the food safety and quality service import documents examiner for review and approval. The establishment's history of compliance with U.S. requirements is examined. A representative sample of each shipment is then inspected.

The food safety and quality service point-of-entry inspectors utilize sampling plans and criteria for acceptance or rejection or imports that are identical to those used for Federal inspection of domestically produced meat and poultry products.

Routine inspection procedures include defrosting frozen product samples prior to inspection in order to allow identification of bruises, bone fragments, and other defects that are difficult to detect in frozen product. In addition, the condition of canned meat containers is checked and sample cans are opened for inspection of contents. Sample cans of self-stable products are also put under incubation to check for signs of spoilage. Import inspectors check the accuracy of stated net weights and assure that labels have received U.S. approval.

Meat inspection laboratory personnel examine samples to check compliance with compositional standards. Laboratory analysis is also used to monitor meat imports for residues, such as pesticides, hormones, trace elements, and antibiotics. When excessive amounts of residues are detected in a particular product, subsequent shipments of that product from its plant of origin are either withheld or refused entry until results of further laboratory analyses are provided to the POE inspector.

The reconditioning of unsatisfactory products and defective lots in the United States is not generally permitted. However, damaged or dented canned products may be sorted and resubmitted for entry, and slight irregularities in labeling may be corrected. Products may not enter the U.S. market until all examinations and tests show full compliance with U.S. standards. Rejected products are held under U.S. Customs bond until they are either reexported or destroyed for human food purposes. Some products that fail to meet requirements for human food use may be permitted entry for other uses.

There are 54 points of entry designated for inspection of imported products. These products may be shipped to other points provided that previous authorization is granted by food safety and quality service.

The widespread use of agricultural chemicals and drugs by farmers and livestock producers has been a significant contributing factor to increase agricultural productivity. While modern agricultural practices have assured an abundant food supply, they have also created certain health risks stemming from the presence of chemical residues in animals and poultry.

The list of potential sources of residues is nearly endless, including pesticides, fertilizers, insecticides, herbicides, fungicide, rodenticides, soil conditioners, seed-treating compounds, soil fumigants, and miticides. In addition, antibiotics are frequently used for growth promotion and disease treatment. Feed additives and hormones have also proven to be valuable tools in improving the efficiency of crop, livestock, and poultry production.

It has now become obvious that the pervasive use of these chemicals has adverse as well as beneficial consequences. Animals and poultry retain many chemical residues in their tissues for extended periods of time. In many cases, these residues have been discovered in meat and poultry long after the use of a particular chemical has been discontinued. We have also found that exposure to feed additives, drugs, or other chemicals deliberately added to the diet is not the only source of residues in animals and poultry. Soil and crop treatments as well as environmental contamination may indirectly result in residue build-up in food animals.

DISEASE

There are over 60 different disease and physiological conditions that are important in meat inspection. Though the incidence of disease is normally low, it is essential that diseased animals be located in order to prevent infectious disease or other abnormalities from entering human food supplies.

Accepted food additives themselves do not pose risks to consumers, but their excessive use in meat and poultry products can, in some cases, result in health hazards. USDA permits the use of only those food additives that have met one of the following criteria: First, evaluation and approval by the U.S. Food and Drug Administration (FDA); second, generally recognized as safe status; or third, prior sanction under the meat and poultry inspection laws. After making this determination, the Department decides whether or not an additive will serve a useful purpose in meat or poultry products and allows the use of only the minimum amount necessary to achieve that purpose. Although the Department establishes a wide margin of safety in sanctioning the use of food additives it is important that only approved levels of accepted additives be used in product formulation.

GROSS CONTAMINATION

Gross contamination includes any contamination that can be readily identified by sight, taste, smell, or touch. Factors that affect the incidence of gross contamination include: Building construction, facilities and equipment, sanitation and maintenance of facilities and equipment, operational sanitation, and product storage. The very nature of the meatpacking industry lends itself to gross contamination of product, as there are several potential contaminants at virtually any point in the process. Some of the more common contaminants are hair, rodent and insect filth, mold, paint flakes, grit, stones, metal, plastic, wood, and industrial chemicals. Everyday accumulation of dust, machine oil, and grease are other common contaminants. Readily identifiable spoilage of meat is also gross contamination. The risk of gross contamination is greatest in establishments that fail to maintain high standards of sanitation.

MICROSCOPIC CONTAMINATION

In many cases, contaminants are so small that they can be detected only with the aid of a microscope, other instruments, or bioassays. Microscopic contamination can be caused by the same materials that result in gross contamination or by micro-organisms. Although micro-organisms cannot be directly identified by normal sensory perception, their presence as contaminants can frequently be recognized in the form of swollen cans or packages, "off" flavors, discolored or putrid meat, and so forth. It should be noted, however, that not all micro-organisms are harmful, as some are essential to the formulation of certain types of sausages and other products.

ECONOMIC FRAUD

Unfortunately, opportunities for consumer deception are available in any commercial enterprise, and the meat and poultry industry is no exception. The two most common types of economic fraud are: First, deceptive packaging and labeling; and second, failure to comply with standards for product formulation.

Labeling and packaging may be designed in a manner that intentionally misrepresents product quantity, quality, or composition to the consumer. Labels may contain misleading information about product origins or guarantees. In some cases, they may describe the product under the name of a different food. Deceptive packaging may mask product inferiority or lead consumers to believe they are purchasing a much greater quantity of meat or poultry than is actually the case.

Addition of excessive levels of fat, water, or extenders to a product also results in the consumer paying for more than he or she is actually receiving. This practice is generally known as economic adulteration of a product. In an effort to prevent such deception, the Department has developed produce standards, specifying the levels and types of substances that may be used in products bearing particular names. For example, a product may not be called chili con carne unless it contains no less than 40 percent meat computed on the weight of the fresh meat. It may contain no more than a total of 8 percent cereal, vegetable, starch, or other specified extenders.

In order to comply with U.S. standards, a foreign country must maintain laws and regulations establishing permitted tolerances of biological residues. The tolerances may not exceed those approved by the Food and Drug Administration or the Environmental Protection Agency. Materials explicitly setting out these tolerance levels must be provided in instructions to inspection personnel. Although these laws, regulations, and instructions are reviewed when a foreign country is first recognized for export, it is necessary to keep abreast of any changes and to assure that appropriate adjustments are made by foreign countries when U.S. standards change.

Late in 1971, the Department furnished residue monitoring information to all countries exporting meat or poultry to the United States. This information packet included a listing of U.S. tolerances for biological residues. Foreign countries are routinely advised of any revisions in the original listing.

Information that has been supplied regarding foreign efforts to update laws, regulations, and inspection procedures has not yet been compiled in a meaningful format.

The foreign inspection system must provide training and instructions to inspection personnel regarding methods of detecting evidence of residues through antemortem and postmortem inspection. Foreign regulations must also prescribe the action to be taken to dispose of product found to contain violative levels of residue. Inspectors must have the authority to prevent the admission of prohibited chemicals into export establishments and to control the use of restricted chemicals.

FPO onsite reviews offer one means for evaluating the suitability of residue control mechanisms in foreign countries. Our assessment efforts in this area focus on individual establishments as opposed to entire inspection systems. Better correlation of onsite review reports for all certified establishments in a given country would provide a better basis for identifying potential problem areas.

An effective foreign sampling program would provide for the selection of a sufficient number of samples from the slaughter population to assure the statistical reliability of the results. Factors peculiar to a particular country or region would be considered in designing the sampling programs. Countries which permit the use of substances that are either forbidden or restricted in the United States are required to make special provision for control of those substances and offer evidence demonstrating the effectiveness of those controls.

The information packet provided to exporting countries in 1971 contained a considerable amount of material regarding sampling programs, including copies of USDA laboratory procedures for analyzing meat samples for pesticides, trace elements, hormones, and so forth, and instructions provided to U.S. meat inspectors for selecting and submitting data on their biological residues, the general classes of substances monitored, and the number of samples found with violative amounts of residues. The Department also asked that they furnish information regarding agricultural practices in their countries that might result in biological residue problems. Similar residue information has been requested each year. While exporting countries have supplied information pertaining to residue testing conducted during the previous years, other information has not been updated.

In order to properly implement residue control activities, a foreign surveillance program must be adequately supported in terms of funding, personnel, equipment, facilities, training, and supervisory capability. In addition, foreign laboratory technicians must use internationally accepted analytical techniques in testing for all potentially harmful residues such as antibiotics, pesti-

cides, organic or inorganic compounds, hormones, hormone-like substances, growth promoters, anthelmintics, tranquilizers, or other therapeutic or prophylactic agents. Countries are permitted to share the services of a regional laboratory or make use of a U.S. laboratory. However, countries choosing either of these options must accept ultimate responsibility for the quality of the work performed.

While onsite reviews and inspections serve as useful tools for assessing foreign inspection capability, they should be supported by countrywide evaluations.

In 1978, 34 foreign countries offered 2.1 billion pounds of meat and poultry products for import into the United States. Of this amount, 12.1 million pounds (0.6 percent) were refused entry by port of entry import inspections for a variety of reasons. (See figure 11.)

At the time these products are offered for import, we do not know if their quality meets U.S. standards, as it is not feasible to make such a determination by providing day-to-day inspection over foreign production practices. Although we do know that products are subjected to foreign producer quality control and foreign government inspection, we do not require that either the producer or government furnish information regarding the specific outcome of such quality control and inspection.

We receive a general certification in the form of an export certificate. However, differences among plants in terms of the degree of quality control attained are not reflected in the information provided by these certificates. No direct assessment of the quality control available to a foreign inspection program as a whole is made at point-of-entry inspection. Rather a decilson is made regarding the acceptance or rejection of a particular lot based upon the attributes associated with that lot.

Food safety and quality service officials do conduct onsite reviews in order to assess the adequacy of foreign quality control and inspection programs. There is no doubt that onsite monitoring is needed to determine the effectiveness of control mechanisms that cannot be assessed by point-of-entry inspection. However, again, this activity emphasizes a plant-by-plant approach as opposed to an overall evaluation of the control systems available within the entire country.

Individual plant assessment tends to weaken foreign controls, in that it lessens the need for a complete systems analysis of inspection programs by foreign countries. On the other hand, countrywide import monitoring would enable food safety and quality service to determine the overall reliability of foreign quality control. Countrywide performance histories would provide greater assurance of product safety, wholesomeness, and quality than is now available from lot-by-lot, plant-by-plant compliance histories. Food safety and quality service relies heavily upon a foreign government's regulation of its meat and poultry industry. The Agency must therefore review each country's inspection system to determine if:

The regulatory system has the capability to control risks at levels acceptable in the United States; and the system is being effectively enforced.

In addition to strengthening our residue monitoring program, we need to assure that other meat and poultry product risks are adequately controlled. Obtaining such assurance requires the assessment of each risk on a country-by-country, product-by-product basis. As noted earlier, it would be necessary to examine the manner in which foreign governments enforce inspection requirements designed to control risks and determine the effectiveness of these controls. In addition, these assessments would include special consideration of the individual factors that are most relevant to a specific risk. A brief description of these factors follows:

DISEASE

First. The prevalence of disease conditions in a foreign country.

Second. The inspection methods used by a country to detect disease conditions.

Third. The procedures for control and disposition of diseased animals and parts.

MISUSE OF FOOD ADDITIVES

First. The additives that might be placed in a specific product and that cannot be detected by point-of-entry testing.

Second. A country's domestic standards regarding these additives.

GROSS CONTAMINATION

First. The products that have the most potential for gross contamination.

Second. A foreign country's program for regulating the type, condition, and sanitation of facilities and equipment used in the preparation of product.

Third. The inspection controls utilized to preclude industrial accidents and the safeguards used to prevent product exposed to such accidents from being exported to the United States.

MICROSCOPIC CONTAMINATION

First. The products that are most susceptible to microscopic contamination.

Second. A foreign country's program for controlling and testing for microscopic contamination.

ECONOMIC FRAUD

First. The products that are most susceptible to specific types of fraud.

Second. The exact nature of deceptive practices.

Third. A foreign country's program to control consumer fraud.

With specific risk categorization based on these factors, food safety and quality service management would be able to concentrate inspection resources in areas where potential hazards are greatest. In addition, disproportionate effort would not be directed toward areas in which risk is minimal. Risk categorizations for each exporting country by type of product exported should be developed.

Finally, this amendment requires species identification and absence of harmful residues by random sampling and testing here in the United States when the foreign beef is imported into the United States. It is intended to tighten up our inspection here in the United States to back up the thorough inspections required of the approved foreign plants.

Mr. President, the amendment is designed to tighten up the inspection processes that we have on imported meat and includes a very significant point in that we would require that species verification be required.

We have just gone through the episode a few weeks ago when horse meat from Australia was imported as beef and at the same plant kangaroo meat was imported as beef and so labeled fictitiously and falsely as beef.

None of us wants to envision meat coming to this country that is supposed to be beef and then ending up in a fast food chain or in hamburger that is presented in our retail stores and actually it is not even of that quality or that species.

Beyond that, the amendment seeks to tighten up the procedures to identify harmful residues or animal drugs or medicated needs which might be banned here in this country but nevertheless are used in other countries and leave a harmful residue in the meat.

All of the processes that we do to assure that we have good wholesome meat products in this country should be followed. It is our law. If another country wishes to export meat to this country we require that they meet our standards.

The amendment in itself is a tightening up of that process. It does require that the Secretary review the present procedures to institute some housekeeping steps and to develop a little tighter inspection program than what we have currently existing.

I believe the amendment is not only sound but I wish to specify that it represents, I think, the feeling and the belief not only of the producers of meat in this country but also the consumers of meat.

Mr. BENTSEN. Mr. President, I am pleased to join with my distinguished colleague the Senator from Montana in offering this amendment to protect consumers of meat from unknowingly being sold meat that is not up to the high quality standards that we demand and expect to get in this country. At the same time, this amendment will protect the reputation for high-quality products which the American cattleman has built over the years with major investments of time, effort, and hard-earned money.

The need for this legislation in underscored dramatically by the recent discovery by the U.S. Department of Agriculture that meat from two foreign plants that was being imported as beef was in fact not beef, but contained horse meat and kangaroo meat.

Secretary of Agriculture Block is to be commended for his decision to impound and test all Australian meat in this country and to halt all meat imports from these plants. Further testing of meat from plants in the state of Victoria, the location of the two problem plants, is now underway. I hope that there will be a thorough and complete investigation of this incident and that decisive action will be taken to prevent it from happening again.

Mr. President, consumer acceptance is vital to the cattle industry. U.S. produc-

ers have invested years of effort and millions of dollars in promoting beef as a healthy and nutritious product. They have succeeded, and U.S. beef is renowned as the finest in the world. U.S. producers are not resting on their laurels—they are still working hard to produce a top-quality product and to maintain that reputation. Texas beef producers within the last few months have set up a statewide voluntary checkoff program and are contributing 25 cents per head on all cattle sold in the State. These funds are being used to promote beef consumption.

The Texas cattle industry is not taking this money out of its profits. In most cases these contributions are merely adding to losses. These ranchers are making very real sacrifices for the good of their industry, yet their efforts are threatened by scandals such as this one.

Why should years of effort on the part of American ranchers be wiped out by a small group of criminals in a foreign country? There is simply no justification for allowing this.

Mr. President, these problems have been known for too long. It is past time to do something about them, to tighten up our inspection standards so that the U.S. consumer can be assured of the quality and wholesomeness of all the food products sold in this country.

This issue is not new to the Senate, and it is not new to the Senator from Texas. I have introduced legislation in the past, and I have cosponsored legislation in the past, to achieve these same goals. I now hope that the time has come for this legislation. We have had a dramatic focusing of public attention on the problems of our meat inspection system, and I hope that those who in the past have dismissed these problems will take a second look now.

I hope that this bill will be recognized for what it is. This is a consumer protection bill. This is a consumer interest, a consumer concern, and it is not limited at all to cattle producers. I hope that my colleagues will recognize the pressing need to maintain our high food quality standards and will join me in supporting this legislation.

Mr. MELCHER. Mr. President, I ask unanimous consent that Senator BENTSEN, Senator HEFLIN, Senator ANDREWS, and Senator BURDICK be added as cosponsors on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I do not believe there is any objection to this amendment. I have nothing further to add unless I can answer some questions.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. Mr. President, while the committee considers action on the pending amendment, I ask unanimous consent that I may be permitted to speak briefly on another matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

SOIL EROSION AMENDMENT NO. 543

Mr. ARMSTRONG. Mr. President, America is losing its topsoil because of wind and water erosion. Observers of the Mississippi River at Memphis, Tenn., can measure 40,000 tons floating by each hour. Hour after hour, day after day, year after year.

The USDA's Soil Conservation Service estimates that this Nation loses 5 billion tons of its topsoil each year. Nature replaces some of it, conservation practices slow or stop some of it, but the net loss grows—and its impact on our agricultural system is profound.

A single farmer can lose up to 6 tons of topsoil per acre each year to erosion. The result is that in the arid Western States, an area as big as the original 13 States—225 million acres—are undergoing severe desertification—that is, the loss of groundwater and high erosion that eventually make the land unsuitable for cultivation.

The current farm bill contains several provisions which address this growing national concern and the committee should be commended for showing the foresight to include them. The bill contains special loans, matching grants for land repair, a volunteer worker program, and places the emphasis on the most affected areas. All of these programs are badly needed and all will help alleviate this problem to some extent.

But, Mr. President, the time has come to look more closely at the cause of the problem. The potential exists for the creation of a dust bowl beside which that of the 1930's would pale by comparison—and Government programs are largely responsible.

The erosion situation is aggravated by excessive land disturbances during the cultivation process, the use of erosion-prone marginal land for farming, and insufficient crop rotation. But the bottom line is that we give farmers an incentive for continuing to plow up marginal lands in the West.

The land most suitable for farming in the arid West was long ago plowed out of the native sod. The grasslands, now being broken, often by foreign investors, are the most fragile and most susceptible to wind erosion. Farming is a business that requires huge capital investments, but returns very small profits to farmers.

When Government target prices and similar commodity programs yield a higher price to farmers than the market, and when market prices are depressed by huge Government-owned surpluses, farmers are given little choice in maintaining their financial position but to plow up more land and produce more crops.

And then, Mr. President, if the crops do not pan out, or if the erosion problem is severe, the Government helps farmers reseed the land.

So, in effect, we are providing incentives to plow up more land—marginal land that borders on desert and when plowed, destroys native coverings of sod that required centuries to develop—and then the taxpayers pay to retire the land again after permanent damage has been done. The result is the steady erosion of our Nation's most precious resource—its land.

This is erosion we can no longer afford to ignore. Agriculture is the country's largest industry, by far, employing directly and indirectly nearly 24 million people.

Agricultural commodities account for 20 percent of the gross national product, and are among the few things we produce in this country that effectively compete in foreign markets.

In fact, at a time when Americans pay enormous prices for energy obtained from foreign edge, we are fortunate that agriculture provides a viable industry second to none, and the world's most abundant, low-cost food supply.

But the increase in world demand, as well as the Government incentives I mentioned earlier, give our farmers every reason to continue current practices, while we give little incentive for conservation. To continue providing the peacemeal measures contained in this bill—important and helpful though they may be—while ignoring the fact that Government is largely responsible for the problem, is like throwing buckets of water at the Chicago fire.

We must stop paying farmers to destroy our Nation's soil. The USDA has been working for months on plans to reverse these erosion incentives. But Congress must strengthen the Secretary's hand in dealing with this problem.

Statutory authority to deny Federal subsidies to crops produced on newly-plowed land has never been specifically granted, this amendment would do just that.

The amendment simply provides that the Government price support program cannot be used to subsidize crops grown on land that has not been cultivated for the previous 10 years. The provision applies only to arid lands west of the 100th meridian—west of Dodge City, Kans.

Mr. President, I ask unanimous consent that my amendment No. 543 be printed in the RECORD.

The amendment was ordered to be printed in the RECORD as follows:

AMENDMENT NO. 543

On page 224, between lines 4 and 5, insert the following new sections:

"AUTHORITY OF THE SECRETARY OF AGRICULTURE TO REQUIRE BENEFIT RECIPIENTS TO CARRY OUT CERTAIN CONSERVATION PRACTICES

"SEC. 1102. The Secretary of Agriculture shall require, as a condition to the making, insuring, or guaranteeing of any farm ownership loan or farm operating loan authorized under any program administered by the Secretary, that the recipient of such loan agree to carry out, on the farm in connection with which such loan is made, such minimum conservation practices as the Secretary determines are necessary to protect such farm from wind and water erosion.

"PROHIBITION ON LOANS AND PAYMENTS IN THE CASE OF CROPS PRODUCED ON CERTAIN LANDS

"SEC. 1103. (a) Notwithstanding any other provision of law, no producer shall be eligible for any price support assistance under title III, IV, or V of this Act on any crop produced on any land located west of the one hundredth meridian if such land has not been

used for the production of an agricultural crop at any time during the ten crop years immediately preceding the crop year in which this Act is enacted, nor shall any such producer be eligible for a farm storage facility loan under section 1004 if such loan is to be used for the construction of a storage facility to store an agricultural commodity produced on any such land.

"(b) The prohibitions contained in subsection (a) shall not apply in the case of the owner or operator of any land referred to in such subsection if such owner or operator has entered into a long-term agreement with the Secretary of Agriculture to carry out on such land such conservation practices as the Secretary determines are necessary to protect the soil resources of such land from destruction by wind and water erosion.".

Renumber sections 1102 through 1109 of the Act as sections 1104 through 1111, respectively.

Mr. ARMSTRONG. Mr. President, I do not call up the amendment for consideration by the Senate at this time nor is it my intention to do so. I simply wished to explain that in brief this amendment would have withheld Federal subsidies for crops which were grown on land which was put into cultivation for the first time after this date.

This amendment addresses itself to the very serious problem of plowing Western grasslands in areas that are too arid to really be productively used to growing crops like wheat.

People get to the point where they do that. The result is tremendous erosion problems and the loss of topsoil and generally a decline rather than an improvement in the natural environment.

So both for environmental reasons and economic reasons it makes little sense for the Federal Government to subsidize and thereby encourage this unsound practice.

The point of my amendment is simply to say that with respect to land located west of the 100th meridian that farm loans and subsidies would not be available for crops grown on those lands unless there had been crops grown there in the prior 10 years.

This seems to me a reasonable approach and those with whom we have discussed it for the most part agree that it is a reasonable approach to a serious problem because millions of acres of Western land have already been torn up, erosion has been severe, and the threat of future cultivation and erosion is proportionately great.

Mr. President, I am not going to offer this amendment today for the simple reason that we have not done enough ground work to assure widespread understanding of the problem and of the consequences of our proposed solution.

I did wish to have in the record a discussion of the issue which my statement provides and the text of the amendment and at the right time I shall ask my friends on the Committee on Agriculture to consider this and perhaps to raise it as an amendment to another bill.

Mr. President, I thank the Senator and yield the floor.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I have an amendment I wish to call up but I do not know if it is proper procedure since the other amendment has not been acted upon.

Has the other one been acted upon?

UP AMENDMENT NO. 365

The PRESIDING OFFICER. There is an amendment pending.

Mr. HELMS. Mr. President, if the Senator's description is an accurate and comprehensive summary of this resolution, then, I believe I shall support it as I too am an advocate of the Secretary utilizing all his available authority to promote the sale of U.S. agricultural products in exports markets for the betterment of farmers, the American people, and the Government of the United States.

Mr. President, I have examined the amendment of the distinguished Senator from Montana and find myself in agreement with it and in support of it.

Mr. MELCHER. I thank the chairman.

Mr. HELMS. Mr. President, I am informed that the other side now feels likewise about that amendment.

I ask the Senator if I am correct in my understanding that he has discussed this with Secretary Lyng and he also has agreed with the thrust of it?

Mr. MELCHER. Mr. President, we have discussed it with Secretary Lyng, and he himself and speaking for the Department agrees with the thrust of it. I do not know whether they would change any language.

Mr. HELMS. That is my understanding.

Mr. President, we accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (UP No. 365) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MELCHER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 499

(Purpose: To provide for a Soybean Research Advisory Institute)

Mr. HEFLIN. Mr. President, I call up printed amendment No. 499 to the farm bill and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) proposes an amendment numbered 499.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 312, between lines 9 and 10, insert the following new section:

SOYBEAN RESEARCH ADVISORY INSTITUTE

SEC. 1437. (a) (1) There is established within the Department of Agriculture a temporary advisory body to be known as the Soybean Research Advisory Institute (hereinafter in this section referred to as the "Advisory Institute").

(2) The Advisory Institute shall be composed of eleven members appointed by the Secretary of Agriculture (hereinafter in this section referred to as the "Secretary"). Members appointed to the Advisory Institute shall be individuals who are recognized soybean research experts and shall represent the interest of soybean producers, soybean processors, land grant colleges and universities, Federal research agencies, and private industry. The Secretary shall, to the maximum extent practicable balance the membership of the Advisory Institute geographically on the basis of the soybean producing areas of the United States.

(3) The Secretary shall designate a representative of the soybean producers to serve as Chairman of the Advisory Institute.

(b) It shall be the function of the Advisory Institute to—

(1) assess the effectiveness of the ongoing soybean research programs in the United States;

(2) assess the impediments to increased United States soybean production, including the soybean cyst nematode, and consider the most effective means of removing such impediments;

(3) evaluate the available means and the potential for increasing soybean production in the United States;

(4) estimate the amount of funds required to carry out a coordinated program of national soybean research to develop means of of effectively increasing the overall United States soybean production and profitability; and

(5) develop plans for and sponsor an international conference on soybean research for the purpose of comparing and sharing current information on the production and utilization of soybeans.

(c) The Advisory Institute shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives not later than March 1, 1983, a comprehensive report on the findings of the Advisory Institute regarding research on soybean production and utilization. The Advisory Institute shall also include in such report its recommendations of the actions that should be taken to ensure that an effective soybean research program is carried out in the United States.

(d) Members shall receive no compensation for service on the Advisory Institute but may be paid, while in the performance of their duties away from their homes or regular places of business, travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in Government service.

(e) The Advisory Institute shall cease to exist on the day on which it submits its report to the committees referred to in subsection (c).

Mr. HEFLIN. Mr. President, on behalf of the distinguished junior Senator from Arkansas (Mr. PRYOR) and myself, I offer an amendment to S. 884 to establish a task force whose mission will be to devise the course of action needed to increase soybean yields. This group will be known as the Soybean Advisory Research Institute.

The amendment I offer today is a revised version of S. 1295, a bill I introduced earlier this year. On June 19, 1981, the Senate Subcommittee on Agricultural Research and General Legislation under the chairmanship of the distinguished senior Senator from Indiana (Mr. LUGAR) conducted a hearing on S. 1295. I am most grateful to Senator LUGAR for holding this hearing so that all interested parties could be heard and

have a full opportunity to express their views on the proposal. I think the hearing was excellent and, in fact, many of the thoughts and suggestions propounded at the hearing have been incorporated into the amendment.

Mr. President, the soybean is a high-protein commodity and has many varied uses. It is indeed a remarkable, if not a miracle, legume. In fact, the soybean has become the economic superstar of American agriculture. In addition to being the No. 1 cash crop of our Nation, soybeans are also the No. 1 cash export of the United States which is quite a feat in and of itself when one realizes that our Nation dominates grain exports in the world market. Approximately 60 percent of the total world exports of grain originates in the United States. Last year approximately $8.6 billion in U.S. produced soybeans and soybean products has greatly contributed to our balance of payments. As I stated earlier in the discussion on S. 884, it is widely recognized that our foreign trade debt would be a total shambles if it were not for U.S. agricultural sales abroad.

Yet, the record will clearly show that the tremendous rise in soybean production in America has not resulted from increased yields, but from expanded acreage. Testimony before our Senate Committee on Agriculture, Nutrition, and Forestry in connection with the farm bill revealed that in the past decade soybean acreage has grown from 42 million acres to 70 million acres. On the other hand, when contrasted with other agricultural commodities such as corn, whose yield per acre has increased from 26 bushels per acre in 1929 to approximately 110 bushels per acre today, average soybean yields have increased only about one-third bushel per acre annually over the last quarter of a century.

To my way of thinking, Mr. President, this points up the vital need to find the means to increase soybean yields through expanded research efforts and through grower education. Our record of soybean research is not laudable and, in fact, is miniscule relative outlays for corn and cotton research. Giving credence to the importance of developing the knowledge and technology to insure yields in the soybean was the reply of the Director of Science and Education, U.S. Department of Agriculture, Dr. Anson R. Bertrand at the June 19 hearing when asked about soybean yields. Dr. Bertrand said:

> Our records indicate the average annual increased nationwide is about one-third bushel per acre. It has been a very gradual increase. We have not had major breakthroughs. . . . There is no question, Senator Heflin, but that we have made strides much more slowly with soybeans than most of our crops.

A little later on in his testimony, Dr. Bertrand gave the following response when asked about the inadequacy of soybean research support:

> We do need more effort across the board in research for food and agriculture. . . . We do need to give additional emphasis to soybeans, as we do to several areas in food and agriculture.

Speaking further about the failure to provide funding for soybean research in spite of expanding demands for the commodity, Dr. Bertrand said:

> In looking at our inhouse program, and in keeping about the same balance that we have right now, it seems to me we could use at least a 50 percent infusion of funds.

A primary thrust of the Soybean Research Advisory Institute to be established by this amendment will be to "assess the effectiveness of the on-going soybean research programs in the United States." The Advisory Institute will be composed of 11 members appointed by the Secretary of Agriculture and the membership of the Advisory Institute will be composed of representatives from soybean growers, soybean processors, land grant colleges and universities, and the other disciplines having a direct interest in the soybean industry, including Federal research agencies and the private sector. Further, all soybean producing areas of the Nation would be represented and the chairman of the Advisory Institute would be a representative of our soybean producers.

Other functions of the Advisory Institute would be to assess all impediments and barriers to increased soybean yields, such as needed, disease and parasite control methods and to determine the amount of funds needed to launch a comprehensive program to bring about higher soybean production and better use of the soybean plant itself. The amendment also contemplates "an international conference on soybean research for the purpose of comparing and sharing current information on the production and utilization of soybeans."

Upon the completion of its assigned missions the Advisory Institute will submit a comprehensive report to the Agriculture Committees of both Chambers of the Congress. The report shall contain the findings and recommendations of the commitment which should be made and undertaken to expand soybean research. This report must be submitted no later than March 1, 1983, and upon the day the report is received by the Agriculture Committees of the Senate and House of Representatives the advisory shall cease to exist.

It is estimated that in the 1982 fiscal year $50,000 to $60,000 will be required to fund the activities of the Institute, assuming an agenda of two meetings a year. In the 1983 fiscal year, the estimated cost is $25,000 to $30,000. The funding to develop and sponsor the international conference called for under the amendment would approximate $200,000.

Mr. President, this amendment does not in any way encroach upon the freedom of soybean producers and their representative organizations. I am proud of the independence demonstrated and exercised by our soybean farmers which has, in large measure, made soybeans the top crop in the United States. This amendment, incidentally, is supported by the American Soybean Association and at the conclusion of my remarks, I ask unanimous consent to insert a letter by the Washington program manager of the association, Mr. John Baize, wherein he endorses the amendment on behalf of the association.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ASA WASHINGTON OFFICE,
*Washington, D.C., July 10, 1981.*

Hon. HOWELL HEFLIN,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR HEFLIN: It is our understanding that it is your intention to offer your proposal to establish a Soybean Research Advisory Institute as an amendment to the 1981 general farm bill (S. 884) when that bill is considered on the Senate floor. I take this opportunity to offer the American Soybean Association's support for your amendment and urge its adoption by the Senate.

U.S. soybean producers recognize the critical importance of ongoing research aimed at improving soybean productivity, post-harvest utilization, and soybean pest and disease control. We have not experienced increases in soybean yields comparable to those that have occurred in corn, cotton and wheat. Yet, we believe such a yield breakthrough is achievable provided we embark on aggressive genetic research programs. We also believe that pests inhibiting soybean productivity such as the cyst nematode can be controlled provided we have expanded research to find effective control methods.

We believe the Soybean Research Advisory Institute you propose will enhance the opportunity for achieving the soybean industry's research objectives. We, therefore, urge its inclusion in the 1981 farm bill.

Sincerely,

JOHN BAIZE,
*Washington Program Manager.*

Mr. HEFLIN. Mr. President, all of us want what is best for our farmers, our consumers, our taxpayers and our Nation. I strongly feel that this amendment meets these objectives.

Mr. President, the amendment I have sent to the desk, which has been printed and called up, is an extremely important amendment to the farm bill, in my judgment. This deals with a soybean research institute.

Senator THAD COCHRAN on numerous occasions in the many deliberations we have had on the farm bill in the Senate Agriculture Committee has reminded on many occasions that the world's population is growing at the rate of 70 million per year, and that in a matter of 7 years we will have nearly a half billion additional people in this world.

Agriculture, in its efforts to feed the world, has really only one crop that you can label a miracle crop, and that crop is soybeans.

Soybeans have the highest protein content of any crop, and have a great future toward feeding the millions of people on Earth. Yet we look at what research has accomplished dealing with soybeans, and we find there has been very little.

Some 10 years ago a parasite called the cyst nematode cropped up in the continental limits of the United States, and since that time has had a devastating effect upon the production of soybeans.

This parasite has to be conquered. Thus far the research has not come up with an answer for this parasite.

Forty years ago an acre of land on any specific farm yielded a certain number of bushels of soybeans per acre. In many instances that same piece of land 40

years ago produced 25 bushels of soybeans to the acre. Today it is producing just about the same amount, a slight increase, but for all practical purposes, it is producing 25 bushels per acre regardless of the irrigation, regardless of the fertilizer, regardless of the weed control, so there has been very little increase in the yield per acre in soybeans.

We had a professor from the school of agriculture at Auburn University testify about the cyst nematode. He testified that within 10 years, if we do not do anything about it, that soybean production in this country on the present acreage would be reduced 40 percent.

The amendment that I have introduced calls for a soybean research institute gathering together leaders from industry, from farms, from educational institutions, and from Government in which they will come together as a task force and recommend a plan of action as to what is necessary to bring about a research plan, a plan that is greatly needed, to improve soybean production in this country.

This amendment could well be the most important part of the farm legislation. We have had hearings on it. The American Soybean Institute supports it. I know of no opposition to it.

I have discussed this with the chairman of the committee and the ranking minority member and their staffs and, therefore, Mr. President, I move at this time the adoption of this amendment.

The PRESIDING OFFICER (Mr. QUAYLE). The Senator from North Carolina.

Mr. HELMS. Mr. President, during committee markup of the farm bill, Senator HEFLIN offered an amendment to establish a soybean research institute. Because legislation of this nature had not been considered during the farm bill hearings, I asked the Senator to withdraw his amendment with my assurance that hearings would be held prior to Senate action on the farm bill.

Subsequently, Senator HEFLIN introduced S. 1295, a bill to establish a soybean research institute for the purpose of coordinating and conducting research programs, encouraging soybean exports, and providing the leadership for a national soybean policy.

On June 19, Senator LUGAR, chairman of the Subcommittee on Agricultural Research and General Legislation, held a hearing on S. 1295. All witnesses agreed that additional research to increase soybean productivity was imperative. However, representatives of the U.S. Department of Agriculture and the soybean industry expressed reservations regarding S. 1295 as introduced. The USDA representative cited current research and market development efforts in USDA and in the private sector as meeting the intent of the proposed legislation. Nevertheless, in response to Senator HEFLIN, the USDA representative stated that dramatic discoveries are necessary to break the soybean yield barrier, especially since the protein rich soybean will play an increasingly important nutritional role as the world population grows.

On July 18, Senator HEFLIN submitted amendment No. 499, to provide for a soybean research advisory institute, with a fivefold purpose to:

First, assess the effectiveness of the ongoing soybean research programs in the United States;

Second, assess the impediments to increased U.S. soybean production, including the soybean cyst nematode, and consider the most effective means of removing such impediments;

Third, evaluate the available means and the potential for increasing soybean production in the United States;

Fourth, estimate the amount of funds required to carry out a coordinated program of national soybean research to develop means of effectively increasing the overall U.S. soybean production and profitability; and

Fifth, develop plans for and sponsor an international conference on soybean research for the purpose of comparing and sharing current information on the production and utilization of soybeans.

The advisory institute would be required to submit a report of its findings to the House and Senate Agriculture Committees by March 1, 1983, and the advisory institute would be terminated at that point.

Mr. President, this amendment has been submitted for review to the U.S. Department of Agriculture and the soybean industry. The industry endorses this amendment, and it is my understanding that USDA has no objections. The costs of implementing amendment No. 499 would be minimal, and I urge that it be adopted by the Senate.

I agree to accept it. I am informed the minority does likewise.

● Mr. PRYOR. Mr. President, I am privileged to rise today in support of the amendment sponsored by my colleague from Alabama, Senator HEFLIN, to establish a soybean research task force that will lead to essential research in this area. And in joining Senator HEFLIN I am also pleased to say that I am lending full support and encouragement to soybean farmers throughout the United States.

In my native State of Arkansas, soybeans are not merely a primary crop, they are a major staple of the State's economy. More than 4 million acres are involved in soybean production, and the State yields annually about 5.4 percent of the total U.S. production. This year alone we will harvest about 113 million bushels. So crucial is this product to the State of Arkansas, in fact, that soybeans have long been known there as the "princess crop of the prairie."

Soybeans are the No. 1 cash crop in the United States, and the No. 1 cash export as well. In 1979 more than $0.79 billion worth of U.S. soybeans was exported. Many economists predict that growth in world population will double soybean demand in the next decade.

Yet the increase in soybean production throughout the country has not resulted from increased yields. It has come about simply from expanded acreage. The average soybean yield has increased only about one-fourth bushel per acre each year, while corn has increased 85 bushels an acre over the last 50 years.

This comparatively low yield demonstrates the crucial need for research and development in soybean production. It has been documented that investment in agricultural research pays major dividends, generating an average return of 35 to 50 percent for each dollar invested. Yet there has not been the investment in soybean research needed by the American farmer.

An aggressive program is needed to learn more about biochemical relationships of plant stress, insect tolerance, and disease resistance. We need to investigate soil conservation methods, nematode control, genetic improvement of crops, and weed and insect control. There should also be assurance to the farmer that he will have access to university research and cooperative extension programs.

Senator HEFLIN'S amendment would in no way encroach upon the freedom of soybean producers and their representative organizations. It would, however, provide a means for bringing together the soybean industry, the Federal Government, and others interested in achieving the full potential of this crop.

Action of the kind intended by this amendment is absolutely necessary for the full production of future soybean crops. Mr. President, the 1979 crop was the largest in history, exceeding 2.3 billion bushels, and even with the 1980 drought soybeans still ranked second highest in the Nation. Some 67 million acres will be harvested in the United States this year.

We must assure producers that they will be given access to the most recent and sophisticated research capabilities this Nation has to offer. That's why I am pleased and privileged to join Senator HEFLIN in this effort.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment (No. 499) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Is the Senator from North Dakota seeking recognition?

Mr. ANDREWS. Yes.

UP AMENDMENT NO. 366

(Purpose: To provide for an adequate supply of malting barley in the event that the Secretary imposes an acreage reduction program for feed barley)

Mr. ANDREWS. I have an unprinted amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS) proposes an unprinted amendment numbered 366:

On page 160, line 6, strike the period and insert in lieu thereof a colon and the following:

"*Provided*, That the Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases and payments to comply with an acreage limitation established under this subsection if such producer has previously produced a malting variety of barley, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe."

Mr. ANDREWS. Mr. President, the purpose of my amendment is to allow the Secretary of Agriculture to delete from the overall classes of the several feed grains that subsection on barley, subclass of barley, known as malting barley.

If, in fact, there is a surplus of feed grains in the country, and the Secretary enacts a 20-percent setaside across-the-board on feed grains, yet there might well be a shortage of malting barley, a variety that is not used for livestock feed, this would give the Secretary of Agriculture the ability to recognize that and not require the same cutback in malting barley that they would in the other feed grains.

I have discussed this amendment with the chairman of the committee, with the Secretary of Agriculture, and with the Senators on the other side of the aisle and there is no objection to the amendment. I ask for its adoption.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, this amendment merely provides some flexibility for the Secretary of Agriculture to implement an acreage reduction for barley. This is discretionary and will allow Government programs to take into account the actual market and supply differences between barley grown for feed and barley grown for malting purposes.

Mr. President, the Senator is correct. We do accept the amendment. The amendment is acceptable to the administration and I am advised that the minority also accepts it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Dakota (Mr. ANDREWS).

The amendment (UP No. 366) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. ANDREWS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. PRESSLER. Mr. President, I yield to the Senator from Alabama.

Mr. HEFLIN. Mr. President, I yield to the Senator. Does the Senator seek recognition?

Mr. PRESSLER. Mr. President, I wish to call up an amendment at this point.

Mr. HEFLIN. I have a couple more, also. I yield to the Senator.

The PRESIDING OFFICER. The Senator from South Dakota is recognized.

AMENDMENT NO. 423

(Purpose: To provide for a special shelterbelt program)

Mr. PRESSLER. Mr. President, I have an amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER) proposes amendment numbered 423:

On page 235, between lines 17 and 18, insert the following new section:

SPECIAL SHELTERBELT PROGRAM

SEC. 1112. (a) The Congress finds that it is in the public interest to establish and maintain where necessary shelterbelts throughout the Nation, and, thereby, reduce soil blowing; control snow deposition; conserve moisture; protect crops, orchards, and livestock; provide food and cover for wildlife; provide energy conservation; and increase the natural beauty of the landscape.

(b) The Secretary of Agriculture (hereinafter in this section referred to as the "Secretary") is authorized and directed to formulate and carry out a program to establish and maintain shelterbelts. Such program shall begin on October 1, 1981.

(c)(1) In effectuating the shelterbelt program authorized by this section the Secretary is authorized to enter into agreements with landowners and operators to establish and maintain shelterbelts identified in a conservation plan of the entire operating unit, developed in cooperation with the soil and water conservation district in which the lands are located, under such rules and regulations as the Secretary may prescribe. Such agreements shall be entered into for a period of five years.

(2) As used in this section, the term "shelterbelt" means a vegetative barrier with a linear configuration composed of trees and shrubs and other approved perennial vegetation.

(d) In the agreement between the Secretary and landowner or operator, the landowner or operator shall agree—

(1) to conserve plan covering the entire operating unit developed in cooperation with and approved by the soil and water conservation district and to carry out the plan or an approved modification thereof for the period of the agreement;

(2) to place in the shelterbelt program for the period of the agreement all land subject to wind erosion. Other land may be included that would benefit from establishing and maintaining shelterbelts;

(3) not to adopt any practice specified by the Secretary in the agreement as a practice which would tend to defeat the purposes of the agreement;

(4) to forfeit all rights to further payments or grants under the agreement and refund to the United States all payments or grants received thereunder upon his violation of the agreement at any stage during the time he has control of the land subject to the agreement if the Secretary determines that such violation is of such a nature as to warrant termination of the agreement, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the agreement;

(5) upon transfer of his right and interest in the land subject to the agreement during the agreement period, to forfeit all rights to further payments or grants under the agreement and refund to the United States all payments or grants received thereunder during the year of the transfer unless the transferee of any such land agrees with the Secretary to assume all obligations of the agreement; and

(6) to such additional provisions as the Secretary determines are desirable and includes in the agreement to effectuate the purposes of the program or to facilitate its administration.

(e) In return for the agreement of the landowner or operator, the Secretary shall (1) make an annual payment to the landowner or operator for the period of the agreement at such rate or rates as the Secretary determines to be fair and reasonable in consideration of the obligations undertaken by the owner or operator; and (2) bear such part of the cost of establishing and maintaining shelterbelts as the Secretary determines to be appropriate. The Secretary shall annually reexamine the compensation provided in light of current land and crop values. In making his determination, the Secretary shall also consider, among other things, the rate of compensation necessary to encourage owners or operators to participate in the shelterbelt program.

(f) The Secretary may terminate any agreement by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of agreements as he may determine to be desirable to carry out the purposes of the program or facilitate its administration.

(g) This section shall be applicable to the several States, Puerto Rico, and the Virgin Islands.

(h) The Secretary shall prescribe such regulations as he determines necessary and desirable to carry out the provisions of this section.

(i) There are authorized to be appropriated such sums as may be necessary to carry out the program authorized by this section.

Mr. PRESSLER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEFLIN. Mr. President, I have another amendment that I would like to bring up at this time.

The PRESIDING OFFICER. The Chair would inform the Senator that it would take a unanimous-consent request to set aside the amendment of the Senator from South Dakota. Is that what the Senator from Alabama is requesting?

Mr. HEFLIN. Yes. I ask unanimous consent that the amendment of the Senator from South Dakota be temporarily laid aside.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from South Dakota is laid aside temporarily. The Senator from Alabama is recognized.

UP AMENDMENT NO. 367

(Purpose: To provide grants to the 1890 land-grant colleges, including Tuskegee Institute, for the purpose of assisting these institutions in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to

strengthen their capacity for research in the food and agricultural sciences)

Mr. HEFLIN. Mr. President, I call up my amendment to S. 884 to authorize the appropriation of funds to the colleges eligible to receive funding under the act of August 30, 1890, including Tuskegee Institute. I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) proposes an unprinted amendment numbered 367.

Mr. HEFLIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 283, between lines 4 and 5, insert a new section as follows:

"AUTHORITY TO AWARD GRANTS TO UPGRADE 1890 LAND-GRANT COLLEGE RESEARCH FACILITIES

"SEC. 1426. (a) It is hereby cleared to be the intent of the Congress to assist the institutions eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321–326 and 328), including Tuskegee Institute (hereinafter referred to in this section as "eligible institutions"), in the acquisition and improvement of research facilities and equipment so that eligible institutions may participate fully with the State agricultural experiment stations in a balanced attack on the research needs of the people of their States.

"(b) There are hereby authorized to be appropriated to the Secretary of Agriculture for the purpose of carrying out the provisions of this section $10,000,000 for each of the fiscal years 1982 through 1986, such sums to remain available until expended.

"(c) Four per centum of the sums appropriated pursuant to this section shall be available to the Secretary for administration of this grants program. The remaining funds shall be available for grants to the eligible institutions for the purpose of assisting them in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity to conduct research in the food and agricultural sciences.

"(d) Grants awarded pursuant to this section shall be made in such amounts and under such terms and conditions as the Secretary shall determine necessary for carrying out the purposes of this section.

"(e) Federal funds provided under this section may not be utilized for the payment of any overhead costs of the eligible institutions.

"(f) The Secretary may promulgate such rules and regulations as the Secretary may deem necessary to carry out the provisions of this section.".

Beginning on page 283, redesignate sections 1426 through 1436 as sections 1427 through 1437, respectively.

Mr. HEFLIN. Mr. President, this amendment, in essence, contain the provisions of a bill introduced by me earlier this year, namely S. 1237. A similar bill was introduced in the other Chamber in this Congress by the distinguished chairman of the House Committee on Agriculture (Mr. DE LA GARZA). This measure which may be identified as H.R. 1309 was unanimously passed by the House of Representatives on July 13 of this year.

It had been my original intention to offer the provisions of S. 1237 to be a part of S. 884 when we were marking up the farm bill this spring. At that time, however, we had not received the comments of the Department of Agriculture relative to the administration's position with respect to the legislation and, therefore, I felt that the proposal should not be considered by our committee during markup; notwithstanding the fact that we had received some very outstanding testimony concerning the legislation during hearings on the new farm bill.

Happily, Mr. President, on July 9, 1981, Secretary of Agriculture Block directed a letter to the distinguished chairman of our Senate Committee on Agriculture, Nutrition and Forestry (Mr. HELMS) endorsing S. 1237 on behalf of the administration, including, I should like to add, the Office of Management and Budget. I ask unanimous consent, Mr. President, that Secretary Block's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
*Washington, D.C., July 9, 1981.*

Hon. JESSE HELMS,
*Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: This is in response to your request for a report on S. 1237, a bill "To provide grants to the 1890 landgrant colleges, including Tuskegee Institute, for the purpose of assisting these institutions in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity for research in the food and agricultural sciences."

The Department would not object to enactment of the bill if it is amended to delete subsection (b) in Section 4. Such a "report and wait" requirement is unnecessarily restrictive to the administration of this program.

The bill, if enacted, would authorize grants to the 1890 institutions, including Tuskegee Institute, for funding of food and agricultural research facilities. It would be a five-year authorization for no-year-end monies.

The bill authorizes appropriations for fiscal years 1981 through 1985 in the amount of $10 million per year. Four percent of the funds to be appropriated will be utilized by the Department for administration.

The research capability of these institutions is not comparable to that of the 1862 land-grant institutions. The 1890 institutions have received limited State construction funds for research facilities. Furthermore, they were not eligible to participate in the modest Federal facilities program provided in the late 1960's and early 1970's for the 1862 land-grant institutions under the Research Facilities Act of 1963.

The lack of sufficient research facilities has forced the institutions to use the space provided for resident instruction and other campus programs to accommodate the staff required for research supported by the grant funds available under Public Law 95–113. In some institutions, scientists are conducting research in classrooms during the hours that those rooms are not used for student instruction.

The lack of facilities has forced these institutions into very limited agricultural research programs, which have been developed by "making do" under unfavorable circumstances. They have been unable either to develop research programs that could provide expertise to complement and enhance their instruction and extension program needs, or to participate with the 1862 landgrant institutions in a balanced attack on the agricultural research problems of the people in their States.

Enactment of the bill would have no significant effect upon the quality of the human environment.

The Office of Management and Budget advises that there is no objection to the presentation of this legislative report from the standpoint of the President's program.

Sincerely,

JOHN R. BLOCK,
*Secretary.*

Mr. HEFLIN. Mr. President, as evidenced by the first paragraph of Secretary Block's letter, the purpose of this amendment is to provide funds to the 1890 landgrant colleges, including Tuskegee Institute to assist these institutions of higher education in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity for research in the food and agricultural sciences. In other words, the amendment is a bricks and mortar proposal. It is designed to provide a portion of the capital needed by the eligible institutions in their quest to improve and develop agricultural research centers of excellence.

This amendment would compliment and, in fact, become an integral part of the action taken by the Congress in the 1977 farm bill when it included the research and extension work of the 1890 land-grant colleges, including Tuskegee Institute, in the regular Federal funding processes enjoyed by the 1862 land-grant colleges. In making the eligibility of the 1890 land-grant institutions comparable to their 1862 counterparts, however, the 1977 farm law did not extend this concept to physical facilities. This amendment will go a long way toward fulfilling the intent of the 95th Congress to make the 1890 land-grant colleges, including Tuskegee Institute, full partners in the agricultural research and extension communities.

Greater emphasis on agricultural research is one of our principal long-term needs. If we are to be able to continue our expected mission of feeding and clothing the citizens of this Nation and hundreds of millions more throughout the world as well, agricultural research will play a more important role than in the past in the development of knowledge that must be used by our farmers. Already we see the need to hasten progress to improve the efficiency and increase the production of American agriculture. All of our land-grant universities and colleges, including experiment stations, must participate in this mission. Each institution obviously has the potential for providing the many breakthroughs we are seeking and must have.

Mr. President, the 1890 land-grant colleges and Tuskegee Institute have agricultural research shortcomings that need to be remedied if they are to participate in the development of knowledge needed to generate the food and fiber requirements of the future. These institutions have carried on important work for nearly a century and adoption

of this amendment will mean much in facilitating their dedicated research efforts.

Mr. President, I believe there is no objection to this amendment.

Mr. HELMS. Mr. President, I am prepared to accept the amendment of the distinguished Senator from Alabama. I am informed that the distinguished ranking minority member is also prepared to accept the amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 367) was agreed to.

Mr. HEFLIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## VISIT TO THE SENATE BY MEMBERS OF THE BRITISH PARLIAMENT

Mr. HELMS. Mr. President, we are honored at this time to have 10 members of the British Parliament in the Chamber visiting us, plus a lady who, I understand, is the equivalent of our Secretary of the Interior.

RECESS

Mr. HELMS. Mr. President, I ask unanimous consent that the Senate stand in recess for 5 minutes so that Senators may express their welcome to this fine group of visitors.

There being no objection, the Senate, at 3:25 p m., recessed until 3:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. QUAYLE).

## AGRICULTURE AND FOOD ACT OF 1981

The Senate continued with the consideration of the bill.

AMENDMENT NO. 423, AS MODIFIED

(Purpose: To provide for a special shelterbelt program)

Mr. PRESSLER. Mr. President, I send to the desk a modified version of my amendment No. 423 and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The amendment will be so modified.

The amendment, as modified, will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER) proposes an amendment numbered 423, as modified.

Mr. PRESSLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, reads as follows:

At the appropriate place in the bill, insert the following:

SPECIAL SHELTERBELT PROGRAM

SEC. 1112. (a) The Congress finds that it is in the public interest to establish and maintain where necessary shelterbelts throughout the Nation, and, thereby, reduce soil blowing; control snow deposition; conserve moisture; protect crops, orchards, and livestock; provide food and cover for wildlife; provide energy conservation; and increase the natural beauty of the landscape.

(b) The Secretary of Agriculture (hereinafter in this section referred to as the "Secretary") is authorized to formulate and carry out a program to establish and maintain shelterbelts. Such program shall begin on October 1, 1981.

(c)(1) In effectuating the shelterbelt program authorized by this section, the Secretary is authorized to enter into agreements with landowners and operators to establish and maintain shelterbelts identified in a conservation plan of the entire operating unit, developed in cooperation with the soil and water conservation district in which the lands are located, under such rules and regulations as the Secretary may prescribe. Such agreements shall be entered into for a period of five years.

(2) As used in this section, the term "shelterbelt" means a vegetative barrier with a linear configuration composed of trees and shrubs and other approved perennial vegetation.

(d) In the agreement between the Secretary and landowner or operator, the landowner or operator shall agree—

(1) to conservation plan covering the entire operating unit developed in cooperation with and approved by the soil and water conservation district and to carry out the plan or an approved modification thereof for the period of the agreement;

(2) to place in the shelterbelt program for the period of the agreement all land subject to wind erosion. Other land may be included that would benefit from establishing and maintaining shelterbelts;

(3) not to adopt any practice specified by the Secretary in the agreement as a practice which would tend to defeat the purposes of the agreement;

(4) to forfeit all rights to further payments or grants under the agreement and refund to the United States all payments or grants received thereunder upon his violation of the agreement at any stage during the time he has control of the land subject to the agreement if the Secretary determines that such violation is of such a nature as to warrant termination of the agreement, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the agreement;

(5) upon transfer of his right and interest in the land subject to the agreement during the agreement period, to forfeit all rights to further payments or grants under the agreement and refund to the United States all payments or grants received thereunder during the year of the transfer unless the transferee of any such land agrees with the Secretary to assume all obligations of the agreement; and

(6) to such additional provisions as the Secretary determines are desirable and includes in the agreement to effectuate the purposes of the program or to facilitate its administration.

(e) In return for the agreement of the landowner or operator, the Secretary shall (1) make an annual payment to the landowner or operator for the period of the agreement at such rate or rates as the Secretary determines to be fair and reasonable in consideration of the obligations undertaken by the owner or operator; and (2) bear such part of the cost of establishing and maintaining shelterbelts as the Secretary determines to be appropriate. The Secretary shall annually reexamine the compensation provided in light of current land and crop values. In making his determination, the Secretary shall also consider, among other things, the rate of compensation necessary to encourage owners or operators to participate in the shelterbelt program.

(f) The Secretary may terminate any agreement by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of agreements as he may determine to be desirable to carry out the purposes of the program or facilitate its administration.

(g) This section shall be applicable to the several States, Puerto Rico, and the Virgin Islands.

(h) The Secretary shall prescribe such regulations as he determines necessary and desirable to carry out the provisions of this section.

(i) There are authorized to be appropriated such sums as may be necessary to carry out the program authorized by this section.

Mr. PRESSLER. Mr. President, today I am calling up for consideration an amendment No. 423, as modified, to S. 884, to promote the establishment of shelterbelts, that I introduced in July. My shelterbelt amendment would promote the preservation, restoration, improvement and establishment of shelterbelts to protect cropland from soil loss due to wind erosion. In addition to reducing wind erosion, shelterbelts control snow deposition, conserve moisture, protect crops, orchards and livestock; provide food and cover for wildlife; conserve energy and increase the natural beauty of the landscape.

The most valuable reward of increasing the Nation's shelterbelts is the saving of precious topsoils.

Recent studies by the Department of Agriculture have shown that wind damaged nearly two and one half times as much land in the Great Plains from November 1980 through May 1981, as it did during the same period a year earlier. The number of acres damaged by wind increased from 5,134,000 in 1980 to 12,488,000 in 1981. This increase demonstrates that steps have to be taken to encourage our farmers to protect their land against the loss of valuable topsoils. When farmers moved into the Great Plains, there was 30 inches of topsoils; now in 1981, there are about 5 inches. If the remaining 5 inches are lost, farmers will be forced to plant on the subsoils which are not as productive as the upper topsoils.

When we consider our Nation's top soil, it is important to note that 19 percent of all U.S. exports are agricultural products. The U.S. agricultural trade surplus grew from $2 billion in 1970 to $24 billion in 1980. This equals more than a third of the Nation's expenditures on imported oil. Such exports and surpluses cannot be maintained without fertile topsoils; 65 percent of all agricultural exports are grains, which rely on healthy topsoils. As we continue to lose topsoils, our productivity will continue to suffer. This is particularly concerning because agricultural trade surpluses help to counteract this Nation's trade deficit.

Much of this loss of productivity and valuable topsoil can be avoided if this Senate and the Government acts toward offering farmers incentives to establish and restore shelterbelts. It is imperative

that the Nation's awareness be raised concerning this loss of one of our country's most valuable resources. If not, we may be dealing with shortages of agricultural products rather than surpluses.

With a burdensome dependence on foreign oil and limited domestic supplies of fuel oil, it is important to take note of the energy savings which shelterbelts have to offer.

Studies have shown that a well designed farmstead windbreak can reduce winter fuel consumption by 10 to 30 percent. If windbreaks could be planted around the 760,000 unprotected rural dwellings in the Great Plains, the potential energy savings would be 15.2 trillion Btu's per year, or the equivalent of 109 million gallons of fuel oil. The energy savings the shelterbelt offers will lessen this country's dependence on foreign oil and conserve a valuable resource.

It should also be noted that shelterbelts increase the quality and quantity of our Nation's beef and orchards. The Montana experiment station in Harve found that a herd of cattle protected by windbreaks gained 35 pounds more each during a mild winter and lost 10½ pounds less during a severe winter than an unprotected herd. Orchards also need shelter against high winds, especially during pollination and when the fruit is ripening. Fruit is often blown off the trees in unprotected orchards or is bruised or scarred. Windbreak protected orchards produce both high yields and higher quality fruit.

It is important that farmers be given assistance in restoring and establishing shelterbelts. Farmers are unable to undertake the restoration and establishment of shelterbelts on their own because of high interest rates and inflation. In addition, increases in land prices make it profitable for farmers to plow up shelterbelts and increase the value of the land. Therefore, it is necessary for the Government to take steps to aid the farmers in restoring shelterbelts. Shelterbelts are a common heritage which benefit the country as a whole, not just the farmers. Without more Government involvement and public awareness, topsoil will continue to be lost and as a consequence, this Nation's productivity will suffer.

This amendment would authorize the Secretary of Agriculture to enter into agreements with landowners and operators to establish and maintain shelterbelts in cooperation with the soil and water conservation district under the regulations prescribed by the Secretary. The agreement would be for a period of 5 years, in which, in return for establishing a shelterbelt and maintaining it within the prescribed regulations, the Secretary of Agriculture shall make an annual payment to the landowner or operator and bear such costs of establishing and maintaining shelterbelts as the Secretary determines appropriate.

Mr. President, I urge my colleagues to join me in supporting the shelterbelt amendment.

Mr. DOLE. Mr. President, will the Senator yield for a question?

Mr. PRESSLER. I yield.

Mr. DOLE As I understand, the Senator from South Dakota has taken out the mandatory portion of the amendment so that it authorizes the Secretary and then, in the event he does proceed, there are certain prescribed guidelines he must pursue. Is that correct?

Mr. PRESSLER. That is correct. The slight change in the legislation authorizes the Secretary to carry this out. I think it is very important that we adopt this amendment in the farm bill to highlight our concern for our topsoil and to authorize the Secretary to carry out such activities.

Mr. DOLE. If the Senator will yield further, I think with the change and modification, in the view of this Senator, it is a good amendment. I hope it might be acceptable on the basis of its modification. Until such a program is implemented or, at least, designed, I cannot see that it can cause any problem from a budgetary standpoint.

Mr. HELMS. Mr. President, I commend my colleague from South Dakota on his amendment to authorize a shelterbelt program under the direction of the Soil Conservation Service.

The committee considered a broad package of legislative ideas for the 1981 farm bill pertaining to soil conservation. We would like to think that those measures that were adopted reflect a balanced mix of needed legislation. However, we did not include a shelterbelt provision.

There is not presently a specific shelterbelt program; however, current law does authorize the Secretary to provide landowners and operators with financial cost-sharing assistance to carry out conservation measures, including, among other things, the establishment of shelterbelts where needed. Both the Great Plains conservation program and the agricultural conservation program have provisions which specifically provide for the establishment of shelterbelts. The problem is that these authorities do not deal with the specific problem of developing needed shelterbelts.

Like the Senator from South Dakota, I am greatly concerned with the serious loss of topsoil from the precious farmland of this Nation. I am glad to support this amendment.

Mr. President, this amendment is acceptable to both sides. I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (UP 423, as modified) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote.

Mr. PRESSLER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 368

(Purpose: To amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes)

Mr. DOLE. Mr. President, I send an amendment to the desk for myself, the Senator from Missouri (Mr. DANFORTH), and the Senator from South Dakota (Mr. PRESSLER) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself, Mr. DANFORTH, and Mr. PRESSLER, proposes an unprinted amendment numbered 368.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, after line 17, insert the following:

SEC. 1112. Section 101 of title 11, United States Code, is amended—

(1) by adding after paragraph (18), the following:

"(19) 'farm produce' means the product of a person engaged in a farming operation, including crops, poultry, livestock, or dairy products in an unmanufactured state;

"(20) 'farm produce storage facility' means any business enterprise operated by any person for the purpose of (A) providing facilities for the temporary storage of farm produce; or (B) purchasing farm produce from persons engaged in farming operations in bulk quantities; however, such term shall not be construed to include any retail grocery business operation;";

(2) by renumbering paragraphs (19) through (40) as paragraphs (21) through (42), respectively; and

(3) by adding after paragraph (42) as renumbered by this section, the following new paragraph

"(43) 'storage facility receipt' means any document of the type routinely issued by a debtor operating a farm produce storage facility for the purpose of establishing a record of ownership of a quantity of farm produce which is stored with such facility by any person upon a contract of bailmen. Such term shall include a warehouse receipt or a scale ticket, provided identification of the owner of the produce represented thereby is clearly noted upon the face of such document.".

SEC. 1113. Section 109 of title 11, United States Code, is amended in subsection (e) by inserting after "commodity broker," the following "or a person engaged in the business of operating a farm produce storage facility (with respect to the debts of that business),".

SEC. 1114. Section 502 (1) of title 11, United States Code, is amended by striking out "507 (a) (6)" and inserting in lieu thereof "507(a) (7)".

SEC. 1115. Section 503(b) (1) (B) of title 11, United States Code, is amended by striking out "507(a) (6)" and inserting in lieu thereof "507(a) (7)".

SEC. 1116. Section 507(a) is amended—

(1) by adding after paragraph (4) the following:

"(5) Fifth, allowed unsecured claims of farmers or other persons engaged in farming operations arising from the sale or conversion of farm produce to or by a debtor engaged in the business of operating a farm produce storage facility—

"(A) where such sale or conversion occurred within 180 days before the date of the filing of the petition or before the cessation of the debtor's business, whichever occurs first, but only

"(B) to the extent of $2,000 for each such individual.";

(2) by striking out "(5) Fifth" and inserting in lieu thereof "(6) Sixth"; and

(3) by striking out "(6) Sixth" and inserting in lieu thereof "(7) Seventh".

SEC. 1117. Title 11, United States Code, is amended by adding after section 554 the following:

"§ 555. Expedited abandonment of farm produce

"(a) Notwithstanding any other provision of this title, in a case filed under such title by, or with respect to, a person engaged in the business of operating a farm produce storage facility, the court shall follow the procedures herein stated, unless otherwise indicated.

"(1) Within ten days after the filing of the petition, the court shall direct the trustee who has been appointed to supervise liquidation and management of the estate to conduct an examination of the debtor, and of the debtor's books, records, and accounts to determine the identity of persons—

"(A) who either have or may claim to have an ownership interest in farm produce delivered over to the trustee by the debtor by virtue of having—

"(i) retained title to farm produce stored with the debtor upon a contract of bailment;

"(ii) purchased produce from the debtor which was then, in turn, bailed to the debtor for storage purposes;

"(iii) taken assignment of, or title by judgment to, the debtor's ownership interests in produce owned by the debtor; or

"(iv) taken assignment of the ownership interest of any such parties; and

"(B) who claim status as secured creditors of the debtor arising out of a security interest in any farm produce which is delivered over to the trustee by the debtor, which farm produce is property of the debtor's estate.

"(2) Within thirty days after the filing of the petition, the trustee shall conduct an examination of the debtor and his records and, if necessary, shall conduct an audit of the physical assets of all farm produce storage facilities operated by the debtor for the purpose of determining the quantity, quality, and type of farm produce, if any, which has been delivered over to the trustee by the debtor. The trustee shall then sell such farm produce for its then current fair market value, and place the proceeds of such sale on deposit in an interest-bearing account of a type which will obtain the maximum return on such proceeds as may be practical.

"(3) (A) Within sixty days after the filing of the petition, the court shall, after notice to interested parties (including those persons identified by the trustee as having or claiming a direct ownership interest in farm produce delivered to the trustee, or a secured interest therein) conduct a hearing, at which all requests for abandonment of the proceeds of farm produce held by the trustee brought pursuant to the provisions of section 554 of this title shall be heard and determined. No request for abandonment of farm produce proceeds shall be considered which is not filed by a claimant with the the court at least five days before the commencement of the hearing: *Provided*, That the court may grant leave for the filing of a request after such time period upon a finding by the court of excusable neglect justifying delay. No such request may be considered by the court after the distribution of farm produce proceeds by the trustee which is provided for herein commences, except in cases where notice or actual knowledge of the pendency of the proceedings was not provided to a claimant due to fraud, negligence of the trustee, or other cause beyond the control of the claimant. The court shall order abandonment of the proceeds of farm produce held by the trustee, in the manner specified below, with respect to each claim of an affected creditor or other party in interest who establishes, to the court's satisfaction, that—

"(i) a quantity of farm produce sold by the trustee was held by the debtor as bailee only, without benefit of legal or equitable title, and that title to such produce was vested in the claimant; or

"(ii) a quantity of farm produce sold by the trustee which was determined to be part of the debtor's estate is (at the time of the hearing) of inconsequential value or is burdensome to the estate in consideration of a valid security interest existing therein in favor of the claimant.

"(B) Any claimant's production to the court of a valid storage facility receipt held by that claimant as evidence of ownership of a quantity of farm produce sold by the trustee shall be sufficient to establish a right to possession in such claimant of a share of the proceeds equal in value to the quantity, quality, and type of farm produce specified in such document. In any case where a claimant has placed the original of such document on deposit with any party as collateral for a loan, without assigning ownership interests in the farm produce over to such party, an affidavit from such party verifying ownership of such receipt by the claimant shall be sufficient to establish a prima facie claim of right to possession of proceeds in such claimant.

"(4) Within ninety days after the filing of the petition, the court shall direct the trustee to effect abandonment of the farm produce proceeds found to be subject thereto in accordance with subsection (a)(3) of this section, in the following manner:

"(A) With respect to claimants who have established to the court's satisfaction that the trustee sold farm produce as to which title lies in the claimant, the trustee shall apportion to each claimant out of the whole sum of farm produce proceeds held by the trustee that claimant's pro rata share (in comparison to the shares of like claimants) of the proceeds held by the trustee which are equivalent in value to the quantity, quality, and type of commodities which were originally delivered by such claimant, or the claimant's predecessor in title, to the debtor upon the contract of bailment. The value of such produce shall be calculated by reference to the price obtained for it at the time of sale. Distribution shall take place with respect to each of such claimants only after the deduction from such claimant's share of the proceeds of any commercially reasonable storage charge then due the debtor's estate from the particular claimant, plus any commercially reasonable charge for the expense of removing the particular claimant's farm produce from the storage facility.

"(B) With respect to claimants who have established to the court's satisfaction that the estate's interest in quantities of farm produce which (i) are part of the debtor's estate, and (ii) are subject to a security interest existing in favor of such claimants, is of inconsequential value or is burdensome to the estate by virtue of such security interest, the trustee shall next distribute from the remaining proceeds of the liquidation of farm produce required by subsection (a)(2) of this section, a share of such proceeds to each of such claimants according to the value of their secured interests in the farm produce sold, as the same may be entitled to under law. Distribution shall take place with respect to each of such claimants only after the deduction from such claimant's share of any commercially reasonable charge for the expense of removing the farm produce represented by the proceeds distributed to that claimant.

"(C) Distribution of farm produce proceeds which are ordered abandoned by the court, shall commence within twenty days of the entry of the orders of abandonment.

"(D) Expenses and compensation of the court or trustee incurred pursuant to the liquidation and abandonment of farm produce and proceeds thereof shall be paid, in conformity to the provisions of section 330 of this title, in the following manner:

"(i) first, out of the funds retained by the trustee for storage charges and produce delivery charges, to the extent feasible;

"(ii) second, out of accrued interest on farm produce proceeds, to the extent feasible; and

"(iii) third, out of the whole quantity of farm produce proceeds held by the trustee prior to distribution of such proceeds.

No other expenses of the court or trustees shall be deducted from farm produce proceeds.

"(E)(i) If, after satisfaction of the claims of those persons entitled to abandonment of the proceeds of farm produce held by the trustee, there be any remaining proceeds of farm produce held by the trustee, such unclaimed proceeds shall be retained by the court in an interest bearing account, for the benefit of any persons who may present an untimely claim of right to abandonment in accordance with subsection (a)(3)(A) of this section, for a period of one year from the date of the entry of the orders of abandonment. At the expiration of such period, such funds shall be distributed in accordance with section 726 of this title.

"(ii) The trustee may conduct such examination of the debtor or other persons as may be necessary for the purpose of determining the identity of any persons to whom have been assigned the rights of ownership to farm produce, legal or equital title to which does not exist in the debtor, as reflected by the books and records of such debtor and for which no claim has been made; and shall provide notice of the pendency of the action to any person who is so identified.

"(b) This section shall be applied by the court solely for the purpose of effectuating abandonment of farm produce which is not property of the estate, or is of inconsequential value to the estate, and shall not be construed to limit the right of any party to seek abandonment of any other property delivered over to the trustee in accordance with section 554 of this title.

"(c) Distribution of farm produce ordered abandoned by the court pursuant to this section shall not be delayed due to the pendency of any appeal from the orders of abandonment, except that a stay of orders entered pursuant to this section may be entered by the bankruptcy court under the following circumstances:

"(1) the party filing the request for stay, except for the United States, shall post a bond or other security in an amount equal to the amount of farm produce proceeds, distribution of which is affected by the requested stay; and

"(2) the parties entitled to distribution of farm produce proceeds under the terms of the abandonment orders affected by the stay shall, if successful in defending the appeal, be awarded their pro rata share of the proceeds of the liquidation; plus a sum equal to the difference in value between the awarded share and the highest intermediate value (between the date of the entry of the order of stay and the date of final distribution) of the produce sold which was owned by, or secured to, such parties; plus interest on the amount of the original award at the prevailing rate allowed by law upon judgments, with interest to accrue from the date of the entry of the order of stay. The interest payment, and differential payment, provided for herein shall both be satisfied out of the bond posted by the party requesting the stay, to the extent feasible. In the case of an appeal by the United States, it shall be satisfied out of accrued interest on the proceeds on deposit, to the extent feasible. The party or parties requesting such stay and prosecuting such appeal shall, if succesful on appeal, be entitled to interest at the prevailing rate allowed by law upon judgments upon any sum which the court may ultimately award, such interest to be calculated

from the date of the entry of the original order of abandonment appealed from.

"(d) Any order of stay entered by the bankruptcy court pursuant to subsection (c) of this section shall be immediately appealable as of right by any aggrieved party, to the district court for the division and district wherein the bankruptcy court exercises its jurisdiction; or, to a panel of bankruptcy judges as provided by section 405(c)(1) of title 28, United States Code, if the same has been ordered by the circuit council pursuant to such section. The appeal shall be perfected in accordance with the rules applicable to the prosecution of appeals under this title. The district court (or bankruptcy panel) shall rule upon the issue of whether or not the order of stay so entered is appropriate, in consideration of the provisions of rule 62 of the Federal Rules of Civil Procedure and the law applicable thereunder, within thirty days after the docketing of the appeal.

"(e) In any action brought pursuant to chapter 11 of this title, the provisions of this section shall govern the abandonment of farm produce held by the trustee or debtor in possession of a farm produce storage facility business for which reorganization is sought, which farm produce is not property of the debtor's estate but is held by the debtor upon a contract of bailment only. The abandonment of any quantity of such produce shall take place only upon the request of the owner thereof, and shall be done regardless of its effect upon any existing or proposed plan of reorganization.

"(f) The time limits set forth in this section may be extended by the court for good causes shown; however, the distribution of farm produce ordered abandoned by the court shall not be deferred beyond one hundred and forty days after the date of the filing of the petition, unless the court finds that—

"(1) the interests of justice so require in light of the complexity of the case; and

"(2) the interests of those claimants entitled to distribution upon their claims will not be materially injured by such additional delay.

"(g) In actions filed under this title in any State wherein an agency exists which operates under the supervision of that State's government, and which is charged with the responsibility for presiding over the liquidation of an insolvent farm produce storage facility licensed under the laws of such State, the bankruptcy court shall appoint the director of such State agency to act as co-trustee together with the private trustee, if any, appointed under this title; and such party shall perform the duties required of the trustee under this section until the completion of the distribution of the proceeds of farm produce required by this section: *Provided,* That such co-trustee shall not be relieved of its responsibilities before the orders of abandonment required to be entered under this section are made. Said co-trustee shall perform all duties required of the trustee under this section, but shall not be required to perform any duties of the trustee mandated by any other provisions of this title. Said co-trustee shall not recover any compensation out of the assets of the estate for the services performed under this section.

"(h) In actions filed under this title by a debtor in the business of operating a farm produce storage facility licensed under the United States Warehouse Act, the bankruptcy court shall appoint the Administrator of the Agricultural Marketing Service of the United States Department of Agriculture to act as co-trustee together with the private trustee, if any, appointed under this title; and such party shall perform the duties required of the trustee under this section until the completion of the distribution of the proceeds of farm produce required by this section: *Provided,* That such co-trustee shall not be relieved of its responsibilities before the orders of abandonment required to be entered under this section are made. Said co-trustee shall perform all duties required of the trustee under this section, but shall not be required to perform any duties of the trustee mandated by any other provisions of this title. Such co-trustee shall not recover any compensation out of the assets of the estate for the services performed under this section.".

SEC. 1118. (a) Chapter 10 of title 7, section 255, of the United States Code, is amended by inserting a comma after the word "storage", and by inserting the following language between the words "storage" and "in" thereof:

"marketing, handling, shipping, or other disposition"; such that the section, as amended, shall read as follows: "Any person who deposits agricultural products for storage, marketing, handling, shipping, or other disposition in a warehouse licensed under this chapter shall be deemed to have deposited the same subject to the terms of this chapter and the rules and regulations prescribed thereunder.".

(b) Chapter 10 of title 7, United States Code, is amended by adding after section 262 thereof the following:

"§ 262a. Statutory lien, pending payment for agricultural products sold to a warehouseman

"Any farmer (as defined in title 11, U.S.C. 101) who, having delivered agricultural products to a warehouseman licensed under this chapter upon a contract for sale, or having sold to such warehouseman products previously delivered upon a contract for storage, and who has not received the consideration agreed upon for the sale of said products from the warehouseman, shall have a lien against like products in the licensed facility in excess of that required to satisfy receipted or other storage obligations; against like products in transit for which payment has not been made to the warehouseman; and against unencumbered products held in other locations for the account of the warehouseman, or the proceeds from any of the foregoing, to the extent of the consideration agreed upon for the purchase of the product sold. Such lien shall attach at the time of the formation of the contract for sale and shall continue until the obligations of the warehouseman to the seller of the products are satisfied, or the expiration of sixty days, whichever is earlier.".

SEC. 1119. Section 1123 (a) (1) of title 11, United States Code, is amended by striking out "or 507(a)(6)" and inserting in lieu thereof "507(a)(5) or 507(a)(7)".

SEC. 1120. Section 1129(a)(9)(B) of title 11, United States Code, is amended by striking out "or 507(a)(5)" and inserting in lieu thereof "507(a)(5), or 507(a)(6)".

SEC. 1121. Section 1129(a)(9)(C) of title 11, United States Code, is amended by striking out "507(a)(6)" and inserting in lieu thereof "507(a)(7)".

SEC. 1122. Section 545 (2) is amended by striking the semicolon following the word "exists" and adding the following: ", except that this section shall not apply to a lien interest arising by virtue of the provisions of section 262a of title 7, United States Code;".

Mr. DOLE. Mr. President, let me state very briefly what this amendment does. It is an amendment that, as far as this Senator knows, is noncontroversial. At the same time, it is a very important amendment. What it does, Mr. President, is expedite the timetable for distribution of crops in the case of elevator bankruptcy. It has a statutory limit for farmers who have sold crops and have not received a payment for 60 days from date of sale.

Mr. President, my proposed amendment to S. 884 deals with farm produce storage facility bankruptcies. This amendment is drawn directly from the text of S. 1365, my bill designed to effect certain changes in bankruptcy law and procedure to alleviate the hardships created for farm producers, elevator financiers, and other segments of the agribusiness community by storage facility bankruptcies. The measures which are contained within this amendment are ones that I feel are essential to the continued economic security of the farm producers of this Nation, as farm communities throughout the Nation have been experiencing an increasing frequency of elevator failures.

S. 1365, from which this amendment is drawn, was the result of the inquiry of the Judiciary Subcommittee on the Courts into problems posed for the agricultural communities of our Nation by farm produce storage facility bankruptcies. Over the past few years, in a number of States of the central midwestern and southeastern parts of the United States, there has been a steady annual increase in the number of crop elevator insolvencies. Perhaps the most serious result of these bankruptcies has been that farm producers have, in most cases, been unable to obtain quick distribution of the crop assets they hold in storage in those defunct elevators. Farmers in Missouri, Kansas, Indiana, Iowa, Nebraska, Illinois, and Arkansas have seen thousands of bushels of grain, soybeans, and other cash crops tied up in bankruptcy courts under circumstances making it difficult, if not impossible, for those farmers to recover the crops, owned by them, which had been deposited with those elevators on storage contracts.

In response to this problem, hearings were held before the Subcommittee on Courts of the Judiciary Committee with the objective of examining what changes might be made in current bankruptcy law and procedure to expediate the abandonment of crops which are not part of the estate of a bankrupt elevator operator, as well as those secured to the extent of their market value, which have no equity value for the estate. Two days of hearings, at which abundant written and oral testimony was presented, and the research of judiciary committee staff elected the need for the changes in law and procedure which are embodied in S. 1365.

We had a number of witnesses, including the Secretary of Agriculture.

I suggest, Mr. President, that I believe that this amendment incorporates all of the provisions of S. 1365, the original bill I introduced. It has been modified by certain amendments to the language of that bill, which were requested by the Department of Agriculture and the Department of Justice.

Mr. President, the Senator from Kansas will not take the time now to detail the provisions of the amendment. A complete statement detailing the circumstances surrounding this legislation, the events that gave it impetus, and the various provisions and their effect on existing law and practice will be inserted in

the RECORD at the conclusion of my remarks.

In essence, the bill provides for an expedited abandonment procedure for crop assets held by an insolvent elevator operator; it provides for the granting of a statutory lien to farm producers on crops delivered to a federally licensed warehouse upon a sales contact for which the producer has not been paid; and it grants a priority position to farm producers in any distribution of assets to unsecured creditors, where those producers have, even after distribution, still suffered a loss due to shortage of crop assets on hand. It would also bring the State and Federal agencies who have statutory responsibility for supervising the liquidation of insolvent elevators into bankruptcy proceedings to act as cotrustee in directing the liquidation of farm produce and distribution of assets, thus ending conflicts in jurisdiction between bankruptcy courts and those agencies.

The amendment I offer today incorporates all of the provisions of S. 1365, as modified by certain amendments to the language of that bill which were requested by the Departments of Agriculture and Justice. Those changes which have been made from the original text of the bill are primarily technical in nature, clarifying ambiguous language and correcting cross-sectional references. The thrust and impact of the legislation has not changed, and the incorporation of this amendment into the body of S. 884 would be a solid statement of support in the U.S. Senate for the farmers of this Nation.

This legislation has received strong backing from many segments of the agribusiness community who see it as fundamentally important to the economic health of farm producers in our society who are adversely affected by an elevator insolvency. The list of organizations which stand behind it include the National Governor's Conference, the Grange, the American Farm Bureau, the Mid-Continent Farmers Association, the U.S. Department of Agriculture, and State departments of agriculture from throughout the Midwest—Iowa, Illinois, Nebraska, Kansas, Missouri, and I think a number of others I have not had time to contact.

Thus, I have no qualms in stating that the passage of this amendment by the Senate would be welcomed by a broad spectrum of the agribusiness community as well as those governmental agencies at the national and State level who must struggle with the problems created by elevator failures.

Mr. President, the only concerns which have been expressed to me about the content of our final legislation as contained in this amendment relate to, first, the statutory lien created for farmers; and second, the requirement in this legislation that the trustee in bankruptcy liquidate crop assets and distribute the proceeds of those assets to the farmers and other owners of grain. With respect to the first matter, I call attention to the final language of the statutory lien section, which limits that lien to a period of 60 days from the date the contract for sale is formed.

This limitation was placed upon the lien after suggestions received by banking groups that there be a time limitation imposed. Some have expressed concern that this provision might inhibit the financing flexibility of smaller elevators; however, I am of the opinion, after exploring this issue with a number of persons who are directly involved in the elevator-financing end of the business, that it will result in a more careful analysis, by the lending institutions in the field, of the financial stability of local elevators.

Further, the fact that the lien is for a limited duration means that a financing bank need only conduct an examination of the books of the elevator to determine the amount of produce purchases for the preceding 60 days and discount any loan by an equivalent amount to protect its position.

On the matter of liquidation, I note that every agency with which my staff has had discussions concerning the problems of distribution has emphasized the importance—and efficiency—of following the practice of straight liquidation of farm produce and distribution of the proceeds thereof, rather than attempting to distribute crops in kind.

Some farmers insist that they ought to go back and just get their crop, but after considerable discussions and hearings, we believe it is much better to distribute the proceeds rather than the corp itself.

There are four reasons for this: First, the problems of shrinkage and spoilage would require that an insolvent elevator be emptied and reloaded to accurately assess the quantity and quality of produce on hand; second, the inevitable administrative problems that will result when some owners request distribution in kind, while others request distribution in cash; third, the problem of protecting the security and quality of produce which is held by the trustee pending any appeal of abandonment orders. That is because most of the elevators are defunct and there is not much security; and fourth, the increased administrative costs which result from these problems.

Mr. President, my legislation avoids all of these problems by requiring liquidation of the crop assets at the outset of any bankruptcy proceedings. And there are advantages for the farm producer: First, the value of his produce is not diminished by spoilage or theft, as is often the case under present procedure, where the produce sits untended in a warehouse for months or years on end; second, in the event of an unsuccessful appeal of abandonment orders—where a stay on distribution of proceeds is ordered by the bankruptcy court—the owner of grain who is entitled to distribution gets his share with interest, plus the difference between his original share value as liquidated, and any higher intermediate price which that share would have obtained on the open market during the pendency of the appeal.

Under the procedure incorporated in my amendment, the farmer can take his cash distribution and—within a day of final distribution—repurchase his position in the crop if he believes market conditions warrant it.

For these reasons, Mr. President, I submit that this legislation is more than adequate to protect the interests of grain owners caught in the web of an elevator bankruptcy.

It seems to me, Mr. President, these are matters, that should be addressed. I think we have satisfied the concerns, hopefully, of not only the farm community, but also, the banking community and others who have raised questions about this legislation. It is my hope that this amendment might be accepted by the chairman.

Mr. President, I ask unanimous consent to have printed in the RECORD a detailed section-by-section analysis of the amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

III. PROVISIONS OF S. 1365: SUMMARY AND SECTIONAL ANALYSIS

A. SUMMARY

The bill reported by the Committee contains provisions which respond to the problems identified by witnesses as areas of primary concern in six principal ways, as detailed below:

(1) The bill creates a statutorily mandated timetable to govern abandonment of farm produce in a bankruptcy filed by a debtor operating a farm produce storage facility, which timetable would require abandonment of bailed grain and grain secured to the extent of its market value within 110 days of the filing of the bankruptcy petition (except in cases posing unusually complex issues);

(2) The bill creates a two-tiered method of distribution of crop assets required to be abandoned under provisions of the bankruptcy code which is designed to protect persons who have delivered crop assets to the debtor upon a bailment contract from having their property interest diminished for the benefit of creditors holding a security interest in crop assets owned by the debtor;

(3) The bill contains measures requiring the appointment of state or federal agencies charged with the responsibility of liquidating farm produce storage facilities as interim trustee to supervise the liquidation of crops on hand in a bankrupt storage facility;

(4) The bill contains measures requiring the bankruptcy court to accept valid warehouse receipts and scale tickets (designated as storage facility receipts in the bill reported) as proof of ownership of crop assets possessed by the debtor upon contracts of bailment;

(5) The bill creates a statutory lien in favor of farm producers who have sold farm produce to a bankruptcy facility but who have not received payment for such produce, which lien extends from the date of the contract for sale for a period of sixty days under the bill as reported;

(6) The bill incorporates measures which would act to prohibit an involuntary bailment of crop assets owned by third parties to a farm produce storage facility which is the subject of reorganization proceedings under Chapter 11 of title 11, U.S.C.; and

(7) The bill grants farm producers a priority position in the distribution of assets of the bankrupt to general, unsecured creditors when those farm producers have suffered a loss as a result of sale or conversion of farm produce to or by a debtor operating a storage facility, after trustee and court expenses, wages of employees, and pension plan payments.

The bill contains additional sections which are designed to inhibit frivolous appeals of abandonment orders, and eliminate the possibility of a debtor engaged in the business of operating a storage facility seeking adjustment of the debts of that business in wage-earner proceedings under Chapter 13 of Title

11, U.S.C.; as well as certain definitional and technical amendments.

B. SECTIONAL ANALYSIS

The amendments contained in sections one through six, and eight through ten of this bill are amendments to Title I of the Bankruptcy Reform Act of 1978, public law 95–598 (Title II, U.S.C.). In these sections, all section and subsection references are to title I the Reform Act, unless otherwise indicated.

Section seven of this bill amends Chapter 10 of Title 7 of the U.S. Code, 39 Stat. 488 et seq.

Section 1. Provides for definition of terms used in this bill, by addition of definitional sections to S. 101 of Title 11.

Subs. (1)(19). Defines "farm produce" to include all crops (from whatever source), poultry, livestock, and dairy products in an "unmanufactured state." The term "unmanufactured state" is intended to be broadly construed so as to encompass produce which, although initially subjected to a refinement process of some type by the producer thereof for such purposes as preservation, elimination of impurities, or similar processing steps necessary to the preparation of the produce for sale or storage, nevertheless retains its character as the result of the production effort in bulk form. The term is intended to include such items as milk, cheese, honey, and fruit produce.

Subs. (1)(20). Defines "farm produce storage facility" to include business entities which either store farm produce on bailment contracts, and/or purchase it in bulk quantities from persons engaged in farming operations.

Subs. (2) Technical amendment, renumbering affected sections.

Subs. (3)(43). Defines "storage facility receipt" to include any document of the type routinely issued by the operator of a farm produce storage facility as evidence of ownership of farm produce stored in a bankrupt facility. The term includes, but is not limited to, documents known as "warehouse receipts", "scale tickets", or other similar designations provided they are issued for the purpose indicated. It is intended that resolution of the question of the purpose for which the document was issued be accomplished by reference to state or federal law (whichever is applicable), usages of trade, and the nature of the contract between the parties. It is intended only that the identity of the original bailor be required to be recorded on the face of the document, so as to facilitate verification.

Section 2. Amends title 11, U.S.C. S. 109(e) to prohibit a debtor operating a farm produce storage facility from seeking to schedule the debts of that business in a Chapter 13 wage-earner proceeding under Title 11. The intent is to confine relief for a debtor operating a farm produce storage facility to that available under the provisions of Chapters 7 and 11, so as to avoid unnecessary disruption to agricultural communities occasioned by unduly lenient wage-earner plans.

Section 3. Technical amendment, renumbering affected sections.

Section 4. Technical amendment, renumbering affected sections.

Section 5(1). Amends S. 507(a)(5) of Title II to substitute new language for the section. The new language creates a priority in the distribution of assets to general, unsecured creditors, in favor of farm producers who suffer loss pursuant to the sale or conversion of farm produce to or by a debtor engaged in the business of operating a farm produce storage facility. Together with the amendments made by S. 5(2) and (3) of the bill, this section restructures the distribution of assets to such creditors so as to allow farm producers to participate in priority distribution after those distributions made from trustee and court expenses, wages and pension plans, and before distributions made to individuals on account of the deposit of money in connection with the purchase, lease, or rental of property or the purchase of services not delivered or provided. Thus, the priorities contained in the present sections 507(a)(5) and (a)(6) are subordinated to the new priority, and the present section 507(a)(5) and (a)(6) are renumbered as (a)(6) and (a)(7) by sections 5(2) and 5(3) of the reported bill.

The priority so created is a new one which is designed to enhance the other protections afforded under this bill to farm producers in an effort to cushion them from the threat posed to their economic viability by a farm produce storage facility bankruptcy. The farmer is viewed as a unique producer, whose financial security is threatened by such a bankruptcy in the same manner that a wage-earner is threatened by the unexpected bankruptcy of his employer, in that the farmer's main source of income—the cash crop—is jeopardized. In this respect, the rationale for the priority created by section 5(1) is analogous to that supporting the priority in favor of wage-earners.

Subsection (2) Technical amendment, renumbering affected section as detailed above.

Subsection (3) Technical amendment, renumbering affected section as detailed above.

Section 6. Amends Title II to add a new section 555, styled "Expedited Abandonment of Farm Produce". The provisions of the new section are detailed below:

Section 555, subsection (a). This section directs the Court to apply the procedures set forth in section 555 to govern abandonment of farm produce deposited with a debtor operating a produce storage facility, the assets of which are the subject of bankruptcy proceedings.

Subsection (a)(1)(A). This section requires that the Court, within ten days after the filing of the petition in bankruptcy, direct the trustee to conduct an examination of the debtor and the debtor's records to determine those individuals who claim or may claim ownership of farm produce delivered to the trustee by the debtor upon any of the following bases:

(1) Having retained title to produce stored with the debtor upon bailment contracts;

(2) Having purchased produce owned by the debtor which is then bailed to the debtor for storage purposes;

(3) Having taken assignment of, or title by judgment to, the debtor's interest in produce owned by the debtor;

(4) Having taken assignment of the ownership interests of any of these parties.

Subs. (a)(1)(B). This section requires the trustee to identify those creditors of the debtor who hold a security interest in farm produce owned by the debtor and delivered over to the trustee.

Sub. (a)(2). This section requires the trustee to conduct an audit of the physical assets of the farm produce storage facility within thirty days of the filing of the petition in bankruptcy in order to determine the exact quantity, quality, and type of farm produce delivered to the trustee. The trustee must then sell the farm produce for its then current fair market value, and deposit the proceeds in an interest bearing account. The liquidation mandated herein is analogous to that permitted by section 363(f) of the bankruptcy code, when ownership of property which is arguably part of the bankruptcy estate is disputed. This section is intended to be a grant of authority to the bankruptcy court to liquidate such property.

Subs. (a)(3)(A). This section requires that within 60 days of the filing of the petition in bankruptcy, and after appropriate notice, the Court must conduct a hearing, at which all requests for abandonment brought pursuant to the provisions of S. 554 of Title 11 shall be ruled upon. Requests must be filed at least five days before the commencement of abandonment hearings. Provision is made for extension of this time limit in cases where actual or constructive notice is not provided. At the conclusion of the hearings, the court must then abandon that portion of the proceeds of liquidated farm produce which represent produce that was 1) not property of the estate, or 2) although property of the estate, was of inconsequential value to the estate due to the existence of outstanding liens against it.

Subs. (a)(3)(B). This section requires the Court to accept valid storage facility receipts (as defined by section 1) held by a claimant as evidence of ownership of a quantity of farm produce delivered over to the trustee as conclusive proof of entitlement in that claimant to receive that quantity of proceeds which represent the quantity, quality, and type of farm produce specified in the receipt as having been held by the debtor upon a contract of bailment. It is intended that the determination of whether or not the documents in question are held as "evidence of ownership" be made with reference to state or federal law (whichver is applicable), usages of trade, and the nature of the contract between the parties.

This section also provides for proof of ownership in cases where the storage facility receipt has been placed by the owner on deposit with a creditor as security for a loan without assignment of the ownership interests therein.

It is intended, that where the original owner of produce has assigned documents of ownership to a third party as collateral for a loan, with the intent to transfer title and possession thereto, that that third party take part in the abandonment proceedings in place of the original bailor.

Subs. (a)(4). This section requires that the Court order abandonment of proceeds found to be subject thereto within ninety days of the filing of the petition in bankruptcy, in accordance with the requirements of the following sections.

Subs. (a)(4)(A). Provides for pro rata distribution of proceeds among claimants asserting ownership interests in farm produce delivered by the debtor to the trustee. The value of each claimant's share of the proceeds is to be determined by reference to the price obtained for the produce owned by that claimant at the time of liquidation. Storage charges, out-elevator charges, and trustee expenses assessed in accordance with section (a)(4)(D) are to be deducted first. It is intended that distribution of all proceeds to those claiming ownership interests take place if such distribution is necessary to satisfy such claims.

Subs. (a)(4)(B). Provides for pro rata distribution of remaining proceeds to creditors holding a security interest in farm produce owned by the debtor, in like manner as the distribution to claimants asserting ownership interests.

Subs. (a)(4)(C). This section requires the abandonment of farm produce proceeds to commence in accord with the orders of the Court within twenty days from the date of the issuance of the abandonment orders.

Subs. (a)(4)(D). Provides for the satisfaction of trustee expenses of the liquidation of farm produce in a manner designed to minimize diminishment of the distribution shares in abandonment. Expenses are to be taken, first, out of storage and out-elevator charges assessed against the individual shares; second, out of accumulated interest on the proceeds; and third, out of the whole sum of remaining proceeds to be distributed, prior to the distribution. It is intended, and specifically mandated in this section, that no other Court or trustee expenses are to be deducted from produce proceeds,

save those of the liquidation and distribution process itself.

Subs. (a)(4)(E). This section requires the trustee to hold any unclaimed produce proceeds in trust for a period of one year for the satisfaction of such untimely claims as may be allowed.

Subs. (b). Clarifying amendment. This section expresses Congressional intent that the new Section 555 is not intended to infringe upon any party's right to abandonment of other property of the estate pursuant to section 554 of the Bankruptcy Code.

Subs. (c). This section is intended to discourage frivolous appeal of abandonment orders and resultant stays by requiring the posting of an appeal bond in an amount equal to the amount of proceeds affected by a requested stay, and by providing for award of interest, plus a sum representing the difference between the sale price of the produce (proceeds of which are affected by the stay) at the time of liquidation and the highest intermediate value of that produce (between the date of the stay and the date of ultimate distribution) to a party successfully defending an appeal of bankruptcy orders.

Subs. (d). This section provides that orders of stay are immediately appealable by an aggrieved party, with a threshold determination to be made by the appropriate District Court as to likelihood of the appellant's prevailing upon the merits where a stay of abandonment orders has been entered by the bankruptcy court. If such showing is not made to the satisfaction of the District Court, the orders of stay are to be vacated, although the appeal may continue.

Subs. (e). This section delimits the scope of section 555 in reorganization proceedings under Chapter 11. In such a case, the section shall be applied to effect abandonment of farm produce owned by a third party and held by the debtor upon a contract of bailment. Such abandonment shall take place only upon the request of the owner thereof, but shall be done thereon regardless of its effect upon any proposed or existent plan of reorganization. The purpose of this section is to prevent an involuntary bailment from occurring during the pendency of any plan under Chapter 11.

Subs. (f). This section provides for expansion of the time limits set in section 555 if the Court makes certain findings with respect to necessity for the extension and lack of material injury to the interests of claimants. It is intended that this section be narrowly construed and applied so as to discourage extensions of the time limits mandated in section 555 except where absolutely necessary to afford equity to claimants.

Subs. (g) and (h). These sections provide for the appointment of the federal and state regulatory entities specified as interim trustee in cases involving their jurisdiction. It is intended that the agency, if any, so appointed will perform all functions of the trustee during the pendency of the interim trusteeship. No fees or expenses shall be allowed to such trustee for services performed incident to the liquidation and distribution of farm produce proceeds; however, it is contemplated that the interim trustee may apply to the court for expenses and fees incurred pursuant to representing the estate in other matters. The purpose of the section is to reconcile the problem of conflicting jurisdiction which has arisen in certain cases between the federal bankruptcy court and the state regulatory agencies which are charged under state law with the responsibility of supervising the liquidation of an insolvent farm produce storage facility, as well as to bring the liquidation expertise of the federal and state agencies into the bankruptcy proceedings in order that the abandonment of farm produce proceeds be conducted as rapidly and efficaciously as possible.

It is further intended that the court will appoint the Administrator of the Agriculture Marketing Service to act as interim trustee in any case involving a federally licensed storage facility, even though the facility be located in a state that maintains a local regulatory agency which has responsibility for liquidations.

Section 7.

Sub. (a). Amens 7 U.S.C. s. 255 (Chapter 10 of the U.S. Warehouse Act) to clarify the authority of the Secretary of Agriculture to require that all federally licensed warehouse operations be conducted in accordance with, and subject to, U.S. law and regulations. The section provides that any party who deposits agricultural products for storage, marketing, handling, shipping, or other disposition in a federally licensed warehouse is deemed to have deposited the same subject to the terms of the chapter and any rules and regulations prescribed thereunder.

Subs. (b). This section creates a statutory lien in favor of farm producers who sell produce to a facility but have not received payment therefor, to extend for a maximum period of 60 days from the date of the contract of sale. The purpose of this section is to provide farm producers (as defined in Title 11) with secured creditor status for a limited period after sale of produce to a storage facility, so that they may share in the distribution of produce assets as a secured creditor if the facility files a petition in bankruptcy before the farm producer has had opportunity to secure his position through alternative arrangements, such as a third party guarantee (in the case of deferred pricing or payment contracts) or before he has received the immediate payment agreed upon due to insufficient funds available to the debtor prior to bankruptcy.

Sections 8, 9, 10: These sections are minor, technical amendments renumbering cross references within Title 11.

GRAIN WAREHOUSE BANKRUPTCY AMENDMENT

● Mr. DANFORTH. Mr. President, ruinous hardship can result from a grain elevator bankruptcy.

The farmer who has faced down the escalating costs of seed, fertilizer, machinery, and other supplies; who has survived the uncertainty of weather and market prices; who has invested in the harvest and transport of his crop to storage; who depends on the sale of his product to finance the next season's production—this farmer should not have to see his crop tied up for years in litigation or, worse yet, sold to satisfy other creditors if the warehouse in which it is stored goes bankrupt.

Yet, under present bankruptcy law, the farmer can find himself in precisely this fix: Deprived of the fruits of his labor, through no fault of his own, at the very moment that his need for cash is most pressing.

Missourians are all too familiar with the troubles that can occur under current law. The colossal failure of the Ristine elevator near New Madrid threw a harsh spotlight on its shortcomings.

Although very few grain elevators ever go bankrupt, I am advised that in Missouri alone more than $7 million in unsettled claims remain on the books; some of these claims date from 1975.

This amendment would address the shortcomings of current law. When introduced as S. 1365, this measure represented a revision of the measure amending the Bankruptcy Act introduced by Senator DOLE and myself on March 31. On July 27, the measure was favorably reported by the Judiciary Committee.

In its essence, our amendment would accomplish three things. First, it would enable producers with crops in storage to establish title to the grain quickly, thus giving them a position from which to protect their assets. Second, the measure would establish strict timetables and methods for the distribution of assets. Finally, farmers would be in a more favorable position to secure their share of the assets than provided under present law.

I commend Senator DOLE for his hard work in fashioning the necessarily complex provisions of this amendment and for his able handling of the bill in the Judiciary Committee.

I strongly urge the passage of this grain warehouse bankruptcy measure. There are too many farmers in Missouri and other States who have been forced—through no fault of their own—to learn that justice delayed can be justice denied.●

Mr. GORTON. Mr. President, will the Senator from Kansas yield for a question?

Mr. DOLE. Yes, Mr. President.

Mr. GORTON. This sounds very much like the bill which he asked this Senator to cosponsor. First, does this amendment apply to grain owned by the CCC as well as grain owned by individuals?

Mr. DOLE. It does.

Mr. GORTON. Next, does it apply where a warehouse has filed for, say, a chapter 11 reorganization as opposed to liquidation?

Mr. DOLE. It does, yes.

Mr. GORTON. Third, how does this amendment relate to the amendment which has been circulated in this body proposed by Senator EAGLETON?

Mr. DOLE. As I understand, Senator EAGLETON has a different approach. I am not certain how it relates. But we believe this addresses the problem.

I am now reminded that the Eagleton provision would permit the Secretary to buy out the proceeds and make a distribution. That amendment is not supported by the administration. We believe this amendment will address the concerns farmers have.

Mr. GORTON. So, in one sense, the Senator regards this as a superior alternative to Senator Eagleton's proposal?

Mr. DOLE. Yes; I certainly share the concern of the Senator from Missouri (Mr. EAGLETON). This problem has arisen recently in the State of Missouri. It is being addressed by a number of Members in the House. The problem there is that the Judiciary Committee has not been indicating any interest in the legislation. It is our hope that if we can make it part of the farm bill, it will be better understood by the House Agriculture Committee. We believe that what I am offering today will be supported by the House Agriculture Committee and by the House itself.

Mr. GORTON. I thank the Senator.

Mr. PRESSLER. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. PRESSLER. I thank the Senator from Kansas.

Mr. President, I have testified at hearings with respect to this measure and I have been a cosponsor from day 1. It

is a necessary reform in our part of the Nation, and the case for it has been well made by the Senator from Kansas.

The problem is that there are occasions when farmers are caught without being able to receive payment for their grain, through no fault of their own, and this measure will help protect those farmers.

A few years ago, we had a similar situation with certain payments regarding livestock purchased in many of our States, and the Federal Government took care of that matter with legislation.

I am happy to be an original cosponsor of this measure as my remarks on this matter before Senator DOLE's committee indicate. I commend the Senator from Kansas for his leadership in this area.

Mr. DOLE. Mr. President, there are a number of cosponsors of the original bill who should be added to this amendment, unless they object: The Senator from Washington (Mr. GORTON), both Senators from Iowa (Mr. GRASSLEY and Mr. JEPSEN), the Senator from Missouri (Mr. DANFORTH), the Senator from Kansas (Mrs. KASSEBAUM). Senator PRESSLER has been added as a cosponsor.

Mr. GRASSLEY. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. GRASSLEY. I thank the Senator from Kansas for making this move at this time.

I am sure the Senator from Kansas regrets, as I would if I were in his position, that this should have to be tacked onto this measure, but it is such an important measure that it should ride along with the farm bill, particularly considering the fact that the other body is not willing to give it the consideration the economic conditions dictate it should have.

I say to those who sometimes might question the need for this sort of procedure, particularly considering the fact that we have a farm bill and we are concerned about maintaining the income levels of people, that it is one thing to be concerned about the income levels when prices are low or high, but it is another thing when you have worked hard and expect a profit and do not get anything from your crop because of the way the judges interpret our bankruptcy laws.

The farmers are entitled to this minimum protection so that they do get some return on their investments. This will go a long way toward guaranteeing that.

Mr. President, I have studied the amendment that Senator DOLE has submitted to revise the bankruptcy law with respect to the treatment of farmers who have grain tied up in insolvent grain elevators. I have further examined the amendments to the original bill and find that they will, indeed, facilitate the distribution of grain in an equitable fashion. I commend the Senator from Kansas on his persistence and dedication in resolving this burden on the farm sector.

I am particularly interested in section 7 which would grant a statutory lien on bankrupt elevators. This section would correct an inadequacy in the present Federal Warehouse Act by protecting farmers who have sold their grain to an elevator but had not been paid in full prior to its bankruptcy.

One change offered by the revised grain elevator bankruptcy bill which should be noted, is that the class of parties who would share in the first-tier distribution of farm produce proceeds has been expanded to include all owners of grain in the bankrupt elevator. Parties who possess a security interest only in grain assets of the elevator would still have their claims subordinated to the actual owners of the grain. This revised provision injects an increased sense of confidence in the collateral banking scheme. Banks have heretofore been wary of looking upon stored grain as collateral, lest some intervening factor extinguish what was never even regarded as a secured lien. Section 7 of this bill remedies that omission.

The grain in a bankrupt elevator is generally the sole marketable asset of the farmer's operation. By tying up this asset, the entire farm operation is jeopardized. At a time when a depressed farm economy is nothing new, we must do what we can to make certain that outside forces, beyond the control of the farmer, do not force him off the farm.

Mr. President, we must mitigate the effect of elevator bankruptcies on farmers. I am pleased to add my vote in support of an amendment that eliminates some of the great instability in the farm sector.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. RANDOLPH. Mr. President, I am interested in the amendment offered by the Senator from Kansas (Mr. DOLE). I understand its validity, and I feel that the growing number of crop elevator bankruptcies may eventually cause a disruption in food crop processing. I have not entered into the debate in connection with the subject matter, except to say that there are certain protections which we must never forget, which are in the best interests of all the people of the United States, if we think in terms of those who produce the products of the farm, which go into the strength not only of bodies—of the workers of this country and men and women generally—but also that segment of our society which in some ways has had a deterioration for many reasons throughout recent years.

"The doctor heals and the lawyer pleads and the miner follows precious leads. But this or that, what-e'er befall, the farmer, he must feed them all."

We must remember that. For that reason, although I am not asked to be a cosponsor of the amendment, I am continuously concerned about the problems that the agribusiness community are confronted with. I wish to be included as a cosponsor of the amendment.

I thank the distinguished Senator from Kansas for yielding.

Mr. DOLE. I thank the distinguished Senator. I am honored to have the Senator as a cosponsor because of the concern he has just stated. I believe it is a sound piece of legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, this amendment would alter the present bankruptcy laws to provide explicit mechanisms for handling grain elevator bankruptcies. Legislation on this matter (S. 1365) was initially introduced by my distinguished colleague, Senator DOLE, and referred to the Senate Judiciary Committee.

The Subcommittee on Courts of the Senate Judiciary Committee held hearings on this matter. During the course of these hearings, the committee discovered that substantial delays occurred in the release of farmers' stored grain from bankrupt elevators. The committee also learned that substantial jurisdictional conflicts were occurring between the Federal bankruptcy courts and the State authorities charged with the liquidation of insolvent grain storage facilities. Further, the committee discovered that some bankruptcy courts were reluctant to accept warehouse receipts and scale tickets as sufficient proof of ownership.

This amendment will clarify these and other issues for the benefit of all concerned. I am informed that S. 1365 has the support of USDA and the unanimous support of the members of the Senate Judiciary Committee.

Mr. President, I feel this amendment, will be beneficial to farmers and to the general public. Therefore, I am willing to accept the amendment and urge its adoption.

Mr. President, I make this inquiry of the distinguished Senator from Kentucky, the able ranking member of the committee: I note that Senator EAGLETON has an amendment addressing the same subject. Would he wish to delay a vote on this question?

Mr. HUDDLESTON. I ask that the Senator delay action on this matter until Senator EAGLETON has had an opportunity to come to the floor, inasmuch as he does have an amendment addressing this problem. It may be that they can be worked together.

I see that the Senator is in the Chamber now, and I will give him an opportunity to address the issue.

Mr. EAGLETON. I thank Senator HUDDLESTON, Senator HELMS, and Senator DOLE.

Mr. President, I do have an amendment which is on the same general topic. Senator DOLE, however, is not in full accord with my amendment; so I suggest that after the Dole amendment is disposed of, I call up my amendment and we dispose then of my amendment one way or the other.

Senator DOLE is not willing to accept my amendment because he has a genuine disagreement on it, and that is fully understandable. So why do we not dispose of the Dole amendment? Then I will call up my amendment. Will that be permissible?

Mr. DOLE. May I first offer another amendment which I believe will be accepted?

Mr. EAGLETON. Yes.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Kansas.

The amendment (UP No. 368) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas.

UP AMENDMENT NO. 369

(Purpose: To repeal provisions of law relating to wheat certificate requirements for processors and exporters)

Mr. DOLE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 369.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 150, strike out line 9 and insert in lieu thereof the following: "REPEAL OF WHEAT CERTIFICATE PROVISIONS".

On page 150, beginning with "shall" in line 13, strike out all down through line 15 and insert in lieu thereof the following: "are repealed.".

Mr. DOLE. Mr. President, this is a technical amendment to repeal the wheat certificate tax which has been suspended since 1973.

Mr. President, sections 379D, 379E, 379F, 379G, 379H, 379I, and 379J of the Agricultural Adjustment Act of 1938 dealing with the wheat certificate tax serve only to complicate permanent legislation and should be repealed.

Section 379D defines conditions under which marketing certificates can be transferred and establishes who is required to purchase them and how they are to be used.

Section 379E authorizes the CCC to administer the program and sets certificate price levels.

Section 379F authorizes the Secretary to establish conversion factors for wheat used in food products.

Section 379G provides authorities to help the Secretary facilitate transition to the program.

Section 397H authorizes the Secretary to require reports from processors.

Section 379I establishes penalties for violations of these provisions.

Section 379J authorizes the Secretary to issue regulations as may be necessary to implement the program.

On the wake of the largest tax cut in our Nation's history, now is a particularly appropriate time to strike this antiquated tax from permanent legislation.

The wheat certificate tax was established in 1964 as a means of financing the Government's wheat support program. Processors were assessed a 75-cent-per-bushel tax on wheat for domestic use and export. The revenue received, in turn, was forwarded to farmers in the form of a domestic price support.

Mr. President, at the time this tax was implemented the Federal Government was directly involved in farmers' planting and marketing decisions. Rigid marketing quotas, allotments, and certificates were the order of the day.

Today, the farm policies are designed with the intention that farmers will be able to sell their products on the world market for a fair price.

Clearly, a policy which taxes processors as a means of financing producer price supports has no place in today's market-oriented farm policies.

Further, Mr. President, this amendment will complement Agriculture Secretary Block's efforts to simplify our agricultural programs. Although permanent agricultural legislation is necessarily complicated, the continual proliferation of new statutes without repealing those which were once useful, and are now archaic, has unduly resulted in a largely indecipherable melange of current and obsolete policies. Detangling this dizzying legislative labyrinth is clearly a worthy and necessary effort.

The amendment I am offering today eliminates only the wheat certificate tax; it does not disrupt the wheat certificate program. It is useful to retain the certificate program's authorizing legislation, should future needs dictate its reimplementation.

However, the time for the wheat certificate tax has passed by the wayside, permanently. I cannot conceive any possible chain of events which would prompt Congress to implement a policy that requires processors to serve as Government agents and collect a Government price support fee which increases their production costs.

Mr. President, it is time that we moved to simplify permanent agricultural legislation and repeal this tax from a bygone era.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the pending amendment be laid aside temporarily while we handle an amendment to be proposed by the distinguished Senator from Montana.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Kansas will be temporarily set aside.

The Senator from Montana is now recognized.

UP AMENDMENT NO. 370

(Purpose: To make it unlawful to offer for sale or advertise protected seed when it is not certified by a State agency)

Mr. MELCHER. Mr. President, I have an amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 370.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, after line 17, add a new section as follows:

Section 501 of the Federal Seed Act is amended to read as follows:

"SEC. 501. It shall be unlawful in the United States or in interstate or foreign commerce, to sell or offer for sale or advertise by variety name, seed not certified by an official seed certifying agency, when it is a variety for which a certificate of plant variety protection, under the Plant Variety Protection Act specifies sale only as a class of certified seed: *Provided*, That seed from a certified lot may be labeled as to variety name when used in a mixture by, or with the approval of, the owners of the variety."

Mr. MELCHER. Mr. President, this is an amendment to the Federal Seed Act.

Plant variety protection provides the owner of a variety of a sexually produced plant with patent rights on that variety in order to provide the owners an economic return for research and development costs.

"Certified seed" means seed which has been determined by an official seed certifying agency to conform to standards of genetic purity and identity as to variety. These standards have been approved by the U.S. Department of Agriculture. The primary purpose of seed certification is to maintain genetic purity and varietal identity.

The owner of a variety protected under the Plant Variety Protection Act has the option of having his plant variety and protection certificate specify that his variety can be sold only as a class of certified seed.

Seed which has been certified in this manner has the status of "quality seed." Many small seed companies exercise this option because the certification label of quality helps sell their product. In many States, as much as 70 percent of the seed sold is certified.

Currently, section 5 of the Federal Seed Act makes it an unlawful act to sell protected seed when it is not certified by a State agency. My amendment would also make it unlawful to offer for sale or advertise such seed. It is very difficult for a State seed control official to be present when a sale is made, but he can monitor what is offered for sale, and those products that are advertised. My amendment would assure that seed of protected varieties would be marketed in a more orderly manner.

I point out to the Senate that I do not believe there is any objection at all whatsoever to this amendment. I hope it can be adopted.

Mr. HELMS. Mr. President, I am pleased to see that the Senator from Montana is offering this amendment.

I believe it is a noncontroversial proposal, and would simply help make the

marketing of certified seed a more orderly process. Current law prohibits the sale by variety name of noncertified seed if it is a variety for which a certificate of plant variety protection specifies sale only as a class of certified seed. This amendment merely extends that restriction to cover offering for sale and advertising noncertified seed by a variety name.

I understand that the Department has no problems with this amendment, though it may wish in the future to make more substantial revisions in the Federal Seed Act and Plant Variety Protection Act. Until such time as the Department develops those revisions, the amendment Senator MELCHER is now offering should be of assistance to those involved in the production and sale of certified seed.

Mr. President, I am certainly willing to accept this amendment.

Mr. HUDDLESTON. We have no objection on this side of the aisle.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

The amendment (UP No. 370) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MELCHER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 369

The PRESIDING OFFICER. The question reoccurs on the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, while we are in the process of discussing that amendment some have raised some questions about the amendment. I ask that the amendment be withdrawn.

The PRESIDING OFFICER. The amendment is withdrawn.

AMENDMENT NO. 105

(Purpose: To establish a section 22 quota on the importation of casein products into the United States)

Mr. PRESSLER. Mr. President, I call up amendment No. 105 on behalf of myself and the Senator from Wisconsin (Mr. KASTEN).

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER), for himself and Mr. Kasten, proposes an amendment numbered 105.

Mr. PRESSLER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

IMPORT LIMITATION ON CASEIN PRODUCTS

SEC. 1112. (a) Congress finds that milk protein products, including but not limited to casein, caseinates, lactalbumin, and whey protein concentrates or mixtures containing 5 per centum or more of these products, are being imported into the United States in such quantities as to render or tend to render ineffective, or materially interfere with, the dairy price support program conducted by the Secretary of Agriculture under the Agricultural Act of 1949.

(b) To ensure that the entry into the United States of milk protein products will not render or tend to render ineffective, or materially interfere with, the dairy price support program conducted by the Secretary of Agriculture under the Agricultural Act of 1949, the President shall by proclamation impose, under the authority of section 22 of the Agricultural Adjustment Act (7 U.S.C. 624), a quota limiting the amount of milk protein products, including but not limited to casein, caseinates, lactalbumin, and whey protein concentrates or mixtures containing 5 per centum or more of such products, that may enter the customs territory of the United States in any calendar year after 1981. The quota so proclaimed by the President shall be in an amount equal to 50 per centum of the average of the total imports of such milk protein products into the United States during the five-year period 1977 through 1981. The proclamation shall be considered a proclamation issued by the President under section 22 of the Agricultural Adjustment Act (7 U.S.C. 624) meeting the requirements of that section.

Mr. PRESSLER. Mr. President, I shall be very brief. We do seek a rollcall vote on this amendment. So, Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? Apparently there is a sufficient second.

The yeas and nays were ordered.

Mr. PRESSLER. Mr. President, we have discussed casein at length in this body, and I shall not be lengthy.

Today I am calling up for consideration for myself Senator KASTEN and Senator PROXMIRE an amendment No. 105, to S. 884, which would place a 50-percent quota on casein imports. The reason most often given for wanting to restrict casein imports is that it interferes with the operations of the USDA dairy price support program by displacing nonfat dry milk. This is in the most part due to the rapid rise in the cost of the dairy price support program and the rise in the amount of casein imports in recent years. This year the commodity credit corporation net expenditures will rise to $2.1 billion. These large purchases also create a large problem in storage space and cost.

My amendment would both help reduce the cost of the dairy price support program and also the large surplus of Government-held dairy products. A recent USDA study completed on U.S. casein and lactalbumin imports estimated that the 152.2 million pounds of casein imported in 1980 displaced 333 million pounds of nonfat dry milk. The 333 million pounds of displaced nonfat dry milk cost the U.S. Government approximately $300 million to purchase. My amendment would restrict these imports by approximately 50 percent, thus reducing the amount of nonfat dry milk that must be purchased and reduce the cost to the Federal Government by as much as $150 million. This would substantially reduce the cost of the dairy price support program to the U.S. Government.

There are several other factors in the casein trade that also need to be addressed. The United States imports a large portion of our casein needs from countries in the European Economic Community (EEC) where casein production is subsidized. The EEC practices a policy of subsidizing exports to maintain control over domestic supplies. The EEC pays a direct subsidy to the processor for manufacture of casein products and also places an ad valorem tariff ranging from 2 to 14 percent, depending on the type of casein imported. The initiation EEC subsidy program has had a dramatic increase in exports to the United States. EEC casein exports to the United States have risen from 8 percent in 1978 to 24 percent in 1980.

The cost of milk production and casein production in the EEC and United States are nearly the same, but the EEC, through export subsidies, disposes of its excess casein and milk production in the United States. Australia and New Zealand, the other two major exporters of casein, also subsidize their dairy industry to make their products more competitive on the world market. My amendment would help to reduce the incentive for these countries to subsidize their casein exports.

My amendment would require the President to impose a section 22 quota limiting the amount of milk protein products, including casein, that can be imported by 50 percent of the average of the imports during the last 5-year period, 1977 to 1981.

Mr. President, I urge my colleagues to join me in supporting this legislation which is long overdue and which is much needed by dairy farmers and consumers of this country.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I support this amendment to impose a 50-percent import quota on casein and other milk protein products.

In March, during the Senate's consideration of S. 509, the administration's bill to eliminate the April 1 price adjustment, I cosponsored an amendment to limit casein imports. It seemed to me then, and still seems to me today, that it is grossly unfair to decry the size and cost of U.S. dairy surpluses while at the same time permitting the importation of subsidized foreign milk products that assisted greatly in the creation of those surpluses in the first place.

Despite substantial support in the Senate, the amendment was rejected, with many Senators citing the need to wait for the results of a Department of Agriculture study on the impact of casein on the dairy support program.

Well, the USDA's report has been completed and it shows that casein imports do indeed interfere with the dairy program. In fact, the report claims that the Government would save $9.3 million a year if casein imports were reduced by 50 percent. Clearly, these substantial findings point to the need to take serious action to reduce the negative effects of casein imports on our dairy program.

Now the President has asked the International Trade Commission to investigate whether casein imports should be curbed. I am happy that President

Reagan has requested this study, but Mr. President, the time for study is past, the time for action is now. The experts have studied the issue, their findings are clear—there is an impact on the dairy price support program. It is now incumbent upon the Congress to take action and order the President to impose a quota on the casein imports.

Let us review a few of the facts related to casein imports.

In 1980, the United States imported approximately 150 million pounds of casein and casein mixtures—for the period 1977 through 1980 we imported over 512 million pounds, 13,500,000 of which came from the Soviet Union—virtually all of which are used in the production of human foods and animal feeds. Despite what others may argue, in most instances a domestic milk product could be used instead of the casein.

What does this mean in practical terms?

If domestic milk products had been used—for instance, nonfat dry milk, in 1980, instead of the imported casein, the Federal Government could have saved almost one-third of a billion dollars ($329,000,000), since the Commodity Credit Corporation (CCC) pays a support price of around 94 cents a pound for nonfat milk—third of a billion dollars on this assumption.

A lot has been said on this floor during the debate on the farm bill about fairness. Fairness for this commodity, fairness for that program, and so forth. Well, what has happened to the dairy farmers of this country has not been fair. With an affirmative vote on this amendment we can take a positive step, not a negative one, to help the dairy industry and at the same time help reduce Federal spending by holding down CCC payments for nonfat dry milk.

I urge your support for this amendment.

● Mr. ROTH. Mr. President, I rise in opposition to the amendment offered by my colleague, Senator PRESSLER.

In June, following expressions of congressional concern, the U.S. Department of Agriculture completed its study of the effect of casein imports on the domestic dairy price support program. As stated by Agriculture Secretary Block, USDA found there was reason to believe that casein and lactalbumin are being imported under such conditions and in such quantities as to materially interfere with the price support program for milk. Based on this finding, President Reagan formally requested that the U.S. International Trade Commission undertake an investigation under section 22 of the Agricultural Adjustment Act to determine the facts of the case and recommend action, if necessary.

In light of this ongoing Trade Commission investigation, any action taken by Congress to restrict casein imports at this time would be highly precipitous and unnecessarily costly. I believe we should allow the International Trade Commission to complete its inquiry and report its findings before judging so complex an import issue.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The Senator from North Carolina.

Mr. HELMS. Mr. President, this amendment is quite similar to an amendment to S. 509 of last March, which is related to the semiannual price adjustment legislation. The amendment at that time was not agreed to. The vote, as I recall, was something like 60 to 38. The margin. I am confident, was predicated on the administration's promise to take action on the issue by initiating an investigation by the International Trade Commission.

President Reagan made that request on August 11, and the study is now underway.

(Mr. CHAFEE assumed the chair.)

Mr. HELMS. I think I should mention that in 1979 the ITC study on this issue requested by the House Ways and Means Committee found there was virtually no relationship between casein imports and purchases under the dairy price support program.

However, in 1981 the Department of Agriculture study noted that with a 50-percent quota on casein imports 3 million pounds of casein would be replaced by domestic skim milk solid equivalent to about 10 million pounds of nonfat dry milk. This 10 million pound increase in commercial demand for nonfat dry milk would replace CCC purchases valued at $9.3 million. Consumer expenditures would increase by almost $115 million due to this quota.

On its face, Mr. President, frankly speaking, this amendment sounds reasonable and sensible. But I think the question we must consider is can it really stand scrutiny? For my part I think we are obliged to defer, under the circumstances, to the International Trade Commission for its study and results, and I reiterate that the President has made such a request pursuant to his promise last year. The President made his request of the ITC on August 11.

Mr. President, there is absolutely no casein produced in the United States, because U.S. milk producers can get more money for their skimmed milk if they convert it into nonfat dry milk and sell it to the Government than they could if it went for casein purposes. Obviously, then, imported casein is coming into this country because U.S. producers have no demonstrable interest in the domestic casein market; or, if you want to put it a little more accurately, the Federal Government has hired them away through the price support levels for milk, at least that is the contention.

It is a little bit interesting that it is dairy interests which hope for relief from the result of their constant quest for high support levels. Casein is not produced in this country simply because the price support levels are at the level that they are.

An alternative to closing our doors to casein imports could be to make the dairy industry more competitive and responsive to consumer needs. And there are some who feel that S. 884 attempts to do this by moderating the steady increase of price support levels.

The bottom line, if I may use that cliche, Mr. President, is that this Congress ought to hear from the study requested by President Reagan on August 11 before making a final decision on this matter. The International Trade Commission will report within the next few weeks and all of us should anticipate their conclusions. But, in the meantime, this Senator believes that the amendment of my friend from South Dakota is premature.

Mr. President, I am advised that Senator DOLE wishes to address himself on this subject. He is on his way to the Chamber. To permit him an opportunity to do that, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PRESSLER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER. Madam President, I ask unanimous consent that Senator PROXMIRE be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER. Madam President, I also wish to commend Senator PROXMIRE for his outstanding work in the area of reducing casein imports.

Mr. MELCHER. Madam President, will the Senator yield?

Mr. PRESSLER. Yes.

Mr. MELCHER. Madam President, I ask unanimous consent that I be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER. I thank the Senator.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from South Dakota.

Mr. DOLE. Mr. President, I am sorry to have been absent during the explanation of the amendment. Could I ask the Senator from South Dakota what the amendment does, just briefly? As I understand it, it is in reference to casein.

Mr. PRESSLER. Yes; it limits the importation of casein. It is amendment No. 105 which places a 50-percent quota on milk protein product imports, including casein, based on the average of the total imports of such milk protein products into the United States during the 5-year period of 1977 through 1981. Thereby limiting casein imports to about 139 million pounds. Myself and Senator KASTEN from Wisconsin have made statements to that effect. I have a copy of my state-

ment going into more detail if you would like.

Mr. DOLE. Mr. President, I thank the Senator from South Dakota.

I think maybe, under different circumstances, the Senator from Kansas might be supportive of the amendment, but I would say to the distinguished Senator from South Dakota that this matter was raised back in April, as I recall, by the distinguished Senator from Montana. As a result of the efforts of the Senator from Montana and the Senator from South Dakota and other Senators from milk producing States, this Senator personally asked the President to request an investigation by the International Trade Commission. That investigation is now underway.

It would seem to me that, notwithstanding the probable merit of the amendment, we might be, in effect, sending a wrong signal to the International Trade Commission, depending on what the vote was, when they are in the process now of making that determination of whether casein imports do, in fact, adversely impact production in this country on dairy prices, or whatever.

I would hope that the Senator from South Dakota, in view of the action recommended by the Secretary of Agriculture, Secretary Block and taken by the President and in that we do have the USTC now investigating this, I would hope that we might discuss the amendment but not pursue it to a vote.

I just had an opportunity to learn that some of those who represent milk producers feel that at this time such an amendment would not be in their best interests. What they really sought in the first instance was a U.S. ITC investigation. That has now been accommodated, that has been accomplished, it is underway. It is underway because of the efforts of the Senator from South Dakota, Senator PRESSLER; the Senator from Montana, Senator MELCHER, and others, and because of the efforts made on this floor by the distinguished majority leader, Senator BAKER, the Senator from Kansas, and others.

I know how strongly the Senator from South Dakota feels about the problem, but I would hope that we might work out something other than having another vote on this during the consideration of the merits by the International Trade Commission. Is there any possibility of working that out?

Mr. PRESSLER. Mr. President, there have been two studies on this matter already. The evidence that I have indicates quite clearly that we could save money by placing this restriction on the importation of casein.

The Department of Agriculture study indicated that casein imports displace 333 million pounds of domestically produced nonfat dry milk.

In my remarks, which I will supply to the Senator from Kansas, I pointed out that much of our competition comes from the European Economic Community, which subsidizes casein production. The United States is a good guy on the international trade bloc, but in no area is this more evident than in the international trade of dairy products. We are particularly generous to Europe. Casein is being imported into our country as a heavily subsidized product and we are importing it at a cost, in terms of what it costs to purchase and store surplus dairy products in our own country.

The European Economic Community pays a direct subsidy to the processor for the manufacture of casein products, and also places an ad valorem tariff ranging from 2 to 14 percent, depending upon the type of casein imported. Their subsidy program has caused a dramatic increase in exports to the United States. EEC exports to the United States rose from 8 percent in 1978 to 24 percent in 1980.

The cost of milk production and casein production in the EEC and the United States are nearly the same, but the European community, through export subsidies, disposes of its excess casein and milk production in the United States. Australia and New Zealand, the other two major exporters of casein also subsidize their dairy industry to make their products more competitive on the world market.

I agree, we need additional studies and believe they will support my point, but we also need action. I think this body should take action on this matter.

Mr. DOLE. Will the Senator yield at that point? I know the distinguished majority leader is here. I want to make one more point before yielding to him.

I have not checked, but the International Trade Commission is now in the process of the investigation. There are going to be hearings between now and November, I think. They are going to report their findings in January. It would seem to me that the best course to follow would be for those of us who are concerned about the casein problem to appear before the International Trade Commission whatever evidence or testimony we might want to provide and make the case that the Senator from South Dakota so strongly urges here today to the International Trade Commission.

Again, I repeat it was the persuasion, I think, of the majority leader, the President, and others to ask for this investigation, and it is in progress right now.

Mr. BAKER. Mr. President, if the Senator will yield to me, I think the Senator from South Dakota has already done a great deal in this field and indeed was directly responsible for the situation which the Senator from Kansas has described. I remember very vividly that as he offered this amendment, or a similar amendment on a previous occasion, I took the opportunity to leave the floor of the Senate and to talk directly with the White House about the possibility of an ITC inquiry, which had not then been supported by the Department of Agriculture. That position was reversed. Indeed, the President authorized me to say, which I did say on the floor of the Senate. that the administration would support and ask for an ITC inquiry.

The Senator from Kansas correctly recites that that inquiry is presently underway. The Senator from South Dakota is directly responsible for that, primarily responsible for it, virtually entirely responsible for it. But I would hope that the Senator from South Dakota would consider permitting that inquiry to run its course before the Senate is asked to again turn its attention to this issue.

The Senator from South Dakota, of course, is entitled to ask for a yea and nay vote on his amendment, but I would ask him to consider that it would have the effect of predetermining that issue while the proceedings that he is responsible for, in large measure, are continuing to completion.

Could I inquire of the Senator from South Dakota if he wishes to pursue the matter to a rollcall vote or if he would be willing to forego that at this time and wait for the results of the ITC proceedings?

Mr. PRESSLER. First, let me thank the majority leader and the Senator from Kansas for their kind comments. I appreciate the courtesies.

The ITC study would be completed in January and any action they recommend may not become effective for several months. Certainly, we do not know the outcome of that study but all indications are that the outcome would sustain the USDA findings. If the study indicates otherwise, we can certainly revise our actions here today.

I have three cosponsors on the amendment, the two Senators from Wisconsin and my colleague from Montana, and I have obtained the yeas and nays. It is my present intention to go forward with a rollcall vote. I fully understand your feelings, but at this point I intend to go forward with a rollcall vote.

Mr. BAKER. Mr. President, the Senator from Kansas had the floor and I ask him to yield to me so I can propound a unanimous-consent request, not in respect to this amendment but with regard to further business.

Mr. DOLE. Can I ask the Senator from South Dakota if he would be willing to set aside his amendment temporarily and permit us to go to other amendments which may be acceptable? Then I would be happy to yield.

Mr. PRESSLER. I thank my colleague from Kansas. However, I do have cosponsors on this amendment and we are determined to go forward with a rollcall vote.

Mr. DOLE. I yield to the majority leader.

REQUEST FOR TIME LIMITATION AGREEMENT

Mr. BAKER. Mr. President, earlier today I indicated that later in the afternoon I would like to propound a unanimous-consent request to try to establish a time certain for final passage on this bill and limit debate on amendments.

I have an agreement that I would like to pose at this time. I must say in all candor that I am not at all certain that it will be agreed to, but I would like to ask the Senate to give serious consideration to this agreement which appears to represent the best composite request that can be presented at this time with any chance of succeeding.

I observe that the minority leader is on the floor, the managers for both sides of the bill are on the floor, and those who have special interests in certain

amendments are represented here. I believe this is a good time to make the request.

Mr. President, I ask unanimous consent that at not later than 12 midnight this evening the Senate proceed to a vote on final passage of S. 884; that debate on the bill be limited to 2 hours to be equally divided; that the debate on a Hatfield amendment dealing with tobacco be limited to 1 hour equally divided; that debate on Eagleton unprinted amendments similar to those numbered 528 and 529, also dealing with tobacco, be limited to 1 hour equally divided each; that debate on the Lugar amendment dealing with target prices be limited to 1 hour equally divided; that debate on all other first- and second-degree amendments be limited to 30 minutes equally divided, and debate on any debatable motion, point of order or appeal, if submitted, be limited to 10 minutes equally divided.

I further ask unanimous consent that this agreement be in the usual form as to germaneness and the allocation of time.

The PRESIDING OFFICER. Are there objections?

Mr. MELCHER. I object.

Mr. GRASSLEY. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The objection is heard.

Mr. BAKER. Mr. President, before an objection is lodged against the amendment, I wonder if the Senator will withhold that objection, at least until we can gather up some ideas on what further conditions might be addressed and how we might improve the chances of doing this on a subsequent request.

Mr. President, I said at the beginning that I am not certain by any means that we would get this one, but I really did not plan to have my neck cut off that quickly. I wonder if the Senator would withhold his objection until some other Members may be reached on this.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Reserving the right to object, Mr. President, the distinguished majority leader has a very difficult task. I know it is very difficult for him to approach us at quarter to 5 and say, "Can we vote in 7¼ hours on passage?"

My concern with this request at this time is that I understand the tobacco debate and I understand the need for us to have sufficient time for that debate to evolve. Going beyond that, there are a number of points in the bill that deal with commodities other than tobacco that have not been clearly outlined as to what might be the final package. We do not know, for instance, whether Senator LUGAR has another amendment that will knock out the target prices on wheat. We do not know what Secretary Block and Secretary Lyng might be proposing as another little nickle-and-dime amendment in the final package. So, while I hope that a time agreement can be arrived at, I think we need some clarification on what the final package will be in terms of other commodities. I do not think that is very clear, right at this particular time, this afternoon.

Mr. BAKER. Mr. President, I thank the Senator. I make this inquiry of my colleague and friend, the minority leader.

Mr. President, a number of items have been identified by the distinguished Senator. I do not know any way to approach that except to try to take an inventory of amendments that still remain. I am prepared to do that on my side of the aisle. I do not wish to take the time of the Senate for debate to do it on the floor.

I wonder if the distinguished minority leader would be inclined to try to get a similiar list from Members on his side and then we could go amendment by amendment to see if we can get some kind of time arrangement.

Mr. ROBERT C. BYRD. Mr. President, we shall endeavor on this side of the aisle to ascertain the number of amendments, the identity thereof, and the content thereof, and have that back to the majority leader.

Mr. BAKER. I am most grateful to the minority leader, Mr. President. I shall do that on this side. Then approximately at 6, maybe we can present another unanimous-consent request. At this time, since it is clear that there will be an objection from either Senator MELCHER or other Senators, there will be no particular purpose in offering that request at this time, so I withdraw it.

I thank the Senator from Kansas for yielding at this time.

AMENDMENT NO. 105

Mr. HUDDLESTON. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from South Dakota.

Mr. HUDDLESTON. Mr. President, I have been one who has supported the general thrust of the amendment by the distinguished Senator from South Dakota on previous occasions. I believe very strongly that it is an area which needs to be addressed. Certainly, in view of action that has been taken relating to the dairy program in the country, the urgency may be even greater now than in the past. However, I am constrained to agree with my distinguished chairman of the committee and with the Senator from Kansas that this just does not seem to be the right time to make this particular move. I think that prudence dictates that we do delay this action until the proper time. It can be addressed then.

I think there is some serious question within the industry itself as to whether or not this ought to be done at this particular time. Therefore, Mr. President, I move to lay on the table the amendment of the Senator from South Dakota. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from South Dakota.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), and the Senator from Texas (Mr. TOWER), are necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. STAFFORD), would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY) and the Senator from California (Mr. CRANSTON), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 60, nays 35, as follows:

[Rollcall Vote No. 261 Leg.]

YEAS—60

| | | |
|---|---|---|
| Armstrong | Gorton | Moynihan |
| Baker | Hatch | Nickles |
| Bentsen | Hatfield | Nunn |
| Biden | Hawkins | Packwood |
| Byrd, Harry F., Jr. | Hayakawa | Pell |
| Chafee | Heinz | Percy |
| Chiles | Helms | Quayle |
| Cochran | Hollings | Roth |
| Cohen | Huddleston | Rudman |
| Danforth | Humphrey | Schmitt |
| DeConcini | Inouye | Simpson |
| Denton | Jepsen | Stennis |
| Dixon | Johnston | Stevens |
| Dole | Kassebaum | Thurmond |
| Domenici | Kennedy | Tsongas |

NOT VOTING—5

| | | |
|---|---|---|
| Bradley | Murkowski | Tower |
| Cranston | Stafford | |

So the motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I yield to the Senator from Idaho.

## ANTITRUST EXEMPTION IN ENERGY LEGISLATION

Mr. McCLURE. Mr. President, I thank the Senator for yielding to me.

The Senator from Ohio (Mr. METZENBAUM) and I have been in discussion, along with the distinguished chairman of the Judiciary Committee, Senator THURMOND, with respect to the consideration of the extension of the antitrust exemption in energy legislation.

The legislation pending would extend that period, that exemption, for 4 years.

The Senator from Ohio and I have agreed that we would have a limited extension until the end of March of 1982 in order that the Committee on Energy and Natural Resources could consider the matter further.

The antitrust jurisdiction, of course, lies in the Judiciary Committee, but the primary jurisdiction of the matter of the International Energy Agency lies with the Committee on Energy and Natural Resources.

Mr. METZENBAUM. Mr. President, may we have order? I cannot hear the Senator from Idaho.

The PRESIDING OFFICER (Mr. JEPSEN). The Senate will be in order.

Mr. METZENBAUM. I thank the Chair.

Mr. McCLURE. It is not my intention as the chairman of the Energy and Natural Resources Committee, nor is it my understanding that the Senator from South Carolina, the chairman of the Judiciary Committee desires at this time to settle the jurisdictional question with respect to the antitrust exemption.

The matter has been within the Energy and Natural Resources Committee, and it is our expectation that if this accommodation can be reached now, that without settling that jurisdictional question the matter would be subject to the primary jurisdiction of the Energy and Natural Resources Committee next spring on the further extension, but we would agree to a sequential referral of the matter for a short period of time to the Committee on the Judiciary for their consideration of the antitrust implications.

In that way we can extend that period, which otherwise would expire at the end of this month, and let the matter be disposed of in perhaps a more extended and a little less contentious manner with respect to jurisdiction, just simply by agreement of the parties involved.

I ask the Senator from Ohio if I have stated that correctly, and if it has his agreement?

Mr. METZENBAUM. I am quite certain the Senator from Idaho has. Let me, however, be certain in order to clarify my own mind. The pending measure, when it is brought up, will be an extension only until April 1, 1982?

Mr. McCLURE. The Senator is correct.

Mr. METZENBAUM. Two, at the earliest possible date, and as promptly as possible, there will be hearings in the Energy and Natural Resources Committee concerning the efficacy of U.S. participation in the IEA?

Mr. McCLURE. The Senator is correct.

Mr. METZENBAUM. Three, at the very earliest possible date the Senator from Idaho will offer more permanent legislation that the administration and he desire, and that that would not be offered at the very last minute prior to April 1, 1982, but would be offered early and that there would be adequate time for referral to the Judiciary Committee so that it might have a number of days in which to consider the antitrust aspects of the legislation?

I think we have covered the point that the Energy and Natural Resources Committee will promptly hold oversight hearings on this subject, that being within the next several weeks or months.

Mr. McCLURE. That is correct. It is my intention to do that, and it would be my expectation, with this understanding and agreement, that we could then proceed to the temporary extension within the next few days here on the floor of the Senate.

Mr. METZENBAUM. That is my understanding, but I would like to be certain that the chairman of the Judiciary Committee would be satisfied with the arrangement, since I know that it is the view of the chairman of the Judiciary Committee that the antitrust aspect of this legislation properly belongs to the jurisdiction of the Judiciary Committee, and I ask the chairman of the Judiciary Committee if he cares to respond.

Mr. THURMOND. Mr. President, I think it is clear that the bill, which has been referred to, has its primary jurisdiction in the Energy and Natural Resources Committee.

I think it is also clear that if it does have antitrust implications, and that being the case, it would be subject to a sequential referral to the Judiciary Committee for a reasonable time. I think the arrangement worked out here is reasonable. I do want to say this though: I think some Members of the Senate have the opinion that wherever a bill goes primarily, where the jurisdiction is to a certain committee primarily, that it is not necessary then to refer it if it has antitrust implications to the Judiciary Committee.

I want to make it clear that the Judiciary Committee has a responsibility to protect the people of this country in matters of that nature. We have imposed upon us the responsibility to look out for the public, and I shall not hesitate, and I put Senators on notice, to request the Judiciary Committee to hear certain matters where antitrust questions are involved that deeply concern the public.

This bill, I think, has been handled in a very nice way. I commend the able Senator from Idaho and the distinguished Senator from Ohio for the arrangement here which they are willing to make and, as chairman of the Judiciary Committee, it meets my approval.

Mr. METZENBAUM. Under those circumstances, it would be my understanding that at some mutually convenient time the bill will be scheduled, probably for next Tuesday. Is that the understanding of the Senator?

Mr. BAKER. It is clear to me. It is the intention of the leadership on this side to attempt to lay this matter before the Senate next Tuesday. Of course, I am sure both sides would want to go through their clearance process in advance, but it would be my present intention to try to proceed to this matter on Tuesday of next week.

Mr. METZENBAUM. I think that would be a satisfactory procedure. The Senator from Ohio does expect to address the issue, but not in an effort to defeat the measure. Rather it is to raise some of the concerns I have. I guess I might need as much as a half hour for that purpose.

Mr. BAKER. Mr. President, I would propose then either tomorrow or Monday to see if we can arrange a time agreement, a generous allocation of time available to the Senator from Ohio and, perhaps, for a time certain to take up the bill on Tuesday. I hope my friend, the minority leader, will explore that possibility and, perhaps, tomorrow we can finalize that arrangement.

Mr. METZENBAUM. I might also advise the majority leader that although I intend to address the issue, I do not intend to ask for a rollcall vote, it being my opinion that there probably will be very few negative votes on this measure. I do not intend to vote against it.

Mr. McCLURE. I thank the Senator from Ohio and the distinguished chairman of the Judiciary Committee.

The issue of joint or sequential referrals is always a troublesome matter, and I hope we can always accommodate it by mutual agreement, as we have in this instance, and without necessarily getting ourselves put into the straitjacket in future years on similar matters.

I thank the Senator from North Carolina for yielding.

---

## AGRICULTURE AND FOOD ACT OF 1981

The Senate continued with the consideration of the bill (S. 884).

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Chair. The distinguished Senator from Missouri has an item which he feels can be handled in short order, and I yield to him.

The PRESIDING OFFICER. The Chair asks the Senator from North Carolina to defer for a second. The Chair would like to list the Senators in the order in which they have asked for recognition, and if there is no objection to it, is that all right with the Senator from North Carolina?

Mr. HELMS. That is all right. We are just trying to get noncontroversial matters out of the way.

The PRESIDING OFFICER. The Chair understands that the Chair will recognize the following Senators in this order: Senator EAGLETON from Missouri, Senator KASSEBAUM from Kansas, Senator ABDNOR from South Dakota, Senator KASTEN from Wisconsin, Senator DOMENICI from New Mexico, and Senator HATFIELD from Oregon, in that order.

Mr. ROBERT C. BYRD. Mr. President, what is the Chair doing, may I respectfully ask?

The PRESIDING OFFICER. Trying to help out the Senator.

Mr. ROBERT C. BYRD. What is the Chair doing to help out, may I respectfully ask?

The PRESIDING OFFICER. The chairman was given a list of names by the former occupant of the chair when he took over, and he said that this is the list of names in the order which has been asked for by way of recognition.

Mr. ROBERT C. BYRD. Mr. President, I will have to interpose an objection to this kind of procedure. Under the rule, the first Senator seeking recognition by the Chair is to be recognized. Of course,

we all know it is within the Chair's discretion as to whether or not to recognize a Senator against another Senator, and there is no appeal from the decision of the Chair in that respect.

But I strongly protest the use of a list as a means by the Chair to recognize Senators. This has been done from time to time, but I have always protested this, and I hope the Chair will follow the rules.

The PRESIDING OFFICER. The Chair thanks the distinguished Senator for his advice and counsel. It is always sage, and the Senator, in his third year in the Senate, has learned much in the last 3 seconds.

There was no agreement, and the Senator is correct, and now I will recognize the Senator from Missouri, Senator Eagleton.

Mr. BAKER. Mr. President, will the Senator from Missouri yield for just a moment?

Mr. EAGLETON. Yes.

Mr. BAKER. Mr. President, I do not mean to turn this into a major issue, but in defense of the Chair I would point out, and the distinguished minority leader would agree, I am sure, that over the years it has been the practice, if certainly not the rule nor even the precedent, official precedent, but it has been the informal practice of occupants of the Chair to keep a list of Senators who wish to be recognized in some sort of a loose sequence. So I expect that the list that the Senator found on the desk when he occupied the Chair was a continuation of that informal practice.

I agree with the minority leader that the rules clearly provide that the occupant of the Chair is bound to recognize the first Senator seeking recognition and such an informal list is simply an aid of the Chair's obligation to try to do equity among Members of the Senate.

The only reason I rise to say that is because I have great confidence in the occupant of the Chair and in his innate fairness and would point out that I am sure he was following what has been an informal practice of the Senate for many years. But I would say to the distinguished Presiding Officer that it is appropriate to recognize Senators as they present themselves for recognition and not on the basis of some hard-and-fast list that may be compiled. I thank the Senator for his effort in this respect.

Mr. ROBERT C. BYRD. Mr. President, I thank the Chair for clarifying the matter. I think he is quite correct in his clarification.

The PRESIDING OFFICER. The Chair now recognizes the Senator from Missouri.

Mr. EAGLETON. I thank the Chair.

UP AMENDMENT NO. 371

(Purpose: To authorize the Secretary of Agriculture to purchase from producers, under certain circumstances, commodities stored in bankrupt warehouses)

Mr. EAGLETON. Mr. President, I have an unprinted amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 371.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, between lines 17 and 18, insert the following new section:

BANKRUPT WAREHOUSES: AUTHORITY OF THE SECRETARY OF AGRICULTURE TO PURCHASE STORED COMMODITIES FROM PRODUCERS UNDER CERTAIN CIRCUMSTANCES

SEC. . (a) In any case in which a warehouse licensed under the United States Warehouse Act (7 U.S.C. 241 et seq.), or licensed under a State law comparable to such Act, as determined by the Secretary of Agriculture—

(1) has filed a voluntary petition in bankruptcy,

(2) has had an involuntary petition in bankruptcy filed against it, or

(3) is unable to release commodities in the possession of such warehouse because such warehouse has instituted, or has had instituted against it, under a State law proceedings relating to financial insolvency,

the Secretary of Agriculture is authorized, at the request of a producer, to purchase from such producer the quantity of any agricultural commodity stored by such producer in such warehouse if such commodity was produced by such producer and such producer has a valid warehouse receipt (or other valid document of title or ownership defined in regulations prescribed by the Secretary) for such commodity.

(b) The price which the Secretary of Agriculture shall pay any producer under subsection (a) for any agricultural commodity shall be based upon the prevailing market price for the commodity on the day on which the petition in bankruptcy referred to in subsection (a) was filed or the day on which proceedings were instituted under State law, as the case may be, minus applicable storage charges.

(c) In any case in which the Secretary of Agriculture purchases, pursuant to the authority of this section, any quantity of an agricultural commodity stored in a warehouse referred to in subsection (a) by a producer described in such subsection, the United States shall be subrogated to any right or claim that such producer or such producer's personal representative, successor, dependents, or survivors may have against such warehouse with respect to the commodity purchased by the Secretary.

(d) The Secretary of Agriculture may carry out the provisions of this section through the Commodity Credit Corporation.

(e) The Secretary of Agriculture shall issue regulations providing for the administration of this section not later than ninety days after the date of the enactment of this Act.

Mr. EAGLETON. Mr. President, the amendment before the Senate is aimed at correcting a very specific problem—a problem which has, thankfully, not plagued the whole of agriculture, but a problem, nevertheless, which has drastically affected individual farmers who are caught up in a grain warehouse bankruptcy.

The amendment I have introduced provides the Secretary of Agriculture the authority needed to use the Commodity Credit Corporation to protect farmers from economic calamity when their source of income, their grain, is removed from their control by a bankruptcy action.

The problem quite simply is this. The vast majority of our Nation's farmers do not have adequate storage facilities on their farms to handle the bulk of their production. As a result, they must take their grain to the local warehouse and contract with the warehousemen for storage space. The farmer maintains total control over the grain and, under normal circumstances, he will keep his grain in the warehouse while paying storage fees until such time as the market attains an advantageous price or, as is the case most often, until such time as he needs the cash to pay his household and business expenses.

At that point in time, when he actually sells his grain and at no other time, the ownership of and control over that grain passes from the farmer's hand. As I stated before, this is the case under normal circumstances. But, as farmers in my State learned last August and as farmers in about 23 other States have learned over the past few years, should the warehouse in which they are storing their grain go bankrupt, the farmers' free access to their grain, to their private property, to their source of income, is instantly eliminated.

Because grain is not stored in easily identifiable lots and because in some bankruptcies claims against the grain exceed the amount of grain actually held in the warehouse, the bankruptcy court will take control over all of the grain until such time as the court can make a determination as to the extent of the claims as well as to the ownership of the grain. As my colleagues might imagine, this process can last anywhere from several months to several years.

Mr. President, I firmly believe that of all those involved in such situations, the individual farmer is the most harmed. And, unfortunately, the farmer, in the vast majority of the cases, is the one individual who can least afford to be harmed.

My proposal, which would be purely discretionary authority, would, at the request of the farmer, allow the Commodity Credit Corporation to purchase a farmer's grain which is stored in a bankrupt warehouse. The price paid to the farmer would be the prevailing price which existed the day the bankruptcy action was filed. Farmers would then either keep the cash or purchase replacement grain.

Only grain stored in federally licensed and inspected warehouses or in warehouses licensed and inspected under comparable State laws would be eligible for purchase by the CCC. This would assure the quality of the warehouses in which we were providing protection.

My proposal, if implemented by the Secretary, would cost the Government very little because, as titleholder to the grain, the Government would receive payment under whatever settlement is finally achieved by the bankruptcy courts. The critical problem really is the time element—the 6-month to several-year time period during which a farmer has no access to income from his grain. A delay of any unreasonable period of time will undoubtedly cause farmers severe economic stress and might very well bankrupt the farmers involved. My amendment simply authorizes the Government to do the waiting instead of the farmer.

The USDA grain elevator task force is-

sued a report last month which proposed administrative and legislative changes that would aid farmers in warehouse bankruptcies. One of the recommendations proposed that the USDA become directly involved in the bankruptcy legal action "by the Secretary (of Agriculture) acting as trustee for the affected parties." This is precisely what my amendment will do.

Let me close my remarks by reminding my colleagues that the Senate in the reconciliation bill took action to require that the Federal warehouse licensing and inspection program be supported via a fee system rather than by appropriated funds. As I hope all of my colleagues realize, that action will clearly mean that our Nation's farmers, through higher storage payments, will be paying for a system of inspection and licensing which is clearly intended to protect producers who store their agricultural products in approved warehouses.

The farmers are paying for protection. This amendment will assure farmers that even if the inspection system fails, some semblance of protection will remain.

Mr. DOLE. Will the Senator yield?

Mr. EAGLETON. I yield to my colleague from Kansas.

Mr. DOLE. Mr. President, let me say to my colleague from Missouri that I know, as I have indicated in my previous statement, that that is where the most recent controversy has developed in new modernized grain elevators. I appreciate very much the Senator's assistance. We had our hearings before the subcommittee of the Judiciary. I have taken the liberty to add the Senator from Missouri of our amendment. I appreciate his cooperation and his willingness to help us solve the real problem, or help the farmers solve the real problem.

Mr. EAGLETON. I thank my colleague for his remarks. I know that he has given full and complete attention to this problem which affects not only the problems in Missouri but affects the problems in other States, as well, and he will continue in his various assigned duties in the Senate to give attention to this same situation.

Mr. President, I ask unanimous consent to be added as a cosponsor of the earlier Dole amendment (UP No. 368) which was agreed to, just in case the RECORD does not so show.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I might further say to the Senator from Missouri that his amendment, as I understand it, would come to the Agriculture Committee. I would be certainly willing to do whatever I can do to make certain we have explored every possibility, including the Senator's amendment.

Mr. EAGLETON. I thank my colleague.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The Senator has a right to withdraw his amendment. The amendment is withdrawn.

The Chair recognizes the Senator from Kansas.

UP AMENDMENT NO. 372

(Purpose: To establish a National Agricultural Cost of Production Standards Review Board and to give the Secretary of Agriculture greater flexibility in calculating production cost inputs)

Mrs. KASSEBAUM. Mr. President, I send to the desk an unprinted amendment on behalf of myself and Senator DOLE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Kansas (Mrs. KASSEBAUM) for herself and Mr. DOLE proposes an unprinted amendment numbered 372.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 344, between lines 3 and 4 insert a new title XVI reading as follows:

TITLE XVI—NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

ESTABLISHMENT OF BOARD

SEC. 1601. There is hereby established an advisory board to be known as the National Agricultural Cost of Production Standards Review Board (hereinafter in this title referred to as the "Board").

MEMBERSHIP OF BOARD

SEC. 1602(a). The Board shall be composed of eleven members appointed by the Secretary of Agriculture (hereinafter in this title referred to as the "Secretary"). The composition of the Board shall be as follows:

(1) A total of seven members shall be appointed who are engaged in the commercial production of one or more of the various major agricultural commodities produced in the United States. The Secretary shall assure that the major geographical production areas of the major agricultural commodities are represented.

Mrs. KASSEBAUM. Mr. President, my amendment has been agreed to by the distinguished chairman of the Agriculture Committee. I think that we would all feel that a Cost of Production Standards Review Board, which this establishes, of producers will be a valuable input to the Department of Agriculture. This also gives the Secretary of Agriculture greater flexibility in calculating production costs.

It certainly would not be the purpose of this 11 member board of producers to in any way hamper the functions of the Department of Agriculture, but, really, to assist and enhance its efforts. I believe that it will be one way which the producers can feel a followthrough with the statistics that have been traditionally gathered from the farm community.

I ask for favorable consideration of this amendment.

Mr. DOLE. Mr. President, will my colleague yield briefly?

Mrs. KASSEBAUM. I am happy to yield.

Mr. DOLE. Mr. President, I say to the most distinguished Senator from Kansas that I will hopefully be a conferee on this legislation. I have discussed this legislation with Senator KASSEBAUM and also with Congressman PAT ROBERTS, who represents probably the largest wheat producing district in America. We believe it will satisfy a need and it will provide some farmer input. I believe Senator KASSEBAUM pointed out the one area that was objectionable has been modified. I think it is now supported by the Department or not objected to, put it that way.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Carolina.

Mr. HELMS. Mr. President, it is important that the Government be able to have an indication of what is the actual cost of producing a particular crop. It is important to farmers so that they may better be in a position to plan their planting and marketing strategies.

But it is even more important for farm policy makers. The methods used by policy makers in the Department of Agriculture and in the Congress must be consistent and they must be based on real world economic facts.

As I understand this amendment, the proposed Board would have as its essential purpose the study of methods for calculating any given cost of production estimate developed by and for policy makers. The Board would not be commissioned to establish specific estimates on a particular crop at a specific time, but would help assure a realistic and consistent methodology.

Of course, those who best know what it costs to produce a crop will be the farmers themselves. This amendment assures their input into the process in a very positive and effective way. In addition, it provides additional flexibility for USDA to make the studies they now provide.

There is always a great difficulty in establishing a precise cost of production figure, and many experts warn us that there is no such thing as a specific cost of production for a particular crop. Each farmer's efficiencies—and hence his true or real costs—will be slightly different. But this amendment seeks to establish a consistent set of ground rules, and that seems essential to this Senator.

Mr. President, I am prepared to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas (Mrs. KASSEBAUM).

The amendment (UP No. 372) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair recognizes the Senator from South Dakota, Senator ABDNOR.

Mr. LEAHY. Mr. President, will the Senator from South Dakota be willing to yield for 1 minute to allow me to put in an amendment on behalf of myself and Senator JEPSEN, which I understand will be accepted?

Mr. HELMS. Mr. President, I can vouch that it will take only a minute.

Mr. ABDNOR. I yield to the Senator from Vermont.

UP AMENDMENT NO. 373

(Purpose: To authorize the Secretary of Agriculture to establish criteria in cooperation with Federal agencies and departments for the purpose of protecting prime and unique farmlands from adverse effects resulting from Federal programs)

Mr. LEAHY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Vermont (Mr. LEAHY), for himself and Mr. JEPSEN, proposes an unprinted amendment numbered 373.

Mr. LEAHY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 337, line 20, strike out "Agricultural Land" and insert in lieu thereof "Farmland".

On page 337, strike out lines 22 and 23, and insert in lieu thereof the following:

"SEC. 1535. This subtitle may be cited as the 'Farmland Protection Policy Act'.".

On page 338, beginning on line 1, through page 339, line 8, strike out the words "agricultural land" wherever they appear and insert in lieu thereof the word "farmland".

On page 339, strike out line 9 and all that follows through line 19, and insert in lieu thereof the following:

"(b) The purpose of this subtitle is to minimize the extent to which Federal programs contribute to the unnecessary and irreversible conversion of farmland to nonagricultural uses, and to assure that Federal programs are administered in a manner that, to the extent practicable, will be compatible with State, unit of local government, and private programs and policies to protect farmland.

"(c) As used in this subtitle—

"(1) the term 'farmland' includes all land defined as follows:

"(i) Prime Farmland. Prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, fiber, forage, oilseed, and other agricultural crops with minimum inputs of fuel, fertilizer, pesticides, and labor, and without intolerable soil erosion, as determined by the Secretary of Agriculture. Prime farmland includes land that possesses the above characteristics but is being used currently to produce livestock and timber. It does not include land already in or committed to urban development or water storage;

"(ii) Unique Farmland. Unique farmland is land other than prime farmland that is used for production of specific high-value food and fiber crops, as determined by the Secretary of Agriculture. It has the special combination of soil quality, location, growing season, and moisture supply needed to economically produce sustained high quality or high yields of specific crops when treated and managed according to acceptable farming methods. Examples of such crops include citrus, tree nuts, olives, cranberries, fruits, and vegetables; and

"(iii) Other Farmland. Farmland, other than prime or unique farmland, that is of statewide or local importance for the production of food, feed, fiber, forage, or oilseed or unit of local government agency or agencies, and that the Secretary of Agriculture determines should be considered as farmland crops, as determined by the appropriate State for the purposes of this subtitle.".

On page 339, line 24, strike out "and".

On page 340, line 7, strike out "plans." and insert in lieu thereof "plans; and".

On page 340, between lines 7 and 8, insert the following new paragraph:

"(4) the term 'Federal program' means those activities or responsibilities of a department, agency, independent commission, or other unit of the Federal Government that involve (i) undertaking, financing, or assisting construction or improvement projects; or (ii) acquiring, managing, or disposing of Federal lands and facilities. The term 'Federal program' does not include construction or improvement projects that on the effective date of this subtitle are beyond the planning stage and are in either the active design or construction stage.".

On page 340, strike out line 8 and all that follows through page 341, line 2, and insert in lieu thereof the following:

"FARMLAND PROTECTION POLICY

"SEC. 1537. (a) The Department of Agriculture, in cooperation with other departments, agencies, independent commissions, and other units of the Federal Government, shall develop criteria for identifying the effects of Federal programs on the conversion of farmland to nonagricultural uses.

"(b) Departments, agencies, independent commissions, and other units of the Federal Government shall use the criteria established under subsection (a) of this section to identify and take into account the adverse effects of Federal programs on the preservation of farmland; consider alternative actions, as appropriate, that could lessen such adverse effects; and assure that such Federal programs, to the extent practicable, are compatible with State, units of local government, and private programs and policies to protect farmland.".

On page 341, beginning on line 7, through pare 343, line 3, strike out the words "agricultural land" wherever they appear and insert in lieu thereof the word "farmland".

In the table of contents strike out "SEC. 1537. AGRICULTURAL LAND PROTECTION POLICY." and insert in lieu thereof "SEC. 1537. FARMLAND PROTECTION POLICY.".

Mr. LEAHY. Mr. President, I ask unanimous consent that Senator JEPSEN be shown as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, America is losing 3 million acres of agricultural land each year. One million acres of those lost are prime farmland, the remainder being range land, pasture land and forest land. The problem is equally serious in virtually every region of the country. My own State of Vermont loses 22,000 acres of agricultural land annually.

America has a large agricultural land base. But future trends in American agriculture portend substantial increases in the loss of agriculture land which threaten this vast natural resource.

I am pleased that my amendment to address this problem of farmland protection was incorporated into the 1981 farm bill. While this amendment is a beginning, it sets a direction and reflects congressional concern for this vital national resource.

The amendment I offer today provides minor adjustments in this provision which respond to suggestions made by the administration and others to clarify the intent and scope of this measure. I do want it known that my interest in this issue is broadly shared in the Senate on a bipartisan basis and in this regard I am especially pleased to have the able assistance of Senator JEPSEN who has been active in all areas of conservation. Farmland protection is important to all of us and I intend to follow up this effort with a continuing vigilance to protect and preserve America's farmland.

Mr. President, I yield back the remainder of my time.

Mr. HELMS. Mr. President, the amendment to the agricultural land protection subtitle is specifically tailored to address certain concerns within the administration that some of the provisions of S. 884 pertaining to agricultural land conversion are overly broad. On August 25, 1981, Secretary Block wrote me to express these concerns. I ask unanimous consent that a copy of his letter be printed in the RECORD. This amendment has been reviewed by committee staff and several of the Senators on tne committee—among them Senator DIXON, Senator JEPSEN, Senator LEAHY, and myself—and there is general agreement that it should be adopted.

In brief, the amendment would clarify that the thrust of the provision is to protect land that is actually being used for farming or is reasonably capable of such use. This is accomplished by substituting the word "farmland" for "agricultural land" and by defining farmland to include only prime and unique farmland plus certain other farmland of statewide or local importance that the Secretary determines should be brought within the scope of these provisions. One benefit of making this change is that the terms "prime" and "unique" farmland are already defined by the Department's regulations and are thus familiar terms to many people.

In addition, the amendment provides for the Department of Agriculture to establish "criteria" for other Federal agencies to use in evaluating whether the programs they undertake will unnecessarily cause the conversion of farmland to nonagriculutral purposes. S. 884 presently provides for the establishment of "procedures" which suggest the creation of more regulations at a time when the administration is working to reduce the number of regulations.

Finally, the amendment defines Federal programs to include those activities, such as construction projects or the disposition of Federal land, that reasonably can be expected to have an impact on the conversion of farmland. At the present time, S. 884 refers to all Federal actions, which clearly is unnecessarily broad.

All in all, Mr. President, I believe that this amendment clearly improves S. 884 and may be instrumental in assuring that the subtitle on agricultural land conversion becomes an effective tool in developing Federal programs rather than than a mere proliferation of unnecessary paperwork. For these reasons, I favor adoption of this amendment.

The PRESIDING OFFICER. The ques-

tion is on agreeing to the amendment of the Senator from Vermont (Mr. LEAHY).

The amendment (UP No. 373) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair recognizes the Senator from South Dakota (Mr. ABDNOR).

UP AMENDMENT NO. 374

(Purpose: To require a study of the adverse impact of the foreign trade policies of foreign governments on the export sales of United States agricultural commodities and products thereof)

Mr. ABDNOR. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABDNOR), for himself and Mr. DURENBERGER proposes an unprinted amendment numbered 374.

Mr. ABDNOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 245, between lines 2 and 3, insert the following new section:

STUDY OF THE TRADE POLICIES AND PRACTICES OF FOREIGN GOVERNMENTS WITH RESPECT TO UNITED STATES AGRICULTURAL COMMODITIES

SEC. 1205. The Secretary of Agriculture shall conduct a study of the policies and practices of foreign governments, including governments of the European Economic Community, which adversely and unfairly affect export sales of United States agricultural commodities and products thereof. The Secretary shall submit a written report to the Congress, within 180 days after the date of the enactment of this Act, on the results of such study together with such recommendations for legislative and other actions as he considers necessary to protect and increase the export sales of United States agricultural commodities and products thereof and to otherwise protect the agricultural trade interests of the United States.

Mr. ABDNOR. Mr. President, I would also like to have the record show that Senator DURENBERGER is a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. Mr. President, I have discussed this amendment with Members on both sides of the aisle, and I believe they have found it quite acceptable. It is a needed amendment.

It calls for the Secretary of Agriculture to conduct a study of the policies and practices of foreign governments, including governments of the European Economic Community, which adversely and unfairly affect export sales of U.S. agricultural commodities and products thereof.

The Secretary shall submit a written report to the Congress on the study with recommendations for legislative and other actions within 180 days after enactment of this act.

Mr. President, I, for one, am not convinced that this present piece of legislation which we are working on is going to be part of a great program for American agriculture, but we all know that the real answer to the cost-price squeeze farmers find themselves in today, is emphasis on exports. The beneficiaries of those sales are not only the farmers of America, but also the economy of the entire country.

Mr. President, the farmers want the opportunity to work in a free market, but they are hindered by unfair trade practices abroad. Mr. President, my amendment will not correct the inequities which exist in world trade today, but it will give us a firm basis upon which to base future decisions with respect to actions needed to protect our national interest.

Mr. President, I move adoption of the amendment.

Mr. HELMS. Mr. President, this is a good amendment and I commend the Senator for it. I am glad to accept it.

Mr. HUDDLESTON. We accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 374) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ABDNOR. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair recognizes the Senator from Wisconsin.

AMENDMENT NO. 534

(Purpose: To amend section 403(b) of Public Law 480 of the 83d Congress to allow for flexibility in determining the amount of reimbursement due the Commodity Credit Corporation)

Mr. KASTEN. Mr. President, I call up my amendment No. 534 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes amendment numbered 534.

Mr. KASTEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 249, between lines 15 and 16, insert the following new section:

SEC. 1313. Section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting "a price not greater than" before "the export market price".

Mr. KASTEN. Mr. President, I ask unanimous consent that Senators PROXMIRE, PRESSLER, and DURENBERGER be added as cosponsors to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, my amendment is a simple one. It will give to the Secretary of Agriculture the discretionary authority to set the value of a commodity acquired under a domestic price support program at less than the export market price currently mandated by law when used in the Public Law 480 program.

When a commodity is drawn from the Commodity Credit Corporation inventory for use in the Public Law 480, title I or title II programs, the Corporation is reimbursed for the costs of that particular commodity.

While it is difficult to assess all of the implications of this amendment, since the quantities and types of commodities held by the Corporation vary, the following cost/price relationship for nonfat dry milk may shed some light on the cost implication. The Corporation has large stocks of nonfat dry milk. At present CCC-owned milk is being distributed through the title II donations program under Public Law 480. Currently, the title II account reimburses the Corporation at a rate of 19 cents per pound; the cost of the milk to the Corporation is 95 cents per pound. The proposed fiscal year 1982 budget for title II includes 245 million pounds of milk.

Therefore, under current provisions this milk costs the title II budget $47 million. Lower rates, allowed by my amendment, would reduce the cost of this milk to the title II budget. For example, a price of 10 cents a pound would reduce the $47 million to $25 million, a saving in title II terms of $22 million. Milk is not currently programed under the title I concessional sales portion of Public Law 480; however, this is being considered and I would expect this amendment to reduce costs for any such programing in the title I budget.

Mr. President, there are countries under title I that have expressed an interest in purchasing nonfat dry milk, but have not done so because of the high purchase price relative to other commodities available. Passage of this amendment will encourage the purchase of more milk abroad.

Likewise, movement of nonfat dry milk from CCC inventory will help ease the storage burden and the associated costs. Storage costs for nonfat dry milk are currently running approximately $500 million per month and are expected to go up.

So, Mr. President, the adoption of this amendment means reducing the budget while at the same time getting nutritious milk to the people in countries that so desperately need it.

I urge the amendment be adopted.

Mr. President, I have discussed this amendment with the chairman of the committee and his staff, and it is my understanding there is no objection to the amendment.

Mr. HELMS. Mr. President, may I ask the distinguished Senator if he alluded to the budget impact of this amendment? I could not hear because of the noise in the Chamber.

Mr. KASTEN. Mr. President, there is no budgetary impact from this amendment. What it will do is to make it possible for us to export more milk, but there is no budgetary impact.

Mr. HELMS. Has the Senator discussed this with the Department of Agriculture?

Mr. KASTEN. This amendment has been discussed with a number of people in the Department of Agriculture. It is at their suggestion that I offer the amendment.

Mr. HELMS. Mr. President, I have no objection to the amendment, and I urge its adoption.

Mr. HUDDLESTON. Mr. President, we have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 534) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

AMENDMENT NO. 524, AS MODIFIED

(Purpose: To repeal Federal provisions of law establishing agricultural programs concerning the marketing of and price support for tobacco; to prohibit compacts among States for regulating tobacco production and commerce; to amend the Tobacco Inspection Act and the United States Warehouse Act to provide for the assessment of certain fees to cover the costs of inspection, licensing, and other activities carried out under those Acts; and to amend the Internal Revenue Code of 1954 to increase the tax on cigars and cigarettes)

Mr. HATFIELD. Mr. President, I call up my amendment No. 524.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes amendment numbered 524.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I modify my amendment beginning on page 9, line 11, under the subtitle Increased Tax on Cigars and Cigarettes. I modify to strike that beginning on line 11 through the remaining of the amendment on page 10. I modify my amendment to remove from it the tax provision which I think will now remove it from the point of order or charge. I send the modification to the desk.

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The modification will be stated.

The legislative clerk read as follows:

On page 9, beginning on line 11, strike all through line 16 on page 10.

The amendment, as modified, reads as follows:

On page 235, between lines 17 and 18, insert the following new sections:

"REPEAL OF PROGRAMS CONCERNING PRICE SUPPORT FOR AND THE MARKETING OF TOBACCO

"SEC. 1112. (a)(1) Section 101 of the Agricultural Act of 1949 is amended—

"(A) in the matter preceding subsection (a), by striking out 'subsections (a) to (c)' and inserting in lieu thereof 'subsections (a) and (b)';

"(B) in subsection (a), by striking out 'tobacco (except as otherwise provided herein), corn,' and inserting in lieu thereof 'corn'; and

"(C) in subsection (d)(3), by striking out ', except tobacco,' and all that follows the first semicolon.

"(2) Sections 101(c) and 106 of such Act are repealed.

"(3) Section 408(c) of such Act is amended by striking out 'tobacco,'.

"(b)(1) Section 2 of the Agricultural Adjustment Act of 1938 is amended by striking out 'tobacco,'.

"(2) Section 301(b) of such Act is amended—

"(A) by striking out 'tobacco,' in paragraph (6)(A);

"(B) by striking out the following in paragraph (7):

"'Tobacco (flue-cured), July 1–June 30;

"'Tobacco (other than flue-cured), October 1–September 30;';

"(C) by striking out 'and tobacco' in paragraph (11)(B); and

"(D) by striking out 'tobacco,' in paragraph (12).

"(3) Section 303 of such Act is amended by striking out 'rice, or tobacco,' and inserting in lieu thereof 'or rice,'.

"(4) Section 361 of such Act is amended by striking out 'tobacco,'.

"(5) The first sentence of subsection (a) and the first sentence of subsection (b) of section 371 of such Act are amended by striking out 'peanuts, or tobacco' in each sentence and inserting in lieu thereof 'or peanuts'.

"(6) Section 373 of such Act is amended—

"(A) by striking out 'peanuts, or tobacco, and' in subsection (a) and inserting in lieu thereof 'or peanuts, and';

"(B) by striking out 'peanuts, or tobacco from' in subsection (a) and inserting in lieu thereof 'or peanuts from';

"(C) by striking out 'all persons engaged in the business of redrying, prizing, or stemming tobacco for producers,' in subsection (a);

"(D) by striking out '$500;' and all that follows in the last sentence of subsection (a) and inserting in lieu thereof '$500.'; and

"(E) by striking out 'peanuts, or tobacco' in subsection (b) and inserting in lieu thereof 'or peanuts'.
